TPSS Operations & Finance Portal — User Manual

Trinetra Professional Security Services — Internal Portal

Document	User Manual
Version	1.1 (draft for review)
Applies to	Portal build `8b1d126` and later (October 2026)
Prepared	13 October 2026
Audience	Super Admin, CEO, COO / Operations, Accountant
Environment used for examples	**Sandbox** (all records are synthetic)

1. Cover page

This manual explains how to run the monthly operations of a security-services business in the TPSS portal: clients, guards, deployments, paysheets, statutory files, bank payments, client invoices, receipts, expenses and reports.

Every example uses one connected, **synthetic** business month: **Test Client 1**, **Test Employees 1–3**, September 2026. No real client, employee, bank or government data appears in this manual.

> ⚠️ **Statutory disclaimer.** This manual describes how the portal *currently* calculates PF, ESI, PT, TDS and GST. It is not legal, tax or compliance advice. The rates are built into the application and cannot be changed from the screens. Verify them against current law before you process payroll or file returns.

2. Document control and version history

Version	Date	Author	Change
0.1	12 Oct 2026	Documentation team (with Claude)	Discovery, feature inventory, role matrix
1.0	13 Oct 2026	Documentation team (with Claude)	Full manual, screenshots and findings
1.1	13 Oct 2026	Documentation team (with Claude)	Updated for the fixes to the open findings: Sites, receipt reversal, IGST, Statement TDS line, GST split, drafts excluded from reports, salary auto-fill, labelled approvals, ledger postings; new and replaced screenshots

Related documents (same folder): `FEATURE_INVENTORY.md`, `ROLE_PERMISSION_MATRIX.md`, `DEMO_PROD_DIFFERENCES.md`, `GAPS_AND_ASSUMPTIONS.md`, `DOCUMENTATION_FINDINGS.md`, `FEATURE_TRACEABILITY.md`.

3. Purpose and intended audience

This manual is for the people who run the business day to day:

Reader	Typical tasks
Super Admin	Users, roles, permissions, audit, backups, corrections (cancel / re-create)
CEO	Everything operational; approvals; company profile and masters
COO / Operations	Clients, guards, deployments, contracts, approvals
Accountant	Paysheets, invoices, receipts, expenses, statutory files, bank payments

It assumes you know your own business processes. It does not assume technical knowledge.

4. Product overview

The portal replaces spreadsheets with one system that is shared and audited:

```
Client  ──► Contract, wage rates, billing lines
   │
Employees ──► Deployment to client (shift, start date)
   │
Monthly paysheet (duties) ──► Approval ──► Bank payment file, payslips,
   │                                       PF / ESI / PT documents, ECR, ESI challan
   ▼
Client invoice (from paysheet) ──► Sent ──► Receipts ──► Paid
   │
Expenses, compliance payments ──► Ledger (Cash Book) ──► Reports
```

Main menu groups: **Overview, Masters, Employee Lifecycle, Payroll, Invoices, Finance, Reports, Expenses, Compliance, CRM, Administration**. Which groups and items you see depends on your role (chapter 9).

5. Environment and access

	Sandbox (training)	Production (live)
Address	`tpss-security-sandbox.pages.dev`	`portal.tpsssecurity.com`
Banner	Yellow **SANDBOX MODE** strip on every page	None
Document numbers	Start with `TEST-`	Normal
PDFs	Diagonal **SANDBOX** watermark	Normal
Bank payment Excel	Row "*** SANDBOX — NOT FOR REAL PAYMENT ***"	Normal

You need a user account created by a Super Admin. You receive an email invitation to set your password.

6. Demo (Sandbox) versus Production

The two environments run the **same application** but keep **completely separate data and user accounts**. The address you open decides which one you are in. There is no switch inside the app.

- Use the **sandbox** for training and trying things out. Nothing there affects real records.
- Never upload a sandbox bank file to a bank. It is marked "NOT FOR REAL PAYMENT".
- A password set in one environment does not work in the other.
- Sandbox document numbers start with `TEST-`.

Full comparison: `DEMO_PROD_DIFFERENCES.md`.

7. Login, logout and basic navigation

Sign in

1. Open the portal address.
2. Enter **Email** and **Password**, then click **Sign In** (Figure 7.1).
3. You arrive on the **Dashboard**.

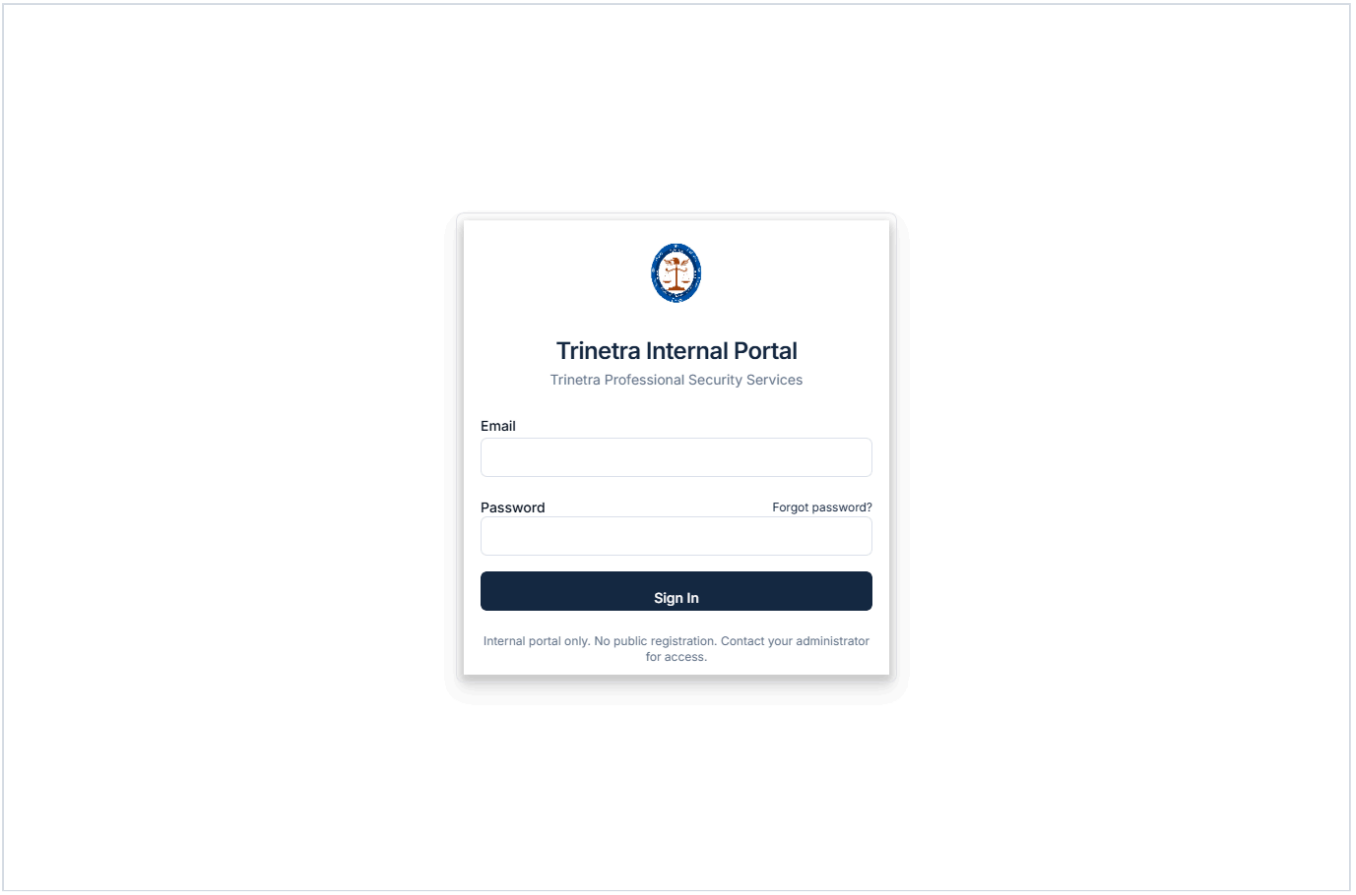

Figure 7.1 — Sign-in page

Forgot password: click **Forgot password?**, enter your email and follow the link sent to you. The new password must be at least 8 characters, and both entries must match (Figure 7.2).

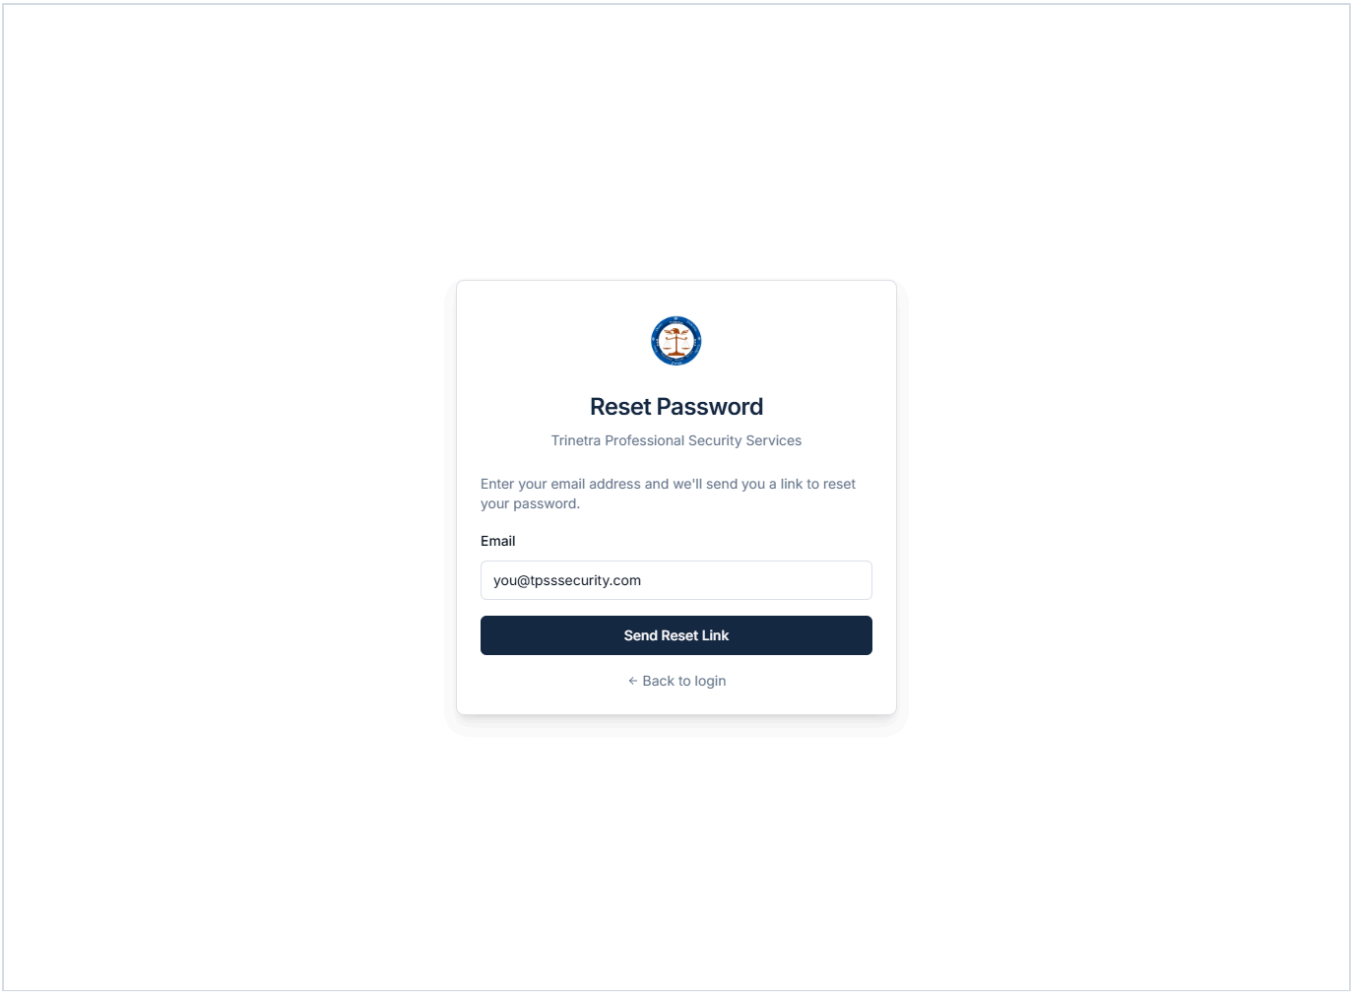

Figure 7.2 — Reset password request

The screen layout (Figure 7.3)

- **Left menu**: modules, grouped. Click ☰ (top left) to collapse or expand it.
- **Top bar**: session timer, notifications 🔔, your name and role.
- **Breadcrumb**: where you are (for example Dashboard › Masters › Clients).
- **Yellow banner**: shown only in the sandbox.

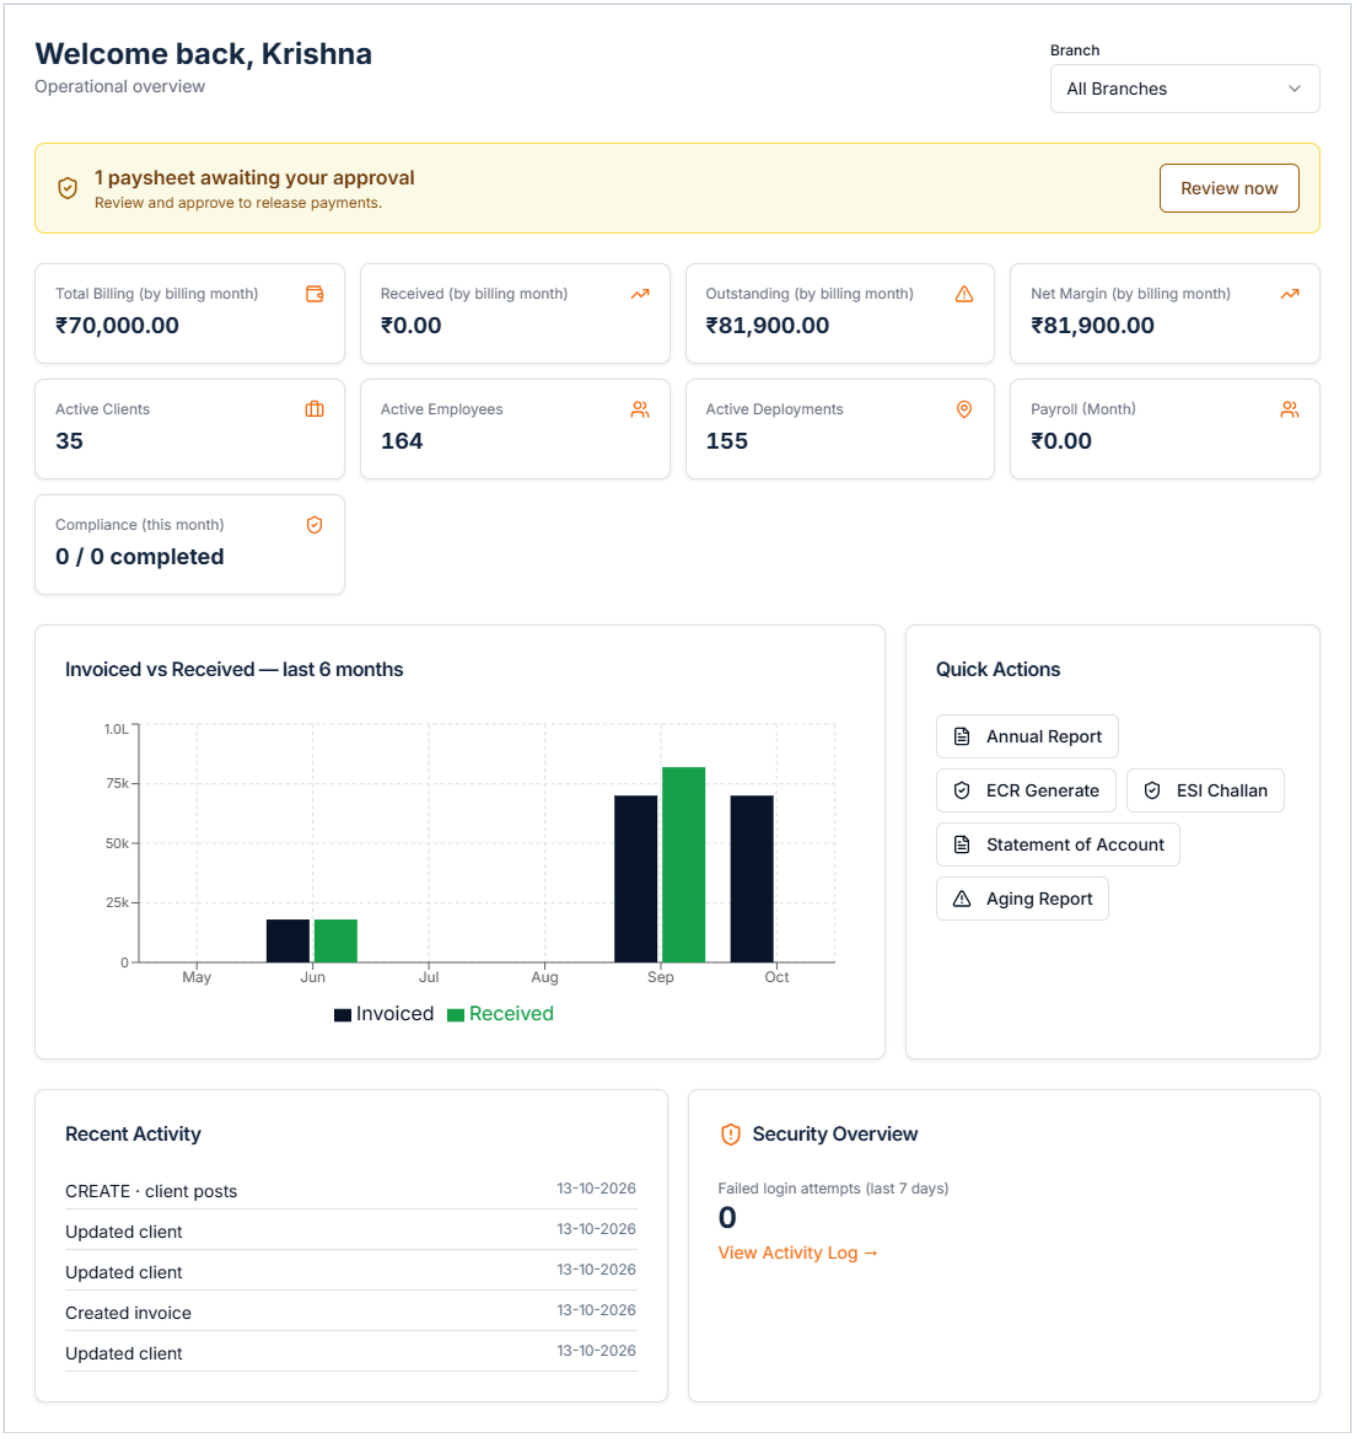

Figure 7.3 — Dashboard

Session timeout and sign-out

- You are signed out after a period of inactivity. A warning appears about 5 minutes before.
- **Signing out ends only this browser's session.** Other devices stay signed in.
- If your session is ended elsewhere (for example an administrator deactivates you), the app notices when you return to the tab and takes you to the sign-in page.

8. User administration (Super Admin)

Menu: Administration › User Management (Figure 8.1)

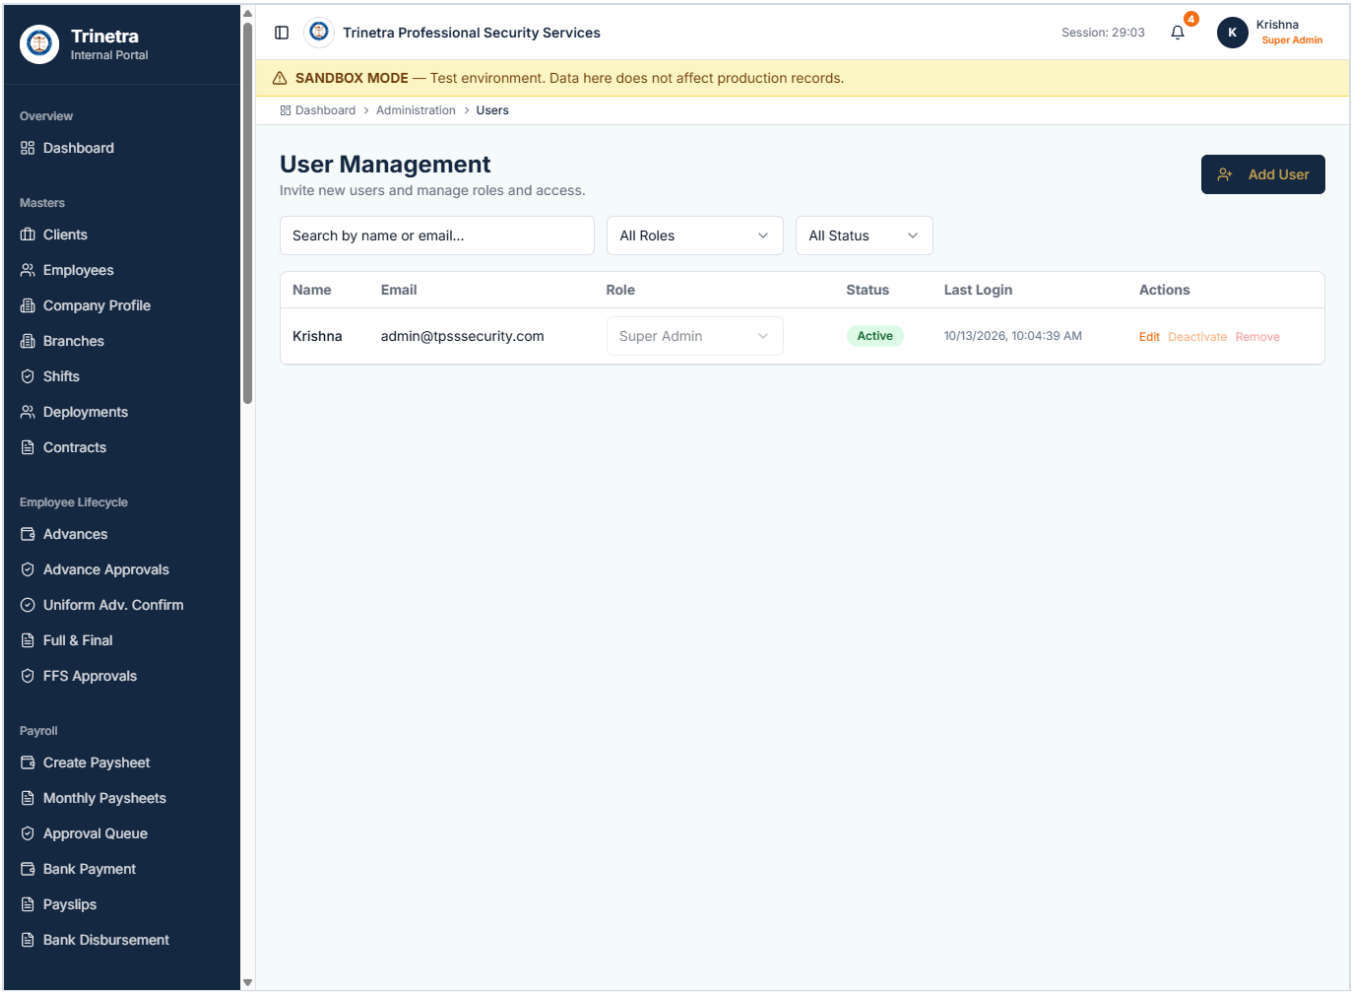

Figure 8.1 — User Management

Add a user

1. Click **Add User**.
2. Enter **Full Name***, **Email*** and **Role***. Phone is optional.
3. Click **Send Invite**. The user receives an email to set a password, and the role applies immediately.

Field	Mandatory	Notes
Full Name	Yes	Shown across the app
Email	Yes	Must not already belong to a user ("A user with the email … already exists")
Role	Yes	Super Admin, CEO, COO / Operations or Accountant
Phone	No	

Edit, change role, deactivate, remove

- **Edit** changes the name and phone.
- The **Role** dropdown on a row changes the role after you confirm. This takes effect immediately.

- **Deactivate** blocks sign-in ("Account deactivated"). **Remove** hides the user.

> ℹ️ **The last active Super Admin is protected.** The app refuses to demote, deactivate or remove them, and you cannot change your own row, so there is always someone who can manage users.

Common errors: "Your session has expired. Please sign out and sign in again" (see chapter 7); "already exists" (use another email).

9. Roles and access control

Role	Summary
Super Admin	Everything, plus: user management, role permissions, audit and activity logs, backups, cancel and re-create of invoices and paysheets
CEO	All business functions and approvals; company profile, expense categories, branches, TPSS bank accounts, branch summary
COO / Operations	Clients, employees, deployments, contracts, shifts, branches; approves paysheets, advances, FFS and expenses
Accountant	Creates paysheets, invoices, receipts, expenses, advances and FFS; bank payments, payslips, statutory documents. Cannot approve

Key rules enforced by the system:

- A COO cannot approve a paysheet, advance or FFS **they submitted**. The CEO and Super Admin can.
- Nobody except the CEO and Super Admin can approve an **expense they recorded**.
- Only the Super Admin can **cancel or re-create** invoices and paysheets.

Role Permissions screen (Administration › Role Permissions, Figure 9.1): a grid of View / Create / Edit / Delete / Approve / Export per role and screen.

> ℹ️ This grid only affects Dashboard, Clients, Employees, Payroll, Compliance, Expenses and CRM. The other menus follow fixed rules (table above).

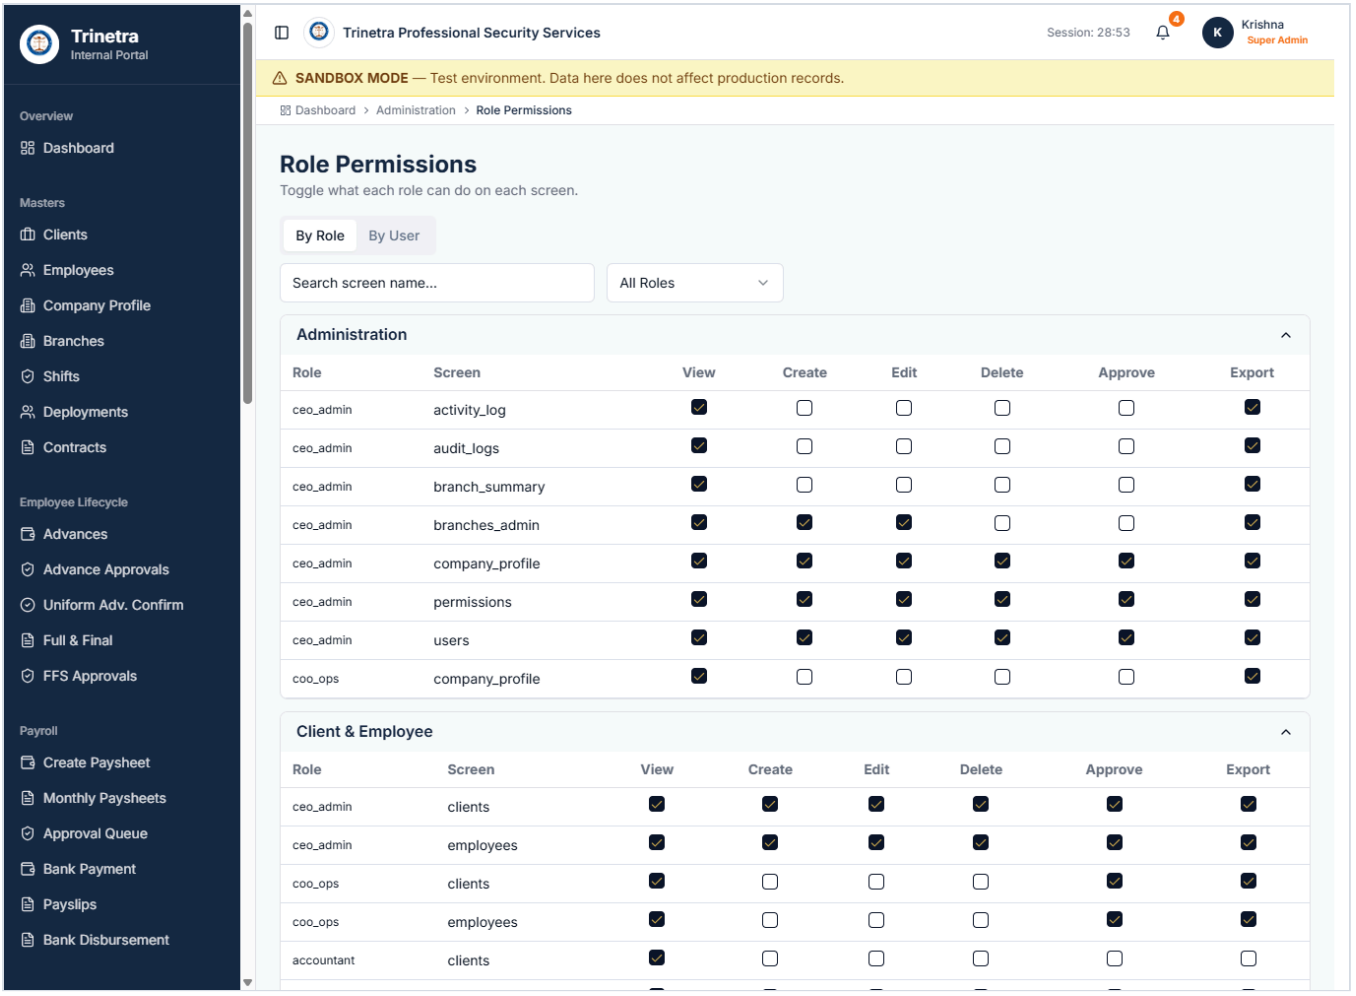

Figure 9.1 — Role Permissions

Full detail: `ROLE_PERMISSION_MATRIX.md`.

10. Initial configuration and master data

Set these up once, in this order, before monthly work:

Step	Menu	Who	Purpose
1	Masters › Company Profile	CEO	Company name, PAN, GSTIN, PF/ESI codes, bank, logo, **invoice location code**. These print on invoices and documents
2	Administration › Branches Management	CEO	Your offices (for example Nellore)
3	Masters › Shifts	CEO / COO	Shift name, code, times, hours, branch
4	Administration › Expense Categories	CEO	Expense heads and their ledger mapping
5	Administration › TPSS Bank Accounts	CEO	The company accounts that salaries are paid **from**. The IFSC must be 11 characters in the format `AAAA0XXXXXX`

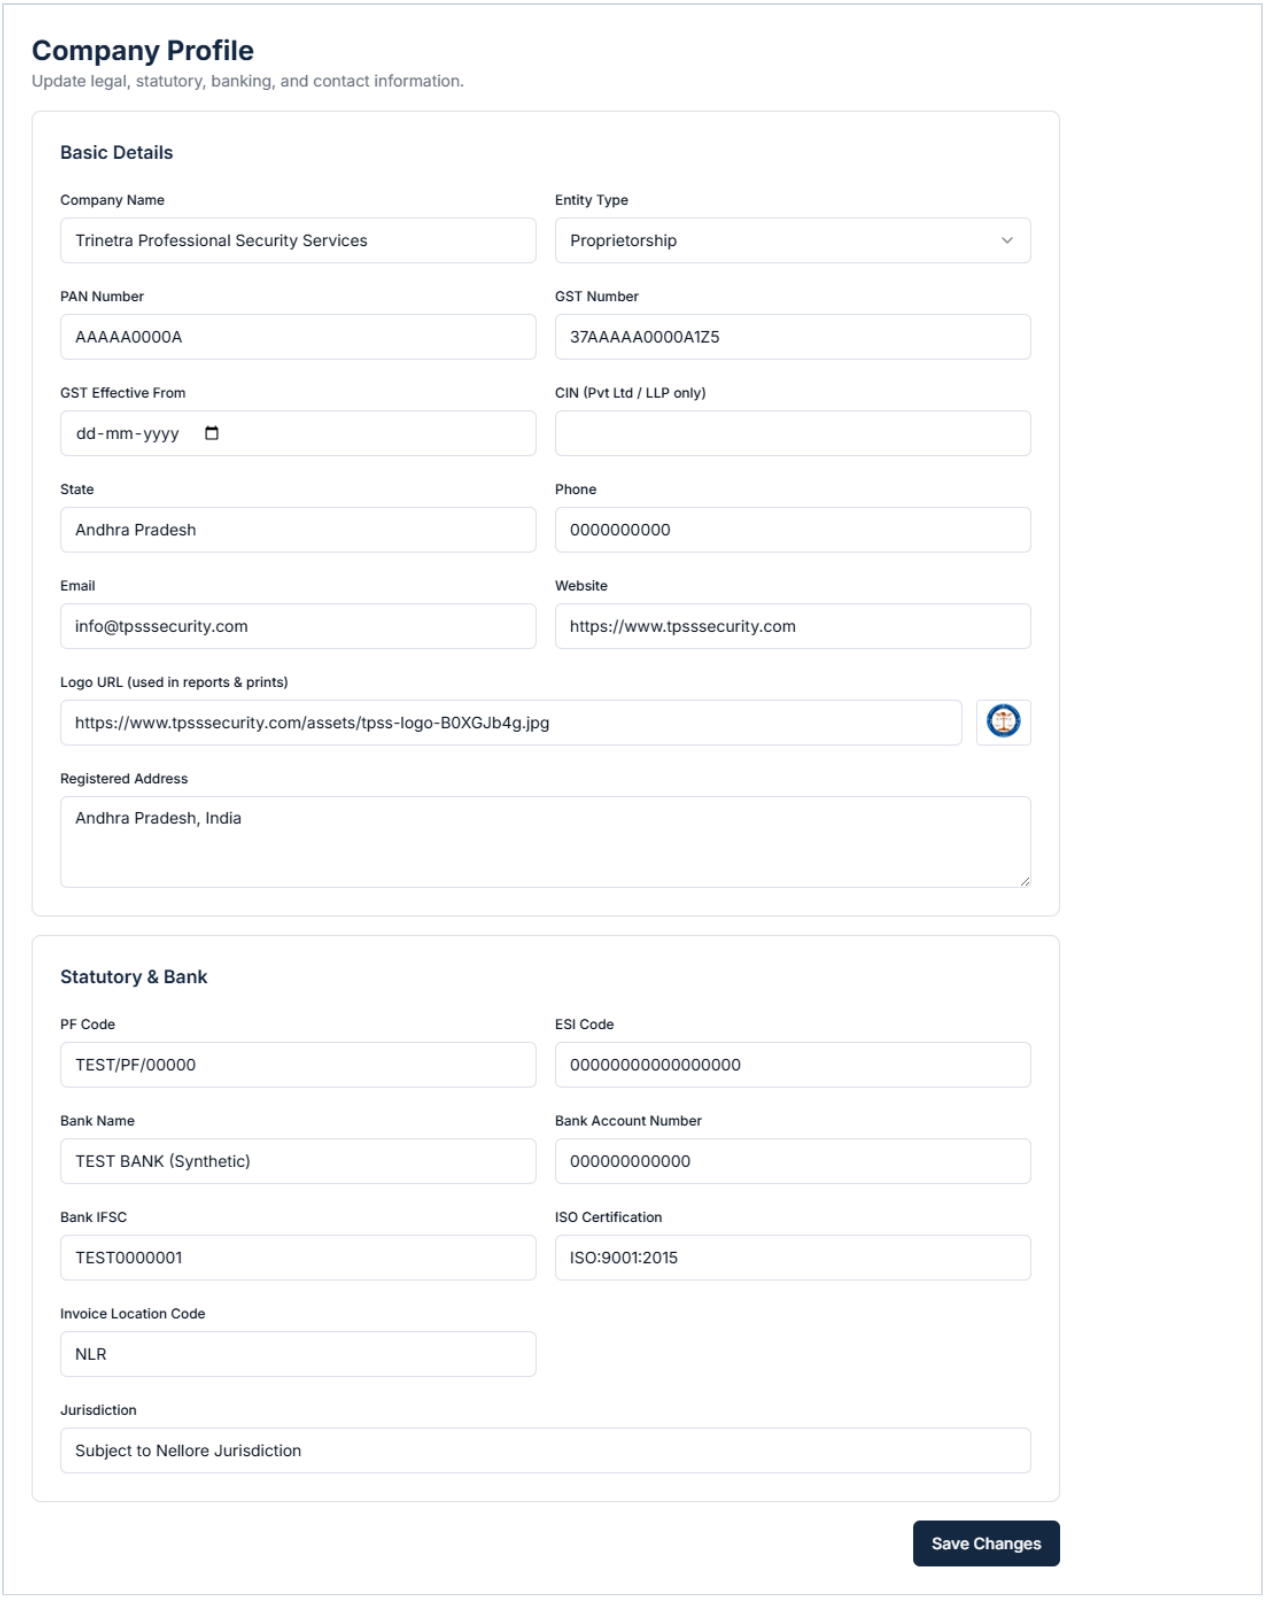

Figure 10.1 — Company Profile (sandbox filled with obviously fake GSTIN, PAN, PF / ESI codes and bank; empty fields print "—" on invoices)

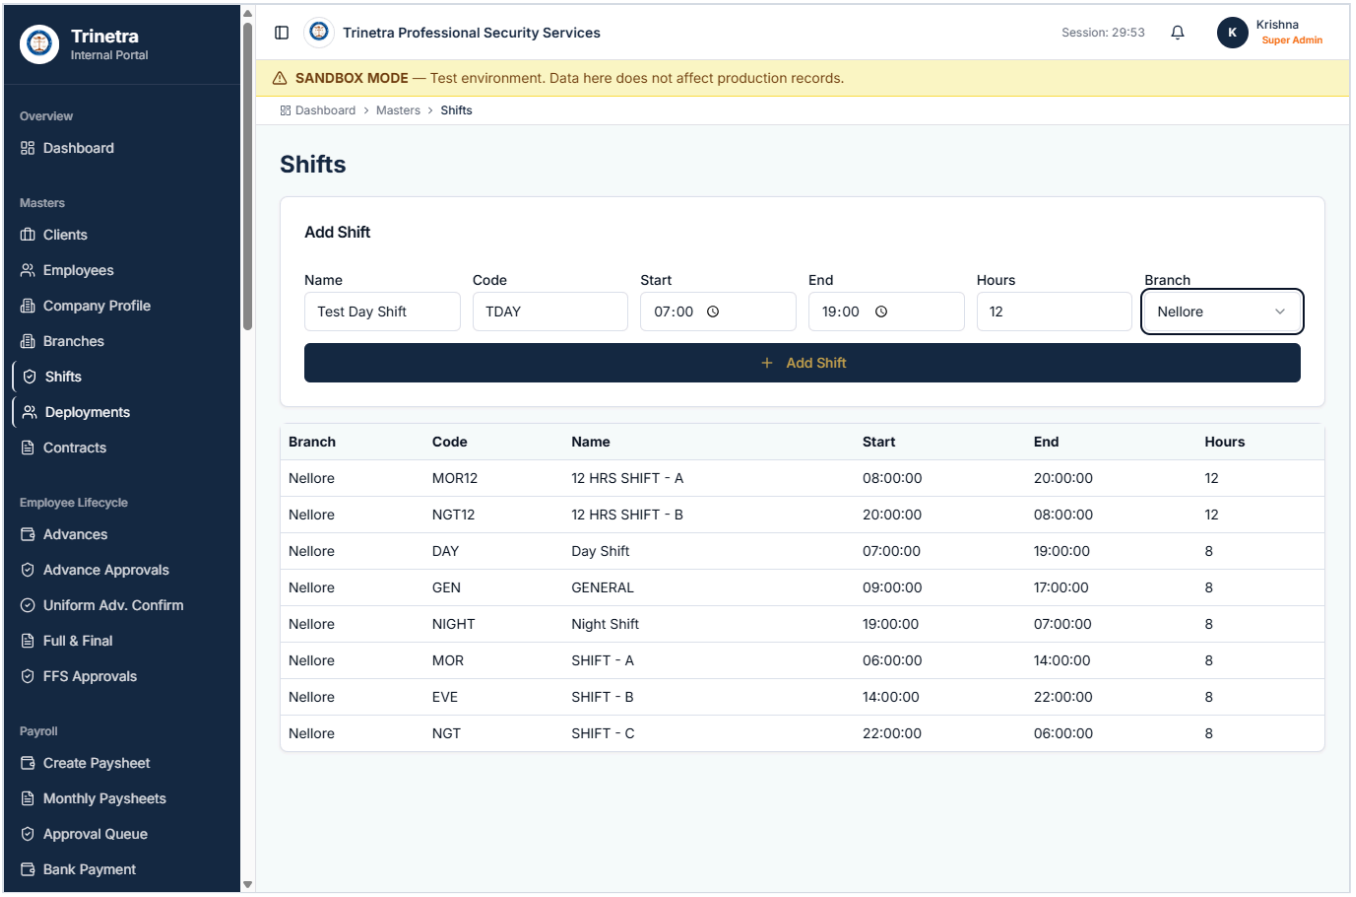

Figure 10.2 — Masters › Shifts: adding "Test Day Shift"

Shift rules: Name and Branch are required ("Name and branch required", Figure 10.3). Times default to 07:00–19:00, 8 hours.

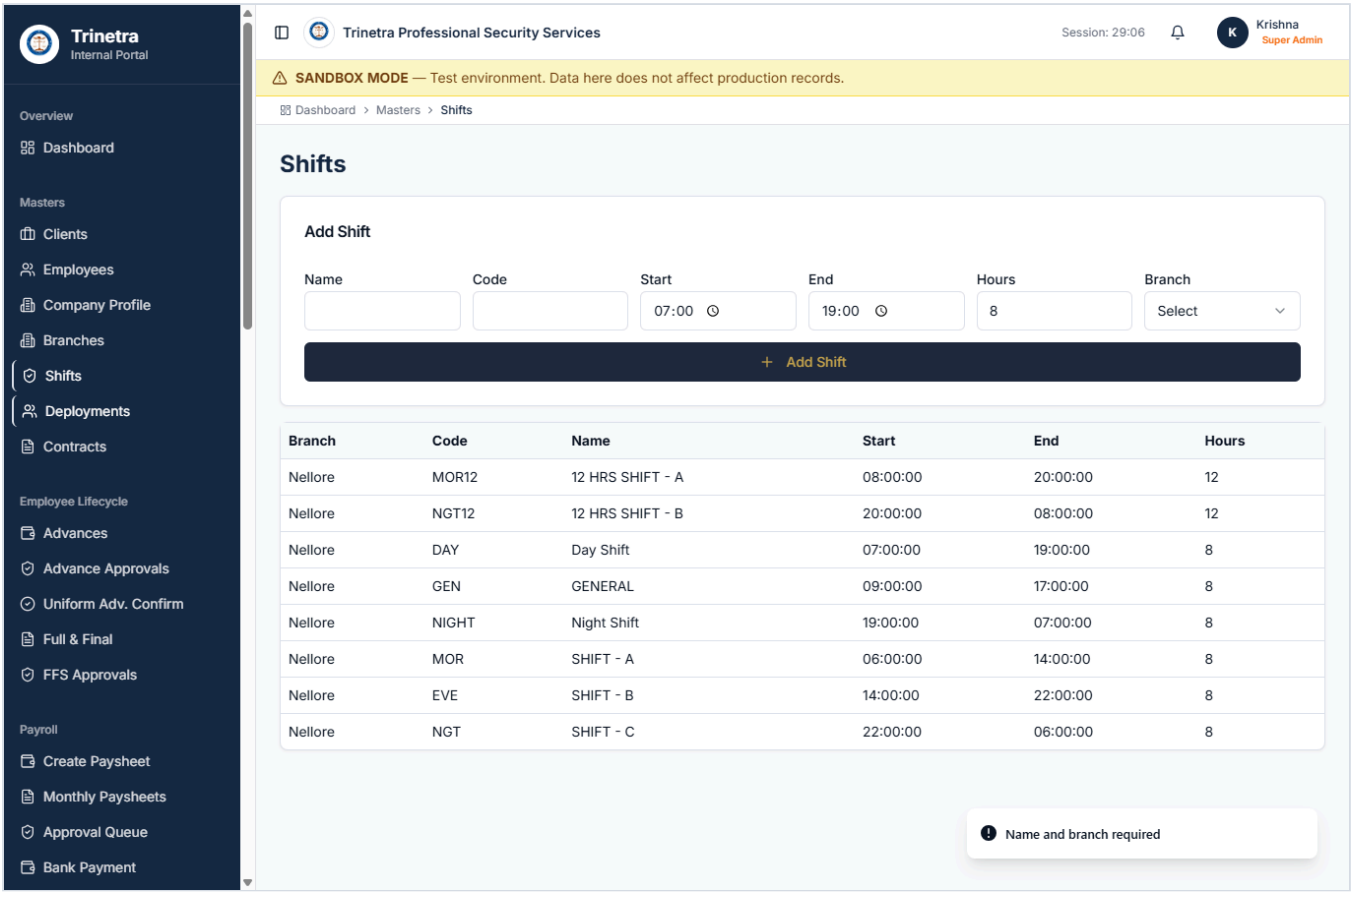

Figure 10.3 — Shift validation message

Other setup screens: Figures 10.4–10.6.

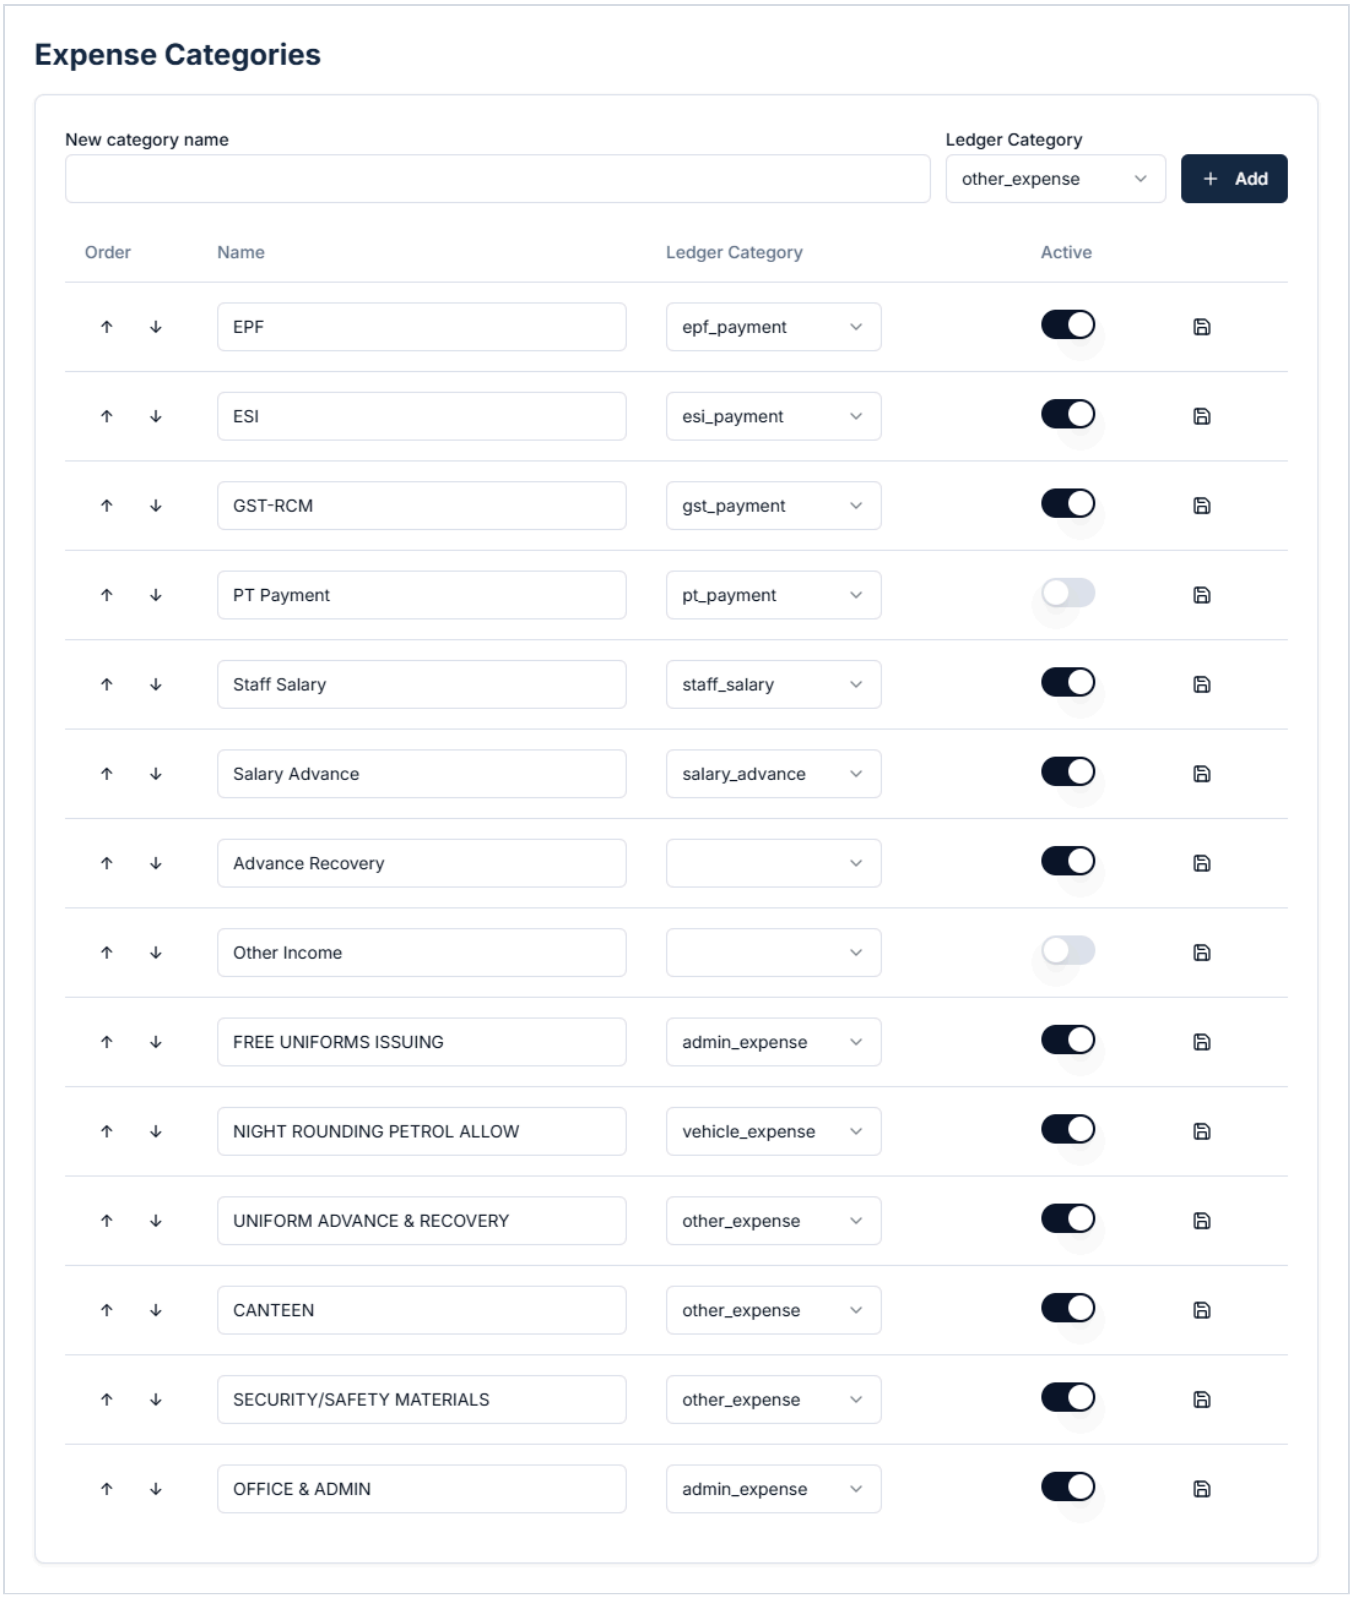

Figure 10.4 — Expense Categories

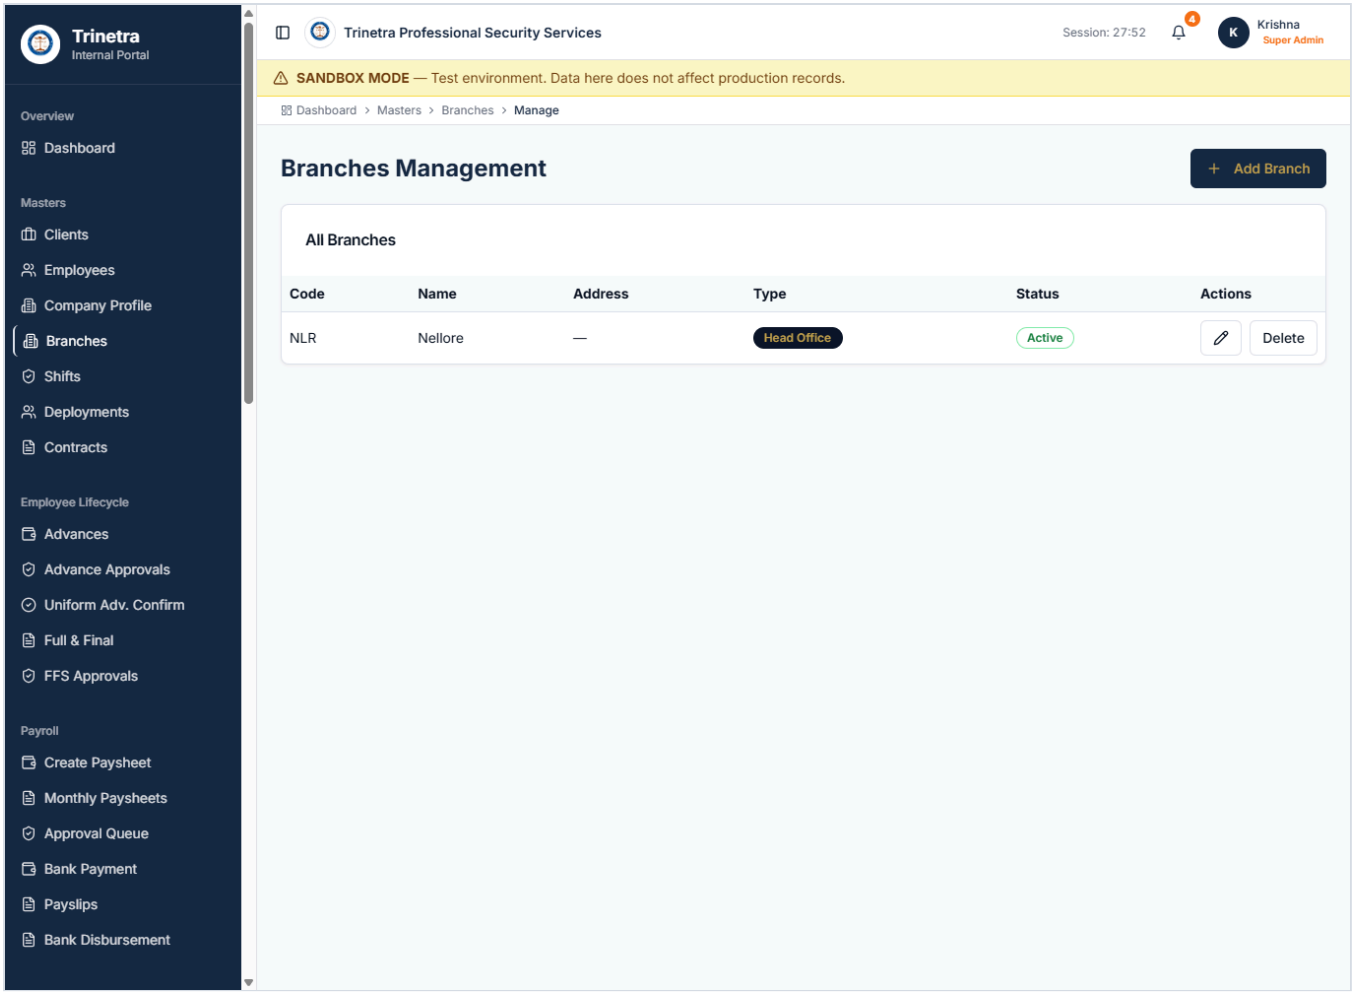

Figure 10.5 — Branches Management (a branch cannot be deleted while clients or employees are linked)

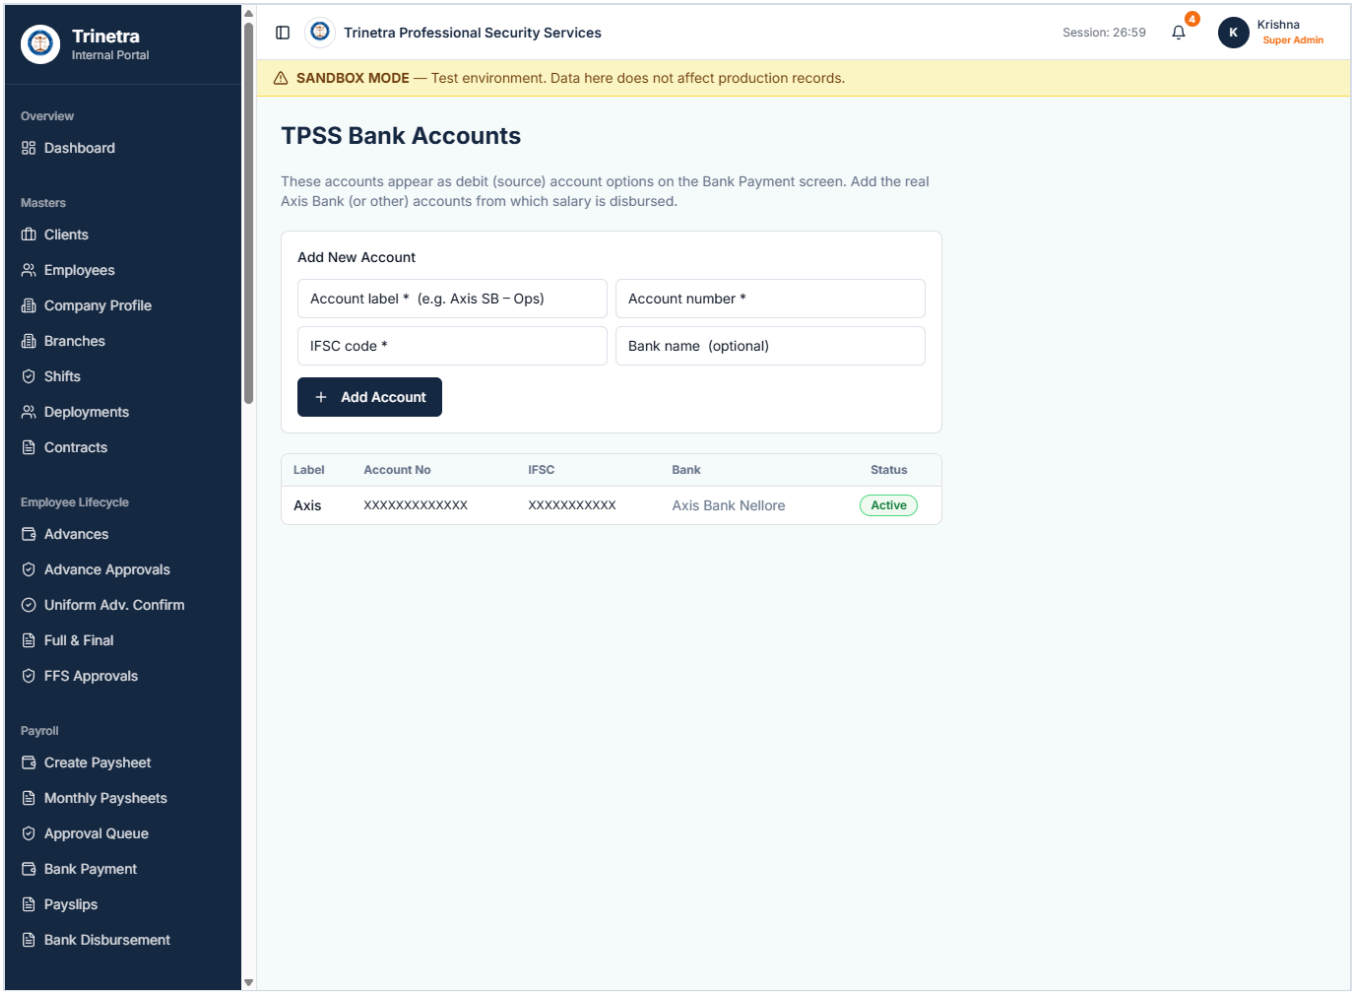

Figure 10.6 — TPSS Bank Accounts (account details masked in this manual)

11. Client / company management

Menu: Masters › Clients → **Add Client** (Figure 11.1)

Purpose: a client record holds everything used later for payroll and billing: statutory switches, wage rates per designation, billing lines and the invoice deduction template.

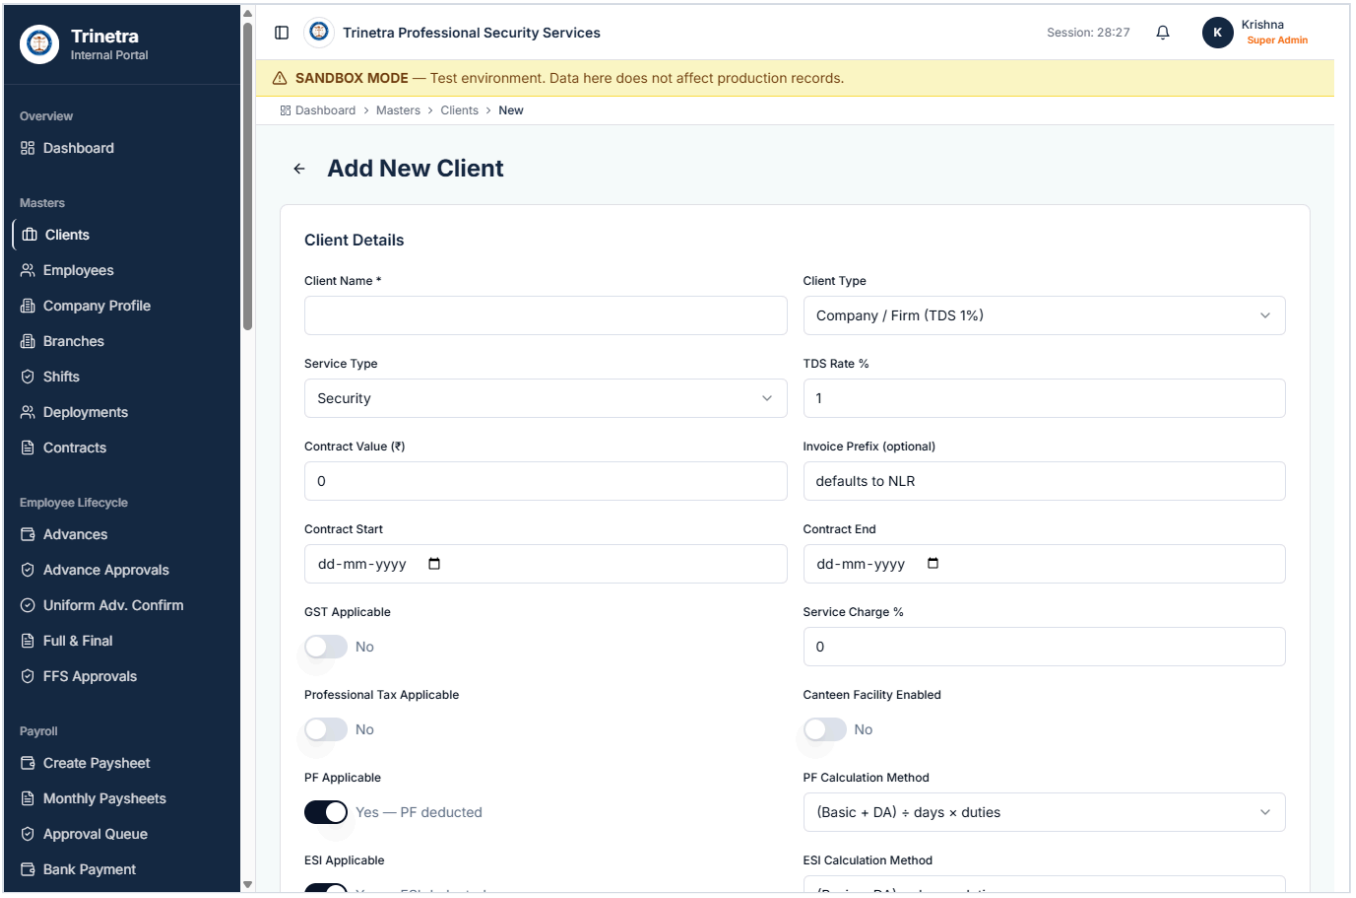

Figure 11.1 — Add New Client

Field reference — Client Details

Field	Description	Mandatory	Example	Effect
Client Name	Legal / display name	**Yes**	Test Client 1	Everywhere
Client Type	Company/Firm or Individual/HUF	No (default Company)	Company / Firm (TDS 1%)	Sets the default TDS rate
Service Type	Security / Housekeeping / Both	No (default Security)	Security	Reports
TDS Rate %	Tax the client deducts	No	1	Invoice: TDS = billing × rate
Contract Value (₹)	Annual value	No	840000	Reference
Invoice Prefix	Prefix for invoice numbers	No	TC1	Invoice number `TC1/26-27/001`
Contract Start / End	Contract period	No	01-04-2026 / 31-03-2027	Reference

Field	Description	Mandatory	Example	Effect
GST Applicable, GST %, GST Number, RCM	GST settings	No	Yes, 18 %	Invoice GST; under RCM no GST is charged
GST Type	**CGST + SGST** (client in the same state) or **IGST** (client in another state)	No (default CGST + SGST)	CGST + SGST	How GST prints on the invoice and splits in the GST report
Service Charge % / Show in invoice	Optional service charge	No	0	Invoice
Professional Tax Applicable	Deduct PT on payroll	No	Yes	Payroll PT
Canteen Facility	Enables canteen deductions	No	No	Payroll
PF Applicable / PF Calculation Method	PF on/off and wage base	No	Yes / (Basic + DA) ÷ days × duties	Payroll EPF
ESI Applicable / ESI Calculation Method	ESI on/off and base	No	Yes / (Basic + DA) ÷ days × duties	Payroll ESI
E-Invoice Applicable	Flag only	No	No	—
Contact Person / Phone / Email	Client contact	No		Reference
Status	Active / Inactive	No	Active	Inactive clients are hidden from pickers
Address, Notes	Free text	No		Invoice "Address"

The **client code** (for example CLT-037) is assigned automatically when you save.

Wage Configuration (one row per designation)

Basic, DA, TA, Special allowance, Conveyance, Washing, Uniform, Weekly-off, **Effective From**, plus a second line: 4-hr OT, Bonus, Relieving, Leave wages, EPF Min Wages, ESI Min Wages.

- Payroll uses **these rates** for each employee, matched by designation.
- A new row with a later **Effective From** creates a new version and closes the previous one. Saving the client without changing a row does not create a new version.

Invoice Billing Lines

Description, SAC (default 998525), Unit label, **Rate / Month**, Order, Active. These pre-fill every invoice for the client.

Invoice Deduction Template

Internal deductions (net salary paid, PF employer, ESI employer, plus any custom rows). They are used to calculate the **net margin** and **never print** on the client's invoice.

Create procedure (Figure 11.2)

1. Enter **Client Name** and set the switches.

2. Add one **Wage Configuration** row per designation you deploy.
3. Add the **Billing Lines**.
4. Click **Save to Sandbox** (in production: **Save**). "Client created" confirms it, and you return to the list (Figure 11.3).

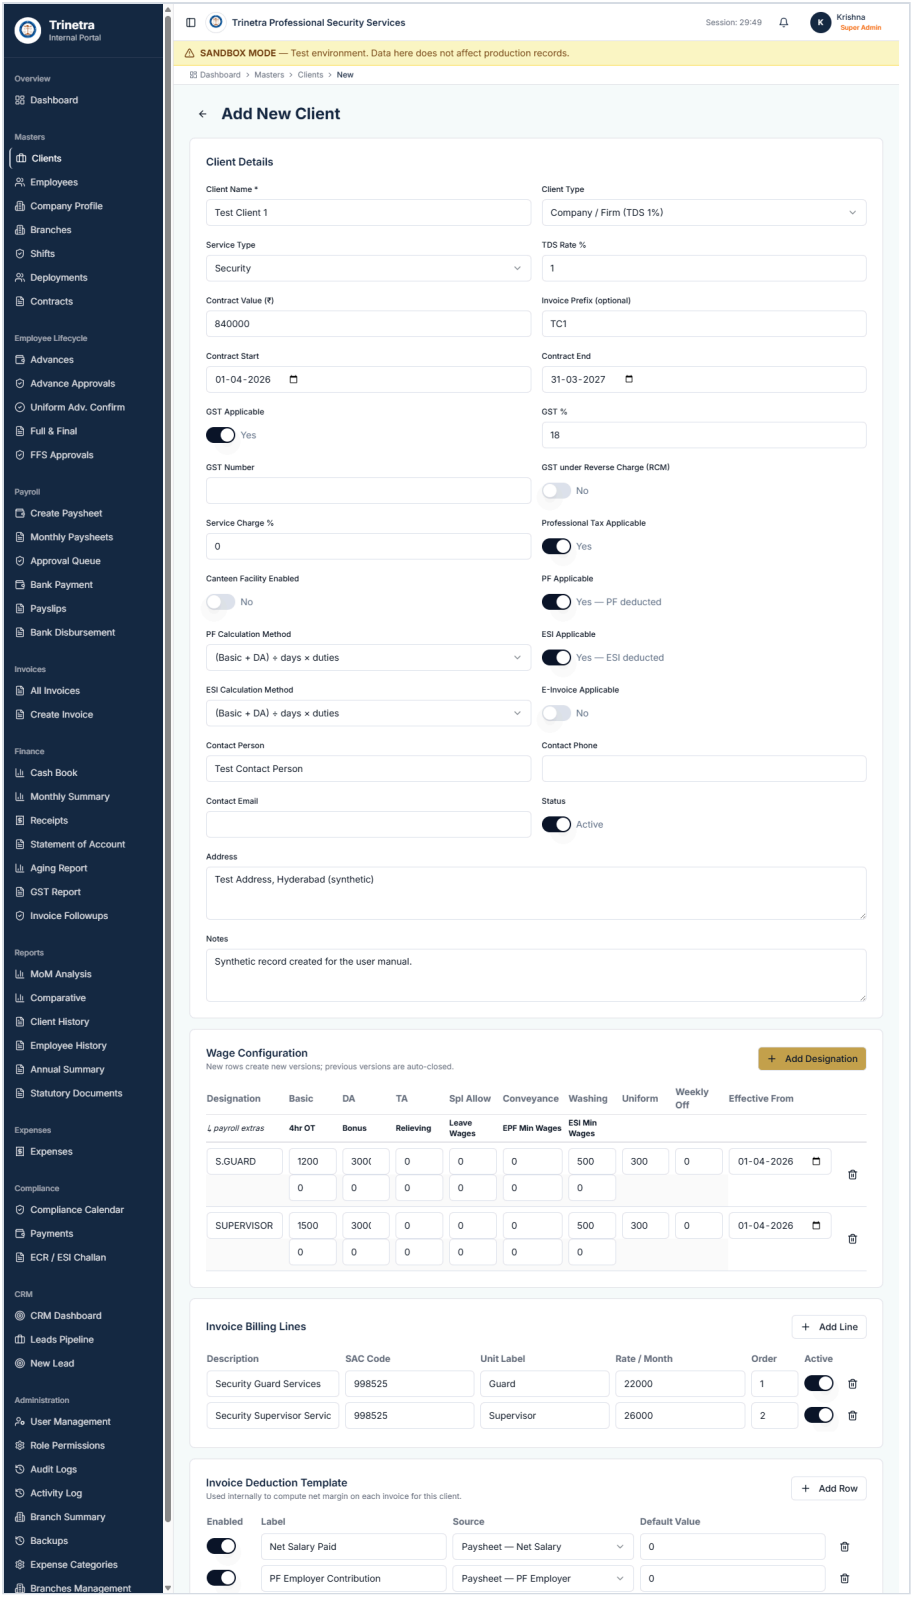

Figure 11.2 — Completed client form for Test Client 1

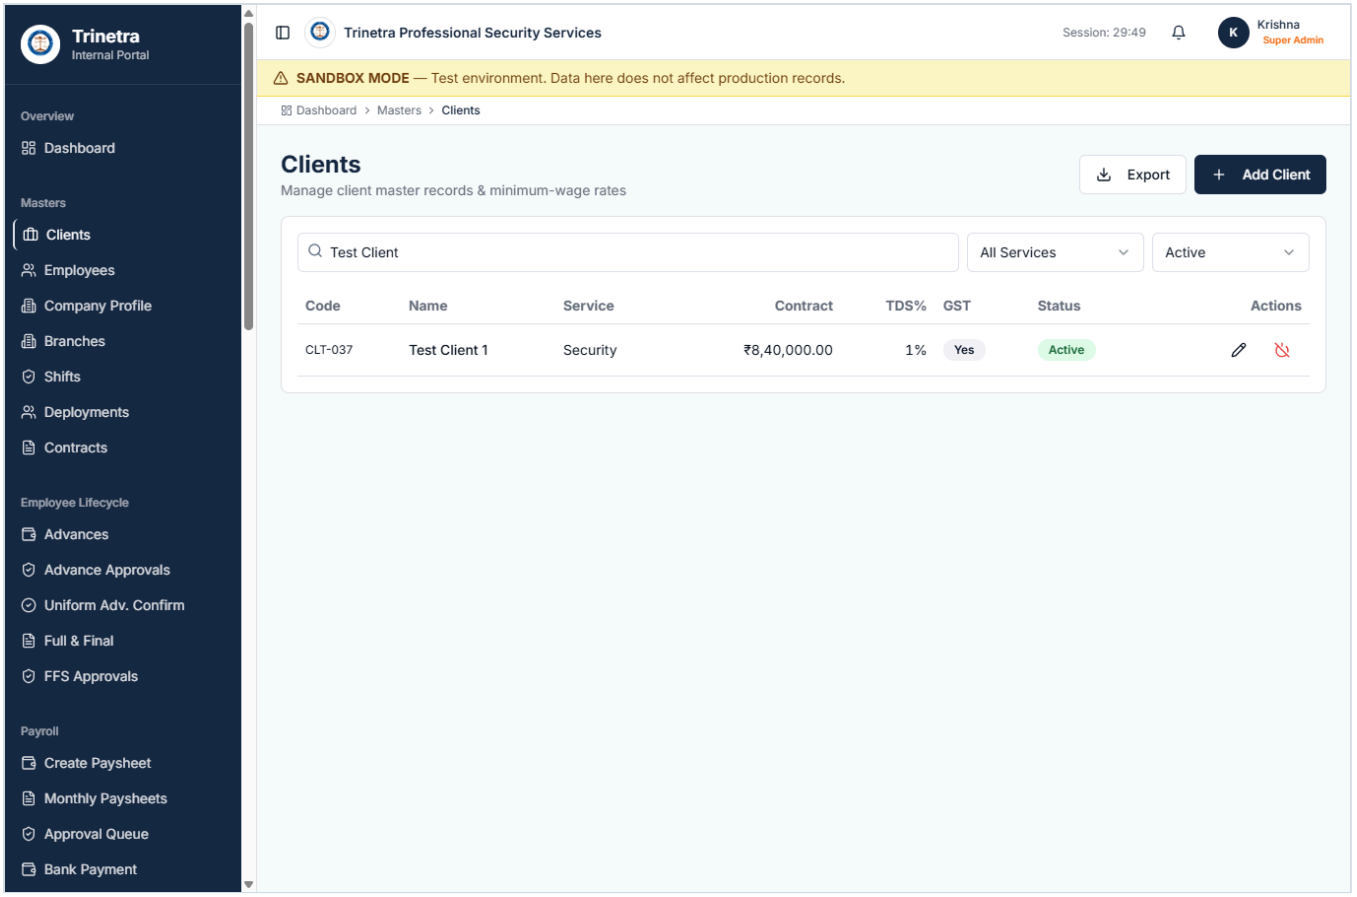

Figure 11.3 — Client list (searched for "Test Client")

Validation: with no name, the message is "Client name is required" (Figure 11.4).

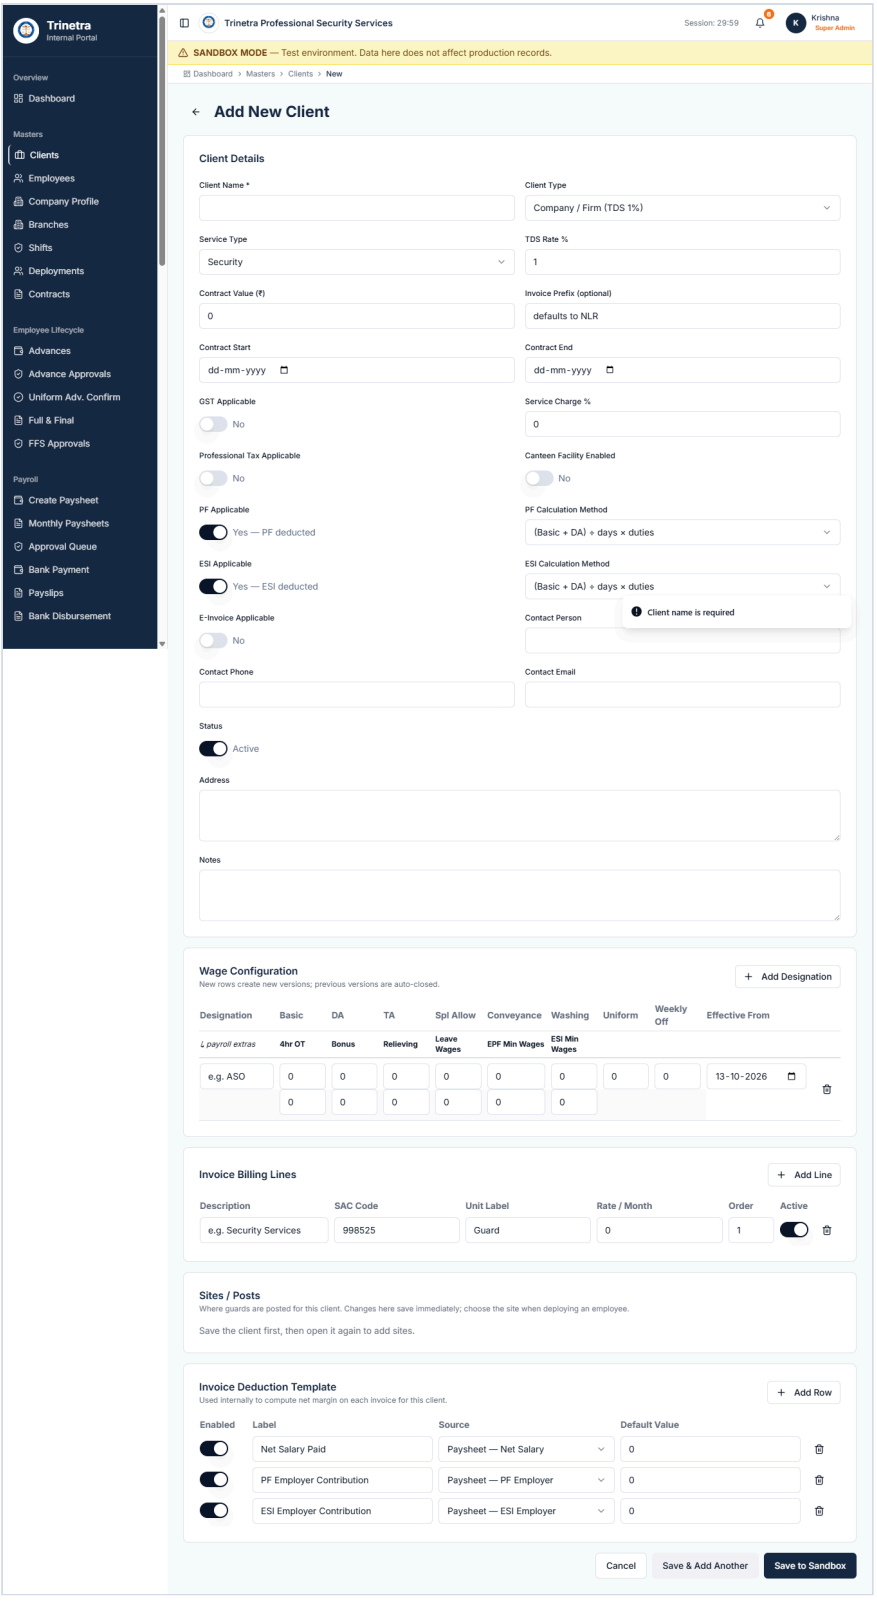

Figure 11.4 — Validation message

Edit / deactivate

Use 🖍️ on the list to edit (Figure 11.5). The power icon (CEO / Super Admin) activates or deactivates a client.

- Changing wage rates affects **future** paysheets only. Approved paysheets keep their figures.

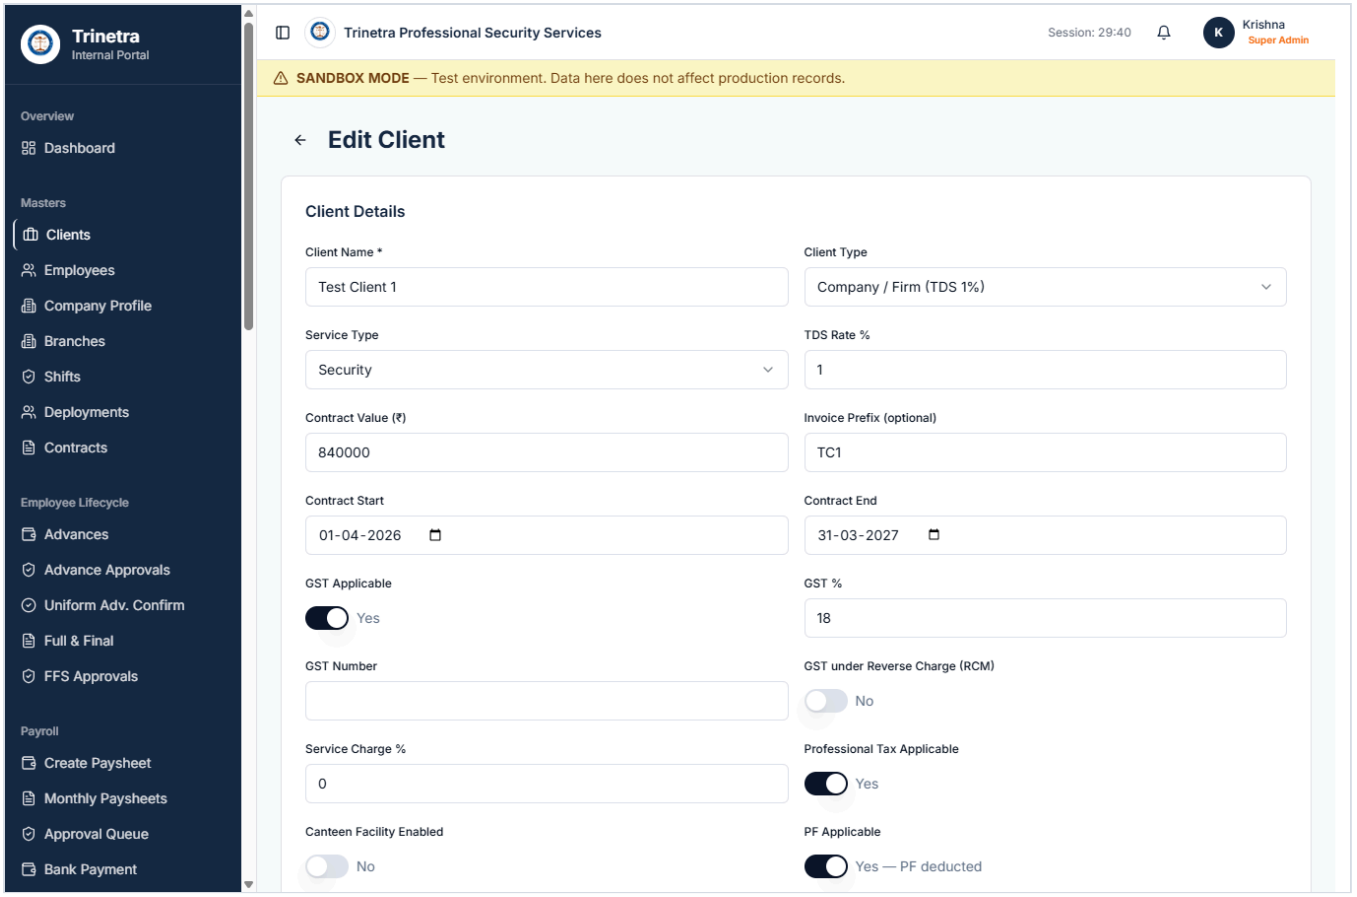

Figure 11.5 — Edit client

12. Client locations and service sites

Menu: Masters › Clients → ✏️ (edit a saved client) → **Sites / Posts** section (Figure 12.1)

Purpose: list the places where guards are posted for a client (for example Main Gate, Block A), so a deployment can name the post.

Field	Mandatory	Notes
Site / post name	**Yes**	Must be unique for the client
Unit / location	No	For example a block or building
Active	—	Switch off to retire a site. Sites are never deleted, so past deployments keep their site

Procedure

1. Open the client with ✏️. (A new client must be saved first; the section says so until then.)
2. Enter the site name and, optionally, the unit, then click **Add Site** ("Site added").
3. Use the **Active** switch to retire or restore a site.

Changes in this section **save immediately**; they do not wait for the client form's Save button. Who can change sites: CEO, COO / Operations and Super Admin.

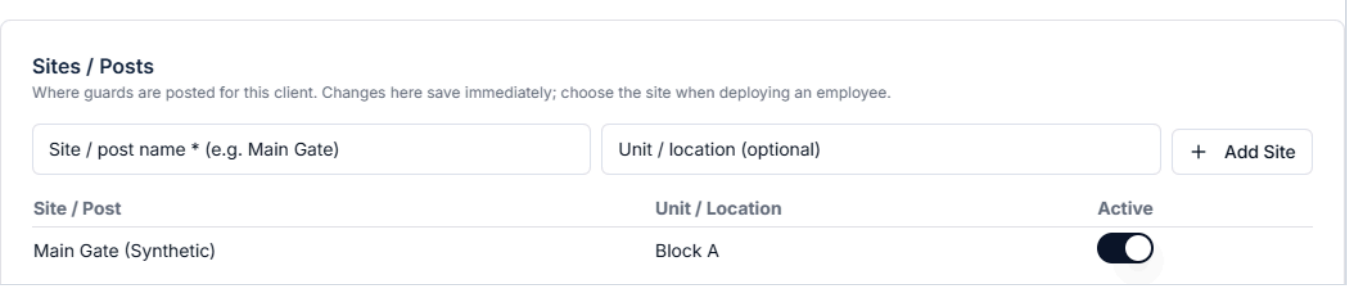

Figure 12.1 — Sites / Posts section with the synthetic site "Main Gate (Synthetic) — Block A"

Choose the site when deploying an employee (chapter 15). Your company's own offices are **Branches** (chapter 10), not sites.

13. Contracts, rates and manpower requirements

Menu: Masters › Contracts → **New Contract**

Field	Mandatory	Notes
Client	**Yes**	
Start	**Yes**	Defaults to today
End	No	Blank = open-ended
PO Number, PO Date, PO Amount, Notes	No	

1. Click **New Contract**, fill in the fields and click **Create** ("Contract created"). The number is assigned automatically, for example `CNT-CLT-037-001`.
2. The list filters by **active / expired / renewed / terminated**. The **Expiry** badge shows Active, days left (under 30), Expired or Open-ended. A daily job checks expiries and sends notifications.

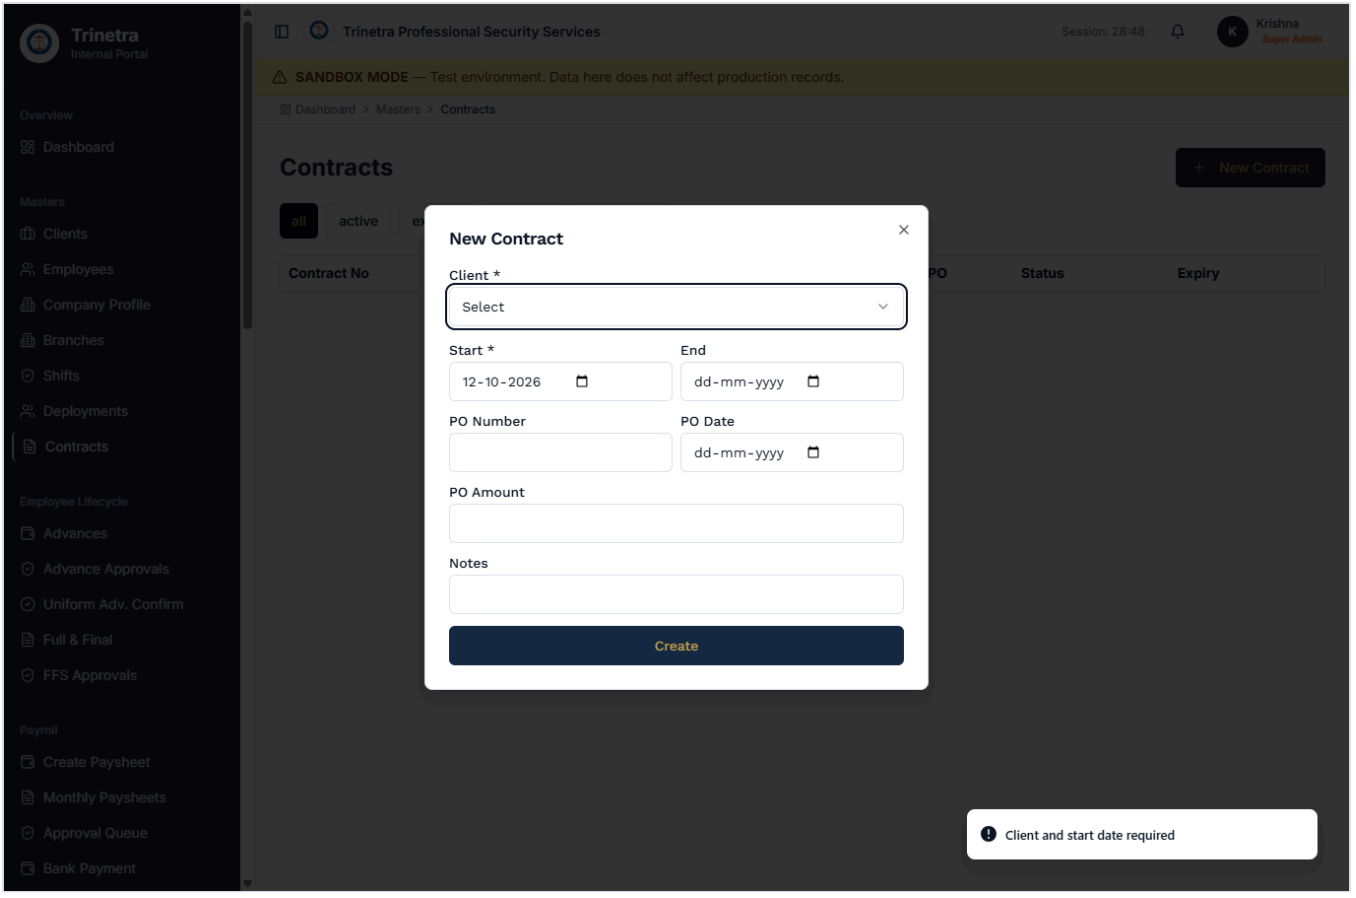

Figure 13.1 — "Client and start date required"

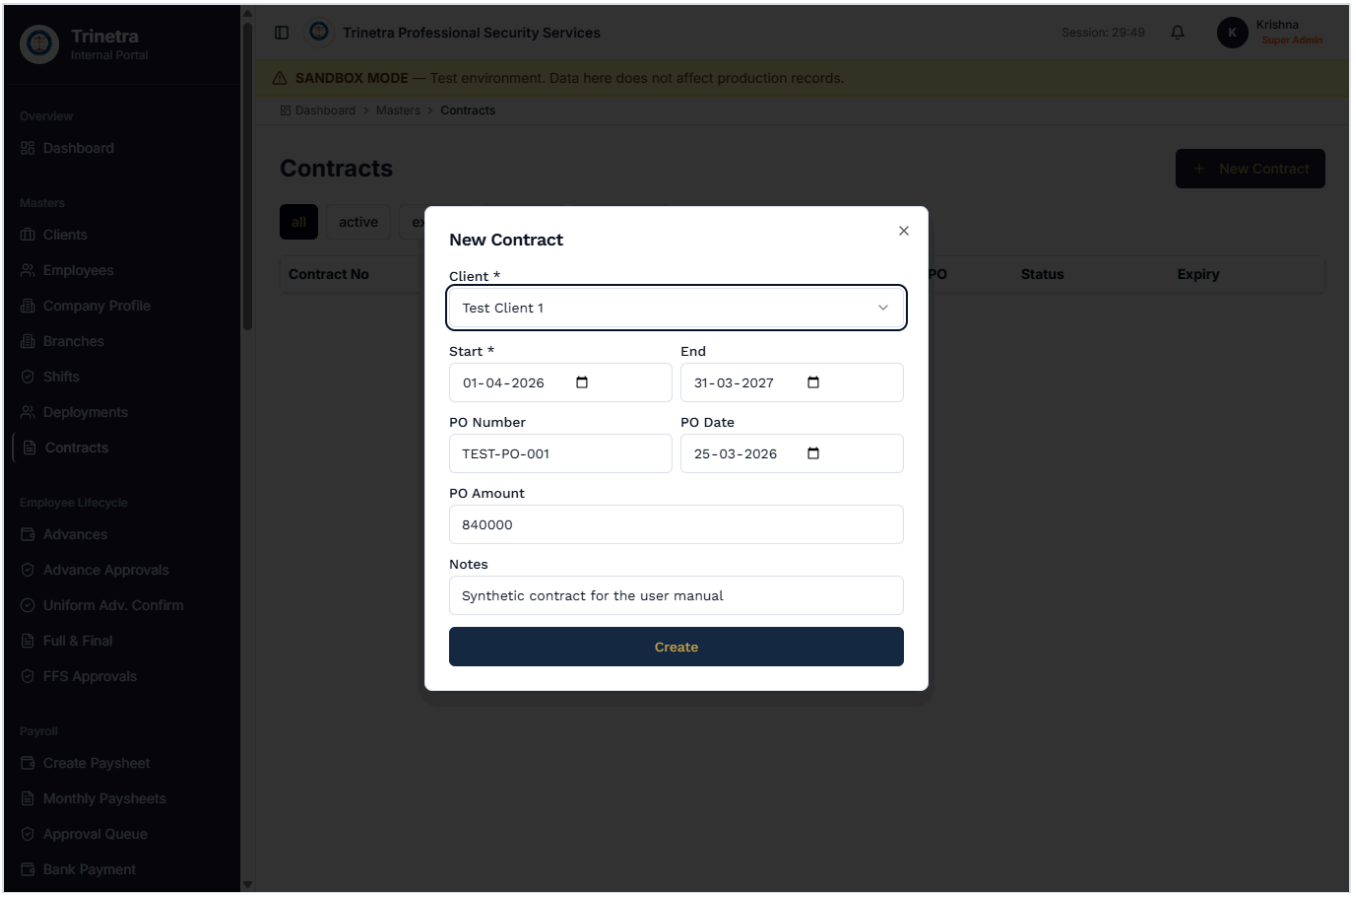

Figure 13.2 — Completed contract

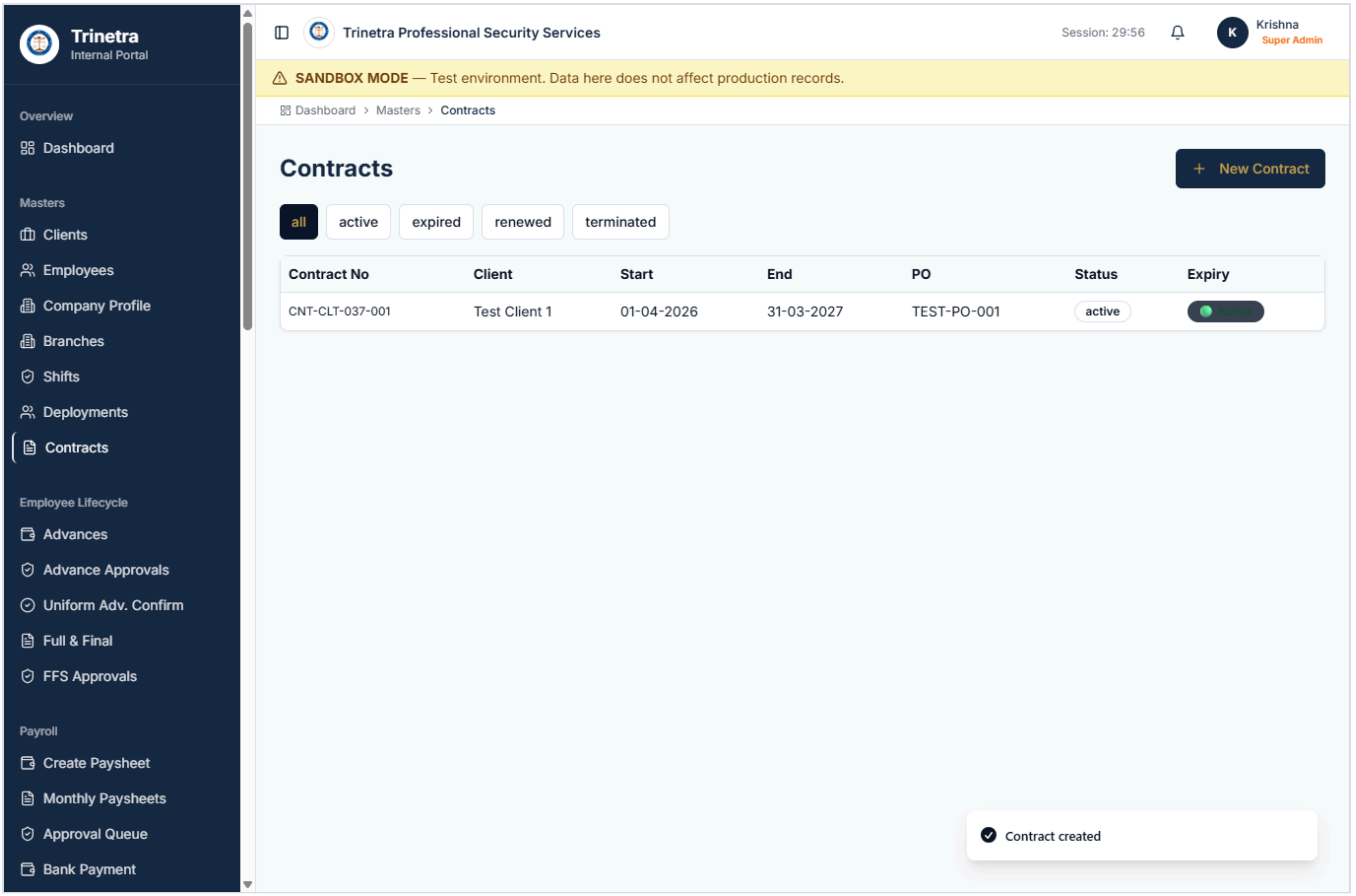

Figure 13.3 — Contracts list

Rates are set on the client (chapter 11). **Manpower requirement** (headcount per site) is **not modelled**. The invoice quantity is entered by hand; when the invoice is created from a paysheet, the form shows the paysheet headcount by designation as a guide (chapter 20).

14. Employee / security-guard management

Menu: Masters › Employees → **Add Employee** (Figure 14.1)

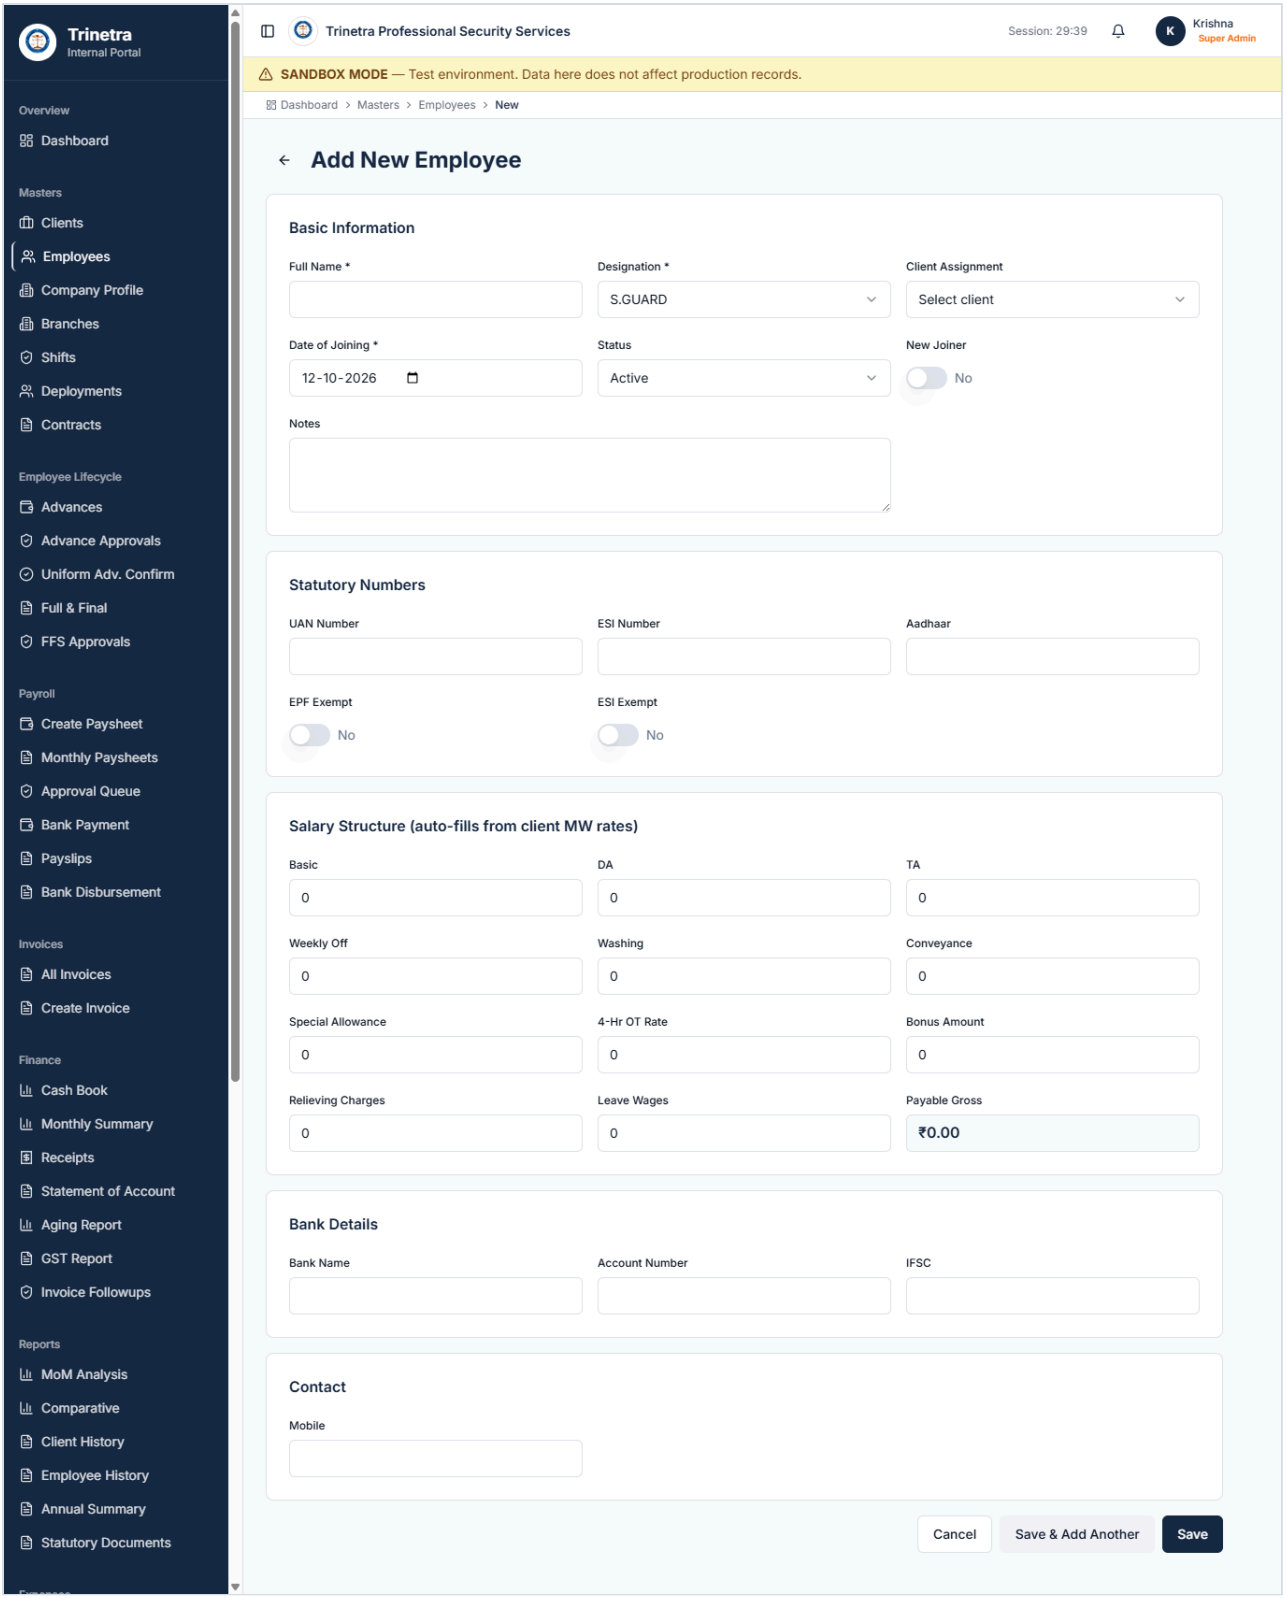

Figure 14.1 — Employee form

Field reference

Section	Field	Mandatory	Format / rule
Basic	Full Name	**Yes**	max 150 characters
	Designation	**Yes**	ASO, S.GUARD, WRITER, SUPERVISOR, FIELD OFFICER
	Client Assignment	No	Client the employee works for
	Date of Joining	**Yes**	
	Status	No	Active / Relieved / Absconded
	New Joiner	No	Marks first month (informational flag on the paysheet)
Statutory	UAN Number	No*	exactly **12 digits**
	ESI Number	No*	exactly **17 digits**
	Aadhaar	No	exactly 12 digits
	EPF Exempt / ESI Exempt	No	
Salary	Basic, DA, TA, Weekly Off, Washing, Conveyance, Special, 4-Hr OT rate, Bonus, Relieving, Leave Wages	No	Payable Gross is calculated
Bank	Bank Name, Account Number, IFSC	No*	account **9–18 digits**; IFSC `AAAA0XXXXXX`
Contact	Mobile	No	exactly 10 digits

* Not required to save, but a **missing UAN** blocks paysheet submission, and missing bank details leave the bank file incomplete.

> ℹ️ For a **new** employee, choosing the **Client Assignment** and **Designation** fills Basic, DA and TA from that client's current wage configuration for the designation (chapter 11). You can change the amounts. Payroll still uses the client's wage configuration first, so these figures are a fallback.

Employee code (for example EMP-192) is assigned automatically.

Validation examples: "Full name is required" (Figure 14.2); "UAN must be exactly 12 digits" (Figure 14.3).

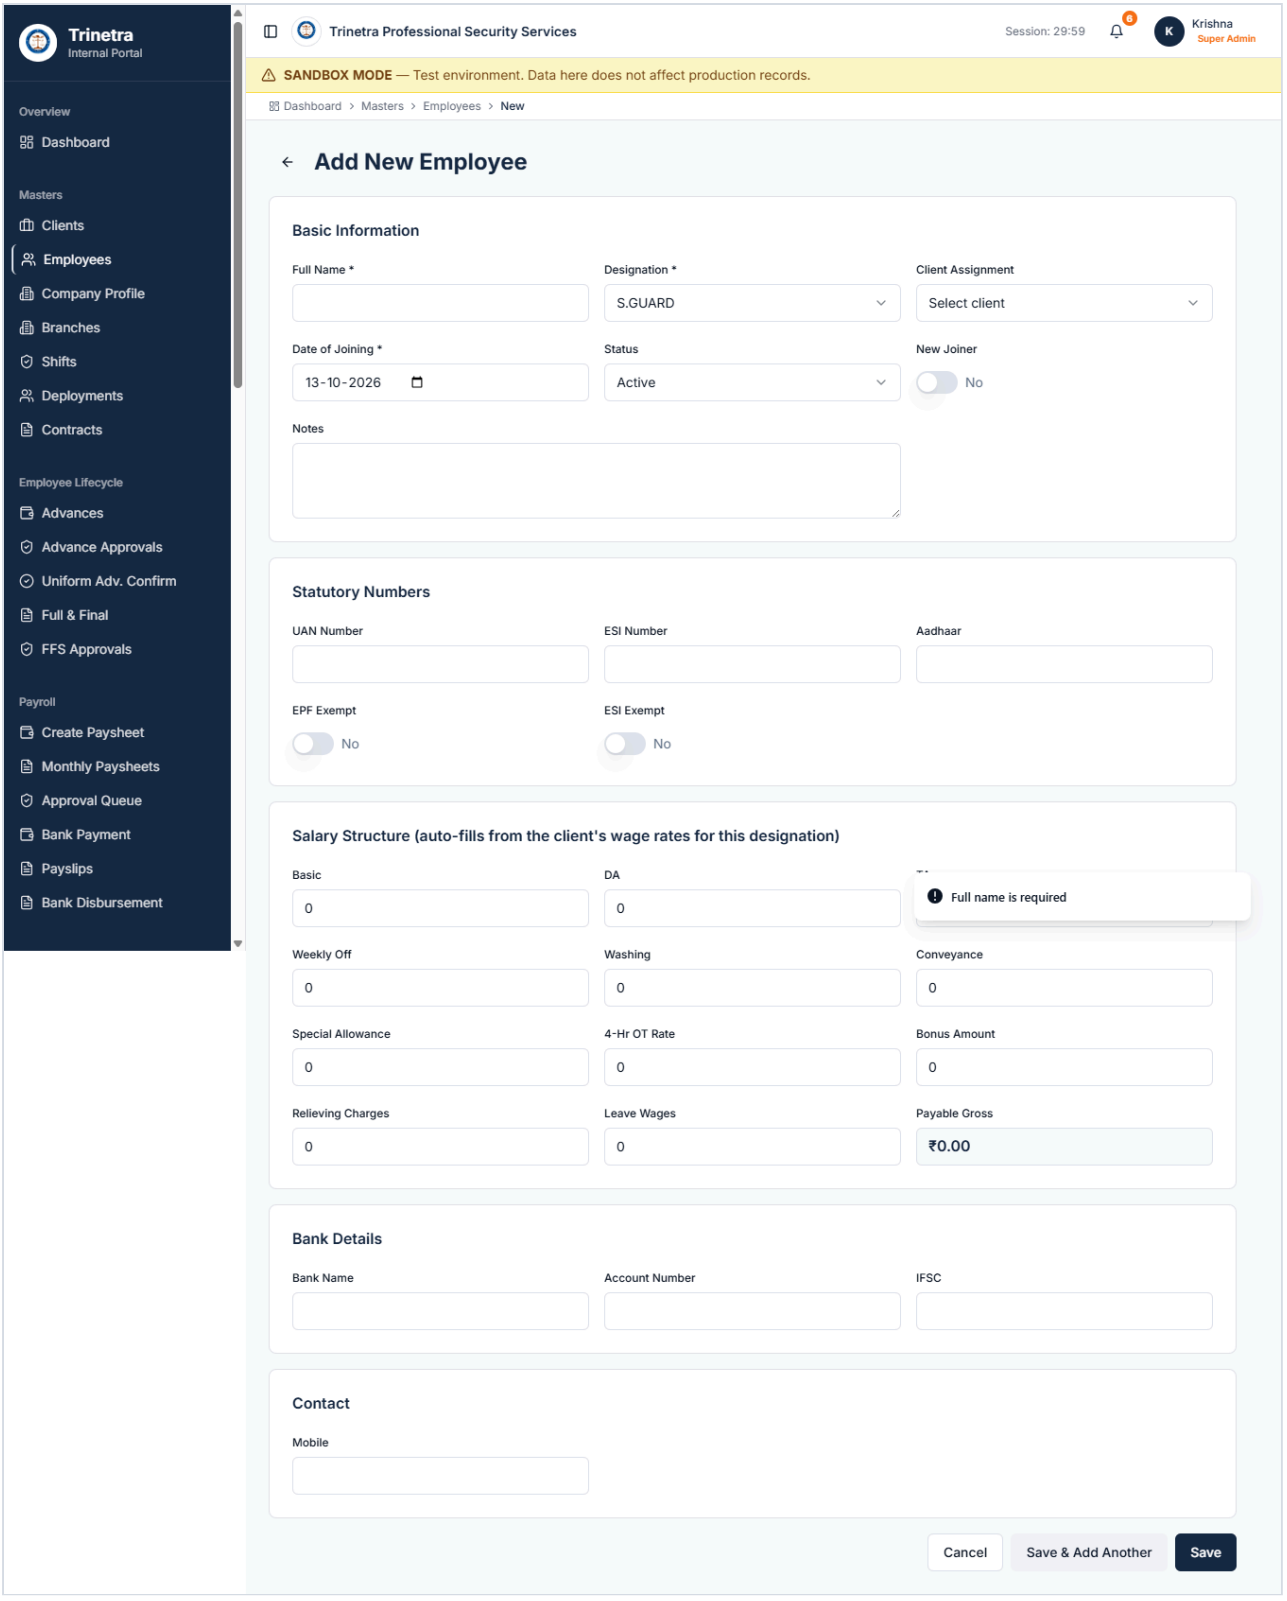

Figure 14.2 — Required-field message

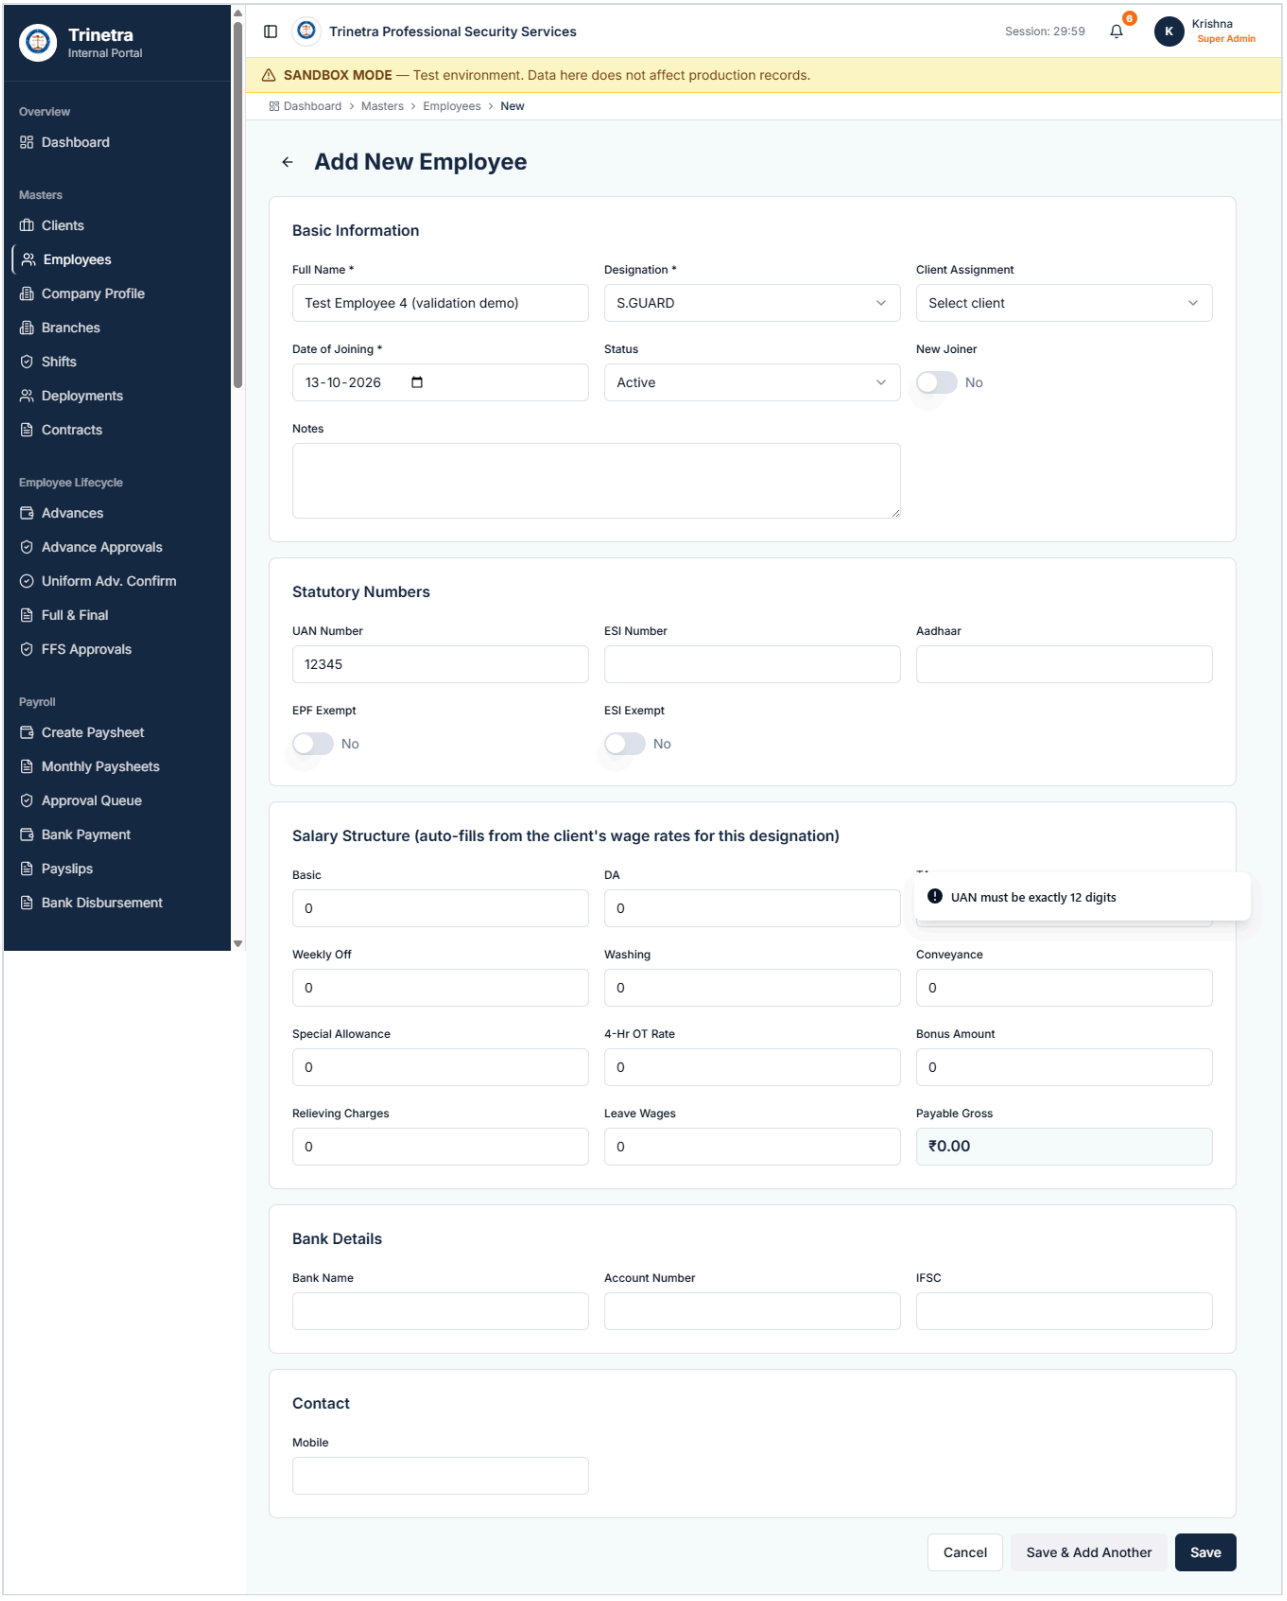

Figure 14.3 — UAN format check

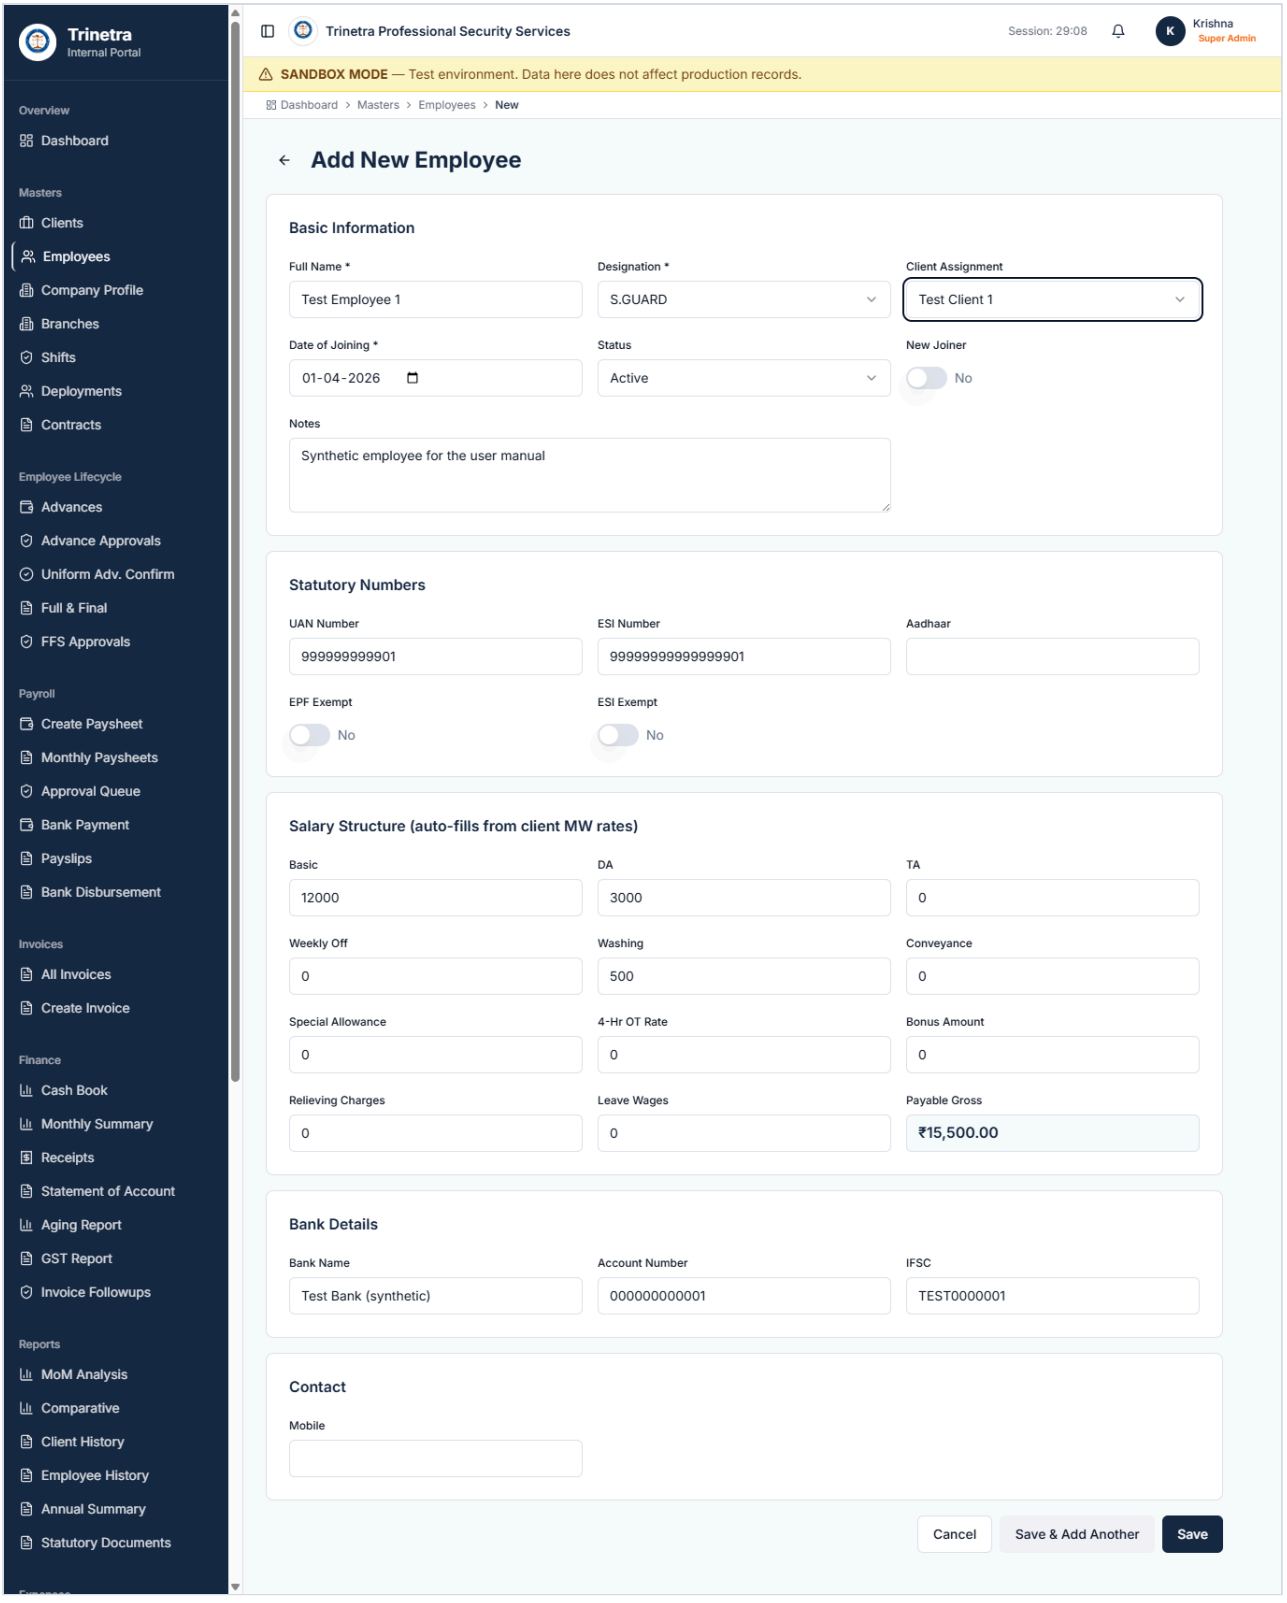

Figure 14.4 — Test Employee 1 completed (synthetic identifiers)

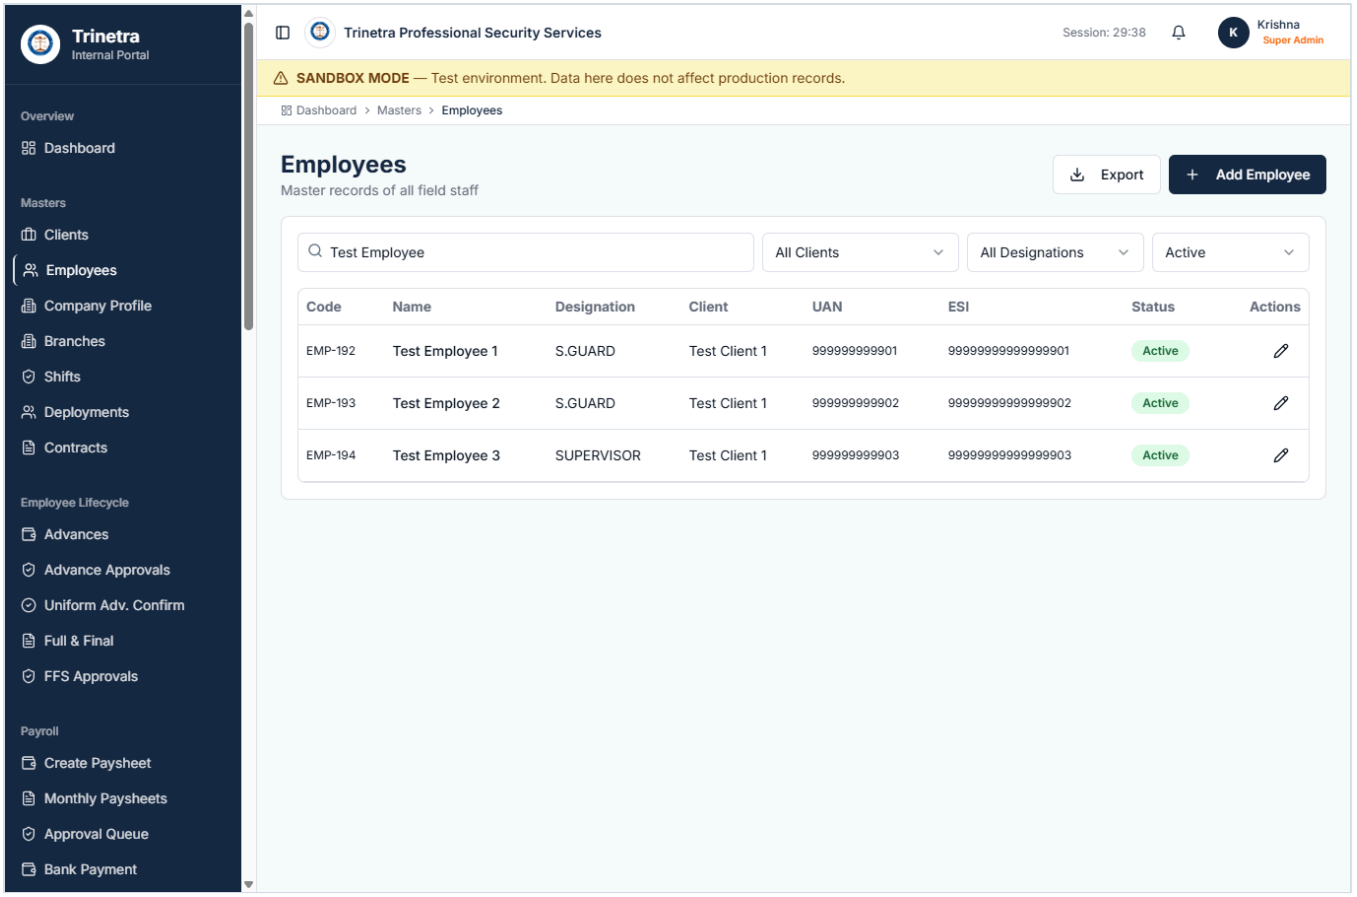

Figure 14.5 — Employee list (searched "Test Employee")

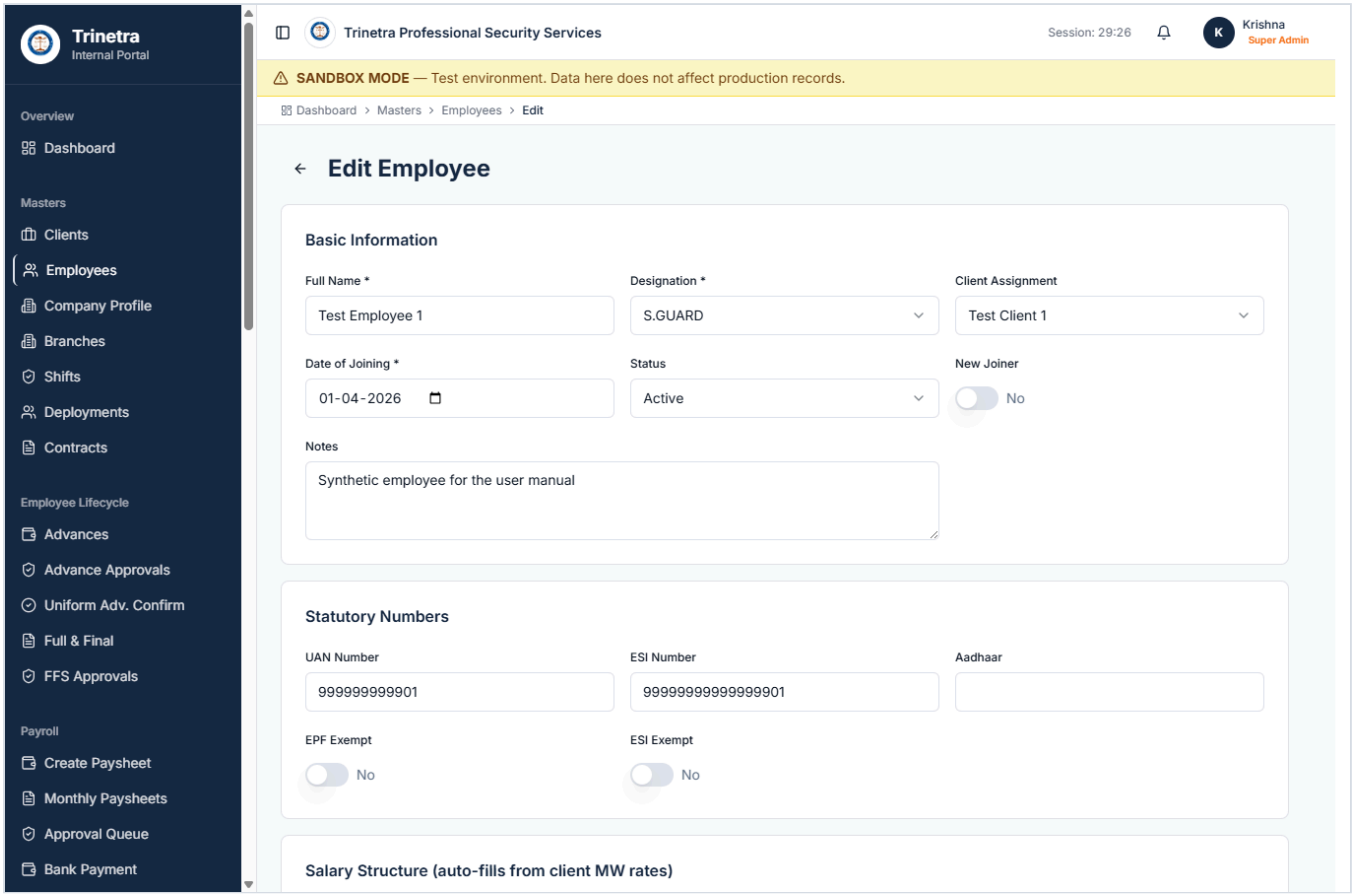

Figure 14.6 — Edit employee

Separation: set Status to Relieved, or complete a **Full & Final** settlement (chapter 22.4), which sets Relieved automatically on approval.

15. Employee–client–site assignment (Deployments)

Menu: Masters › Deployments → **New Deployment** (CEO / COO)

Field	Mandatory
Employee (shown as "EMP-192 — Test Employee 1")	**Yes**
Client	**Yes**
Site / Post	No — lists the client's **active** sites (chapter 12); default "No specific site"
Shift	**Yes**
Start Date	**Yes**
Notes	No

"Fill required fields" appears if any are missing (Figure 15.1). On success: "Deployed". The list shows a **Site** column.

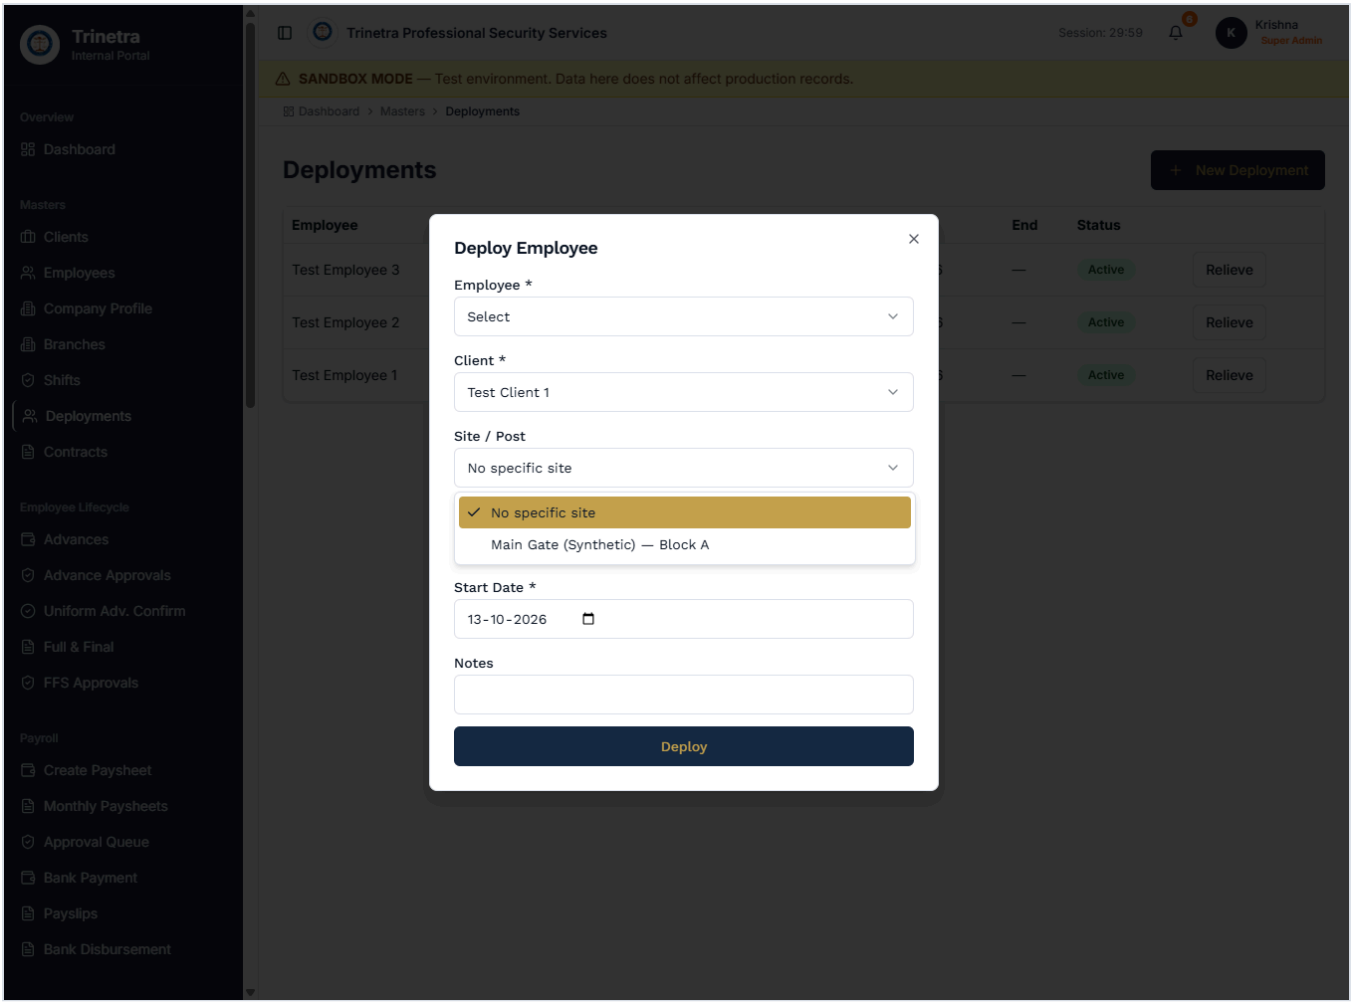

Figure 15.5 — Choosing the site for Test Client 1 (the picker is empty until a client is chosen)

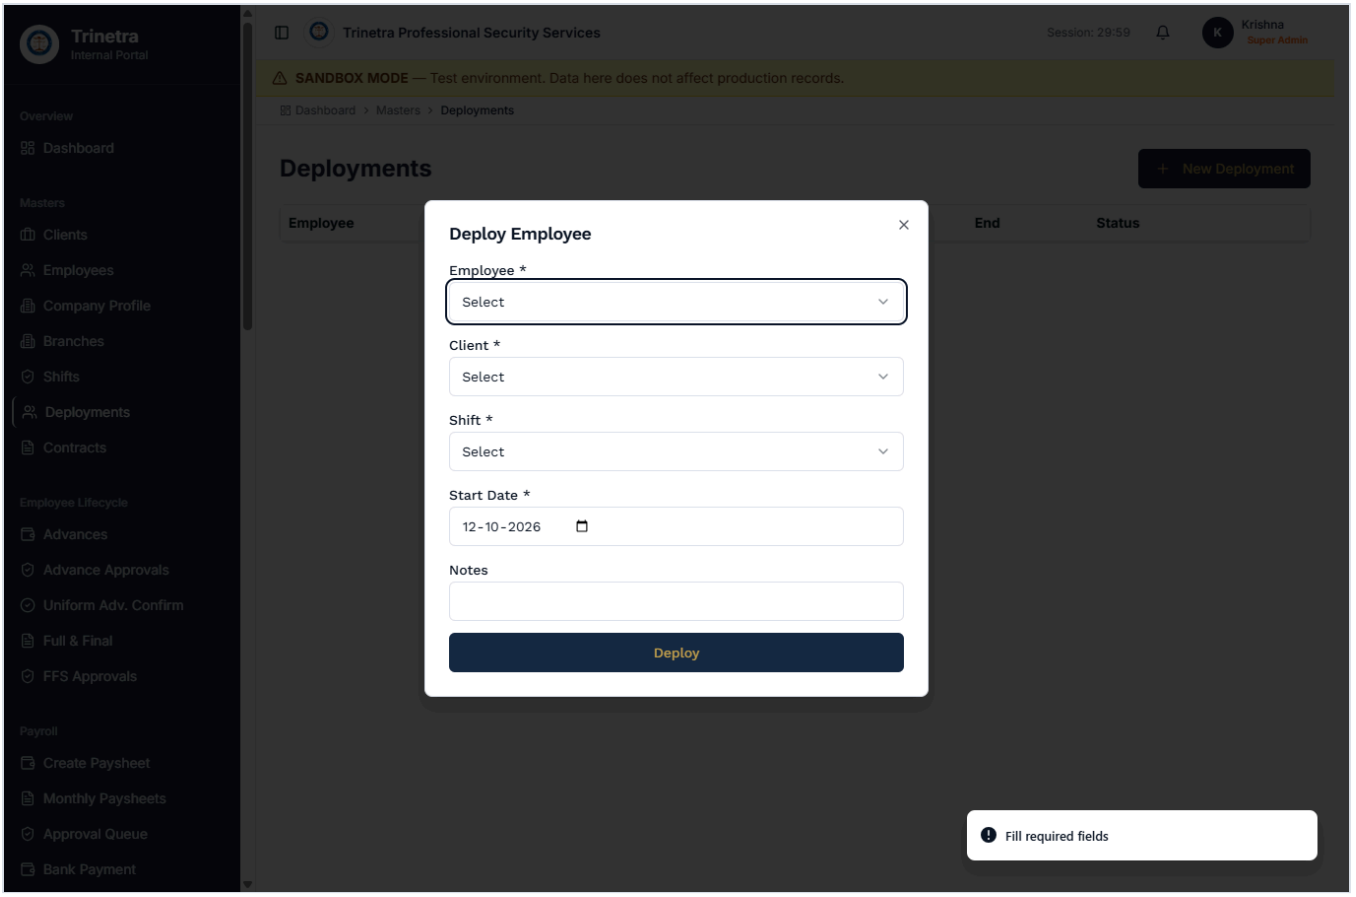

Figure 15.1 — Deployment validation

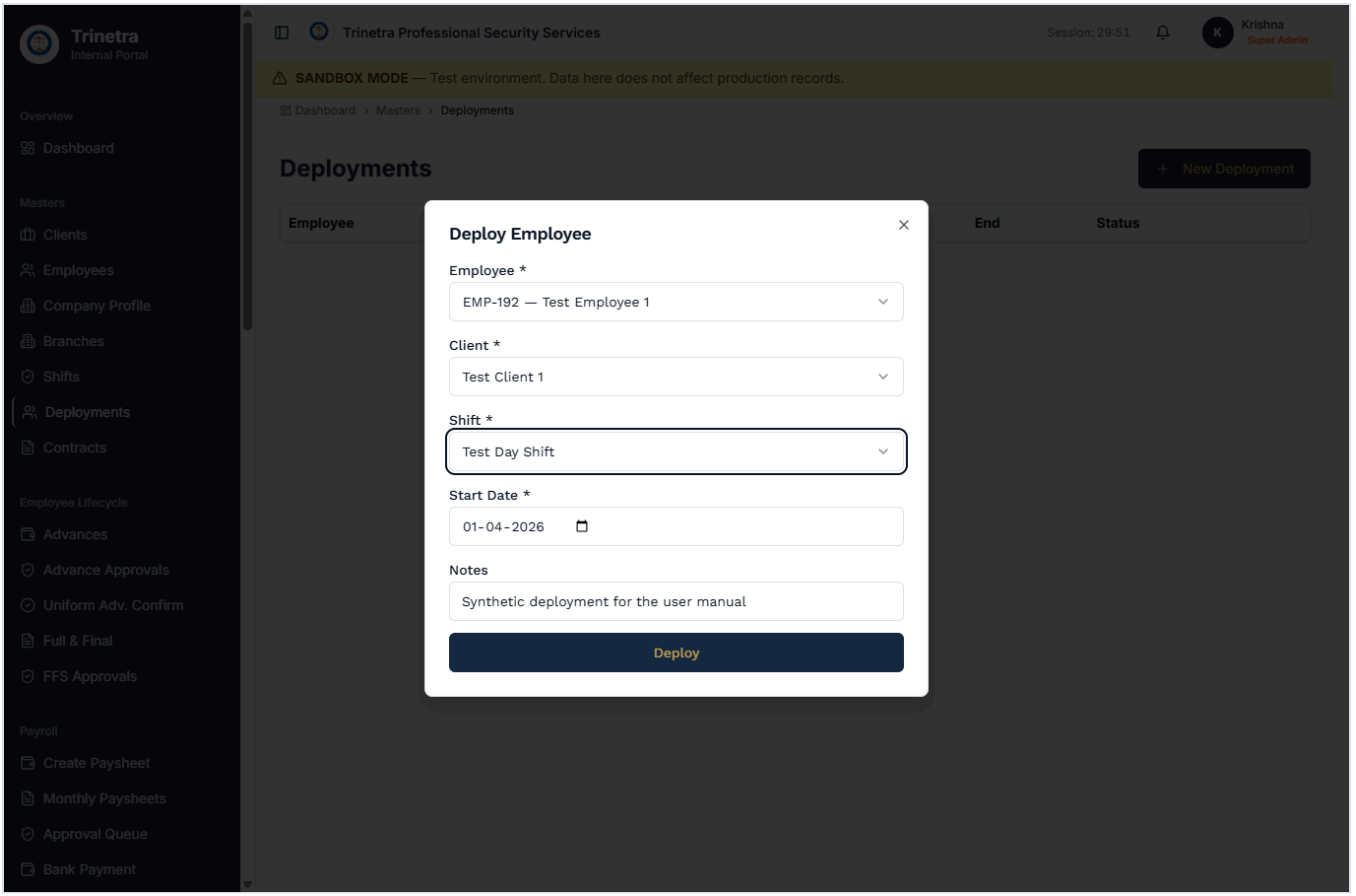

Figure 15.2 — Deploying Test Employee 1

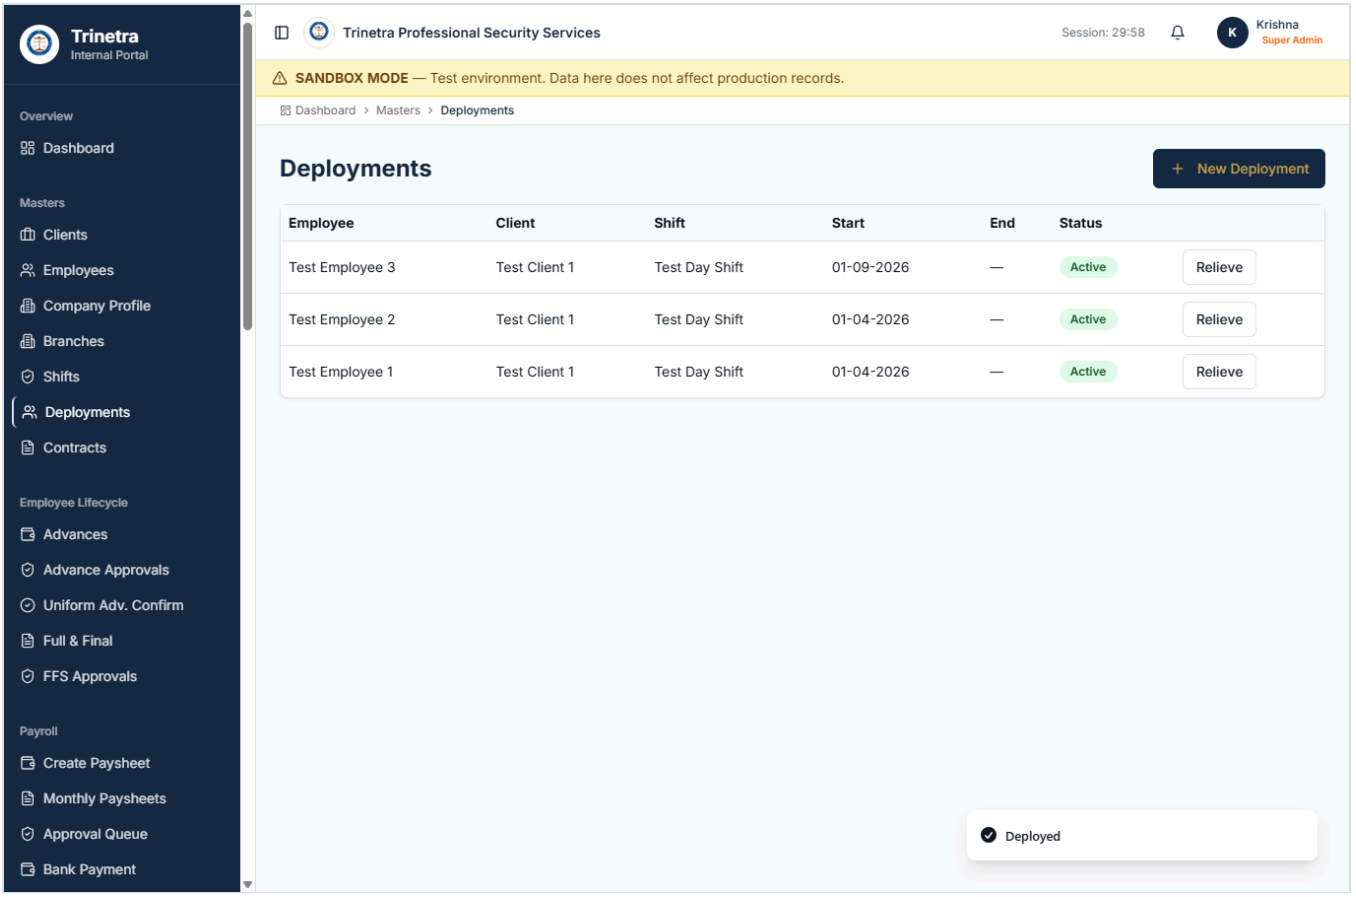

Figure 15.3 — Deployments (other records hidden)

Transfer / end a posting: click **Relieve** on the row, enter **End Date*** and **Reason***, and confirm (Figure 15.4). To move a guard to another client, relieve them, then create a new deployment. History is kept.

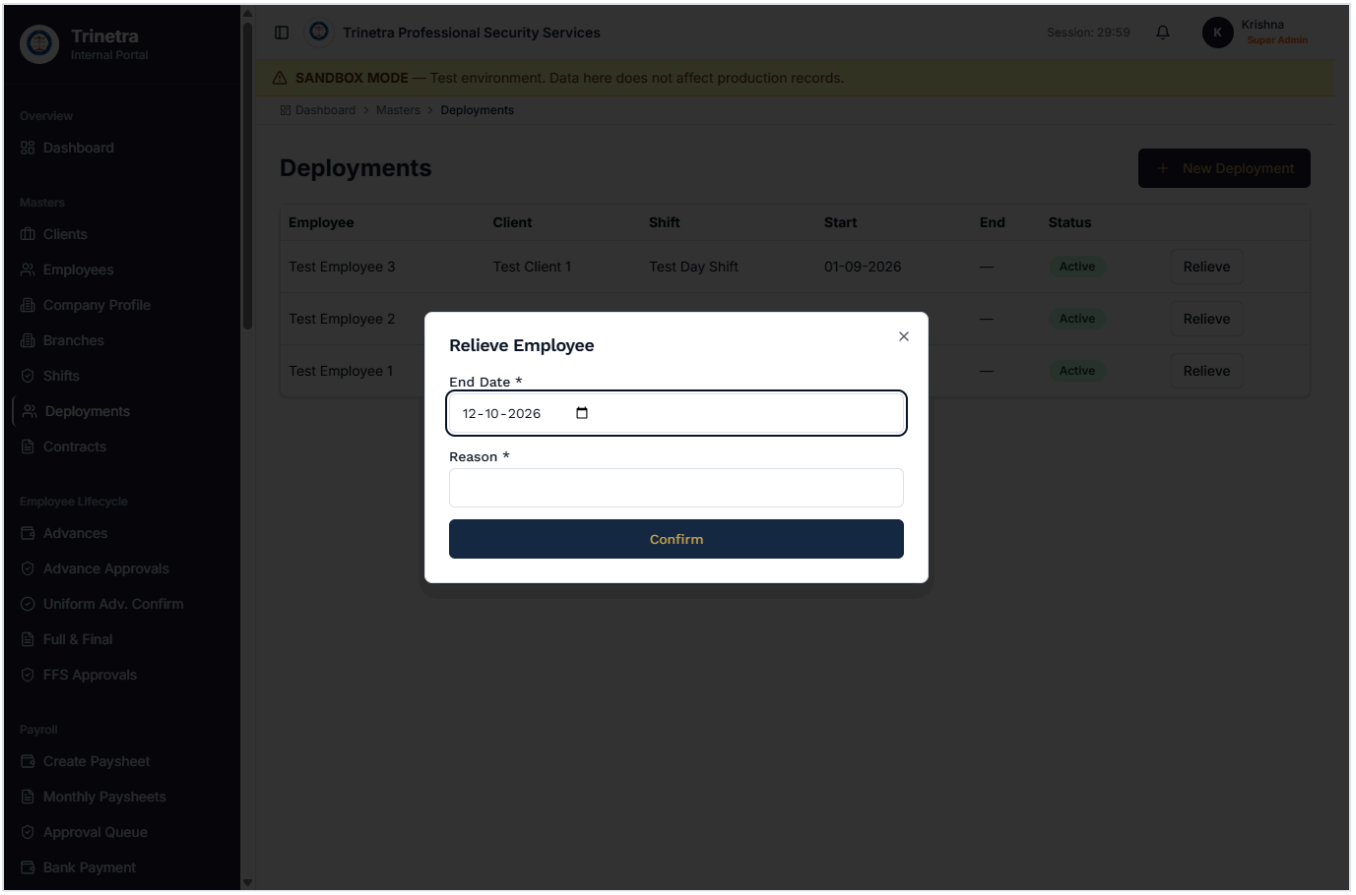

Figure 15.4 — Relieve dialog

16. Shifts, duties, attendance and overtime

- **Shifts:** chapter 10.
- **Attendance / duty register, leave, weekly-off and holiday tracking, and duty import: this functionality was not found in the current implementation.** The *Upload Paysheet* page is a placeholder.
- **How duties are recorded instead:** in **Create Paysheet** → **Step 2**, type each employee's **Duties** (days worked) for the month (chapter 17). Working days default to the number of days in the month.
- **Overtime:** enter the 4-hour OT amount in the paysheet grid (column "4hr OT").

17. Monthly payroll and paysheets

17.1 Create a paysheet (Accountant, CEO, Super Admin)

Menu: Payroll › Create Paysheet

Step 1 — choose client and month (Figures 17.1–17.3)

1. Select **Client**, **Month** and **Year**. **Working Days** fills in automatically (30 for September).
2. Click **Load Employees** →. Without a client you see "Select a client first".

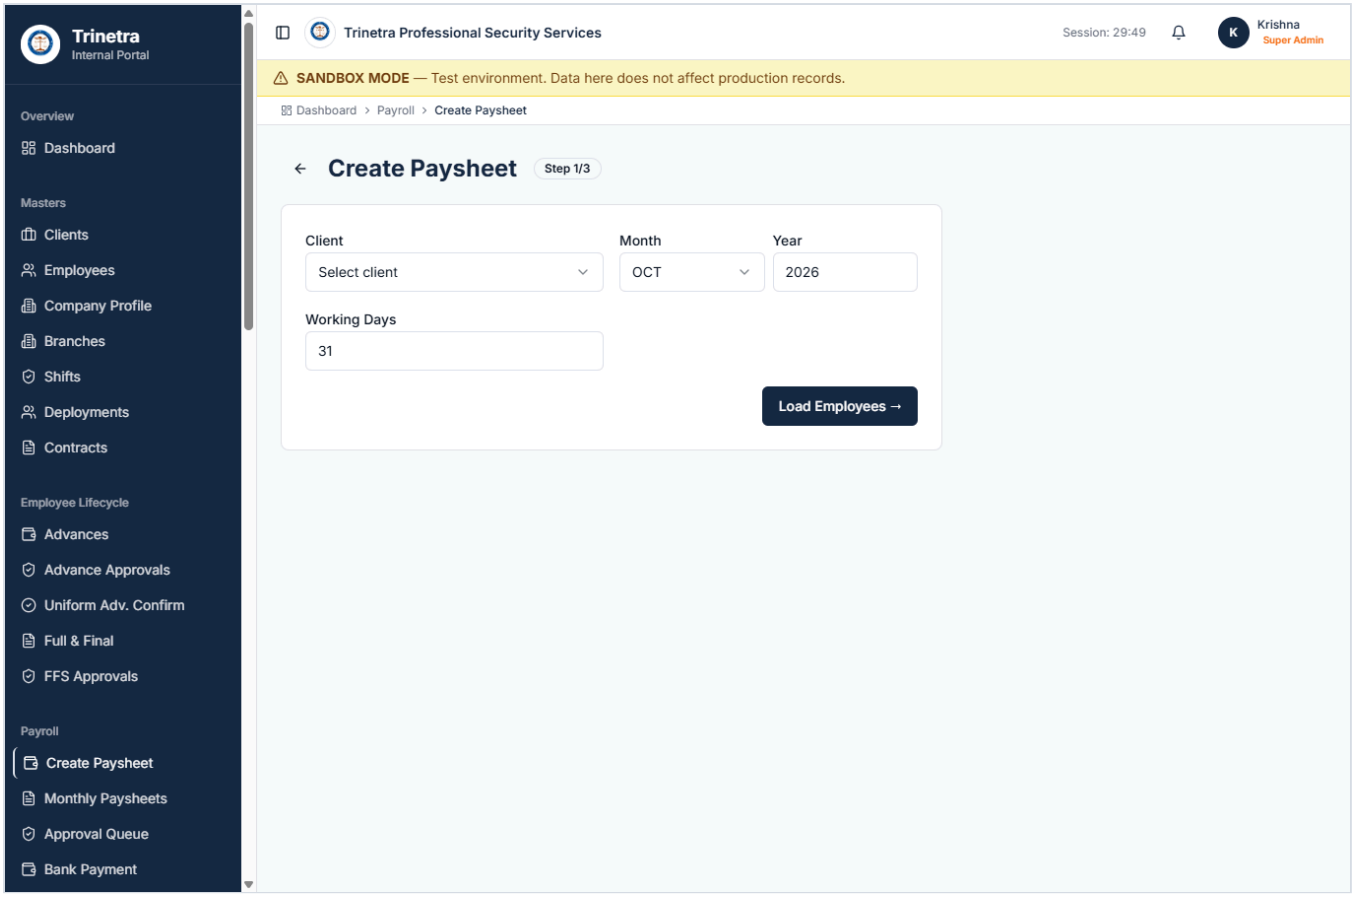

Figure 17.1 — Create Paysheet, step 1

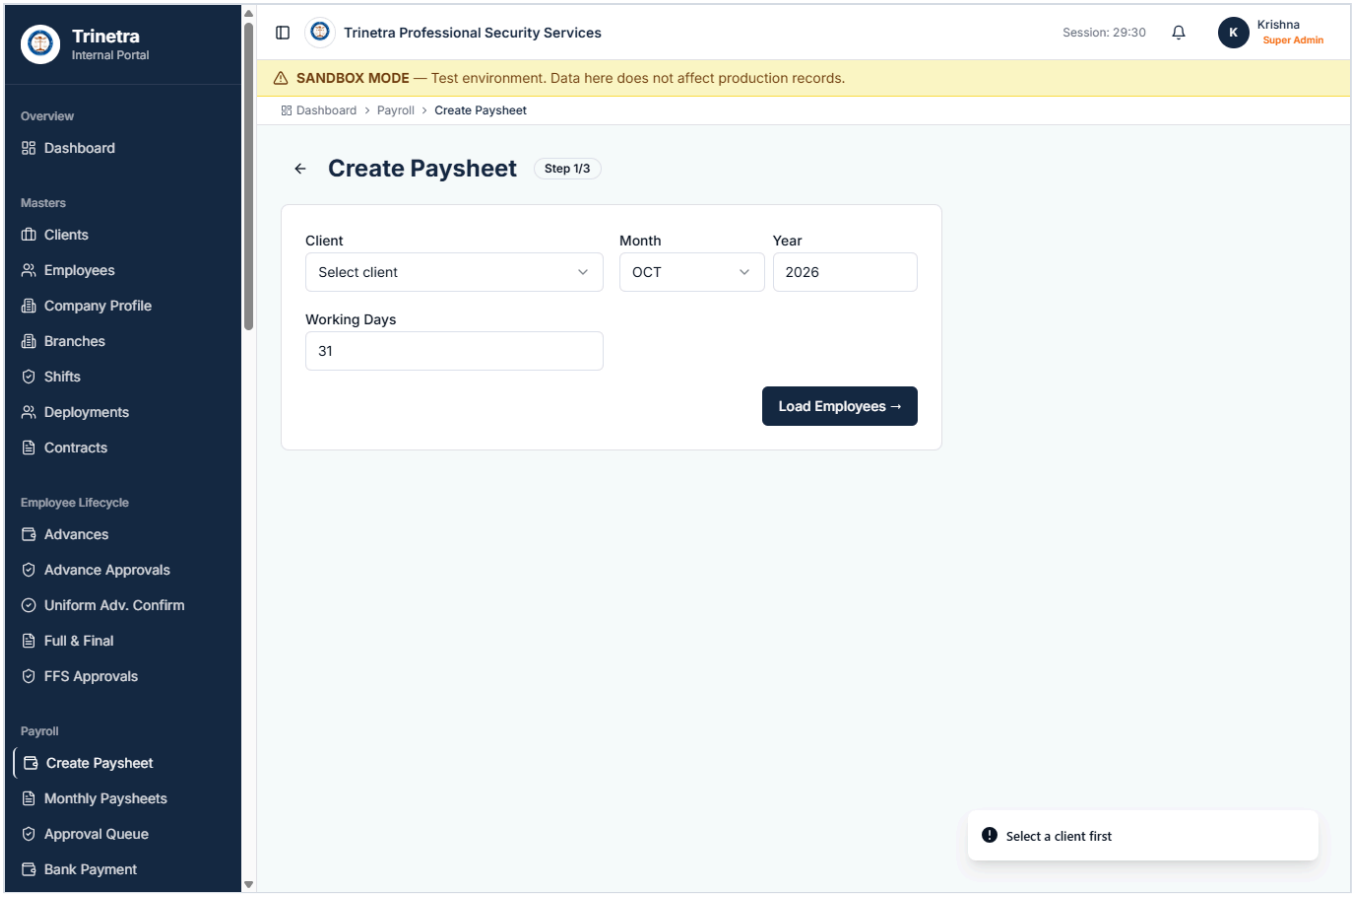

Figure 17.2 — "Select a client first"

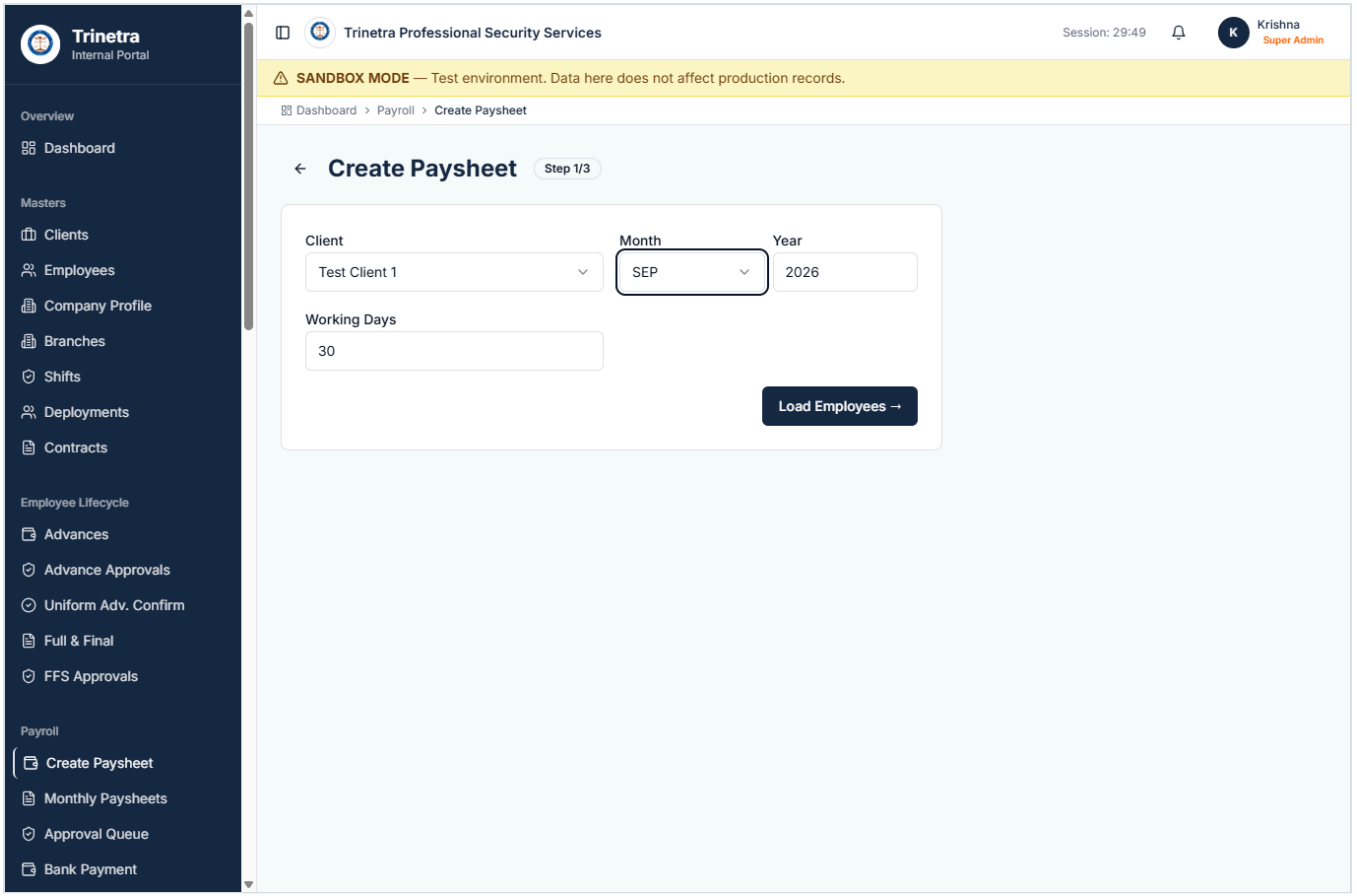

Figure 17.3 — Test Client 1, September 2026

Step 2 — enter duties and review (Figures 17.4–17.6)

- The grid loads every employee assigned to the client, with wage components from the client's wage configuration.
- Type **Duties** for each employee. Every other column recalculates instantly.
- The **anomalies panel** groups problems:

Colour	Meaning	Examples	Action
🔴 Blockers	Must fix before submit	Missing UAN; ESI wages but no ESI number	Fix in Employee master
🟡 Warnings	Review	Zero earned wages; duties > working days; ESI wages > ₹21,000	Confirm or correct
🔵 Info	No action	New joiner	—

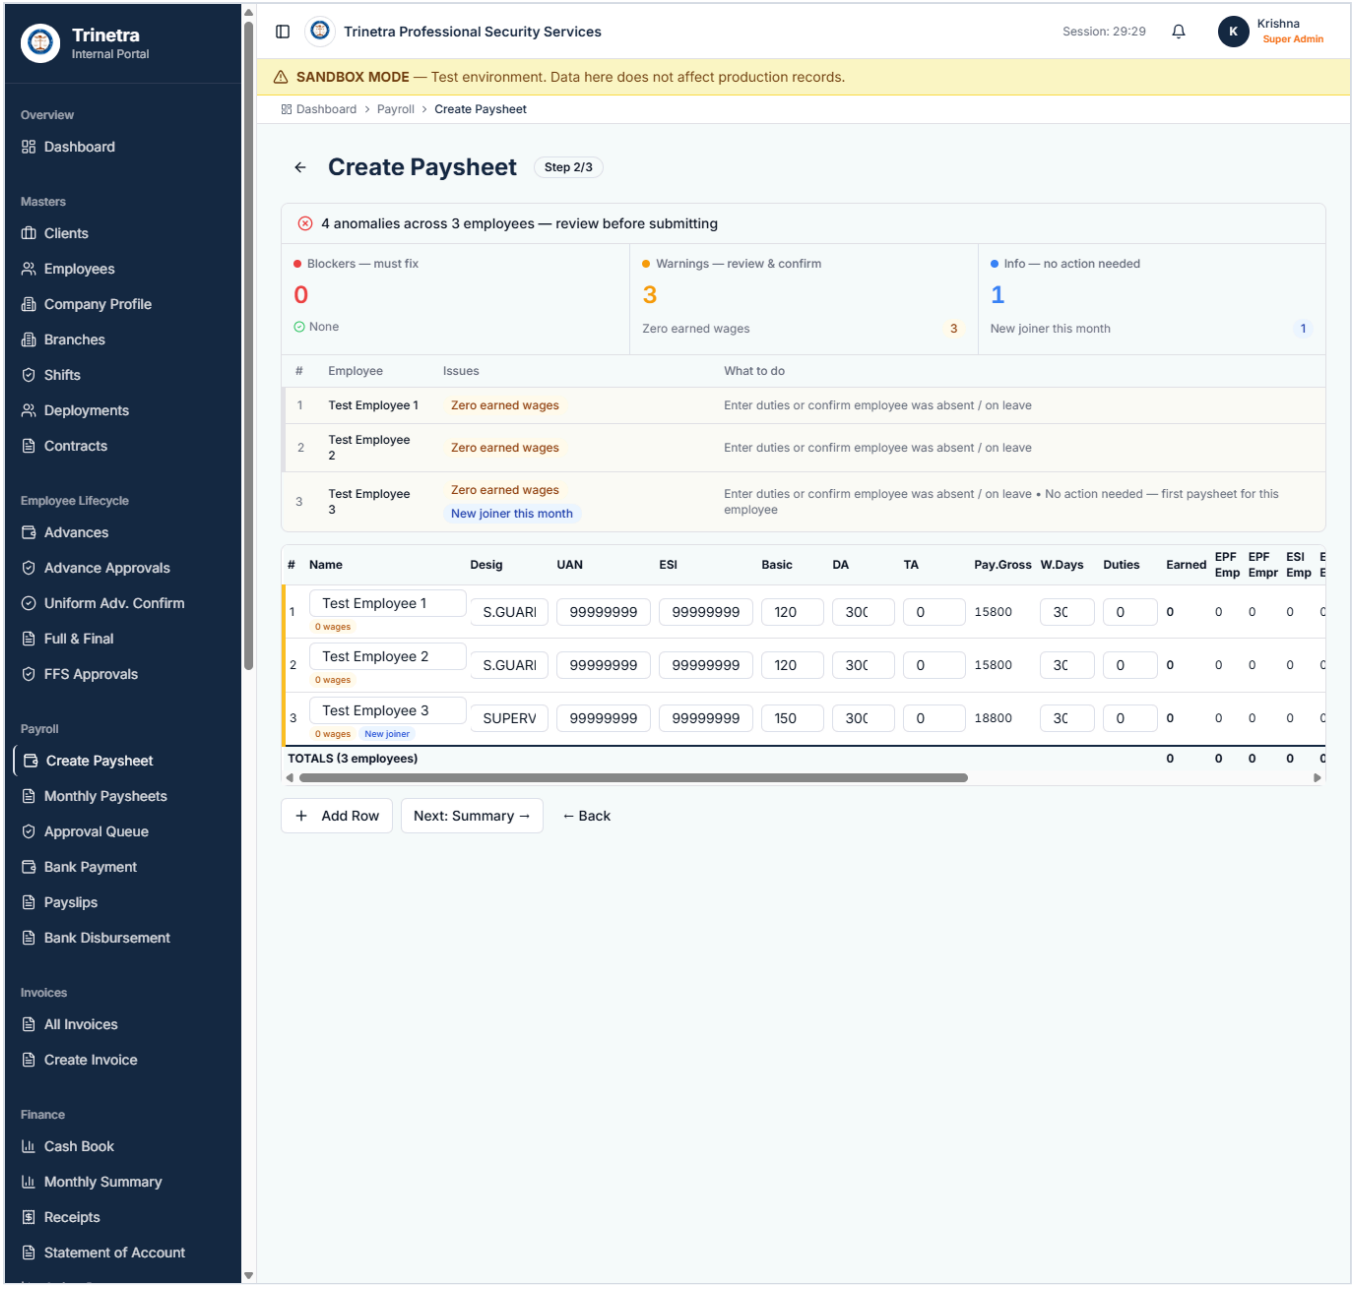

Figure 17.4 — Before entering duties: "Zero earned wages" warnings

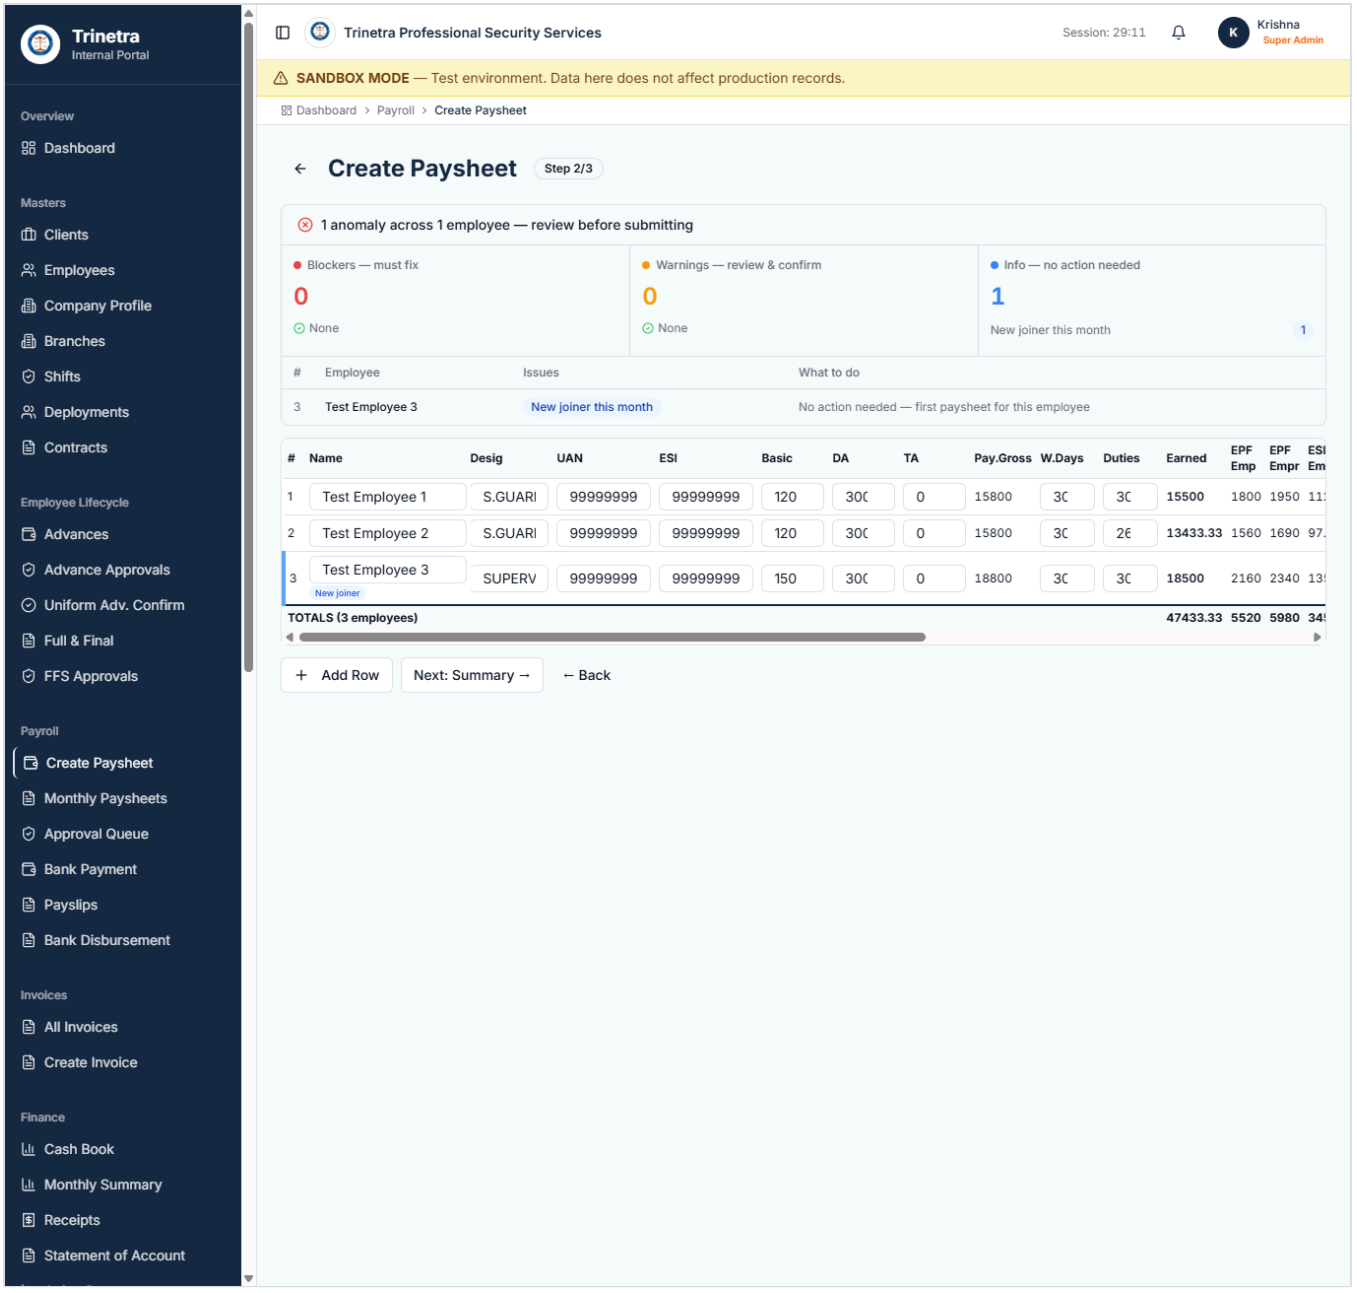

Figure 17.5 — Duties entered (30, 26, 30)

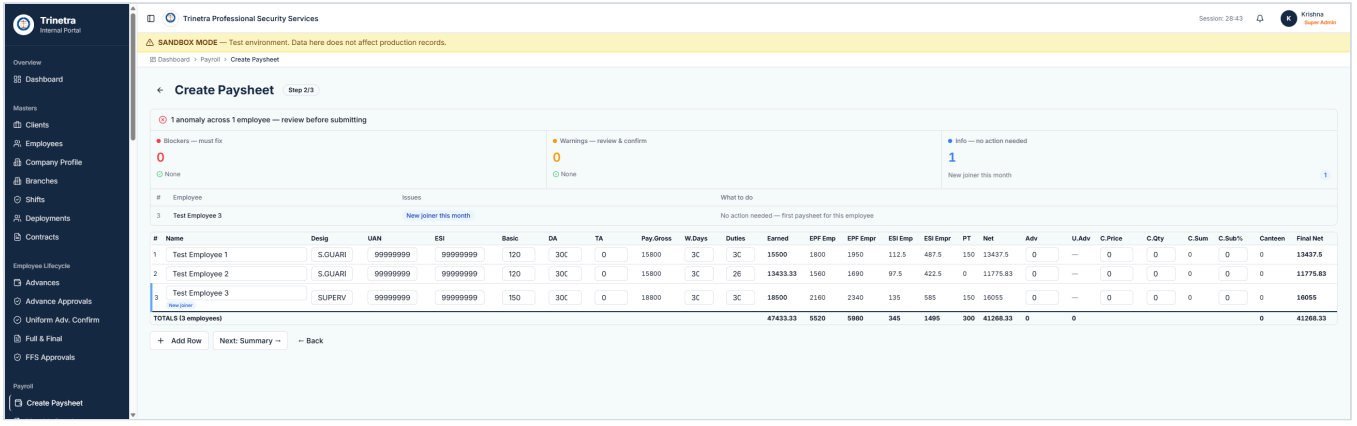

Figure 17.6 — All grid columns (scroll right in the app)

Step 3 — summary (Figure 17.7): **Save Draft** or **Submit for Approval**.

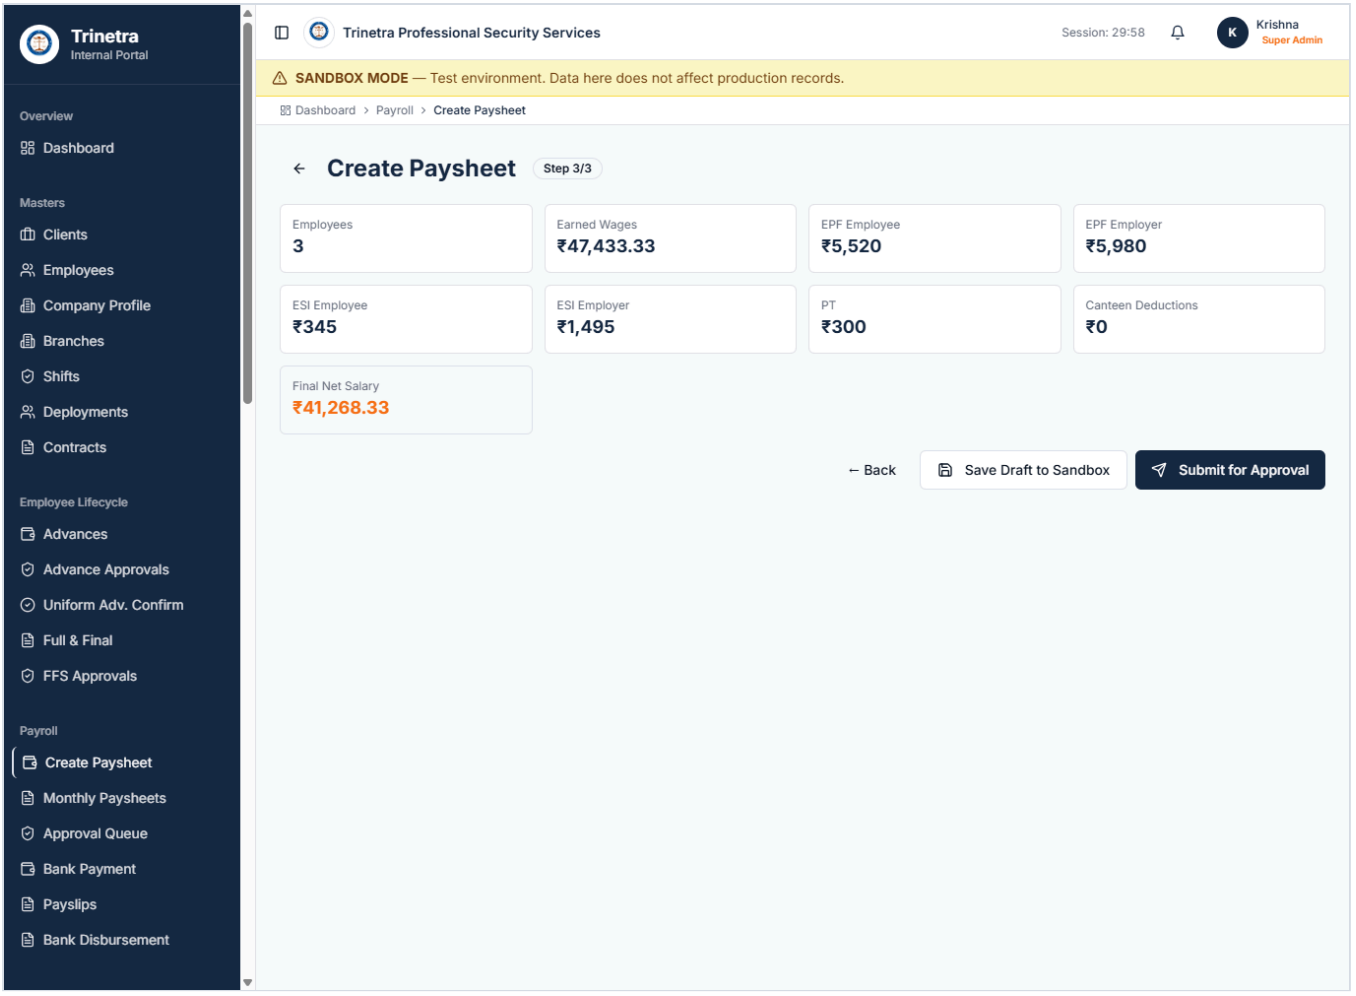

Figure 17.7 — Step 3 summary

17.2 How each column is calculated (as implemented)

For each employee (rounded to paise):

Item	Formula used by the portal
Payable Gross	Basic + DA + TA + 4hr OT + Weekly Off + Bonus + Relieving + Leave + Conveyance + Washing + Uniform + Special
Earned	(Payable Gross − Uniform) ÷ Working Days × Duties. *Uniform is kept by the company (issued in kind)*
EPF wages	Base per client method (default (Basic + DA) ÷ days × duties). If the client's "EPF Min Wages" is higher, that figure is used (minimum)
EPF Employee	12 % of EPF wages
EPF Employer	13 % of EPF wages
ESI	Only if client ESI is on **and** Earned ≤ ₹21,000. Base per client method. Employee 0.75 %, Employer 3.25 %
PT	If client PT is on: Earned ≥ ₹20,000 → ₹200; ≥ ₹15,000 → ₹150; otherwise 0
Net	Earned − EPF Employee − ESI Employee − PT
Final Net	Net − Advance − Uniform advance − Canteen (price × qty less subsidy %)

> ⚠️ These rates and thresholds are **built into the application**. Verify them against current law (finding OF-10).

17.3 Submit, approve, reject

- **Monthly Paysheets** list (Figure 17.8): View 👁, Edit 🖍 (Draft or Rejected only) and **Submit**. The browser asks "Submit anyway?" only when the paysheet has 🔴 or 🟡 flags; informational flags (new joiner) do not ask.
- **Approval Queue** (CEO, COO, Super Admin; Figure 17.10): labelled **Approve** and **Reject** buttons. Reject needs a reason of 10–200 characters (Figure 17.11).
- On approval: pending advance deductions are applied, uniform-advance confirmations are created, and the submitter is notified.

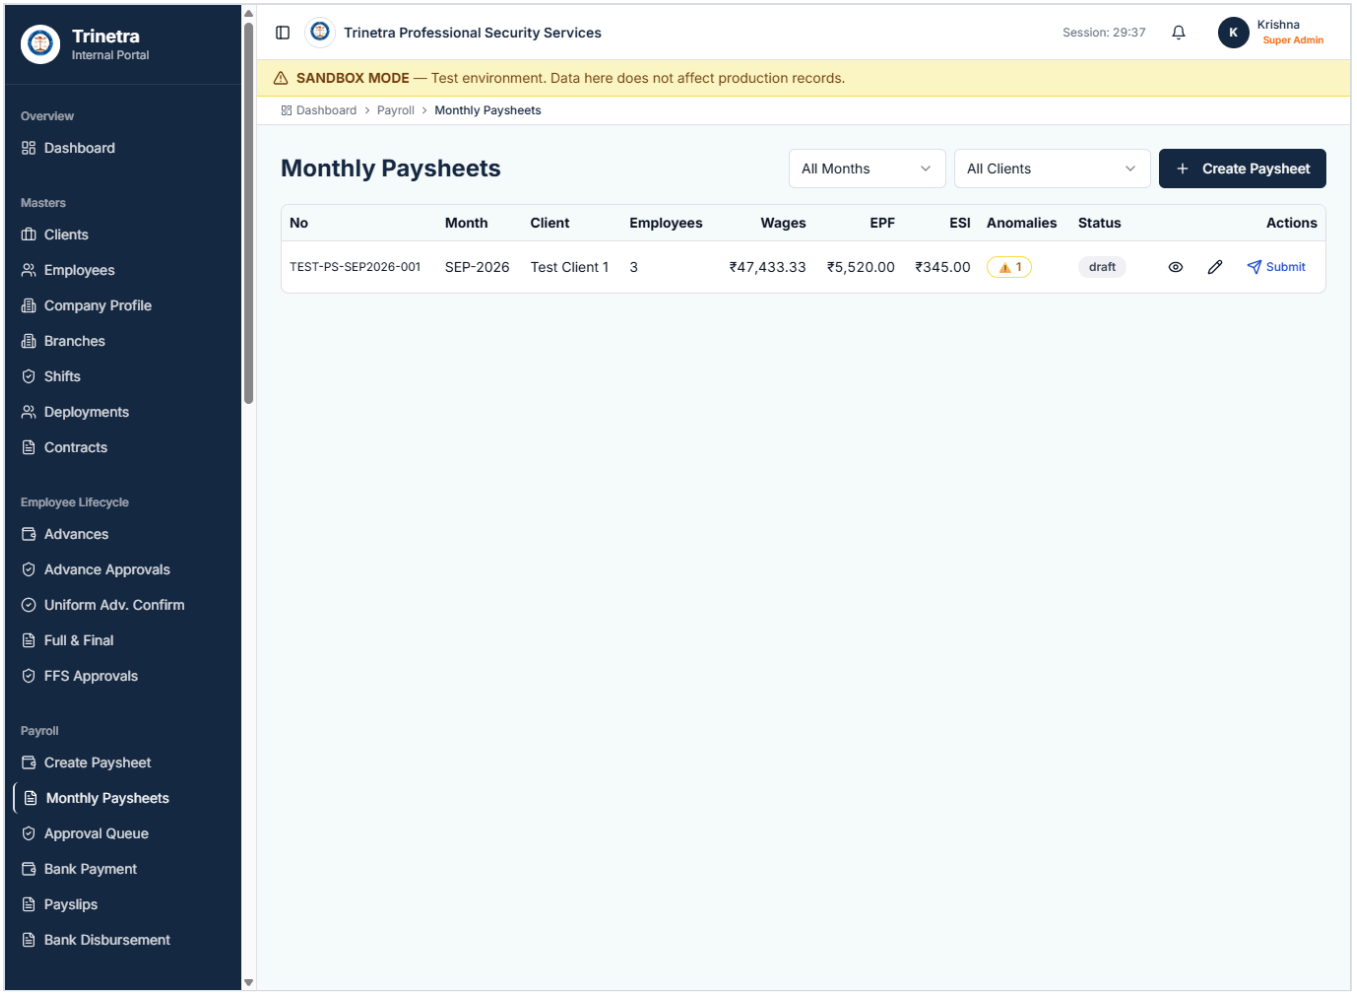

Figure 17.8 — Monthly Paysheets: draft

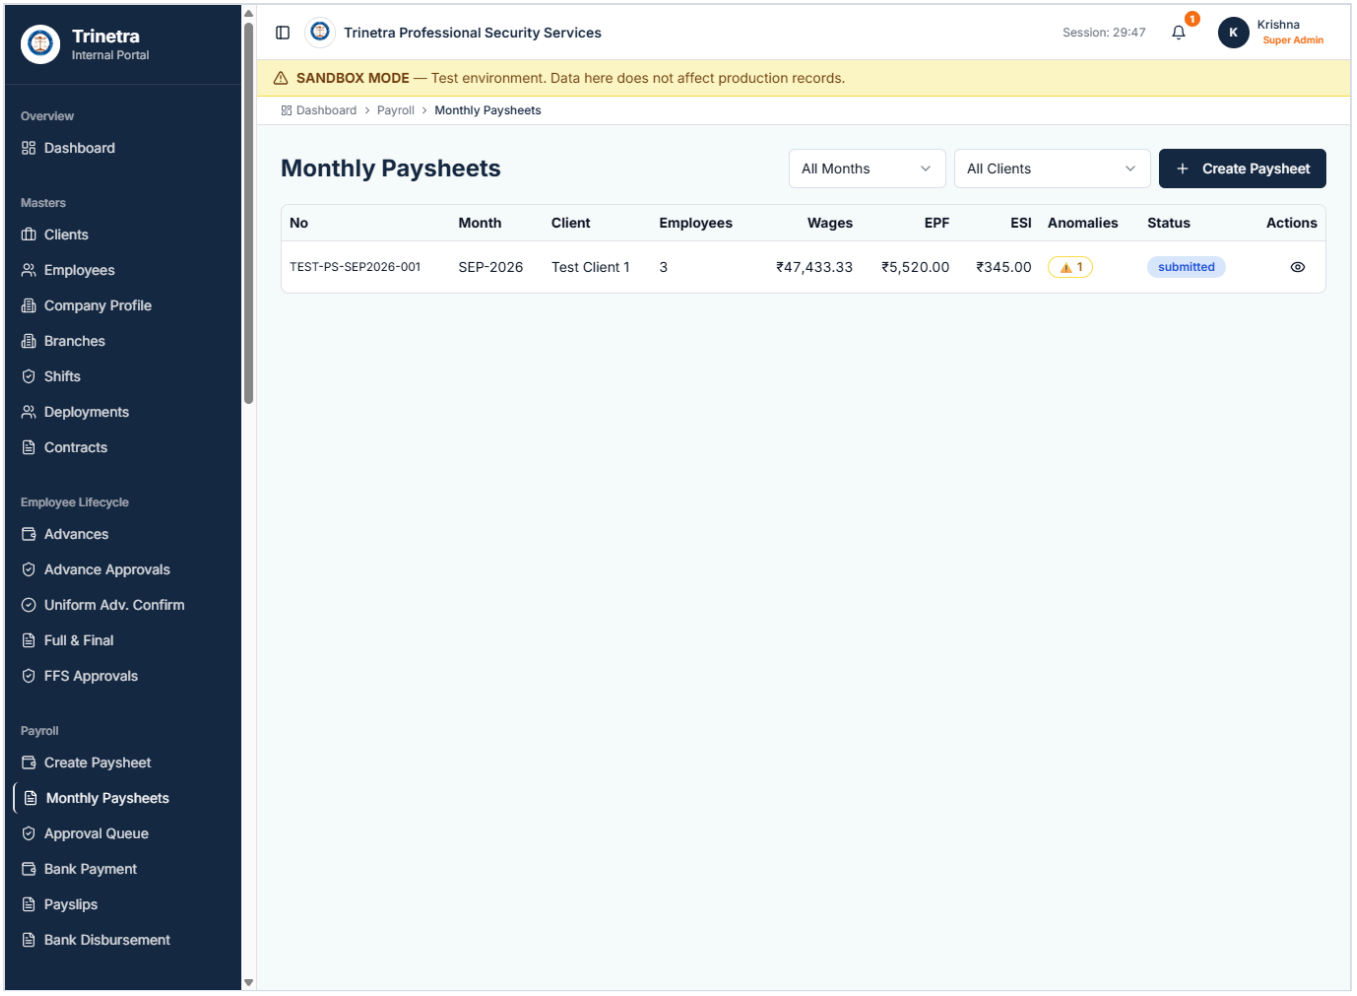

Figure 17.9 — Submitted

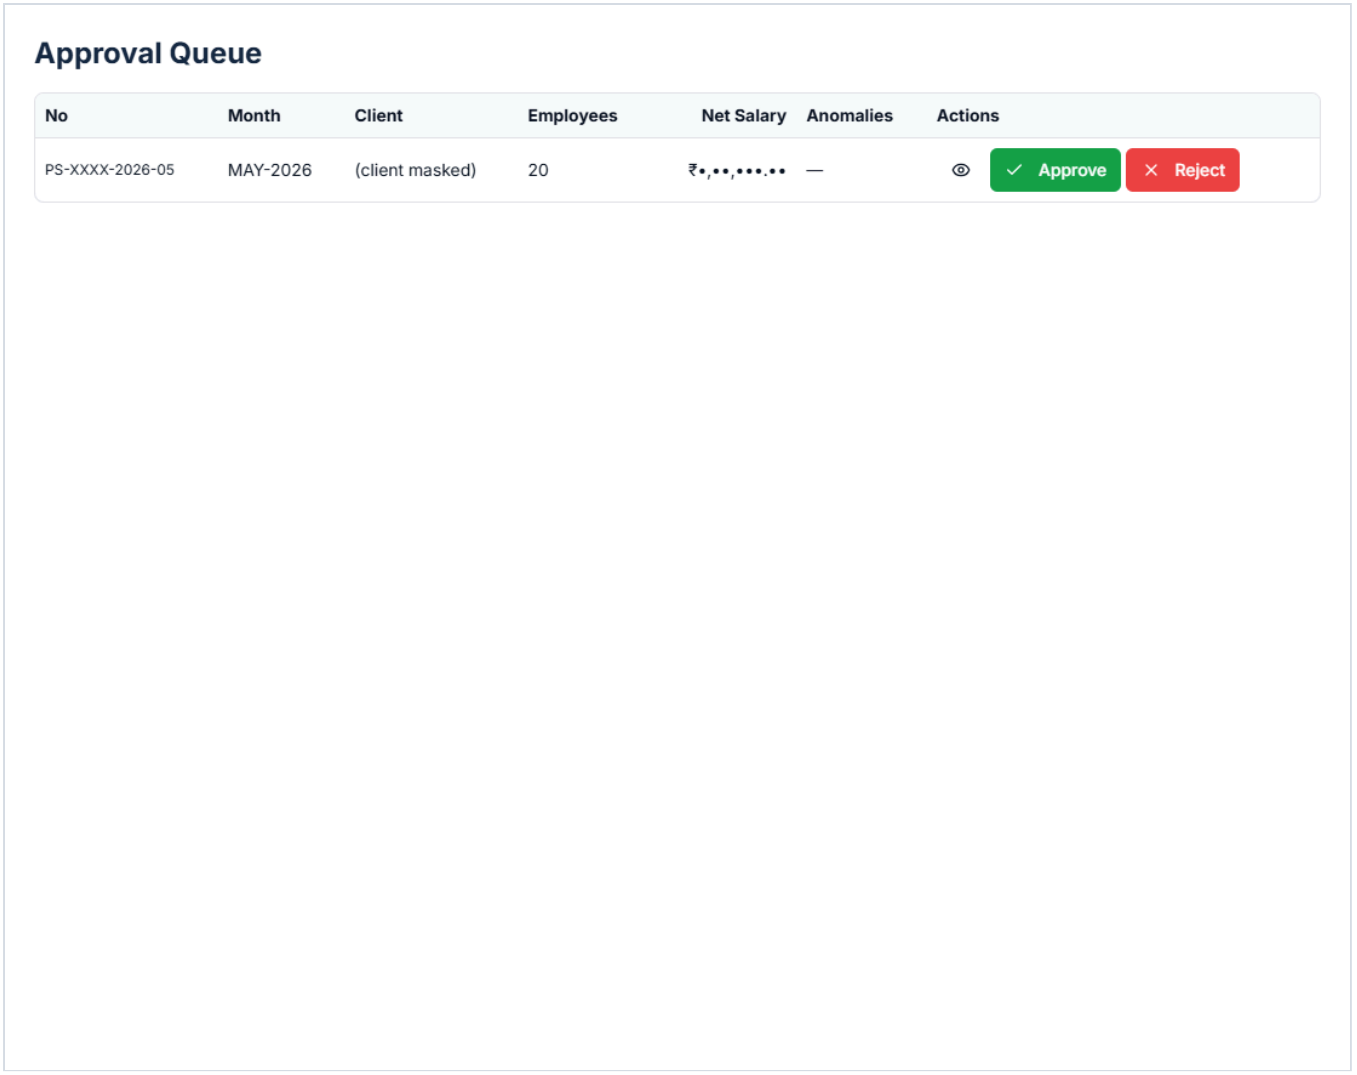

Figure 17.10 — Approval Queue

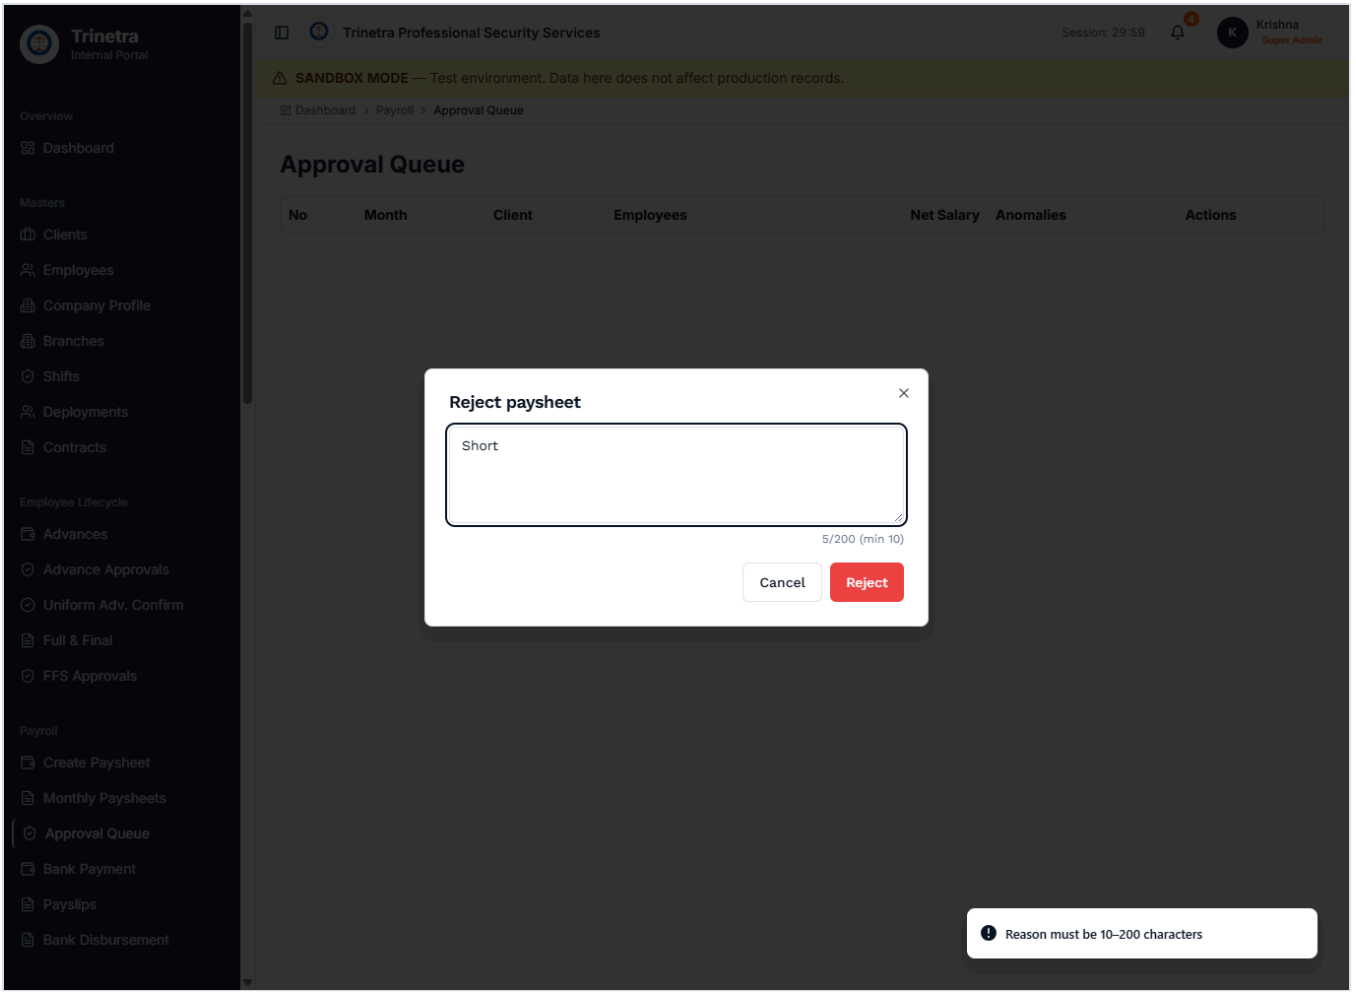

Figure 17.11 — Reject paysheet (reason 10–200 characters)

Statuses: Draft → Submitted → Approved, or Rejected (editable again) → … ; Cancelled (Super Admin only; chapter 25).

17.4 View, print, export

Open a paysheet (Figure 17.12): **Print / PDF**, **Excel** (33 columns, CEO / COO), **Generate Invoice**, and **Cancel Paysheet** (Super Admin).

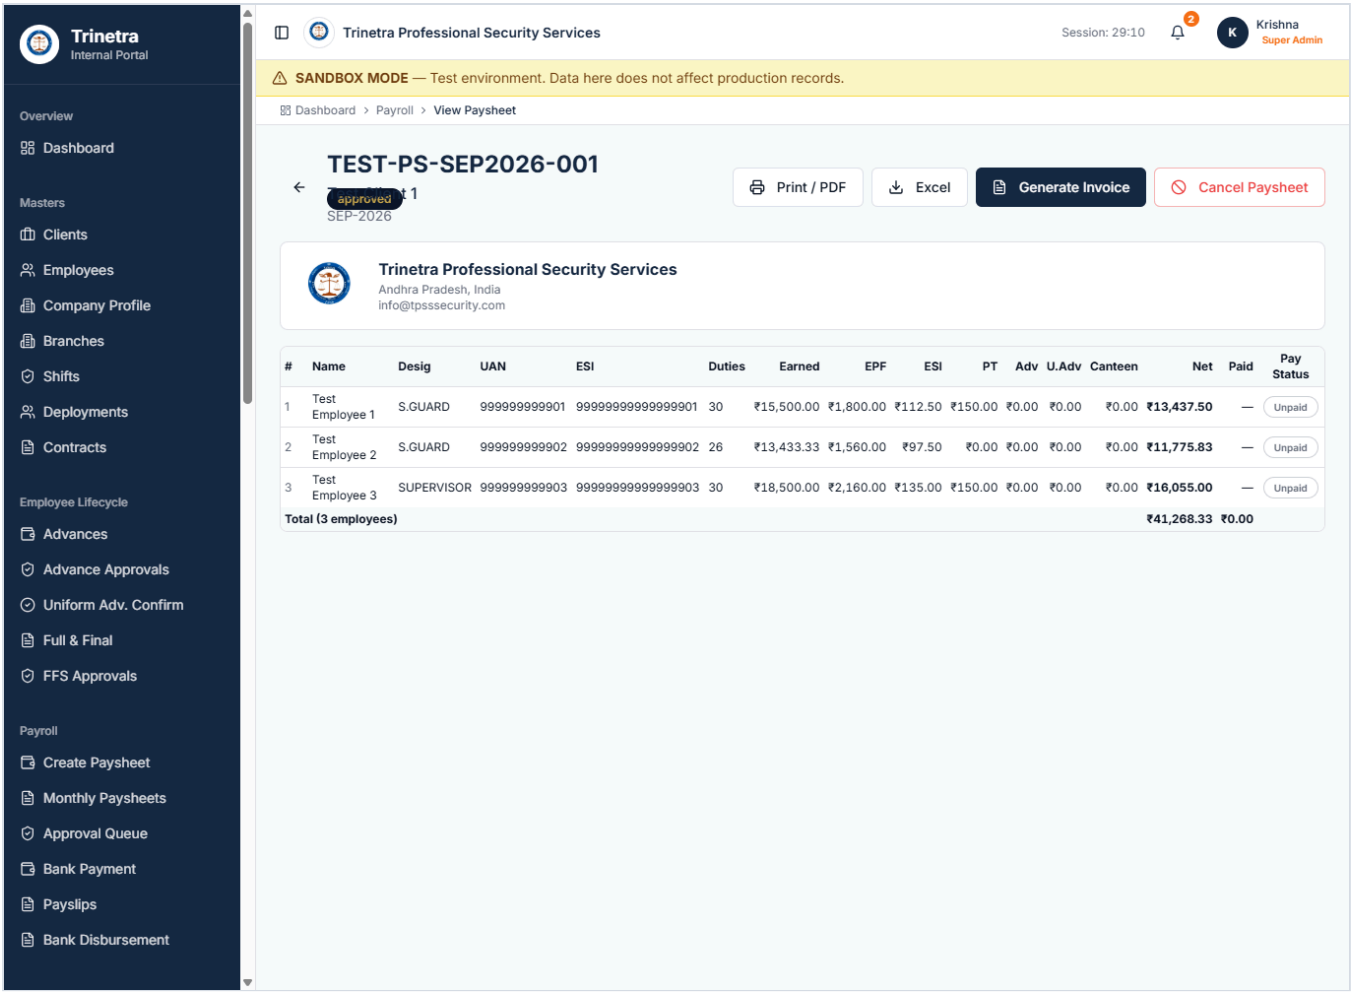

Figure 17.12 — Approved paysheet TEST-PS-SEP2026-001

17.5 Payslips

Menu: Payroll › Payslips. Choose **Client / Site*** and **Month*** (and optionally an employee), then **Generate PDF**. The button is disabled until a client and month are chosen.

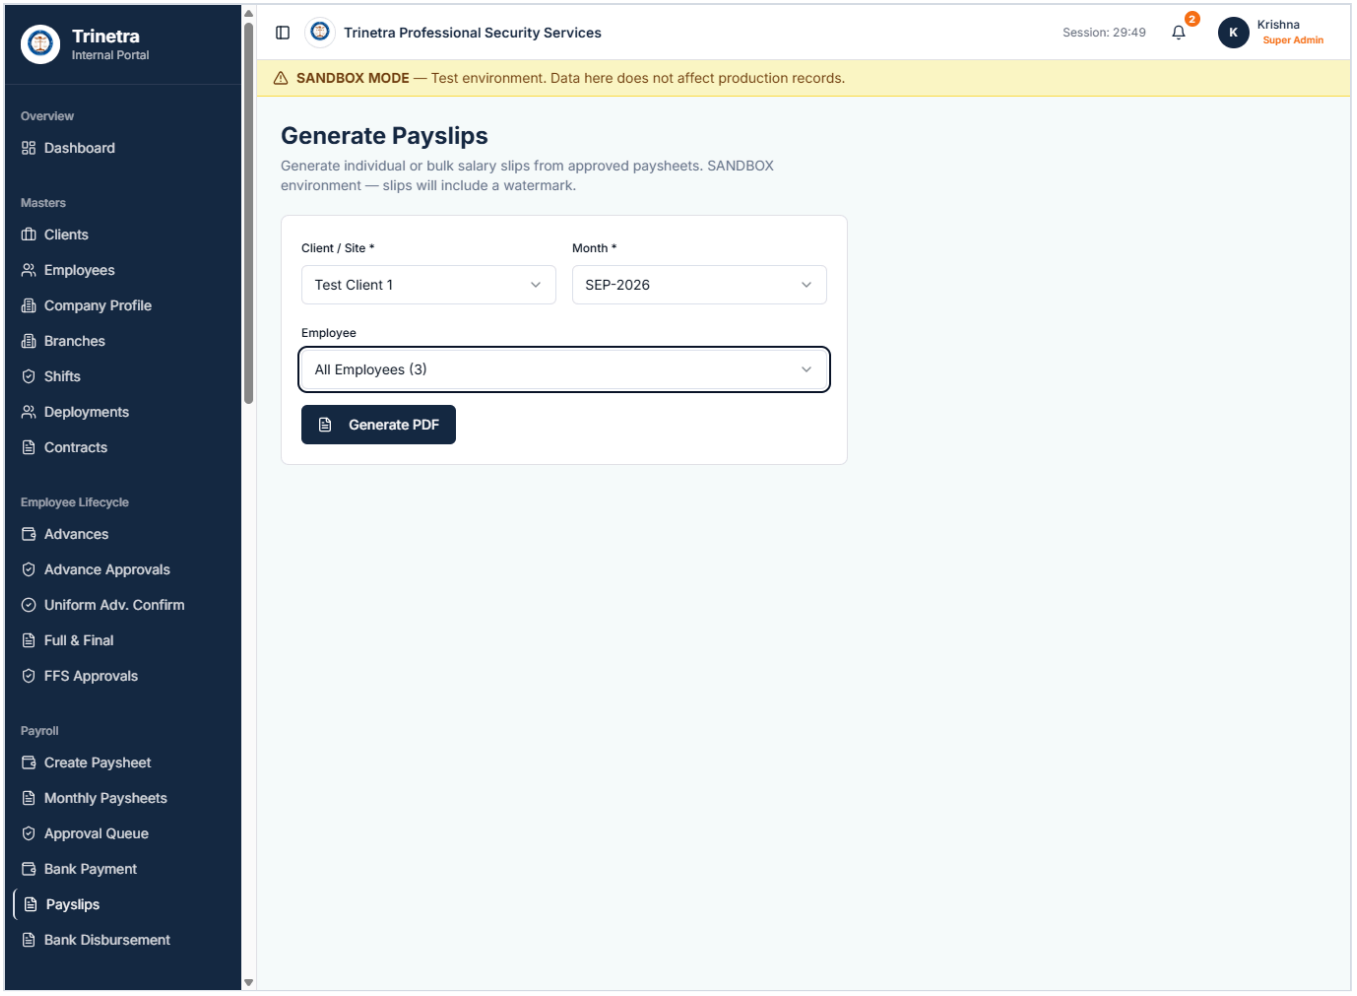

Figure 17.13 — Payslips

PROFESSIONAL TAX DEDUCTION REPORT

Client: Test Client 1 | Month: SEP-2026

#	Employee Name	Designation	Gross Earned	PT Deducted
1	Test Employee 1	S.GUARD	Rs. 15,500.00	**Rs. 150.00**
2	Test Employee 3	SUPERVISOR	Rs. 18,500.00	**Rs. 150.00**
	Total (2 employees)			**Rs. 300.00**

SANDBOX

System-generated PT Deduction Report. Generated on 13 Oct 2026.

Figure 18.5 — PT Report

18.2 ECR and ESI challan files

Menu: Compliance › ECR / ESI Challan. Choose **Year** and **Month**. The page shows the number of approved paysheets and employee lines.

- **EPFO ECR 2.0** tab → **Download ECR text file**. Fields are separated by `#~#`. Only members with a UAN are included.
- **ESI Challan** tab → **Download ESI Challan Excel**. Only members with an ESI number are included.

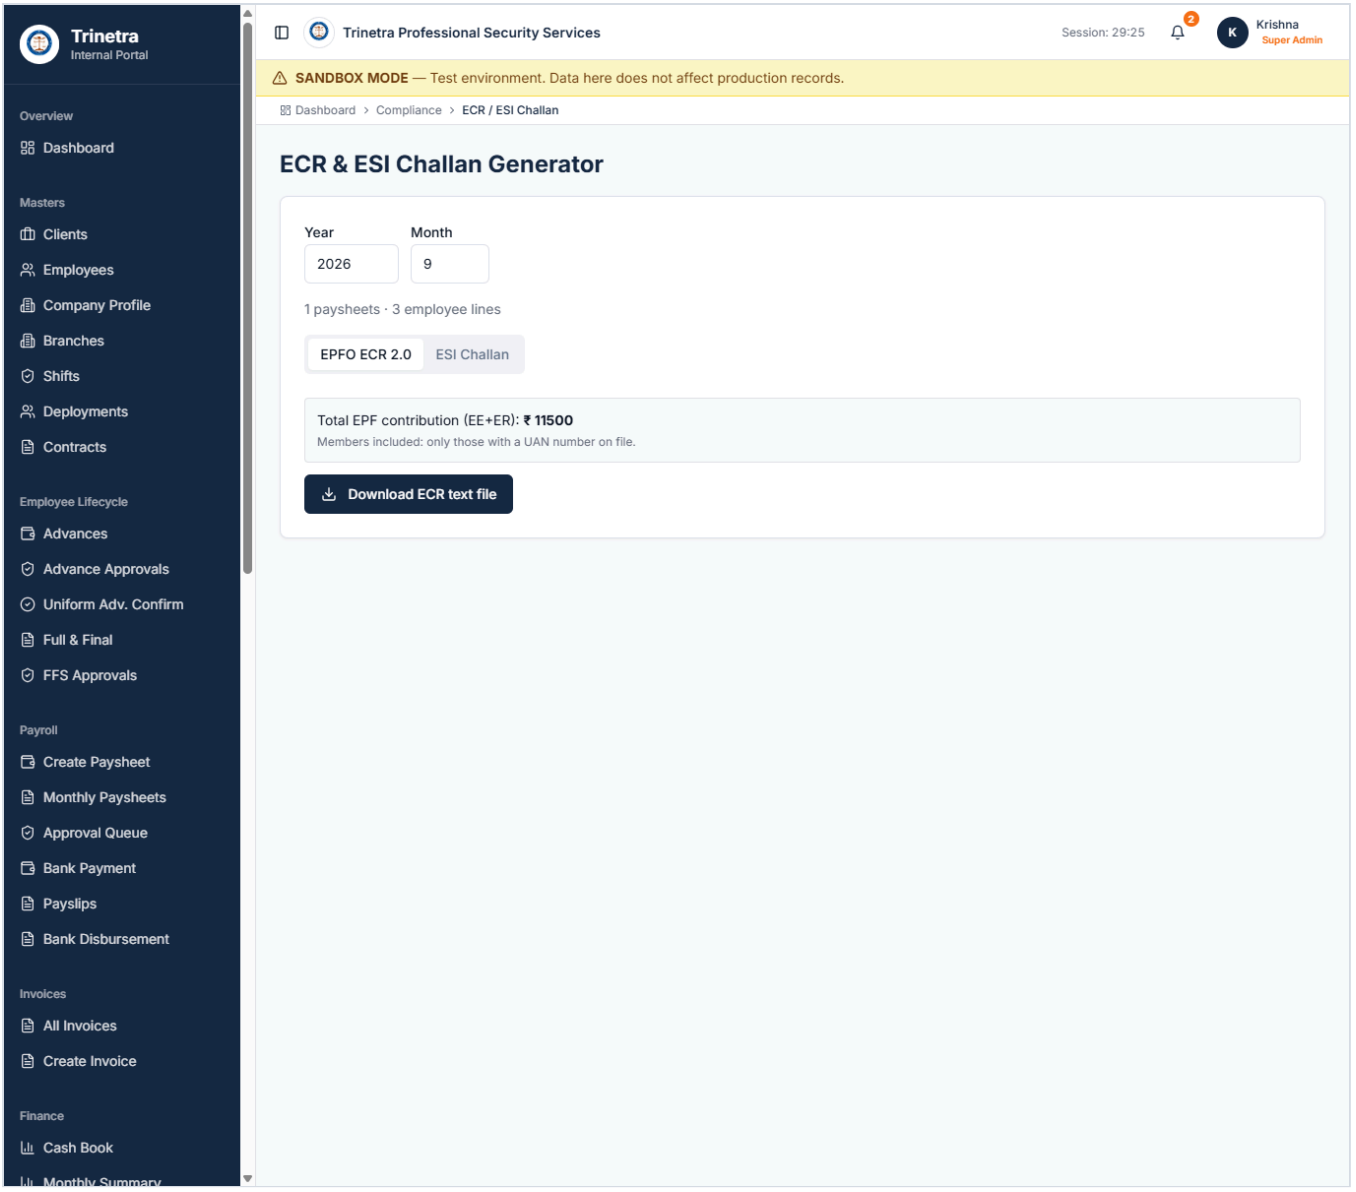

Figure 18.6 — ECR generator: 1 paysheet, 3 lines, EPF ₹11,500

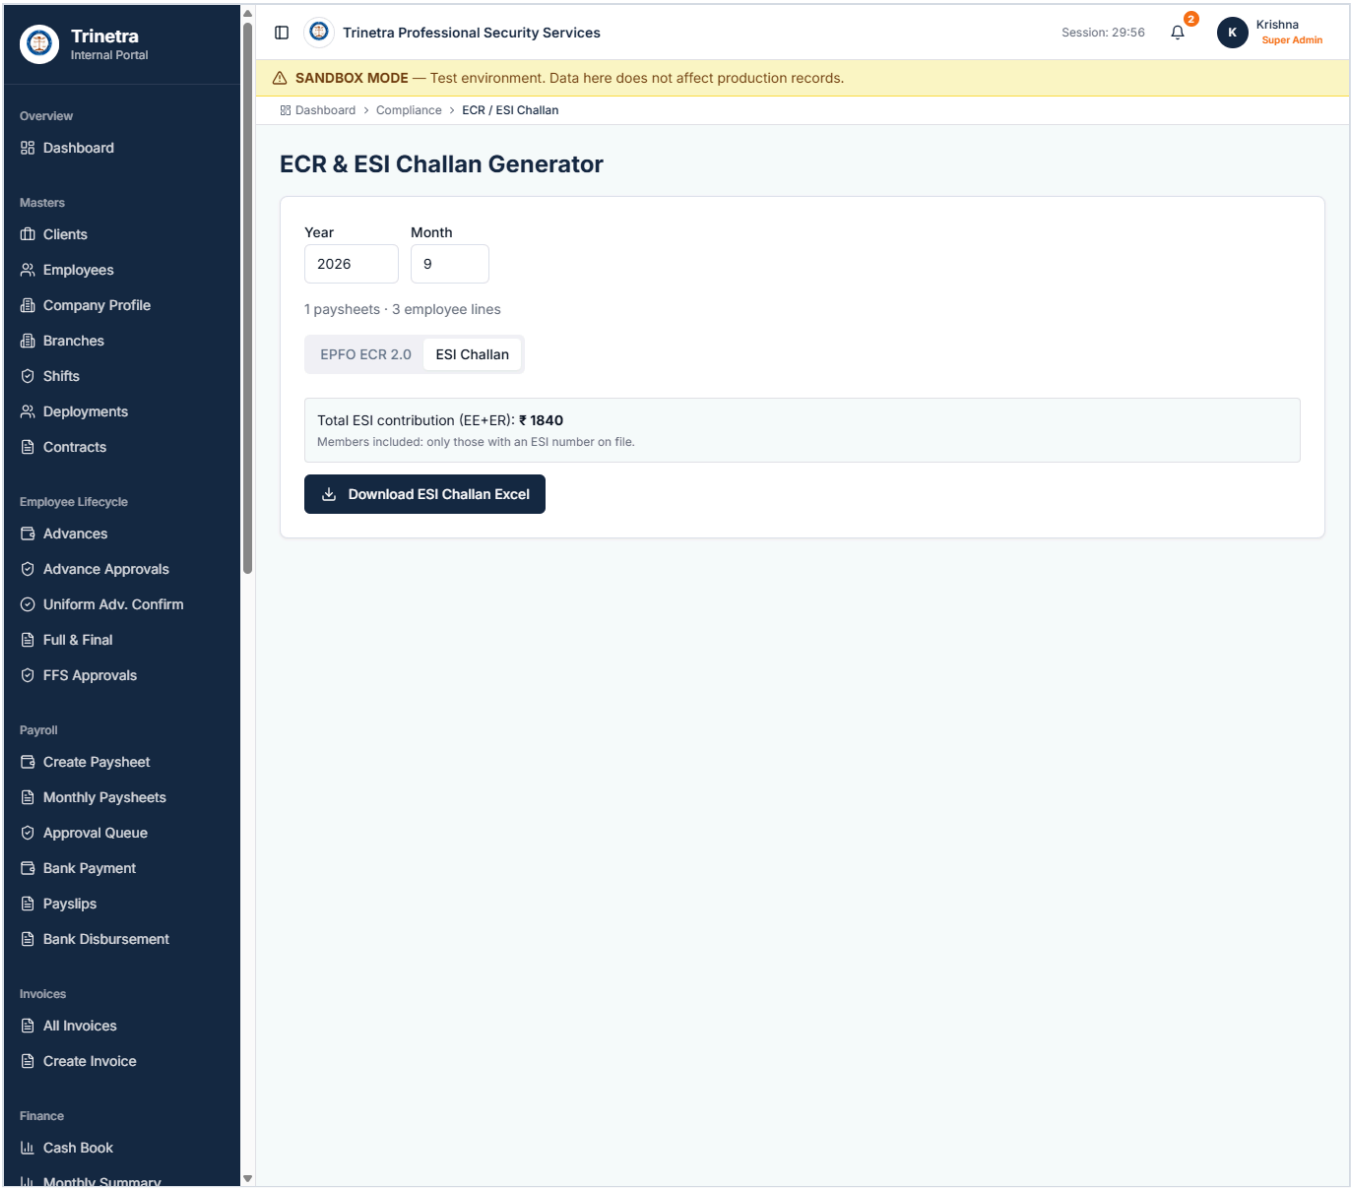

Figure 18.7 — ESI challan: total ₹1,840

How the files are filled:

- ECR **NCP days** = working days − duties for each member.
- ESI challan **No of Days** = the member's duties. The column headings are on row 1, with no company header rows above them.

> ⚠️ **Check before uploading.** By the owner's decision the statutory rules are kept as implemented: the ECR employer difference is 13 % − 8.33 %, and gross wages include the uniform allowance. Verify both files against the current EPFO and ESIC portal formats.

18.3 Compliance calendar and payments

- **Compliance › Compliance Calendar** (Figure 18.8): monthly due-date tasks, overdue and due-this-week counts. **Seed 12 Months** creates the standard tasks; **Mark Complete** records the challan, amount and notes.
- **Compliance › Payments → Record Payment** (Figures 18.9–18.11):

Field	Mandatory
Type (EPF, ESI, GST, PT, TDS, OTHER)	**Yes**
For Month	**Yes**
Paid On	**Yes**
Amount (₹)	**Yes** ("Amount required")
Late Fee, Interest	No
Challan Number, Bank Name, Reference / UTR, Branch, Notes	No

Saving posts a **payment** to the ledger ("Compliance payment recorded & posted to ledger").

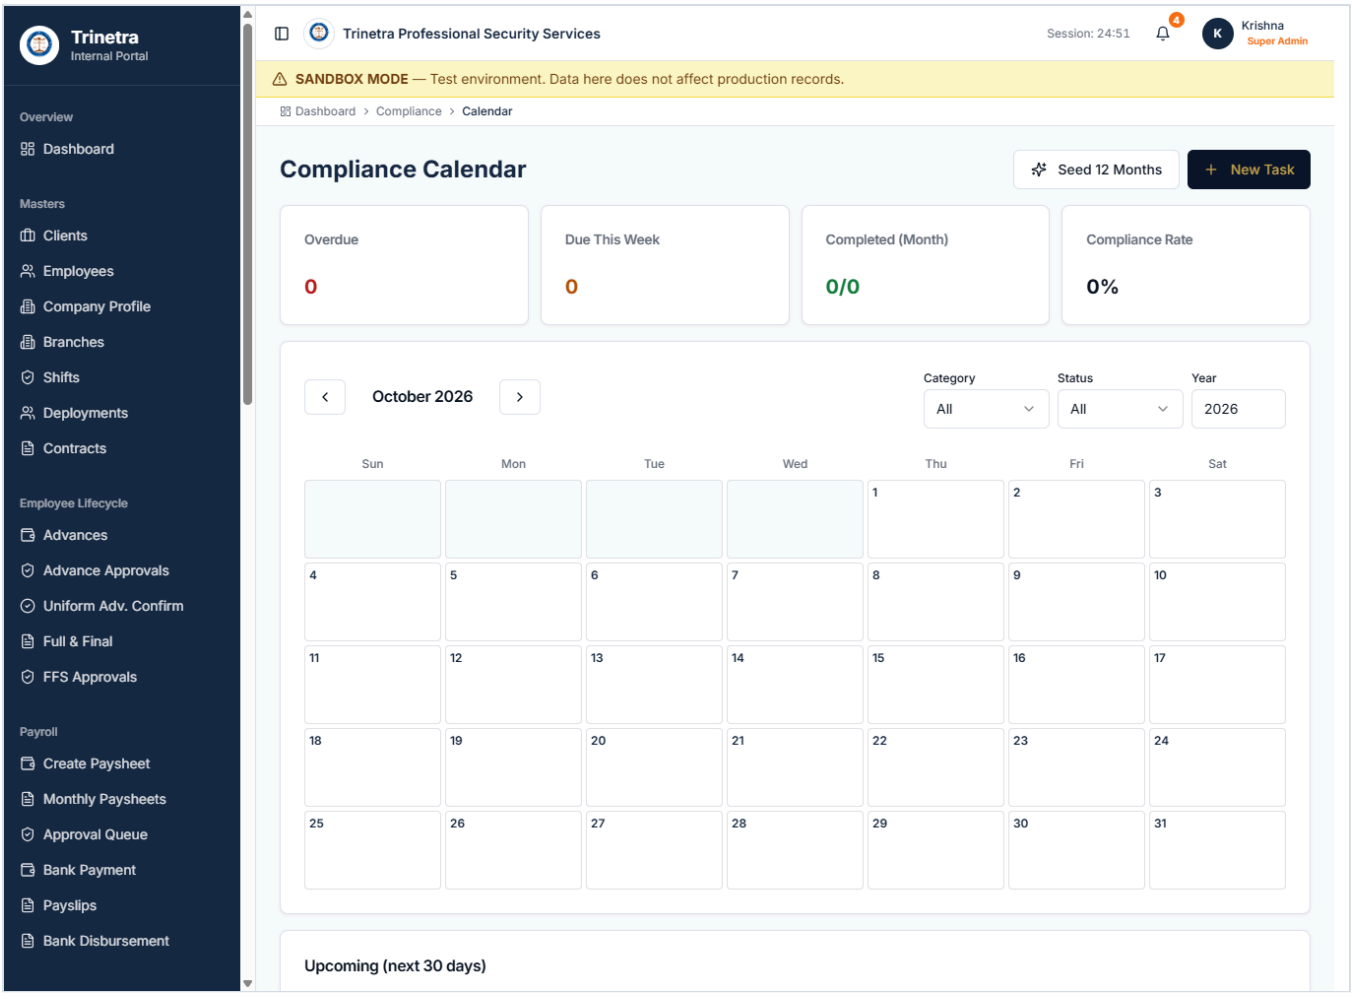

Figure 18.8 — Compliance Calendar

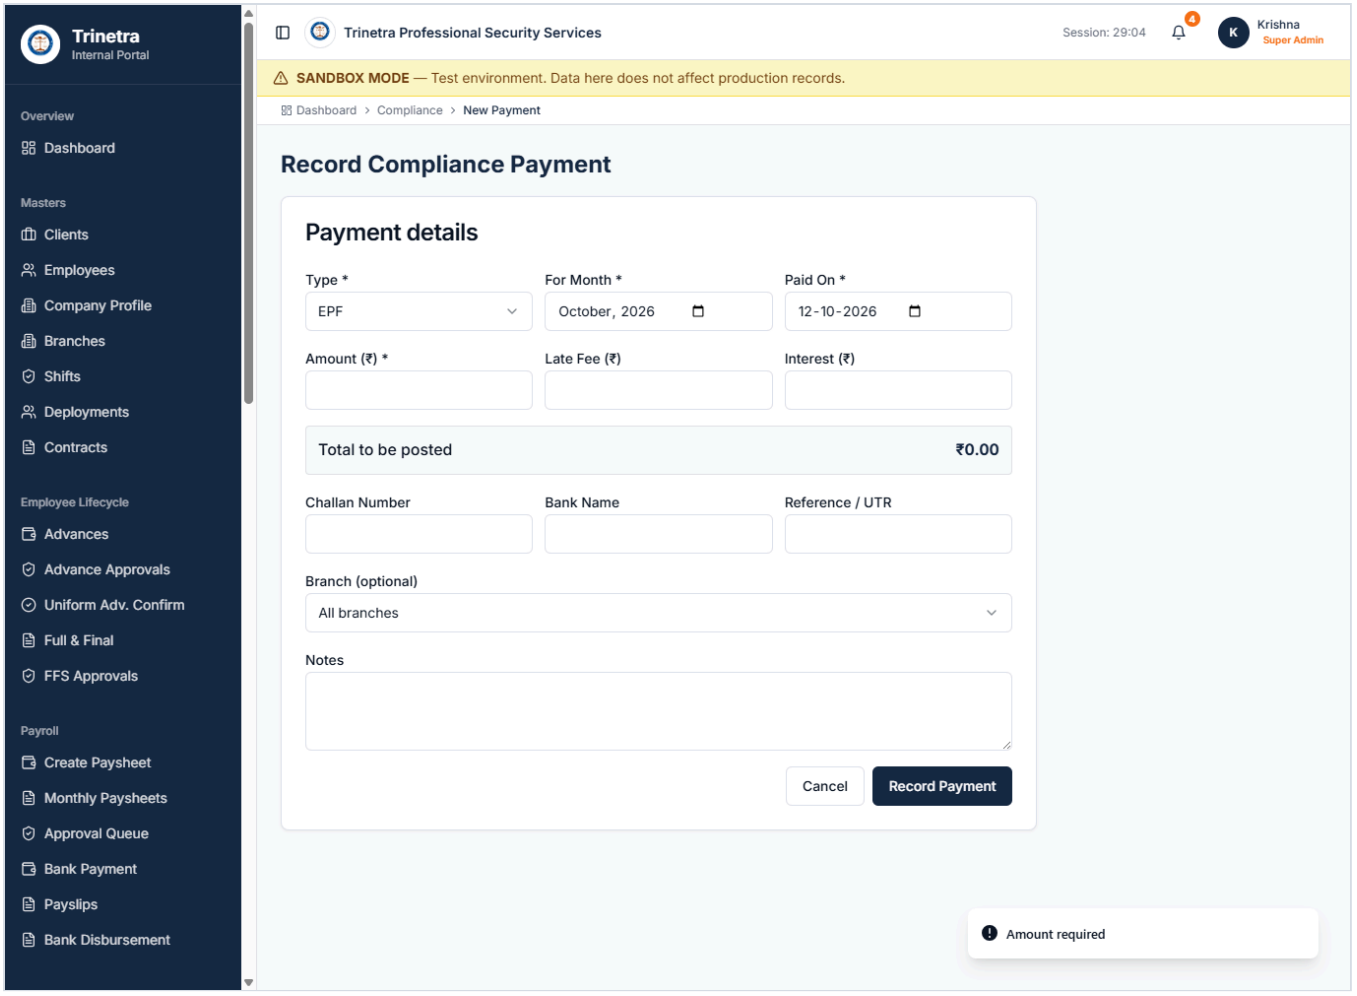

Figure 18.9 — "Amount required"

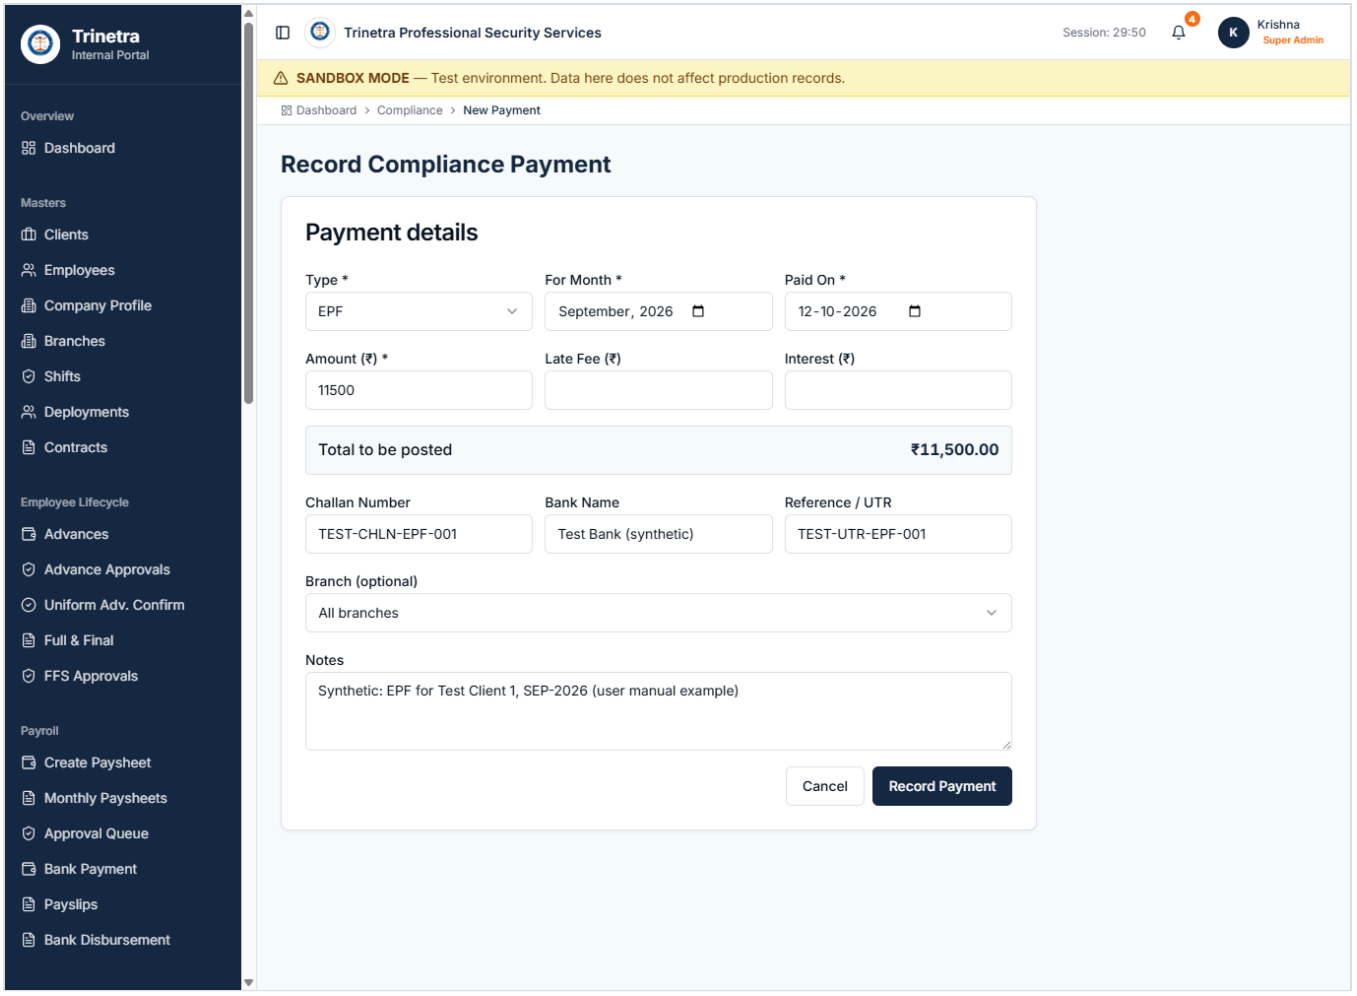

Figure 18.10 — Recording EPF for September

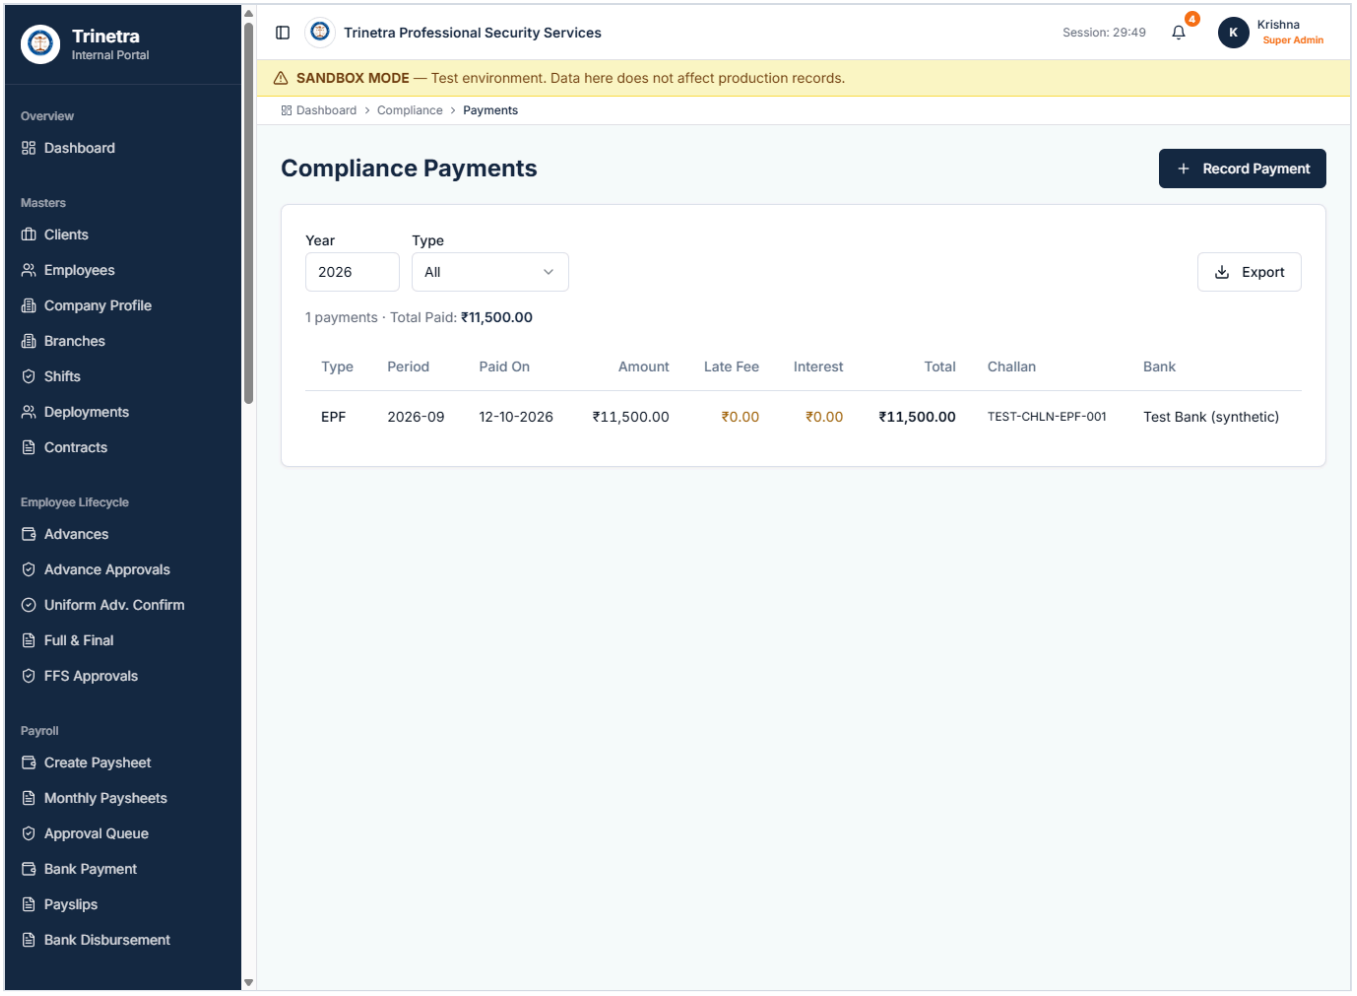

Figure 18.11 — Compliance Payments

19. Employee bank-payment sheet

Menu: Payroll › Bank Payment (CEO, COO, Accountant, Super Admin)

Prerequisites: an **approved** paysheet, employee bank details and IFSC, and a **TPSS debit account** (chapter 10).

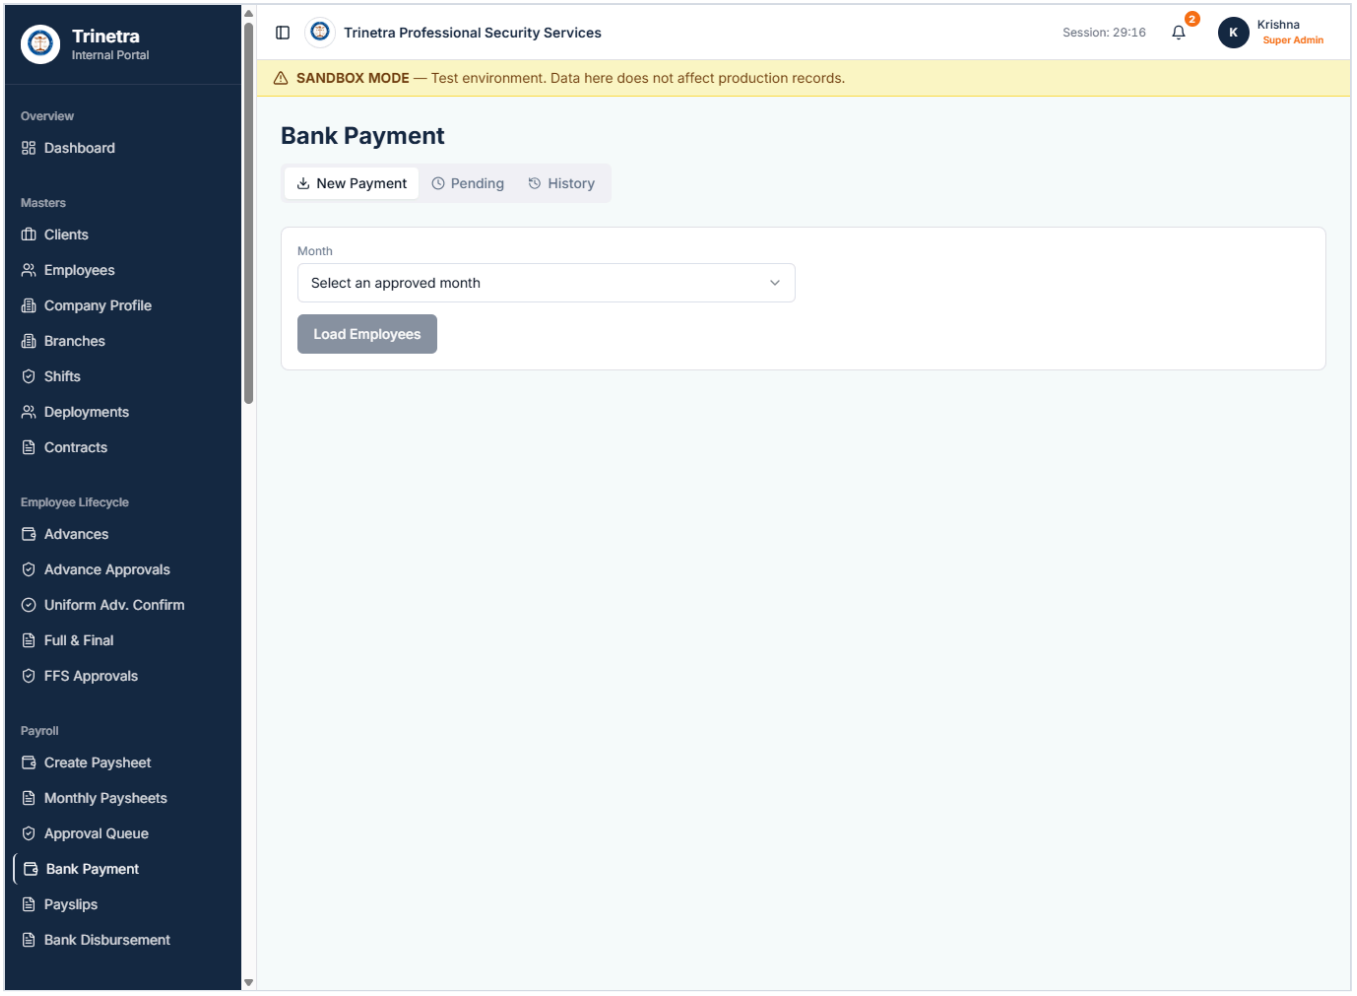

Figure 19.0 — Bank Payment (New Payment, Pending and History tabs)

1. **Month**: only months with approved paysheets are listed.
2. Tick the **clients** and click **Load Employees**.
3. **Select All (Full Pay)**, or tick individual employees. Use **Partial ₹** to pay part of the net, and choose the payment **Type** (for example N = NEFT).
4. Choose the **Debit Account (TPSS)**.
5. Click **Finalise & Generate Excel**. The batch is saved first; only then is the Excel produced. Employees show **Paid** or **Partial**, and the batch total is posted to the ledger as a **Staff Salary** payment (chapter 21).

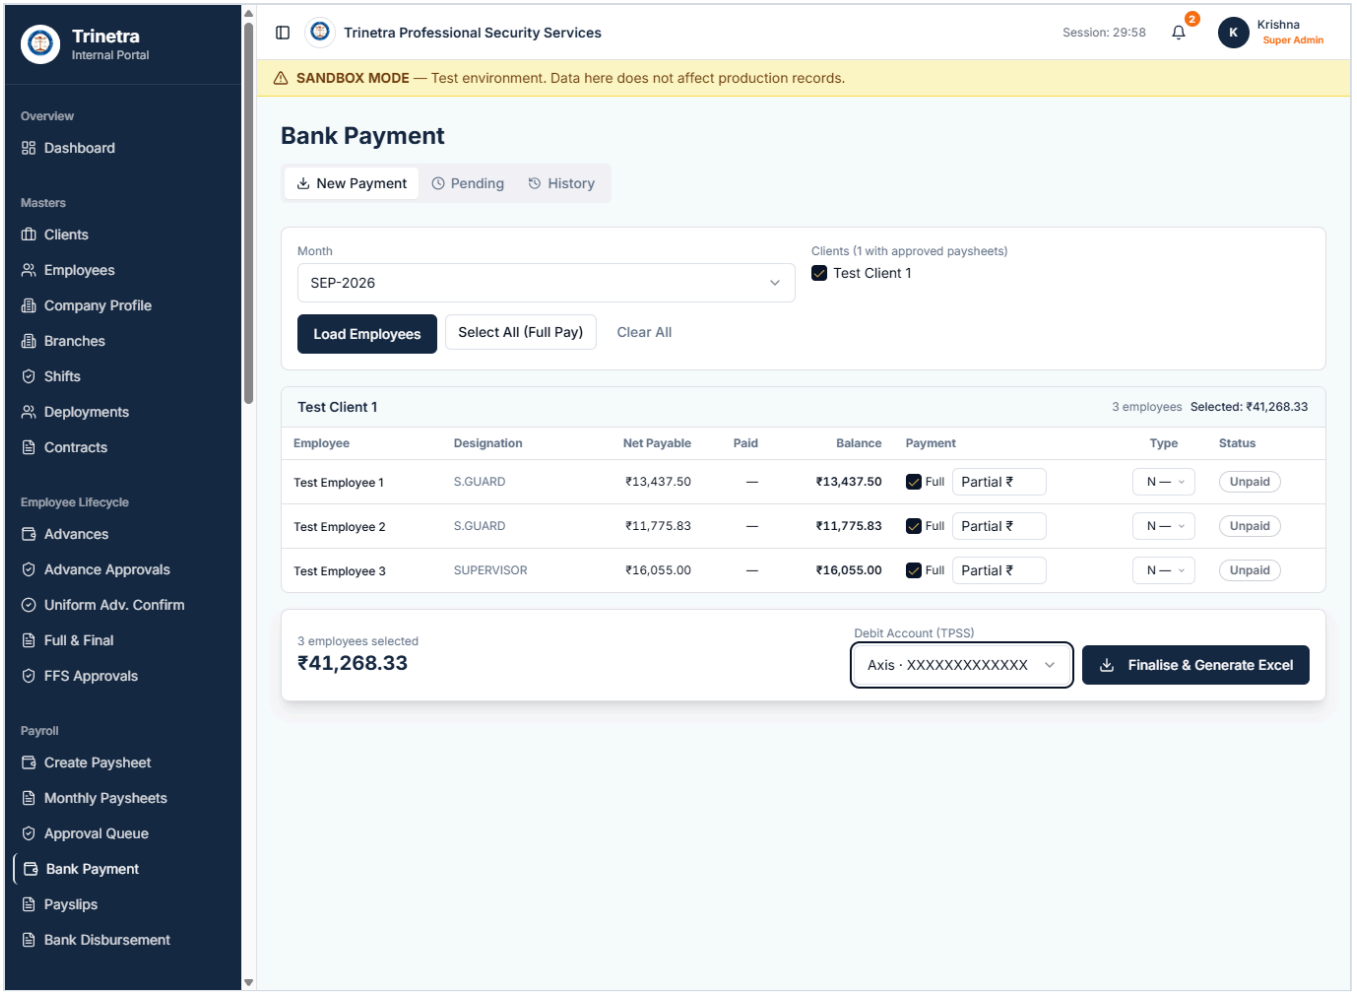

Figure 19.1 — Three employees selected, ₹41,268.33

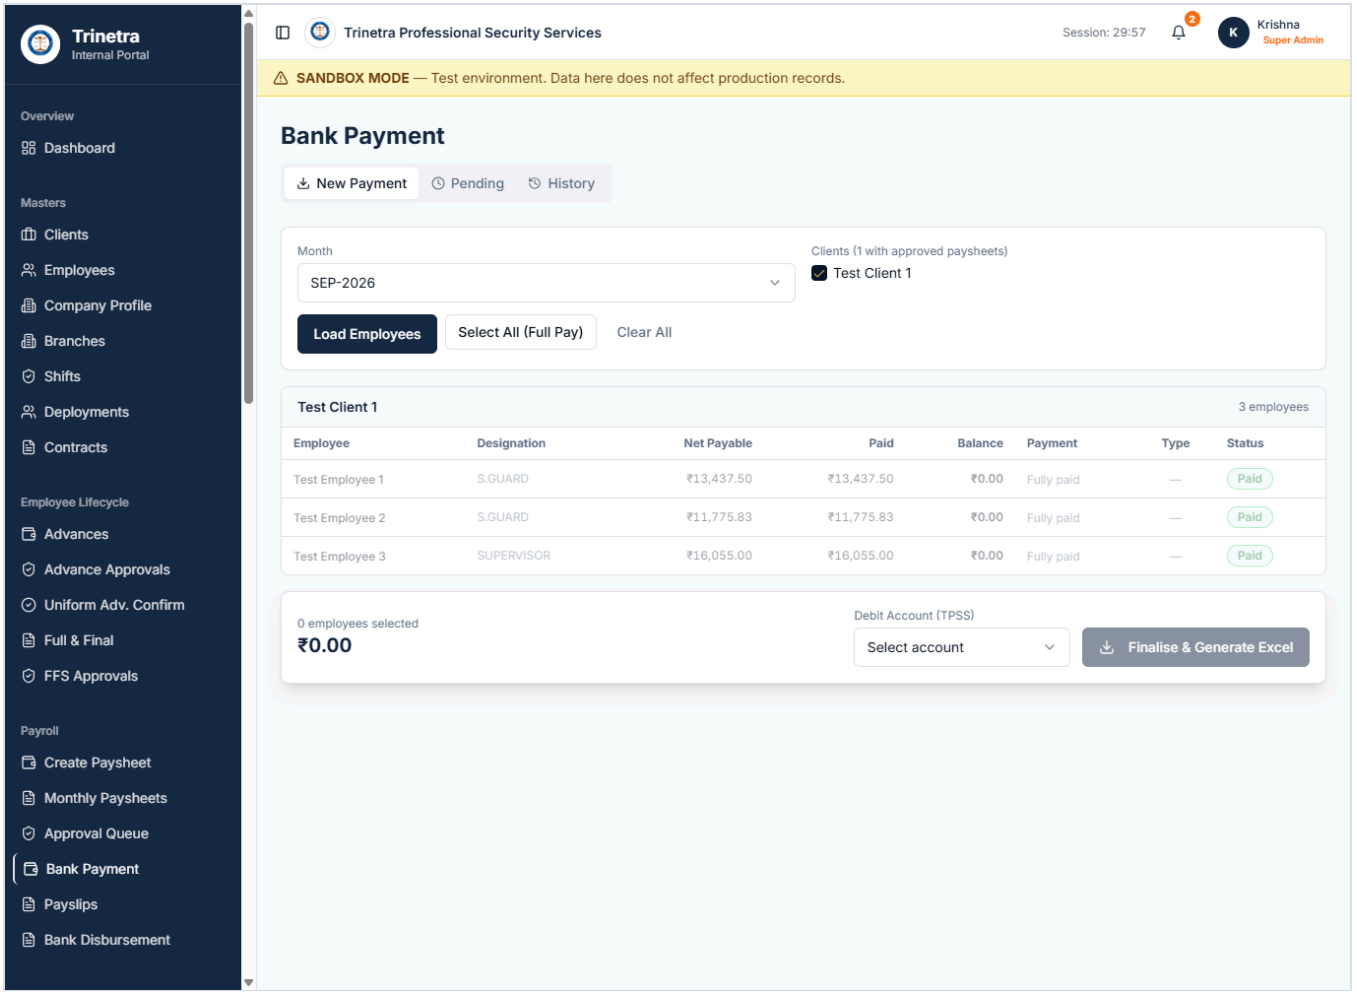

Figure 19.2 — After finalising: Fully paid

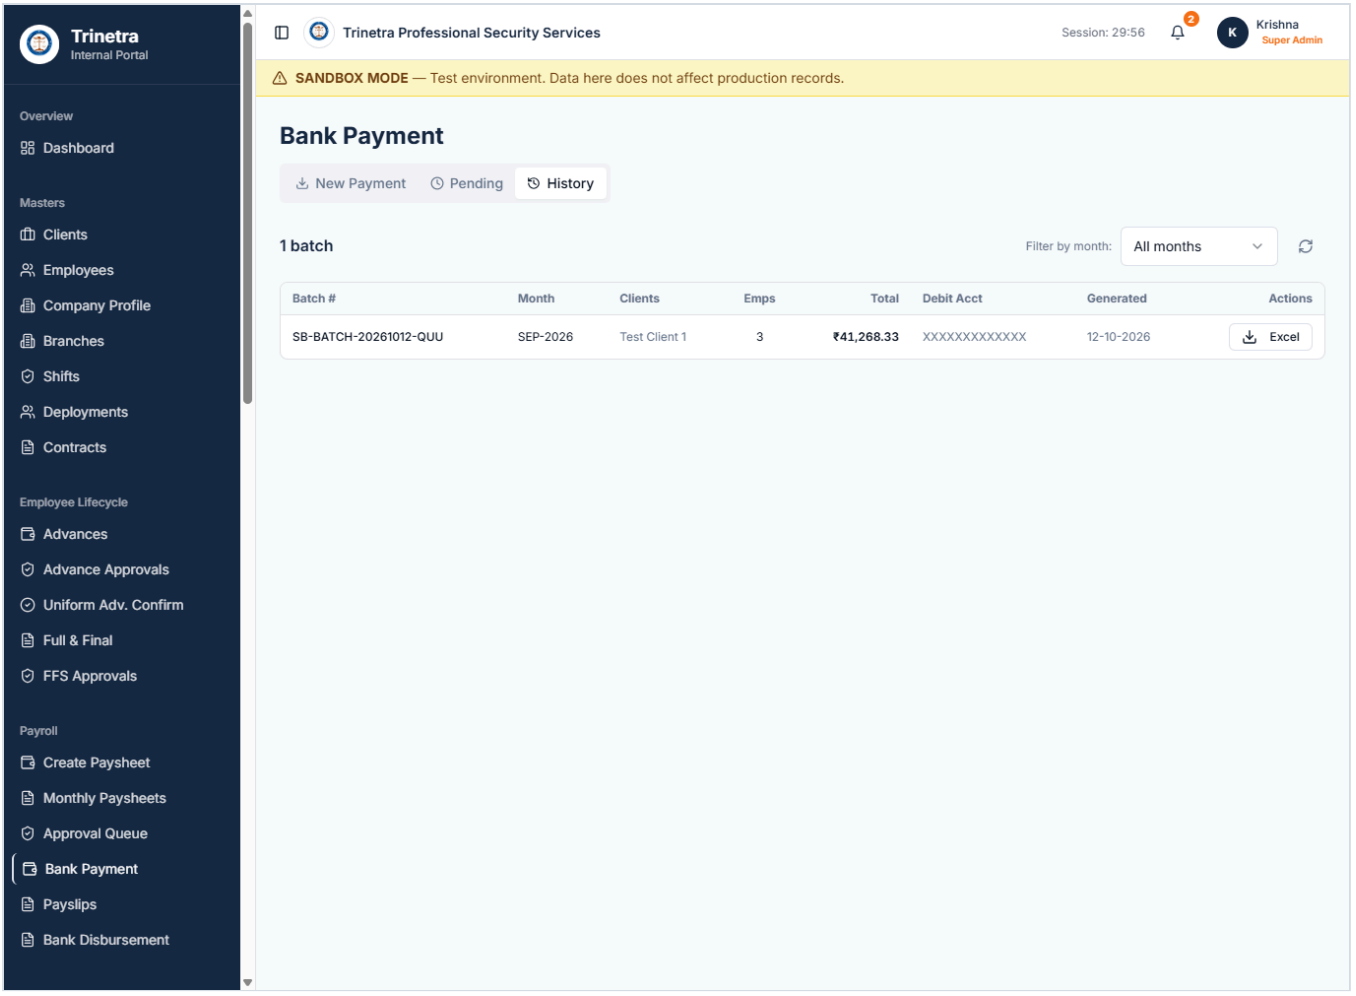

Figure 19.3 — History tab (re-download a batch's Excel)

Excel columns: Payment Identifier, Salary, Salary Credit Date, Beneficiary Name, Account Number, Debit Account Number, Transaction Serial Number, IFSC Code, Account Type, Contact Number.

Errors: "Select a month and at least one client", "Select a TPSS debit account", "Select at least one employee for payment".

Bank Disbursement report (Payroll › Bank Disbursement): choose a month whose paysheet is approved **and** whose invoice has been issued, then **Generate PDF + CSV** (Figures 19.4–19.5). The CSV's payment reference is the paysheet number plus the employee code; files generated in the sandbox are marked **SANDBOX**.

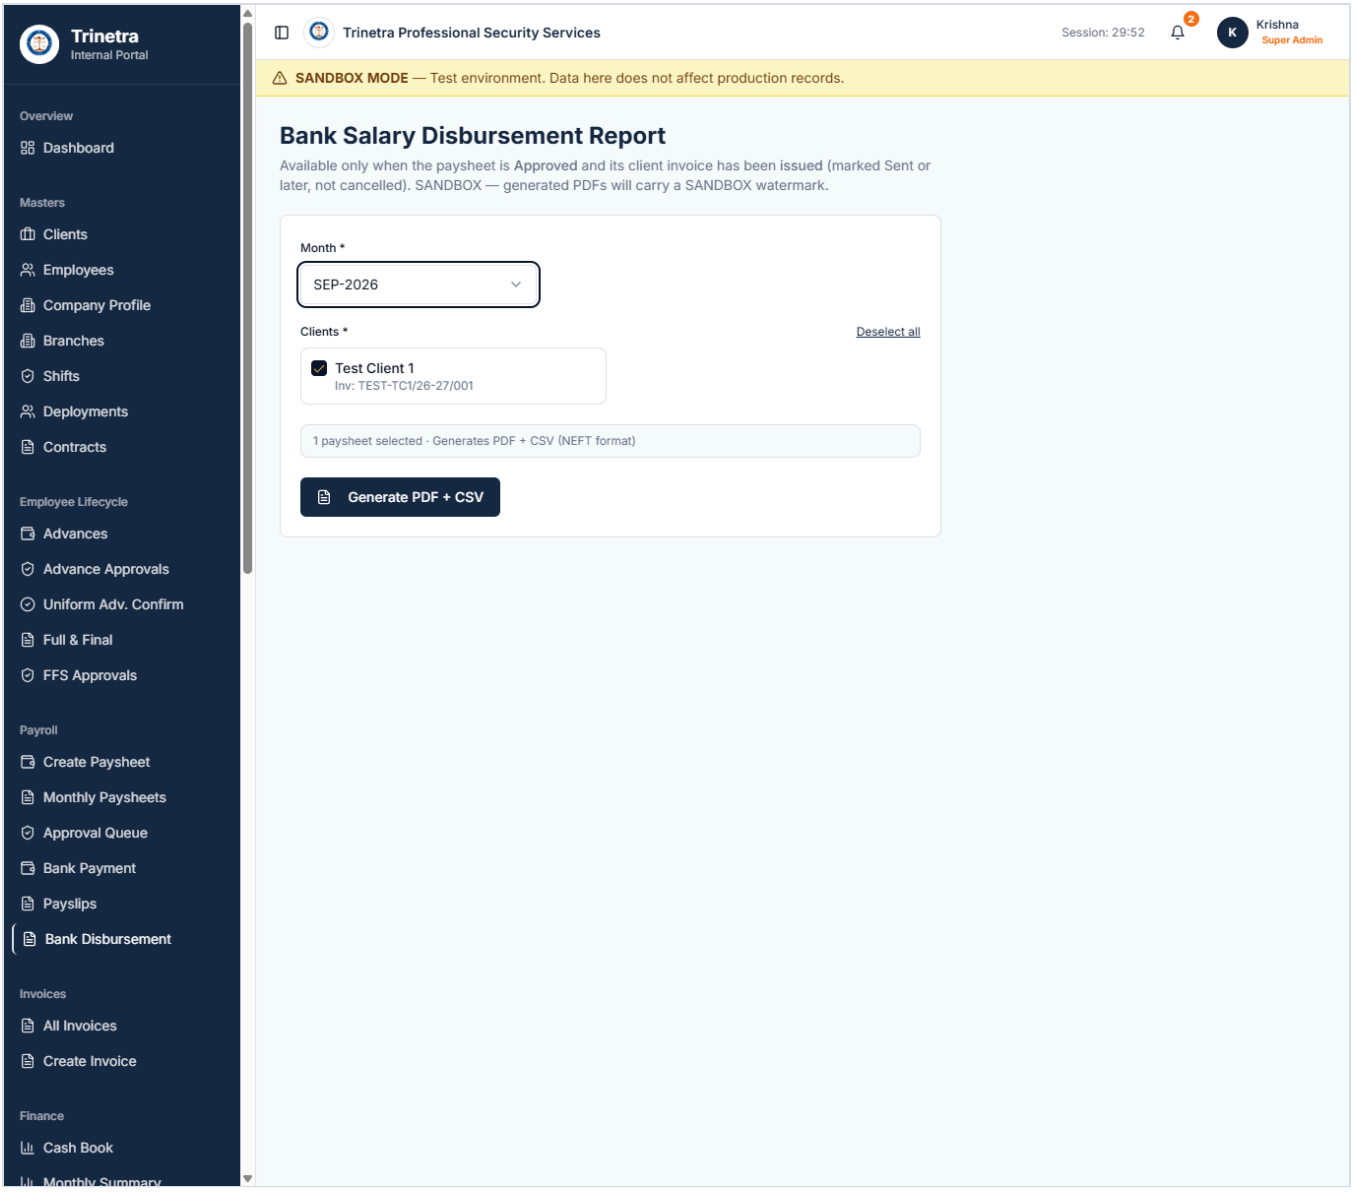

Figure 19.4 — Bank Disbursement report

Trinetra Professional Security Services
Andhra Pradesh, India

BANK SALARY DISBURSEMENT REPORT
For the month of: SEP-2026

Total Employees	3	Month	SEP-2026
Total Amount	Rs. 41,268.33	Generated By	admin@tpsssecurity.com
Clients	Test Client 1	Generated On	12 Oct 2026

#	Employee Name	Account Number	IFSC	Bank	Net Salary (Rs.)	Payment Reference	Remarks
1	Test Employee 1	000000000001	TEST0000001	Test Bank (synthetic)	Rs. 13,437.50	e820ff2c//d01e8d1f	
2	Test Employee 2	000000000002	TEST0000001	Test Bank (synthetic)	Rs. 11,775.83	e820ff2c//b46e1391	
3	Test Employee 3	000000000003	TEST0000001	Test Bank (synthetic)	Rs. 16,055.00	e820ff2c//55a59c0c	
	Total (3 employees)				Rs. 41,268.33		

This is a system-generated bank disbursement report. Net salary excludes Uniform Allowance and Service Charges.

SAMPLE

Figure 19.5 — Disbursement PDF

20. Client billing and invoice generation

20.1 From a paysheet (recommended)

Open the approved paysheet → **Generate Invoice**. The form fills in from the client and the paysheet (Figure 20.1):

- **Billing lines** come from the client. **Set the Qty** to the number of guards or supervisors billed; it starts at 1. Above the lines the form shows the paysheet headcount by designation (for example "Paysheet headcount: S.GUARD 2 · SUPERVISOR 1") as a guide.
- **TDS %, GST applicable / RCM / GST % / GST type** come from the client.
- **Internal Deductions** (net salary, PF employer, ESI employer) come from the paysheet totals. They never appear on the client's copy.

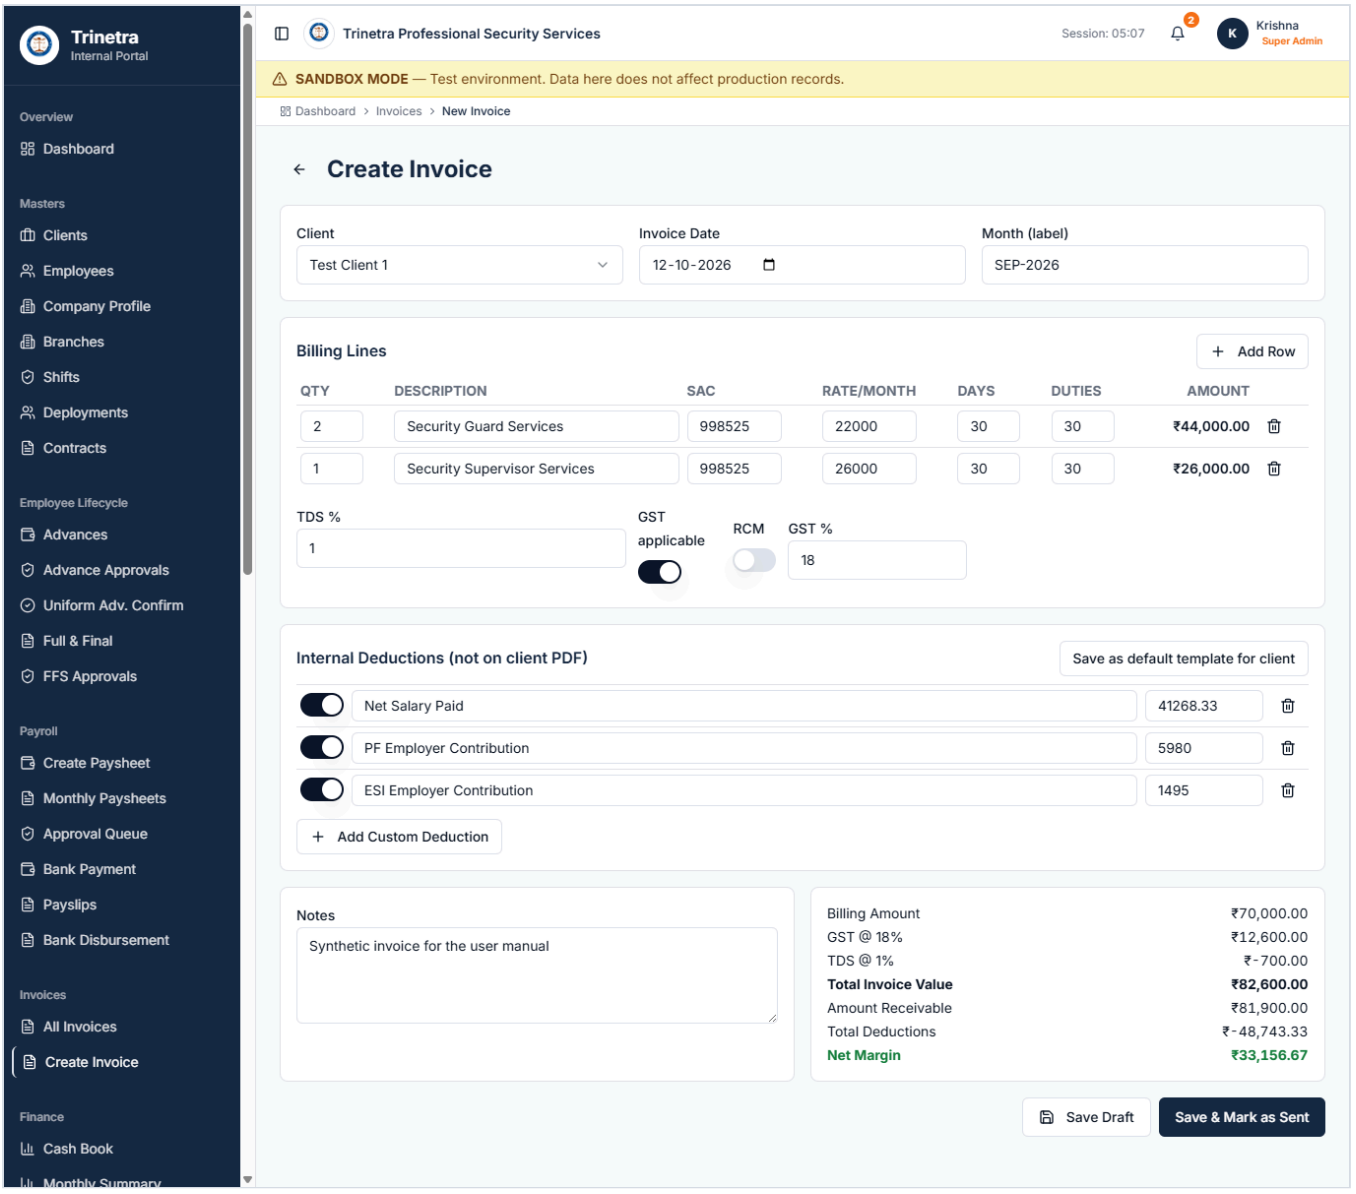

Figure 20.1 — Create Invoice from TEST-PS-SEP2026-001 (Qty 2 guards + 1 supervisor)

20.2 Manual invoice

Invoices › Create Invoice → choose **Client** ("Client required" otherwise). At least one billing line is needed.

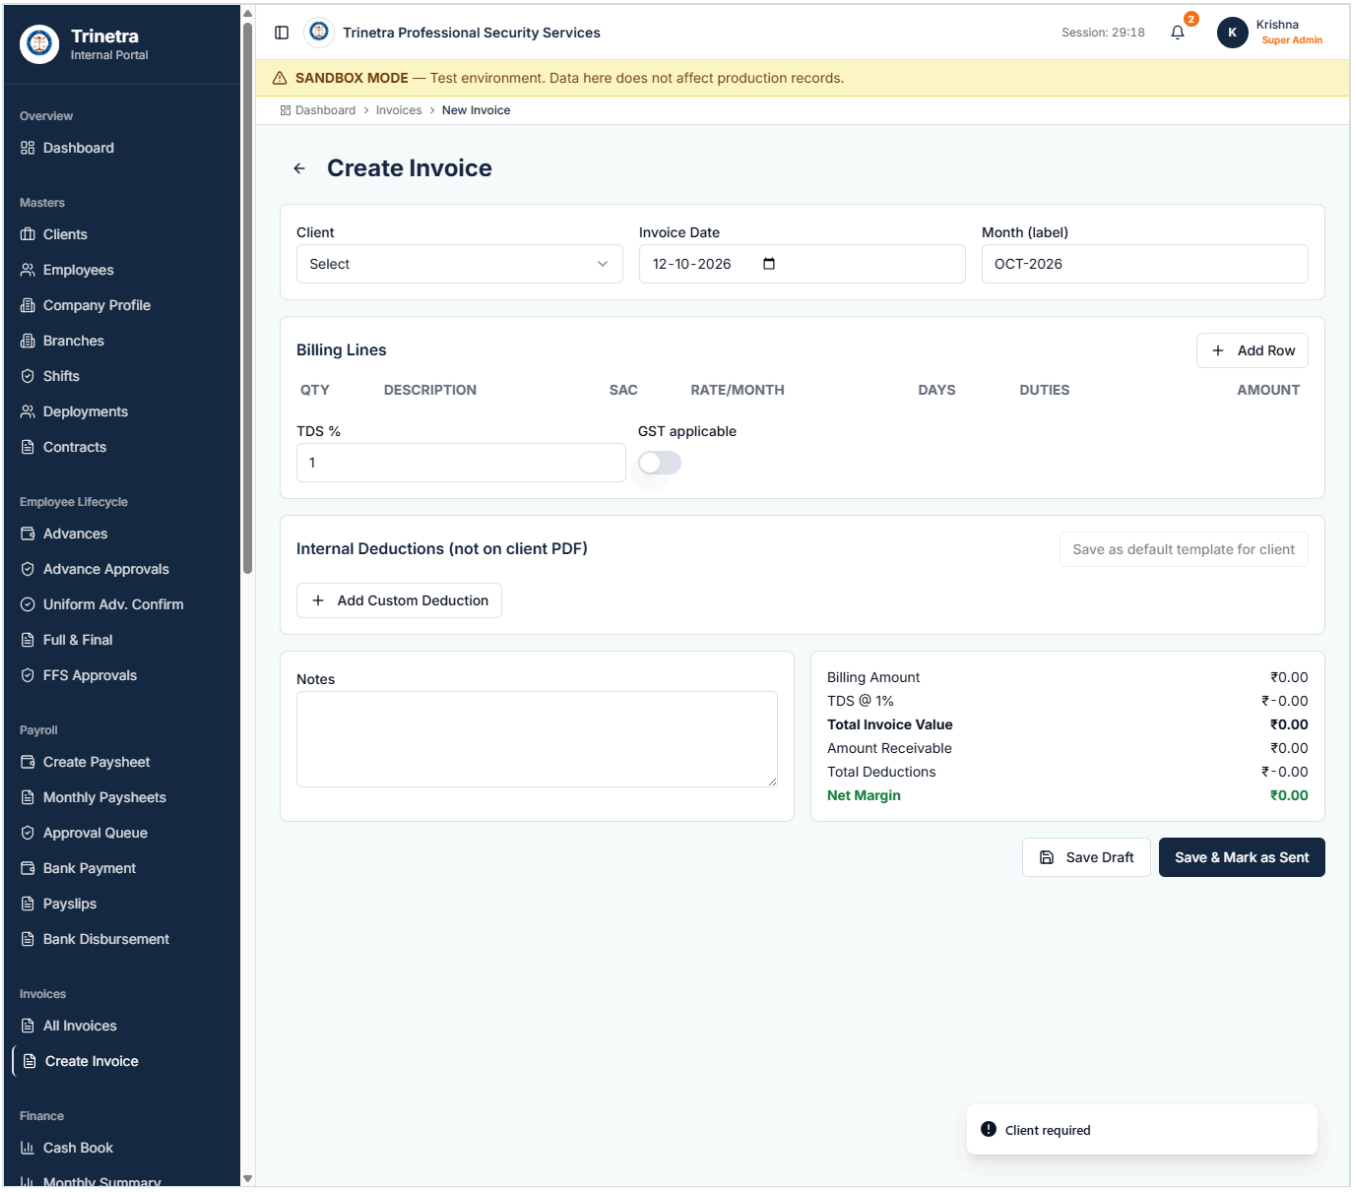

Figure 20.2 — "Client required"

20.3 How the totals work (worked example)

Line	Calculation	Amount (₹)
Billing amount	2 × 22,000 + 1 × 26,000	70,000.00
GST 18 % (shown as CGST 9 % + SGST 9 %; for an IGST client, one IGST 18 % line)	70,000 × 18 %	12,600.00
Total Invoice Value	70,000 + 12,600	**82,600.00**
TDS 1 % (deducted by client)	70,000 × 1 %	−700.00
Amount Receivable	82,600 − 700	**81,900.00**
Internal deductions	41,268.33 + 5,980 + 1,495	48,743.33
Net Margin (internal)	81,900 − 48,743.33	**33,156.67**
Outstanding	Receivable − received	81,900.00 → 0 when paid

Under RCM no GST is charged. Duties and days on billing lines are for display; the amount is **Qty × Rate / Month**. The due date defaults to invoice date + 30 days. The service period is the month.

Invoice number: `<prefix>/<financial year>/<serial>`, for example `TC1/26-27/001` (sandbox: `TEST-TC1/26-27/001`).

20.4 Save, issue, edit

- **Save Draft** keeps it editable. Draft invoices show an **Edit** button (Figures 20.3, 20.5). A draft cannot take payments (no **Record Payment** button) and is left out of the dashboard, reports, GST report, Statement of Account, Aging and Follow-ups until it is issued.
- **Save & Mark as Sent** issues it (status **Sent**).
- **Print** prints the client's tax invoice (Figure 20.4). Email sending is **not available** in the current version.

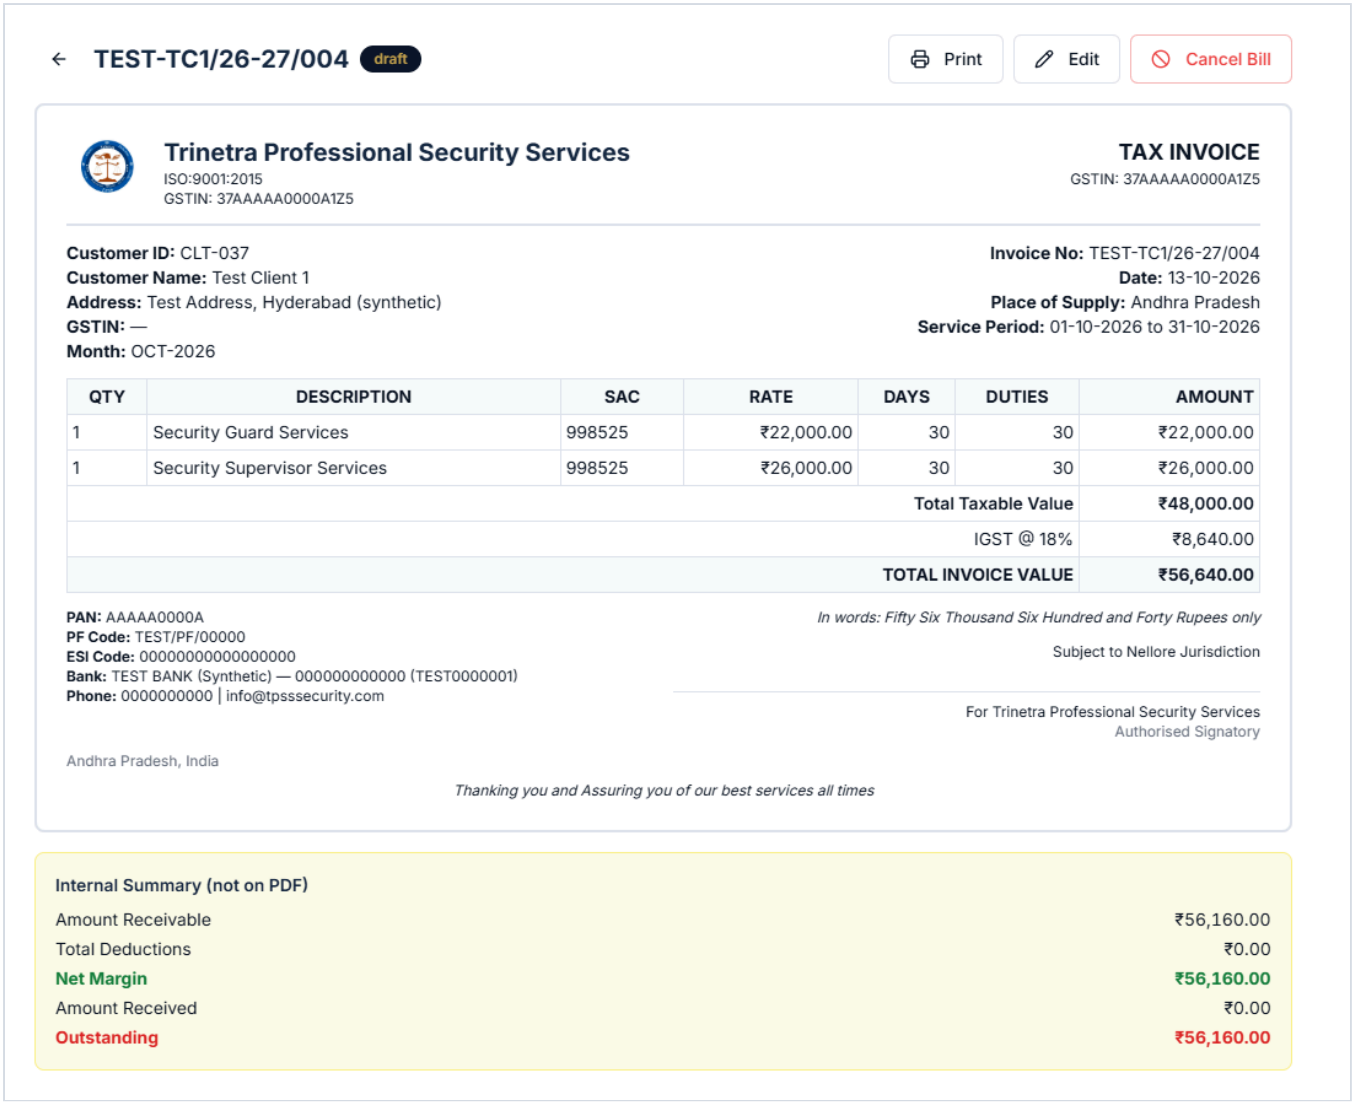

Figure 20.3 — Draft invoice for an IGST client: one "IGST @ 18 %" line, Place of Supply = client's state, internal summary (not printed), no Record Payment

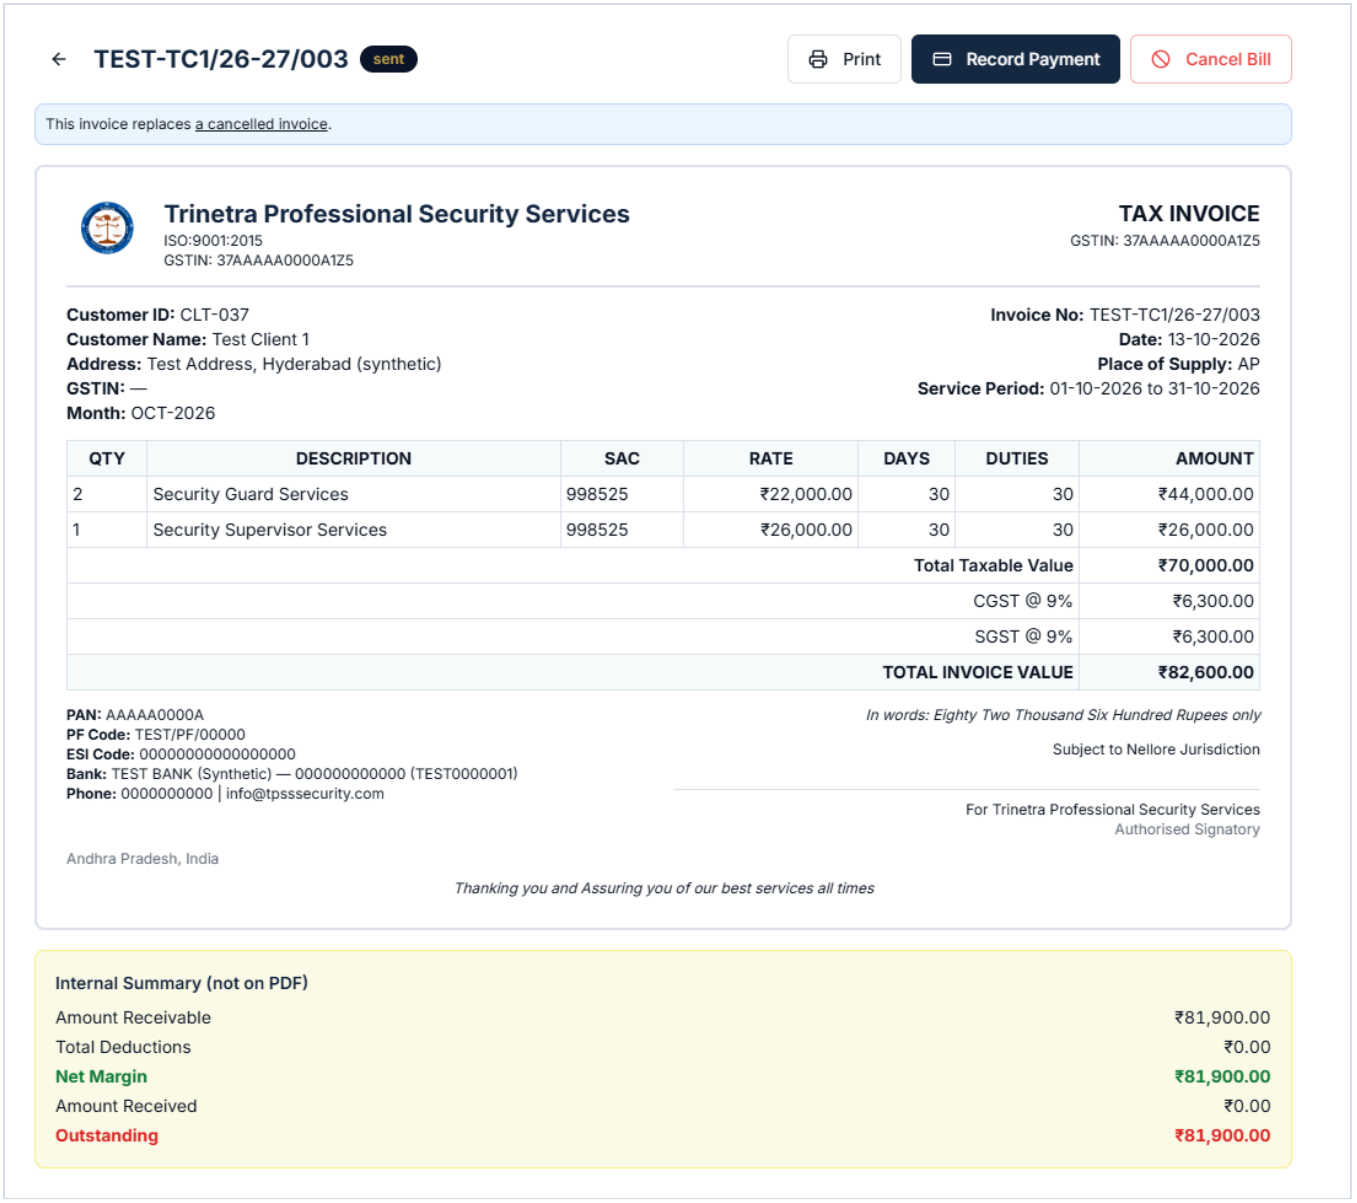

Figure 20.4 — Sent invoice

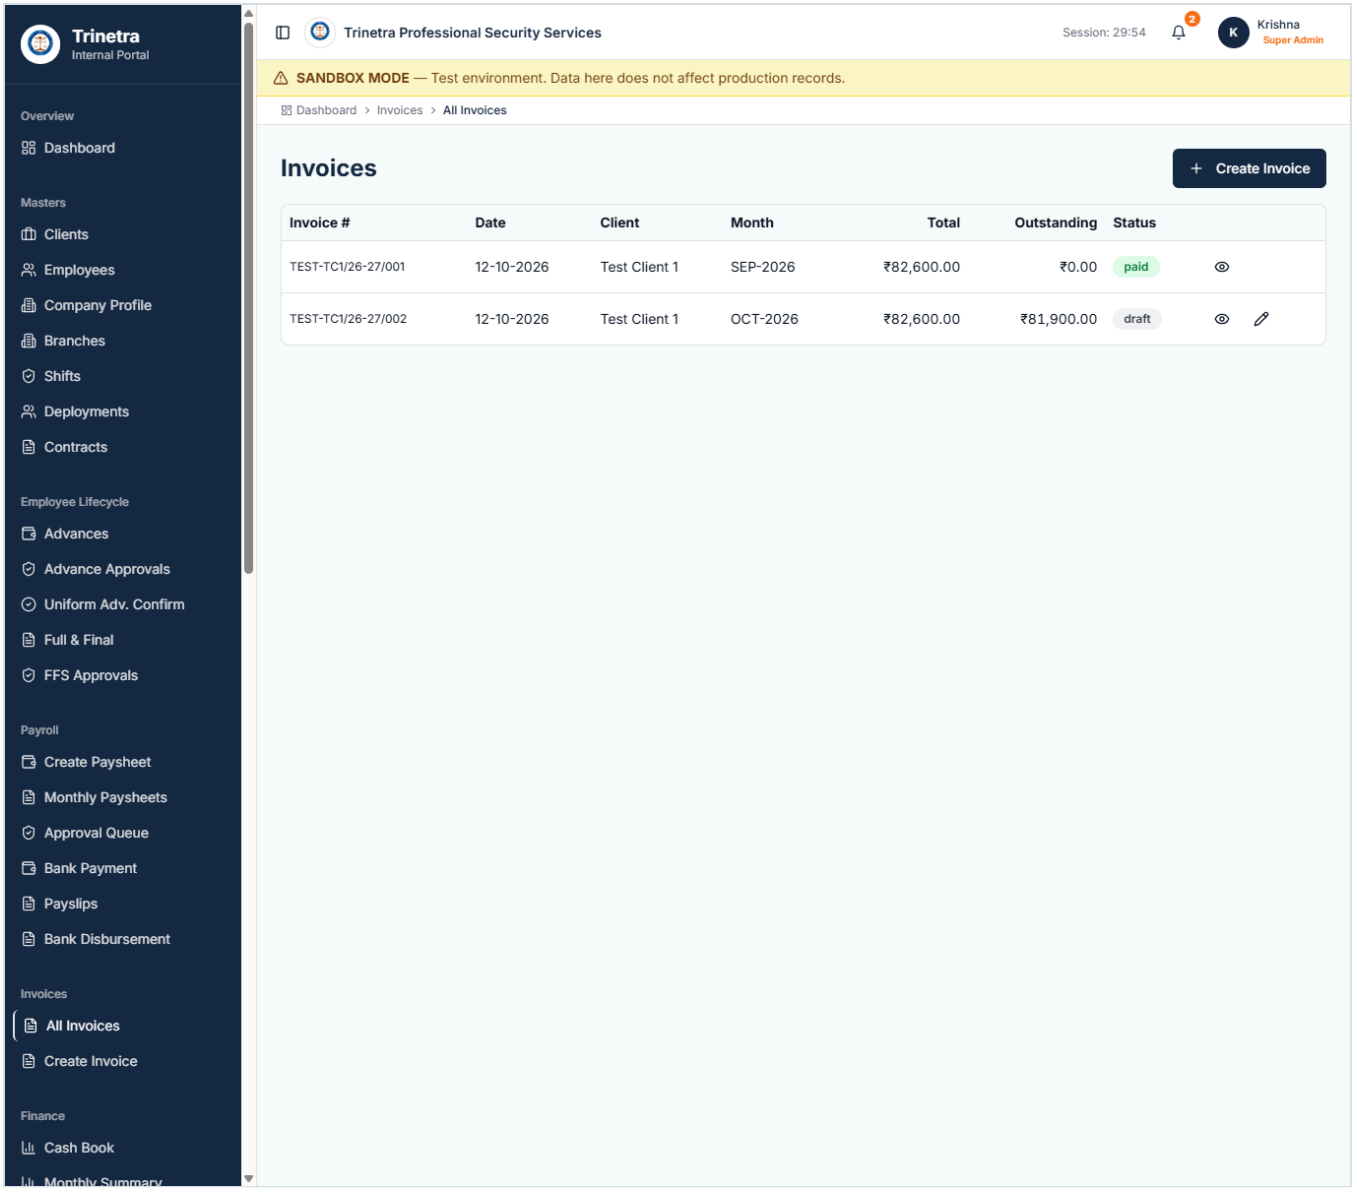

Figure 20.5 — Draft invoices have an Edit icon

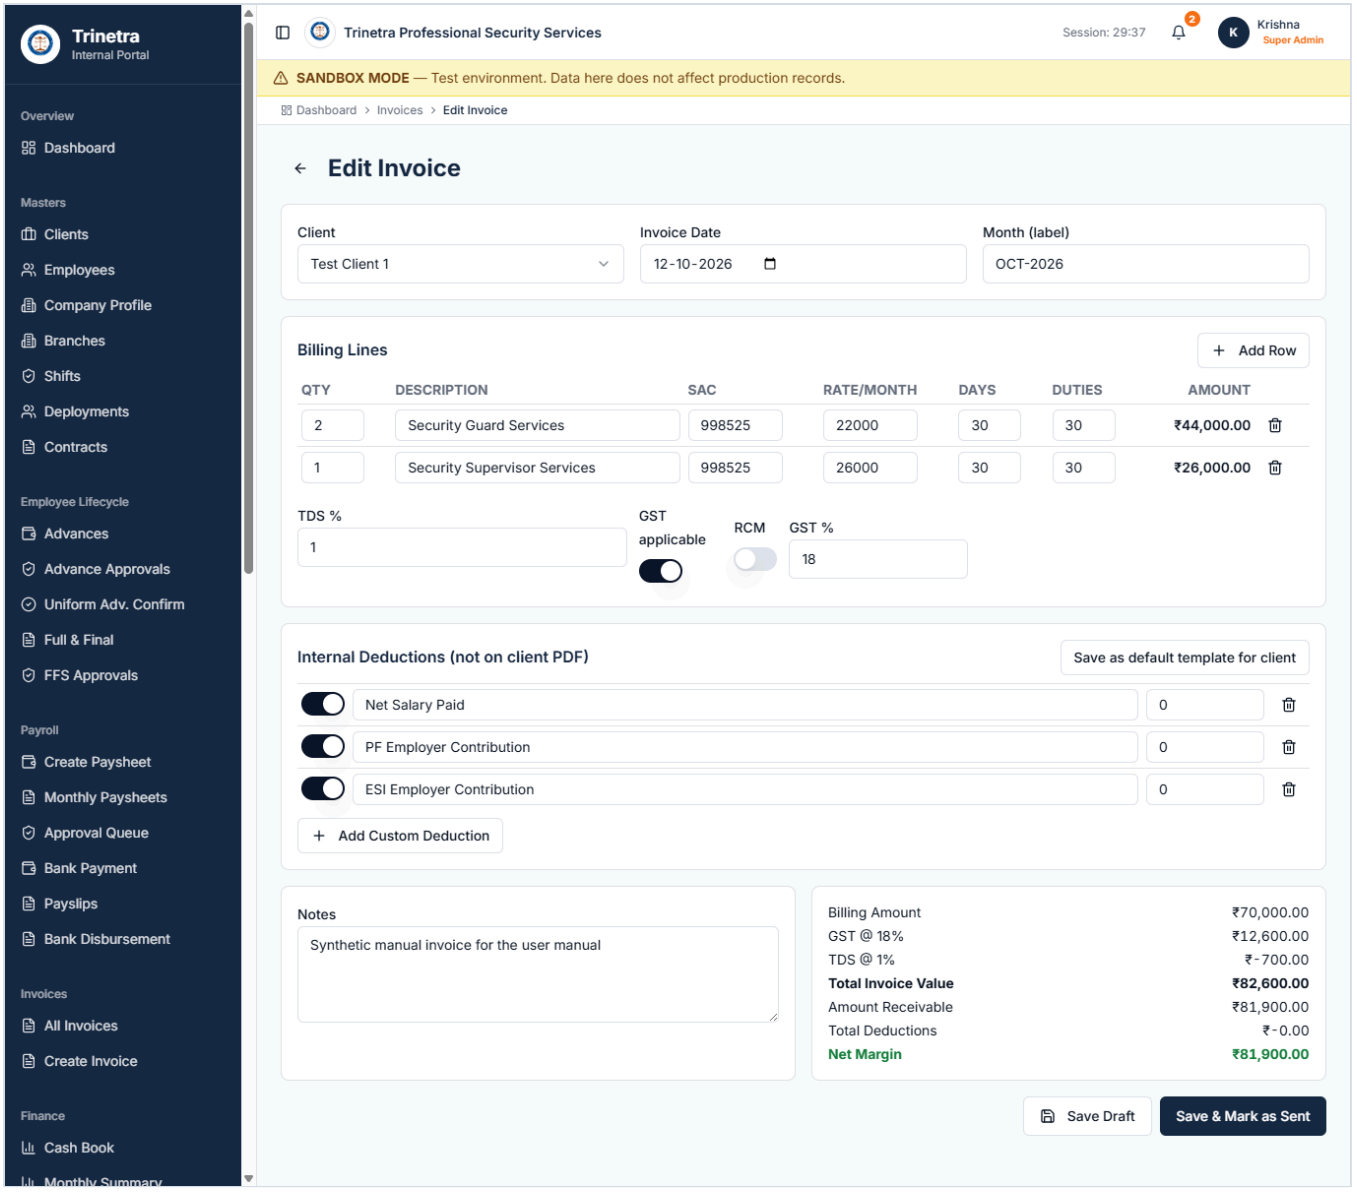

Figure 20.6 — Editing a draft keeps its saved lines

Statuses: Draft → Sent → Partially paid → Paid; Overdue (set nightly when past due with a balance); Cancelled.

> ℹ️ **CGST + SGST or IGST** follows the client's **GST Type** (chapter 11). For IGST the invoice prints a single IGST line and the client's state as Place of Supply. A re-created invoice keeps the original GST type.

21. Client receipts and payment tracking

Record a payment

- From an issued invoice: **Record Payment**, or
- **Finance › Receipts** → **Add Receipt** and select the invoice (Figure 21.1). Only issued invoices with a balance are listed.

Field	Mandatory	Rule
Invoice	**Yes**	"Select an invoice first"
Date	Yes	default today
Amount	**Yes**	> 0 and ≤ outstanding ("Cannot exceed outstanding amount")
Mode	Yes	default NEFT
Reference / UTR, Bank, Notes	No	

The receipt number (for example TEST-REC-OCT2026-002) is automatic. Each receipt posts a ledger entry and updates the invoice:

- Partial → **Partially paid**
- Full receivable → **Paid**, outstanding ₹0

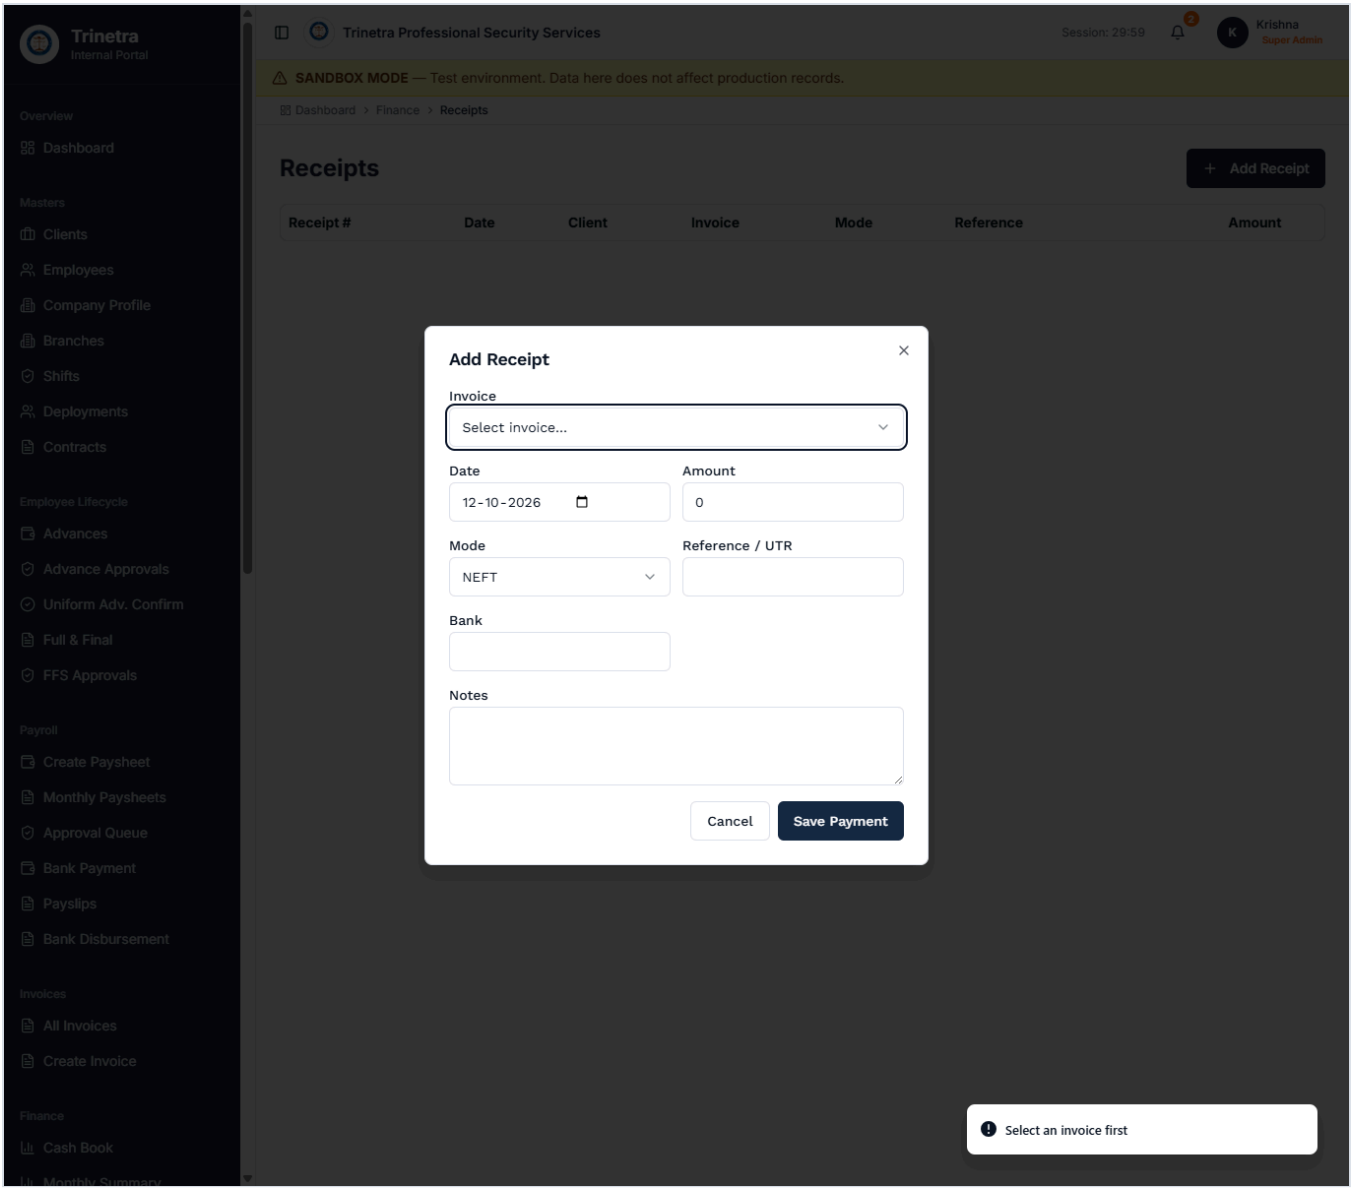

Figure 21.0 — "Select an invoice first"

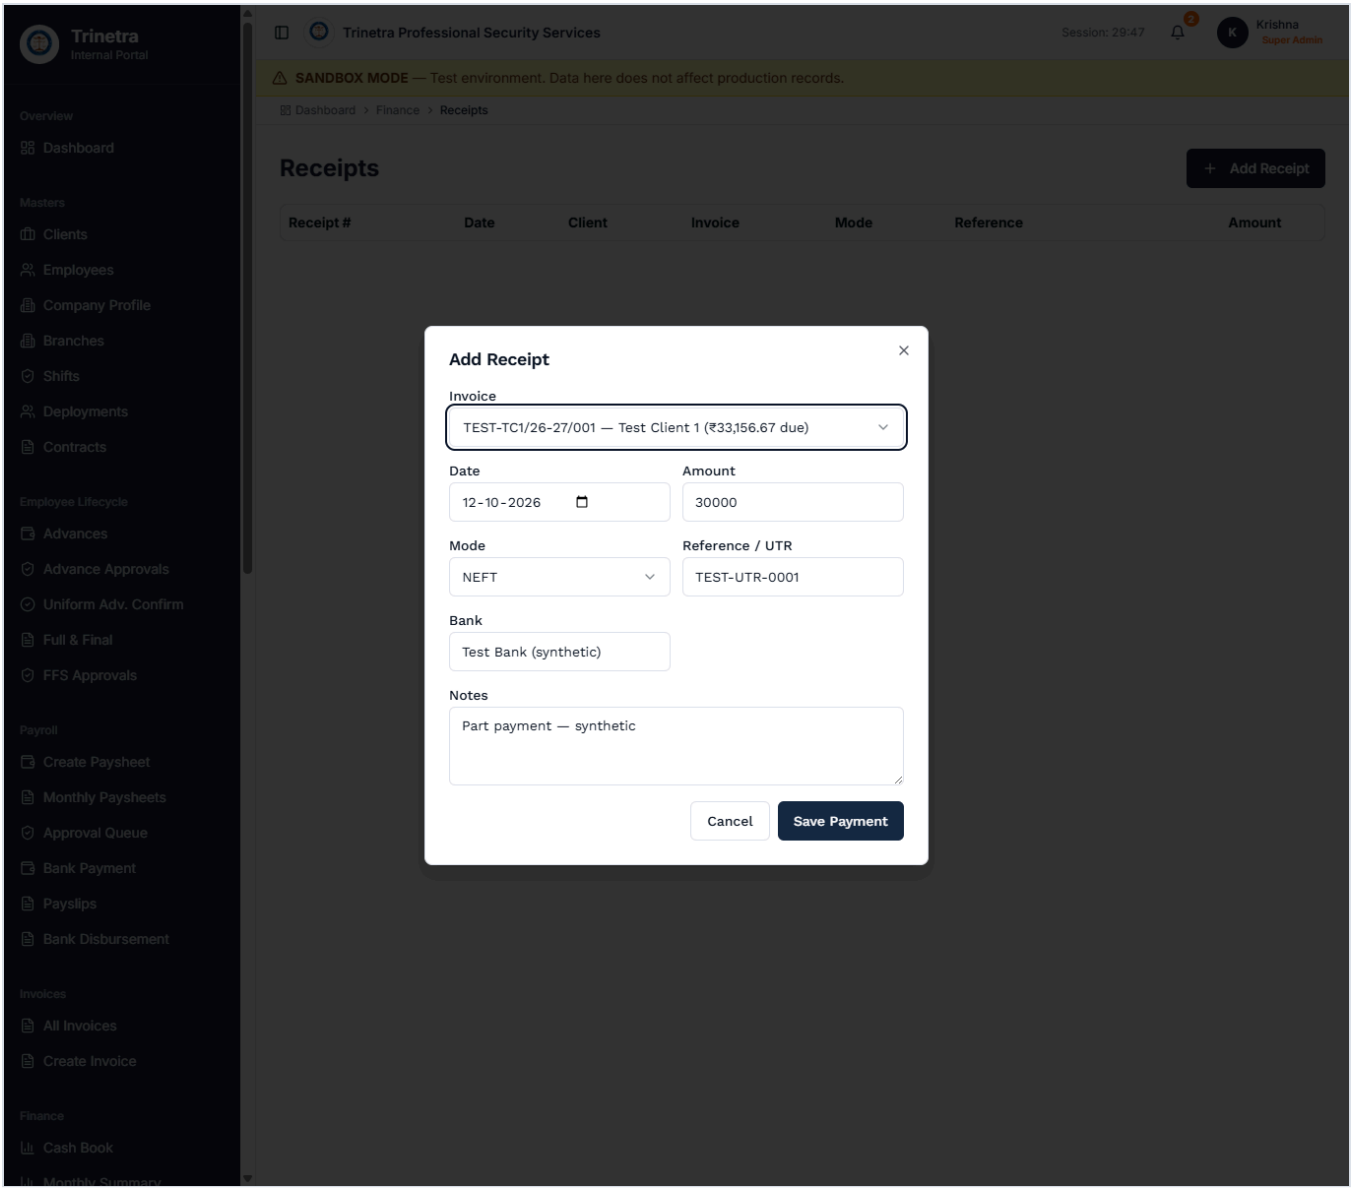

Figure 21.1 — ₹30,000 part payment

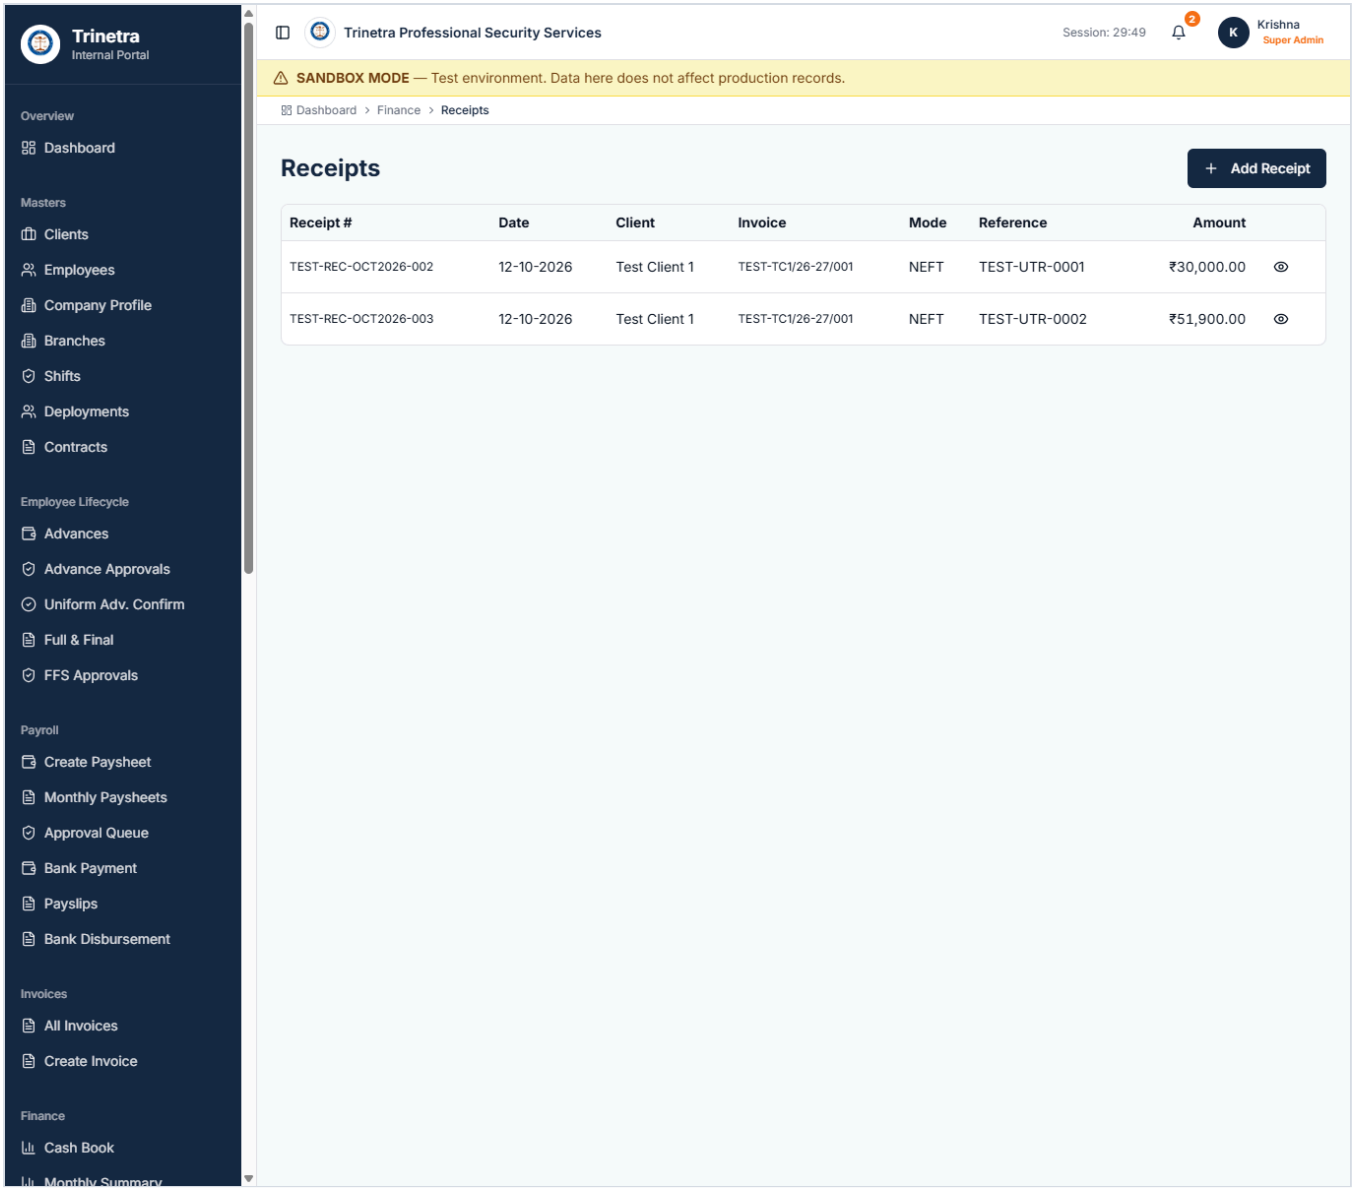

Figure 21.2 — Receipts

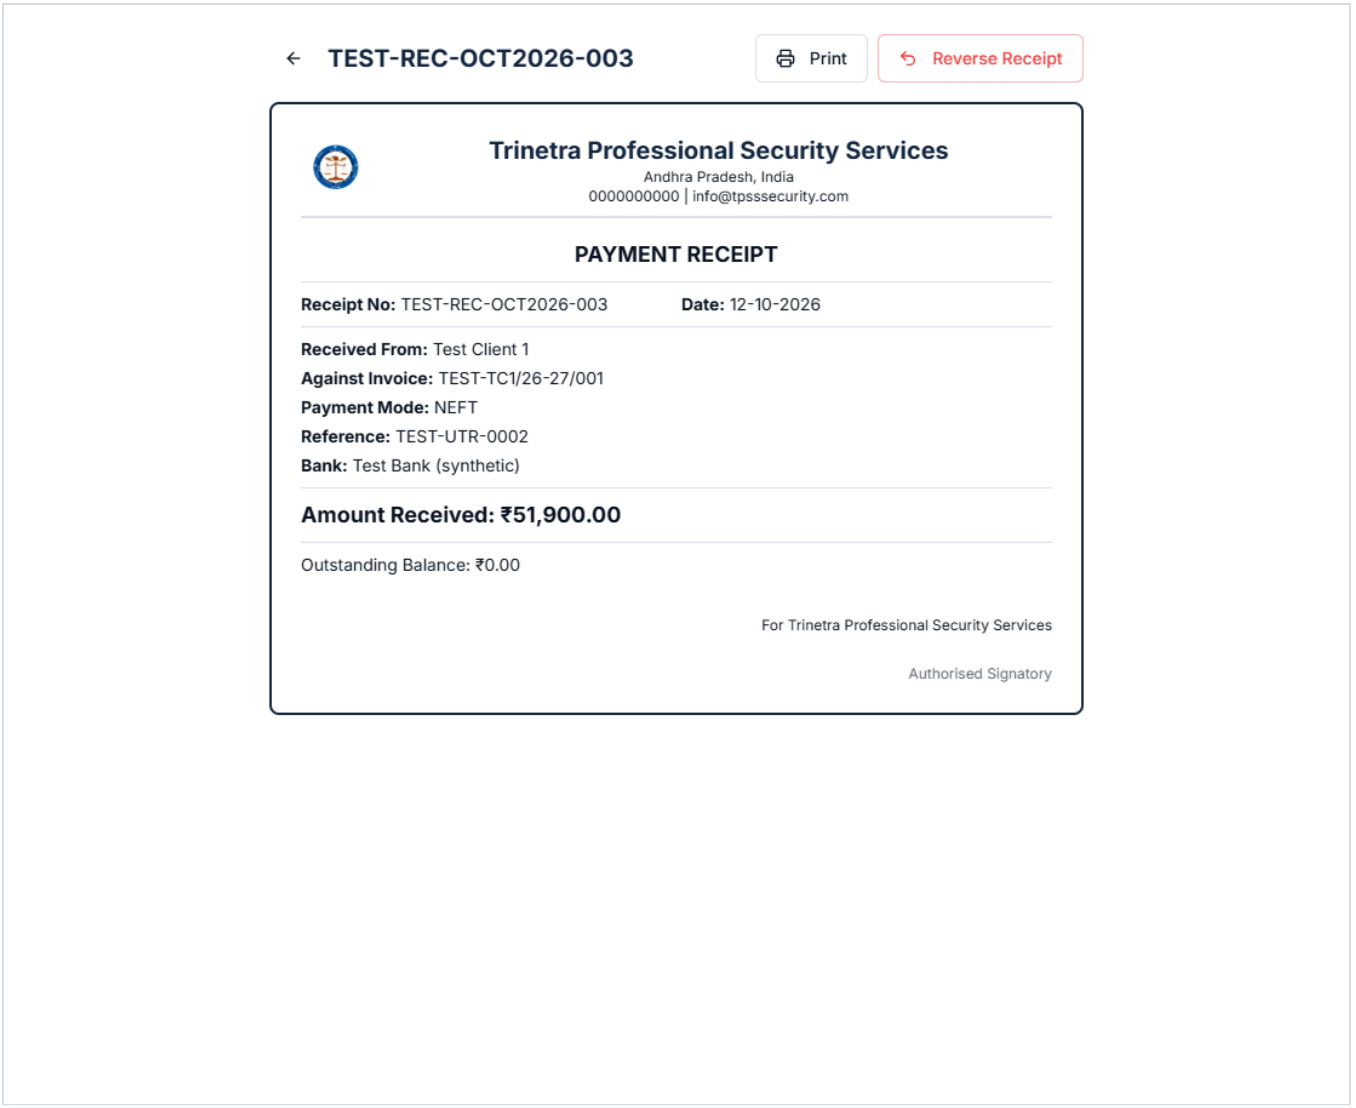

Figure 21.3 — Printable receipt (outstanding ₹0.00)

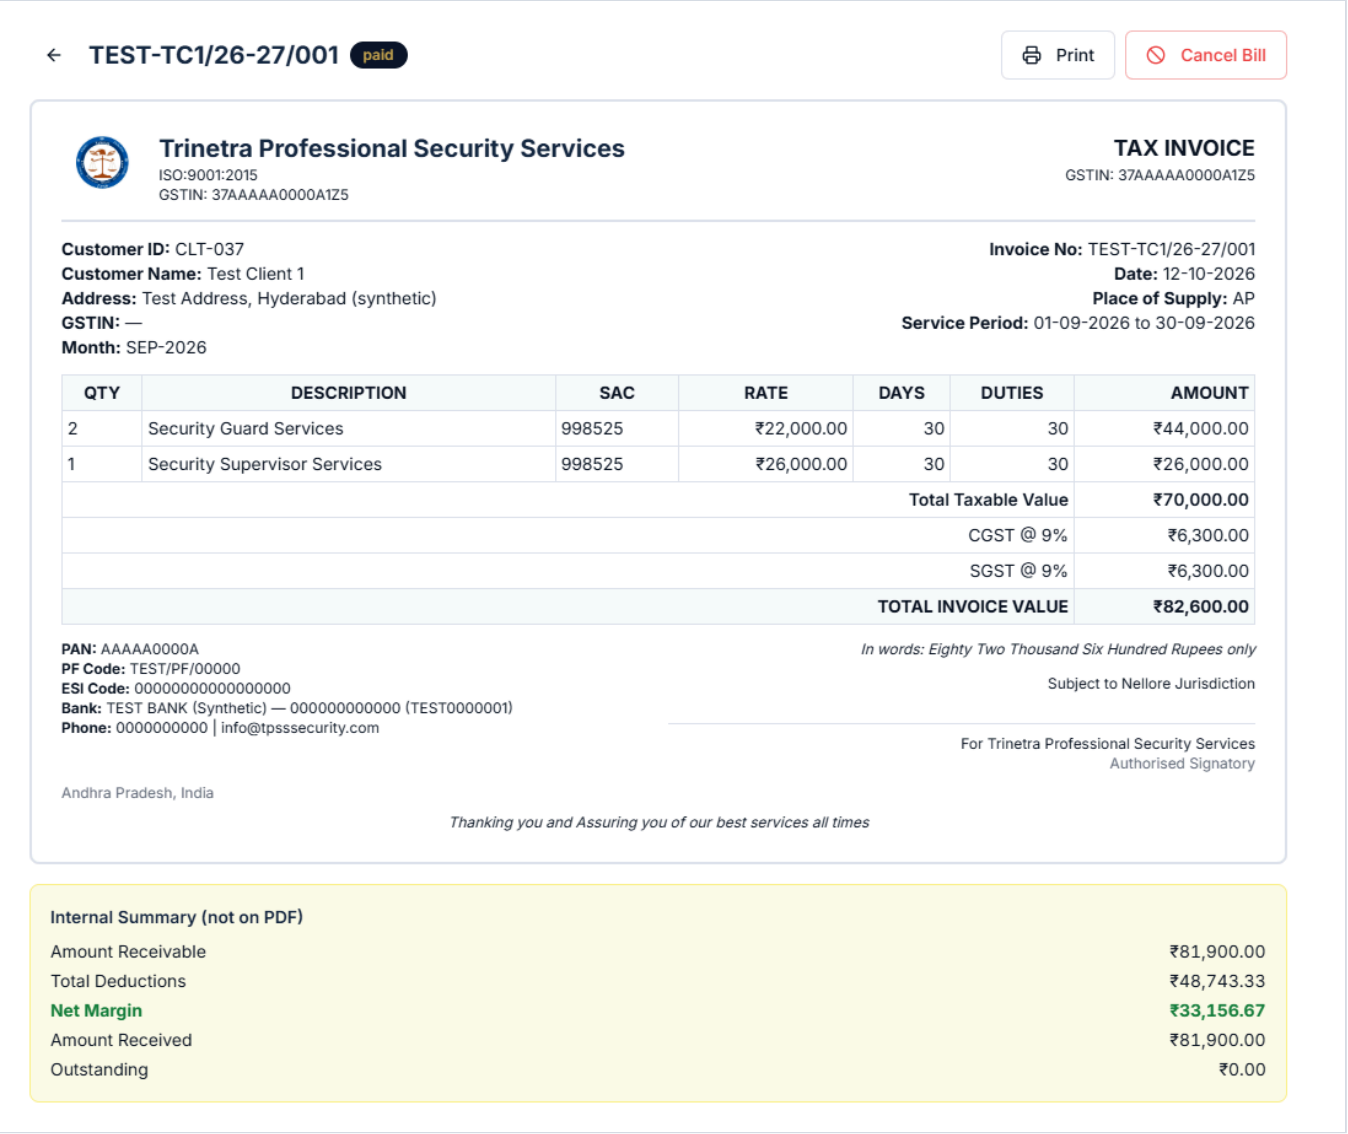

Figure 21.4 — Invoice Paid: received ₹81,900

Reverse a receipt (Super Admin)

Use this when a receipt was wrong (wrong amount or invoice, bounced cheque).

1. Open the receipt (Finance › Receipts → 👁) and click **Reverse Receipt**.
2. Enter a **reason of at least 10 characters**; **Confirm Reversal** stays disabled until then (Figure 21.4a).
3. Confirm. The receipt is marked reversed and disappears from lists, an offsetting ledger entry is posted, the invoice's received amount and status are recalculated (for example back to **Sent**), and the action is recorded in the audit log. You are taken back to the invoice.

This cannot be undone; record a new receipt if needed. After all of an invoice's receipts are reversed, the invoice can be cancelled (chapter 25).

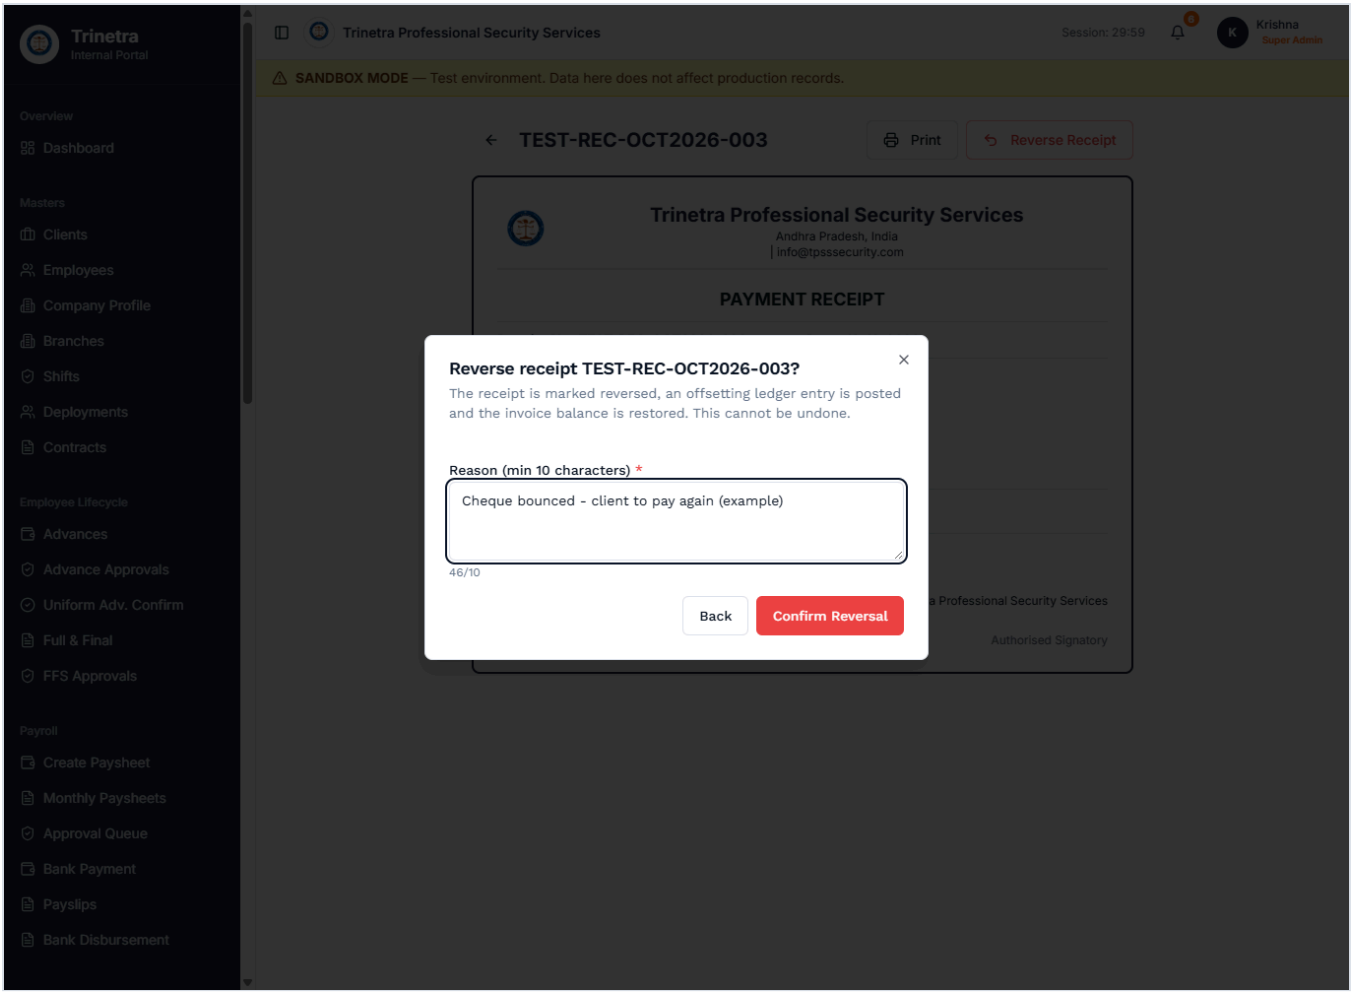

Figure 21.4a — Reverse receipt dialog (opened for illustration, not confirmed)

Limitations:

- One receipt applies to one invoice.
- There are no advance or unallocated receipts.
- Receipts cannot be edited; reverse and re-enter instead.

Follow-ups

Finance › Invoice Followups → Log Followup:

Field	Mandatory / values
Invoice	**Required**
Date	
Mode	Phone, …
Status	open, in_progress, promised, closed
Response / Notes	
Promise Date	
Next Followup	

Auto-sweep overdue opens follow-ups for overdue invoices; a nightly job does the same. Follow-ups close automatically when an invoice is paid or cancelled. Draft invoices cannot be followed up. The list shows **open**

follow-ups by default; choose **All** to see the rest.

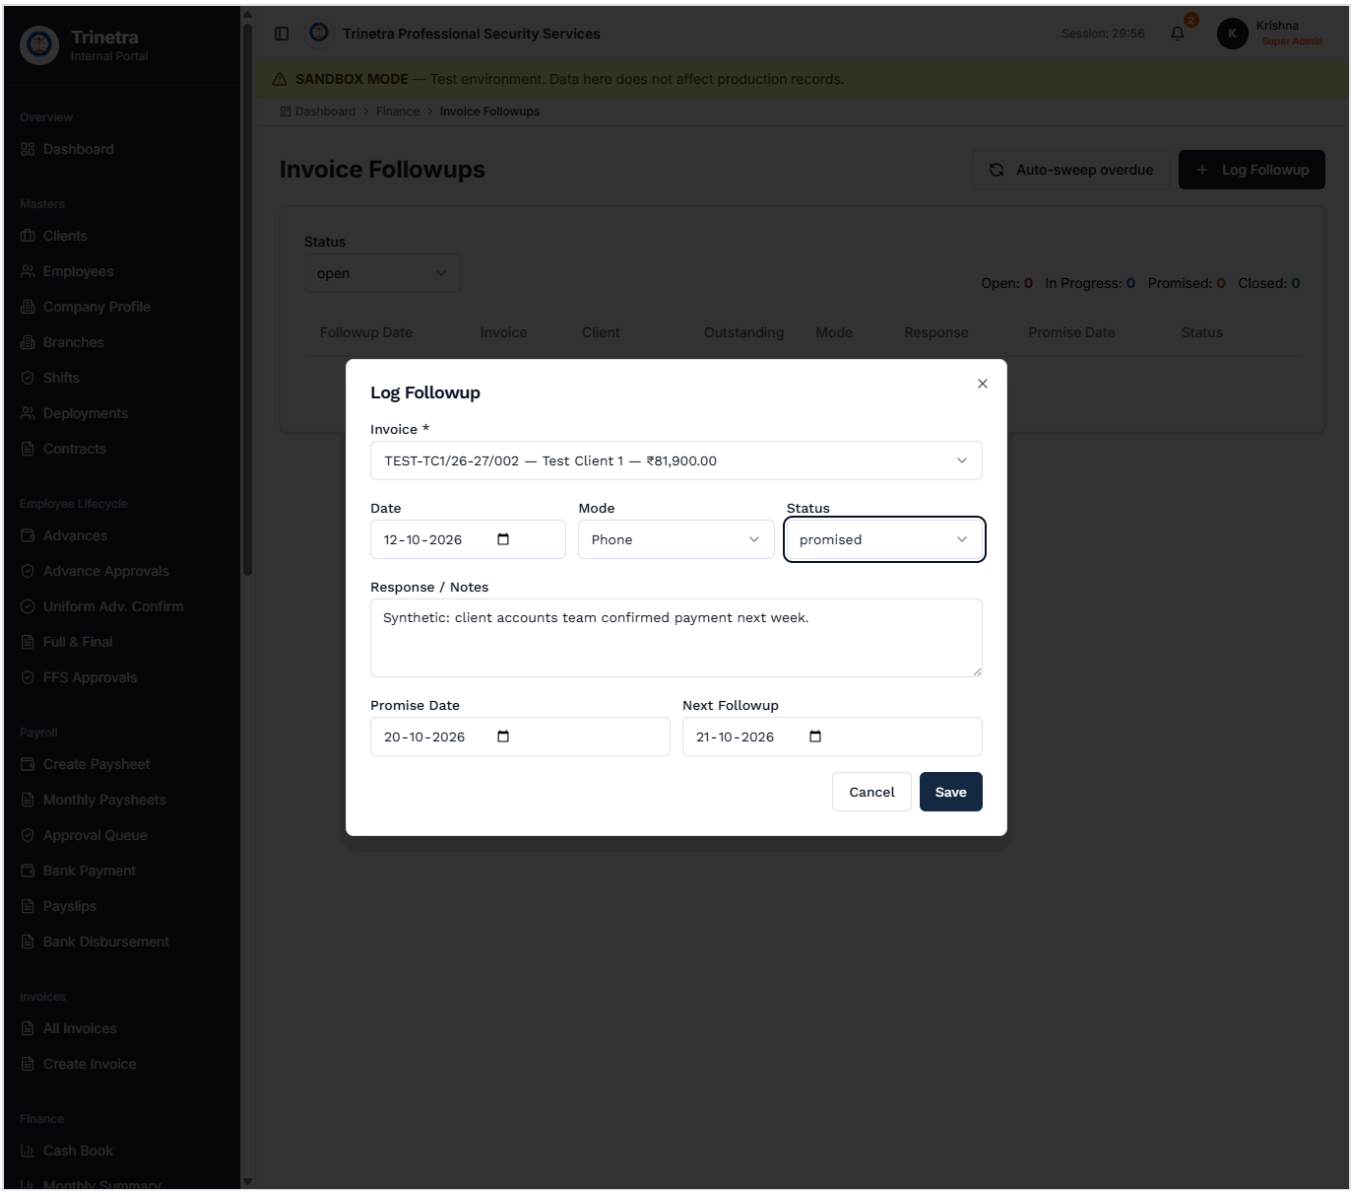

Figure 21.5 — Logging a promised payment

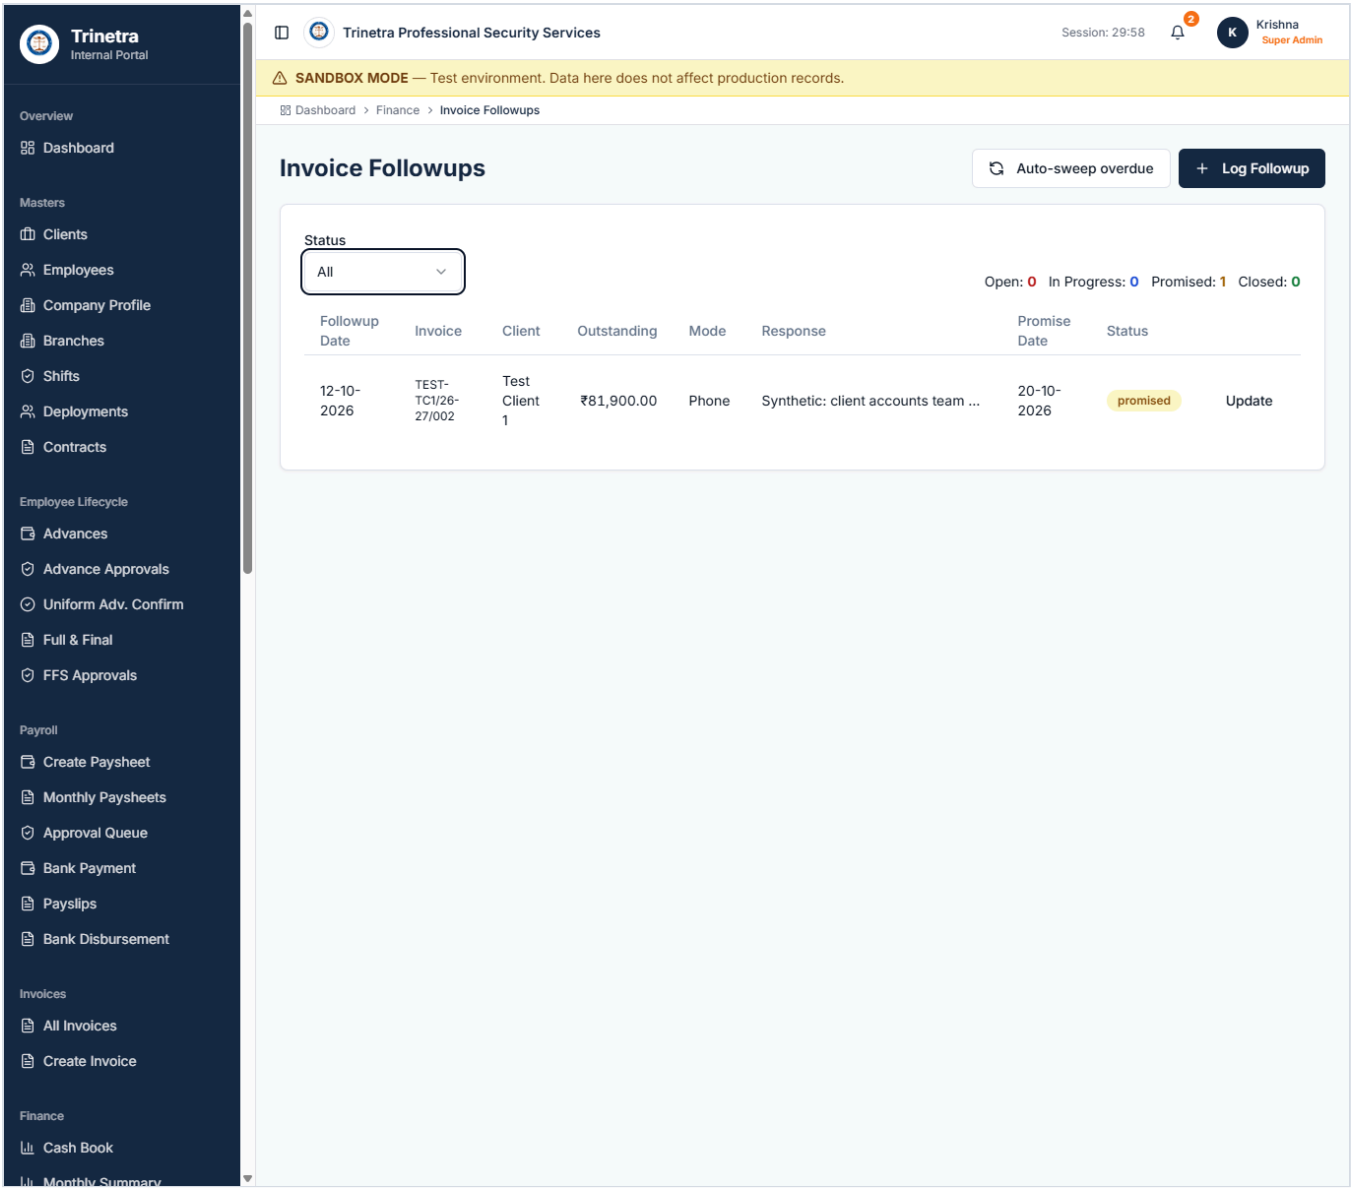

Figure 21.6 — Follow-ups (filter: All)

Ageing

Finance › Aging Report (Figure 21.7): outstanding by client in Current / 1–30 / 31–60 / 61–90 / 90+ buckets as of a date, with **Export**. Only issued invoices are included.

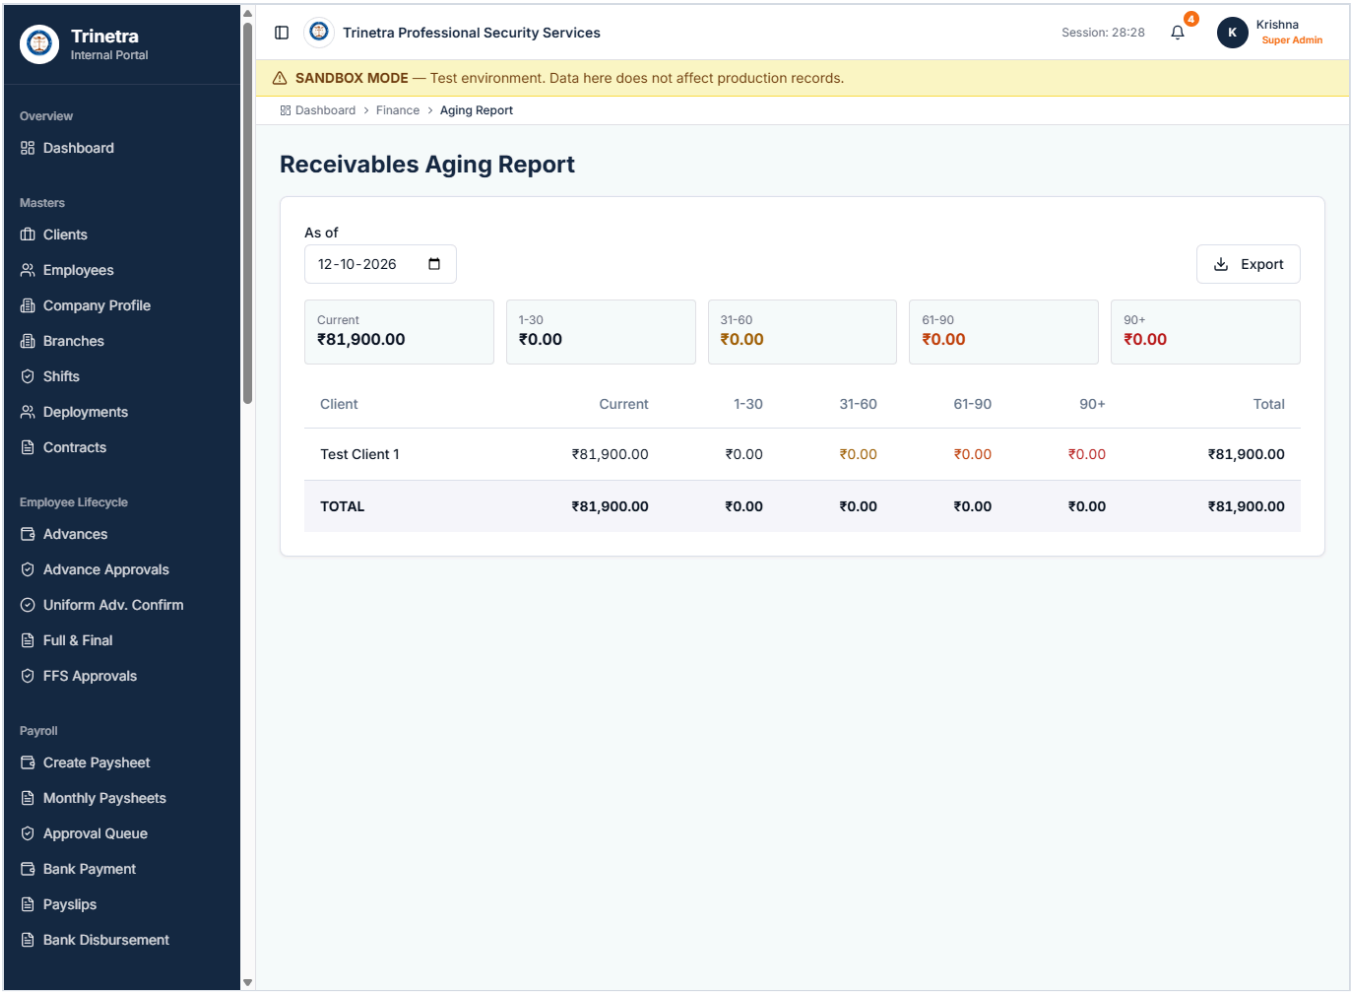

Figure 21.7 — Receivables ageing

22. Finance, expenses and vouchers

22.1 What exists

The portal has **no general voucher entry** (journal, contra, debit or credit note, purchase voucher). **This functionality was not found in the current implementation.** Ledger entries are created **automatically** by:

Event	Ledger entry
Receipt saved	Receipt (credit), category *payment_received*
Expense approved	Payment (debit), category from the expense category
Compliance payment recorded	Payment (debit), category EPF / ESI / GST / PT …
Bank Payment salary batch finalised	Payment (debit), category *staff_salary*
Receipt reversed	Journal (debit) offsetting the receipt

Issued invoices do not post to the ledger (it is a cash book). Each entry stores the running balance after it.

22.2 Expenses

Menu: Expenses › Expenses → **New Expense**

Field	Mandatory
Date	**Yes**
Category	**Yes** ("Select category"). For general office costs use **OFFICE & ADMIN**
Amount (₹)	**Yes** (> 0)
Branch	No
Payment Mode (Cash / Bank / UPI / Card)	**Yes**
Reference / Bill #	No
Description	**Yes**
Submit as	Draft (default), or Approved (CEO / COO only)

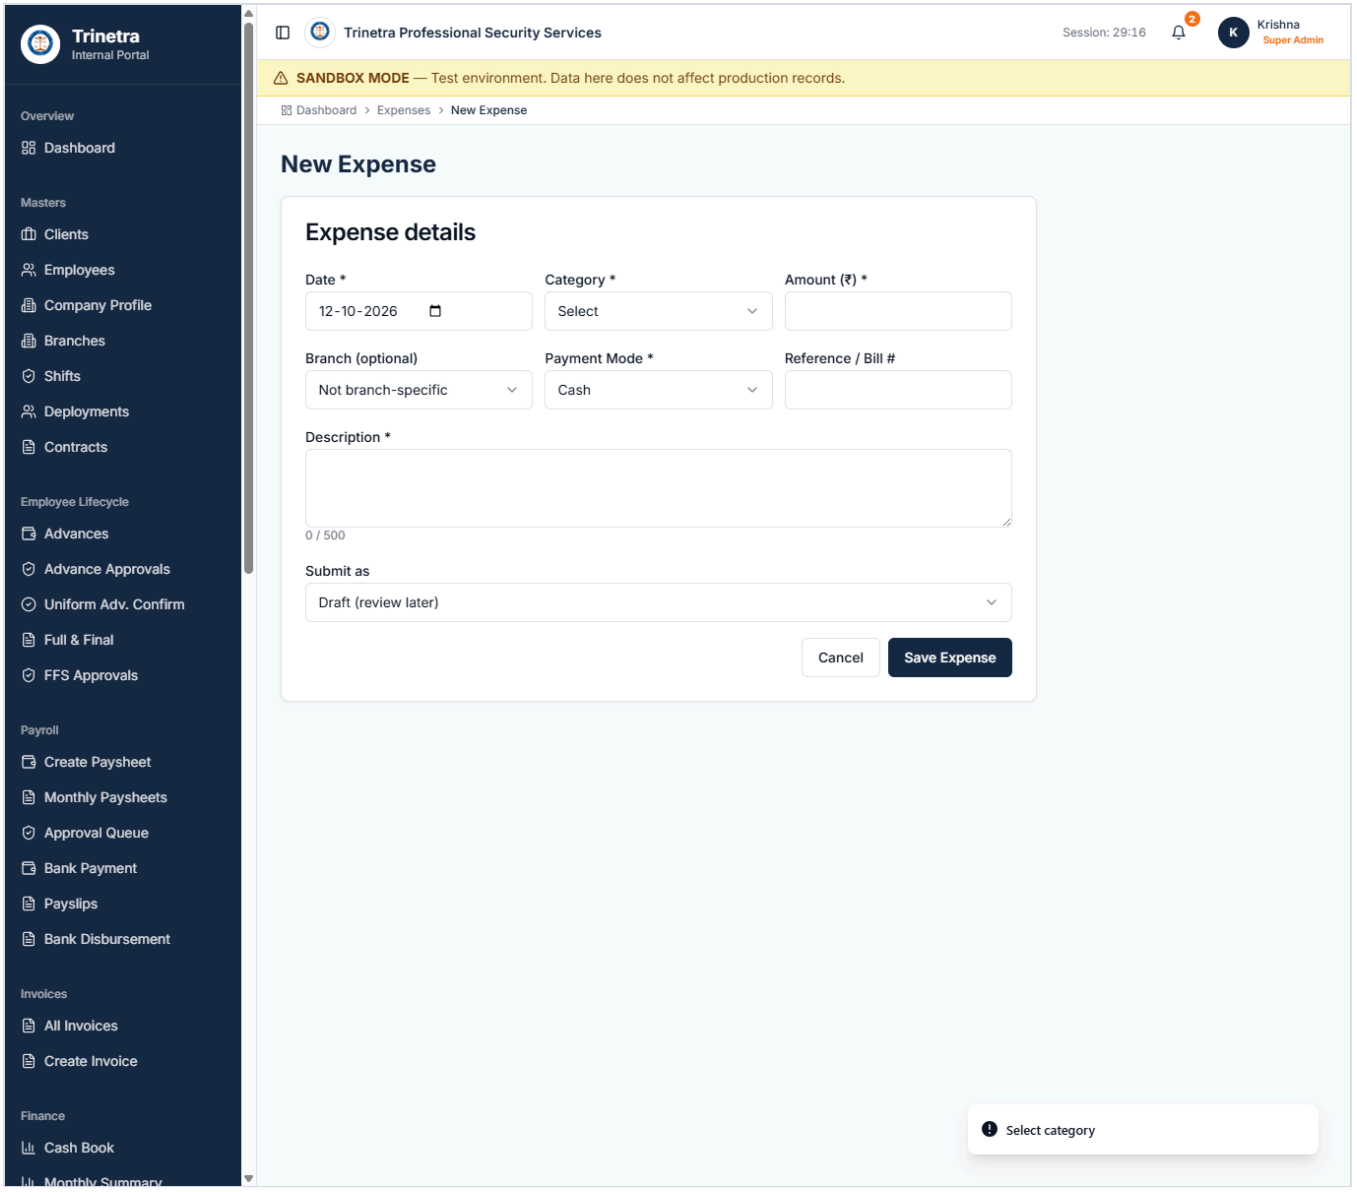

Figure 22.1 — "Select category"

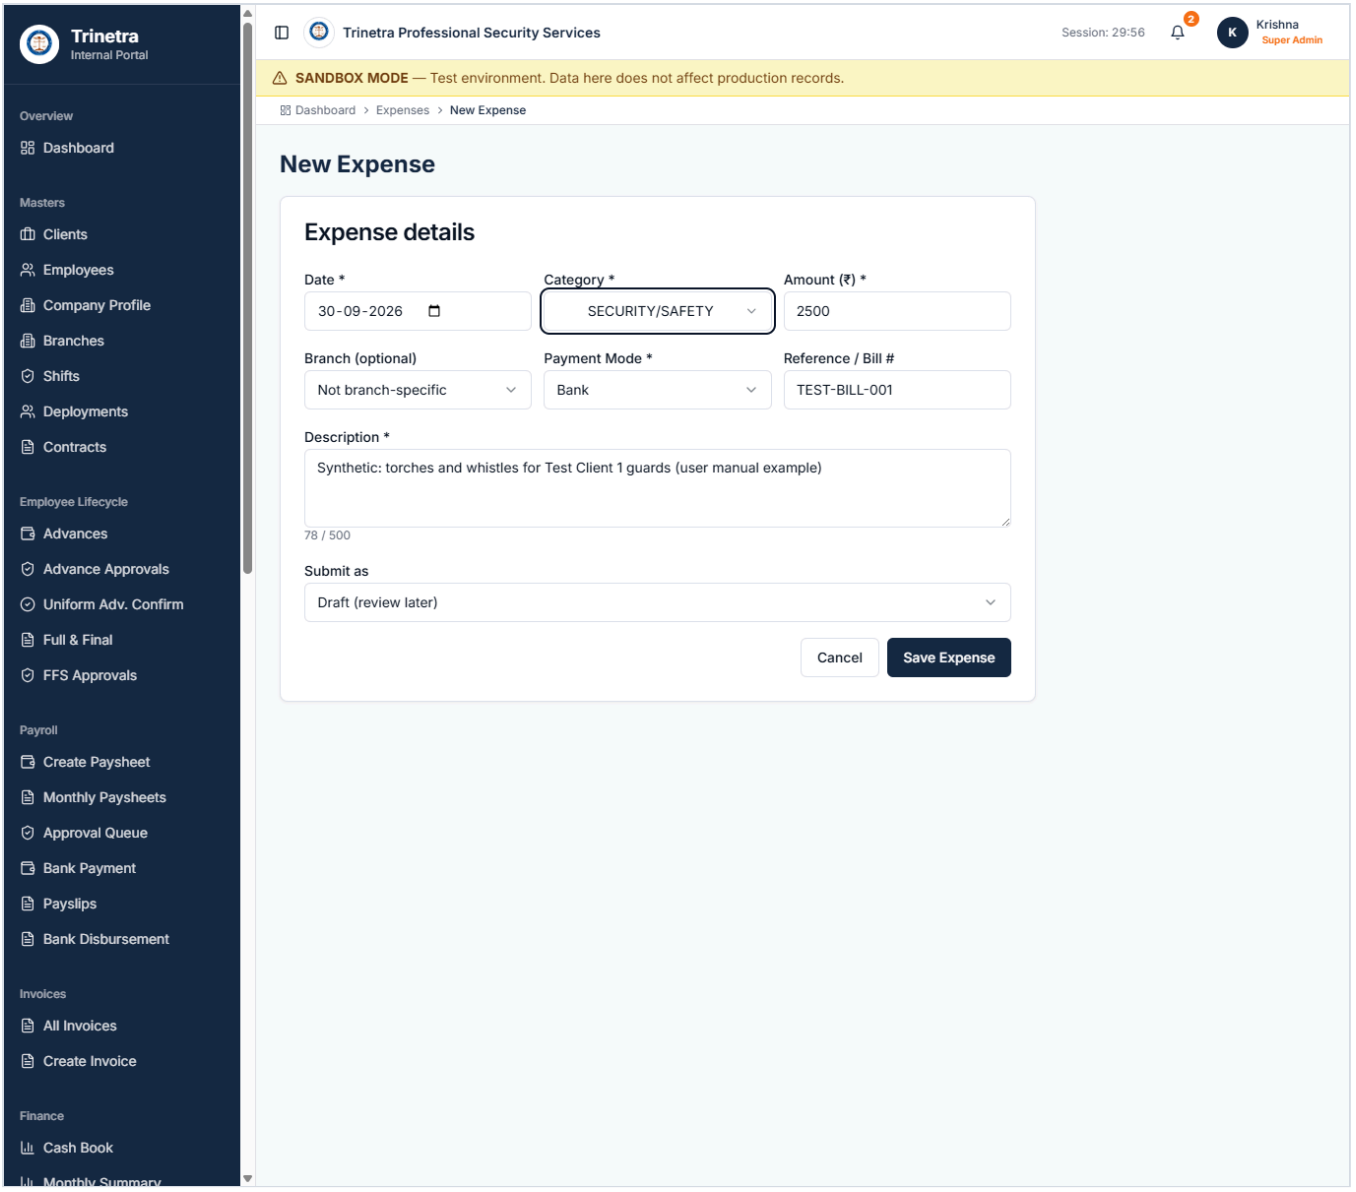

Figure 22.2 — ₹2,500 safety materials

On the list, choose **Year / Month**. Drafts show **Approve** (CEO / COO / Super Admin; you cannot approve your own unless you are CEO or Super Admin). Approval posts the expense to the ledger. Expense numbers are automatic: `EXP-OCT2026-001` in production, `TEST-EXP-OCT2026-001` in the sandbox (the example below, EXP-SEP2026-001, was created before the TEST- prefix was added).

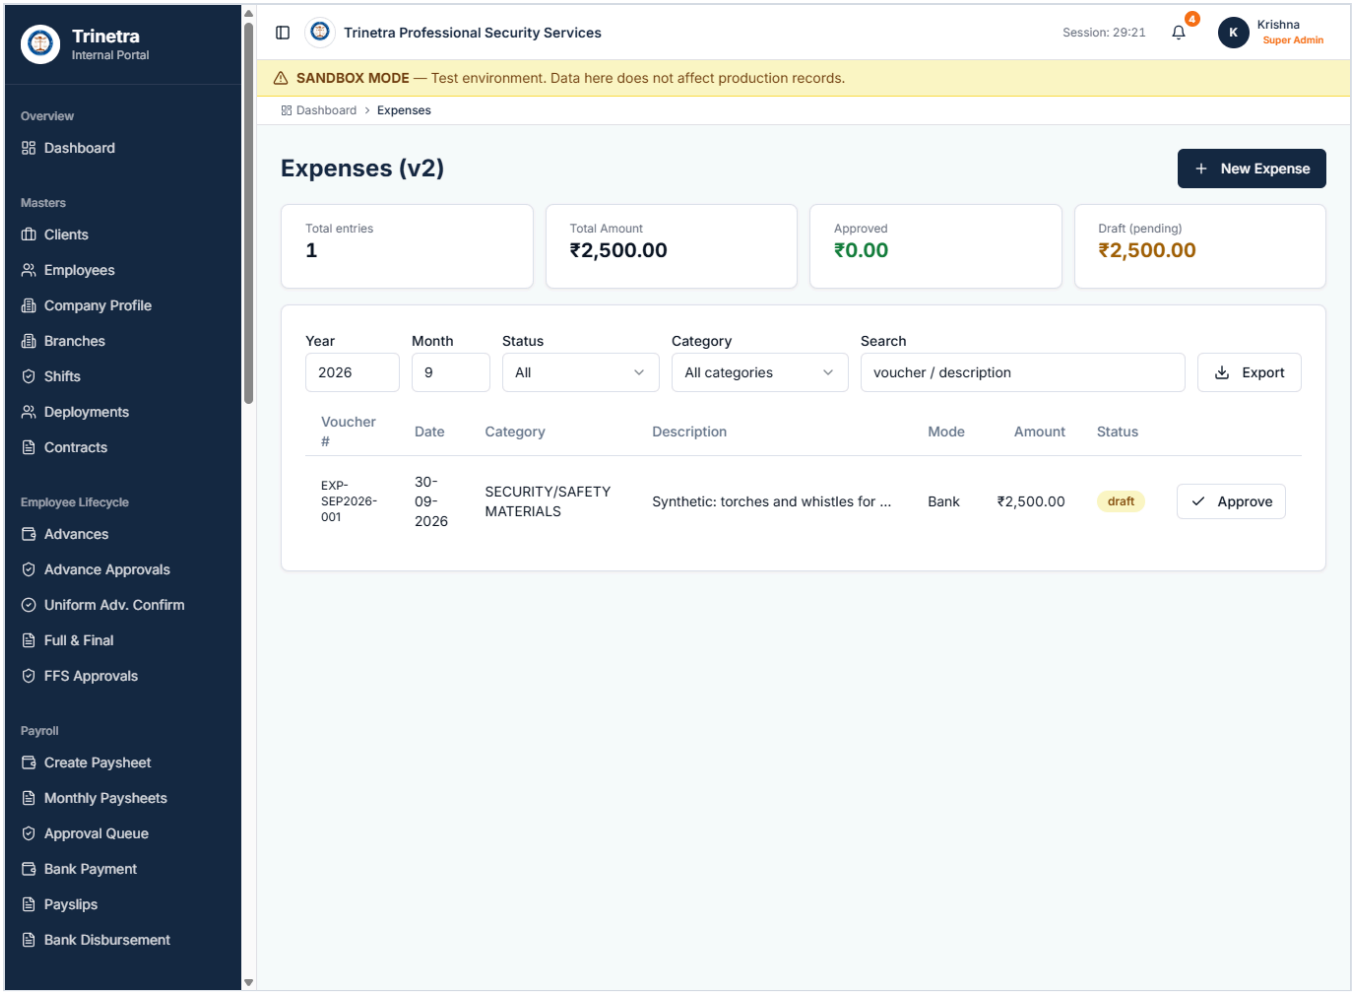

Figure 22.3 — Draft expense

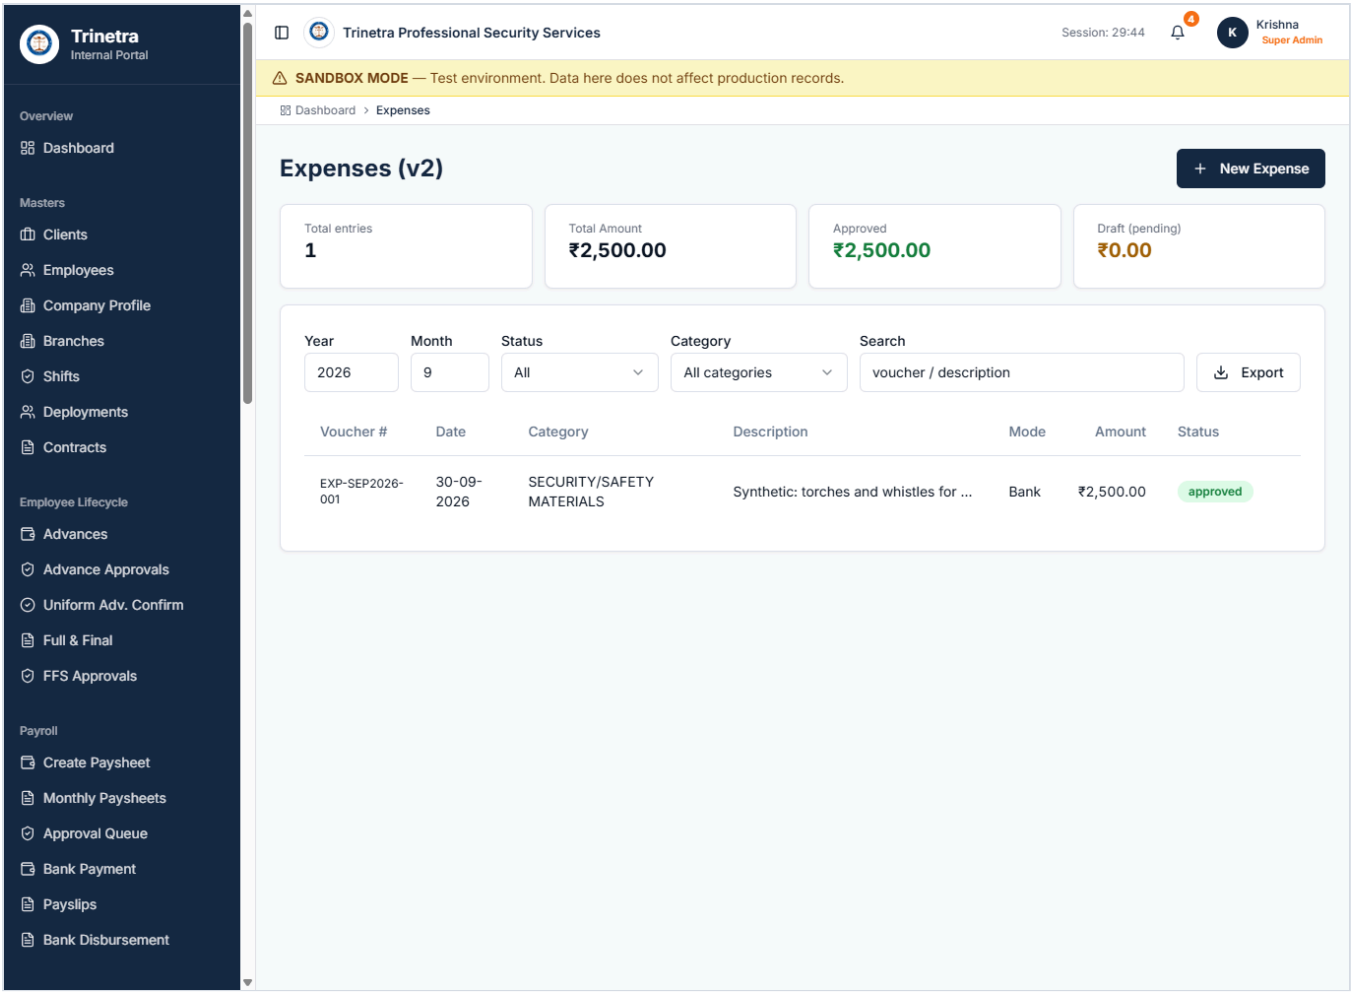

Figure 22.4 — "Expense approved & posted to ledger"

22.3 Cash Book and Monthly Summary

- **Finance › Cash Book** (Figure 22.5): ledger entries between two dates with a running balance and totals. With a **From** date, the first row is the **opening balance** (all earlier entries) and the running balance continues from it.
- **Finance › Monthly Summary** (Figure 22.6): income and expense breakdown for a month, with **Export Excel (CA-ready)**.

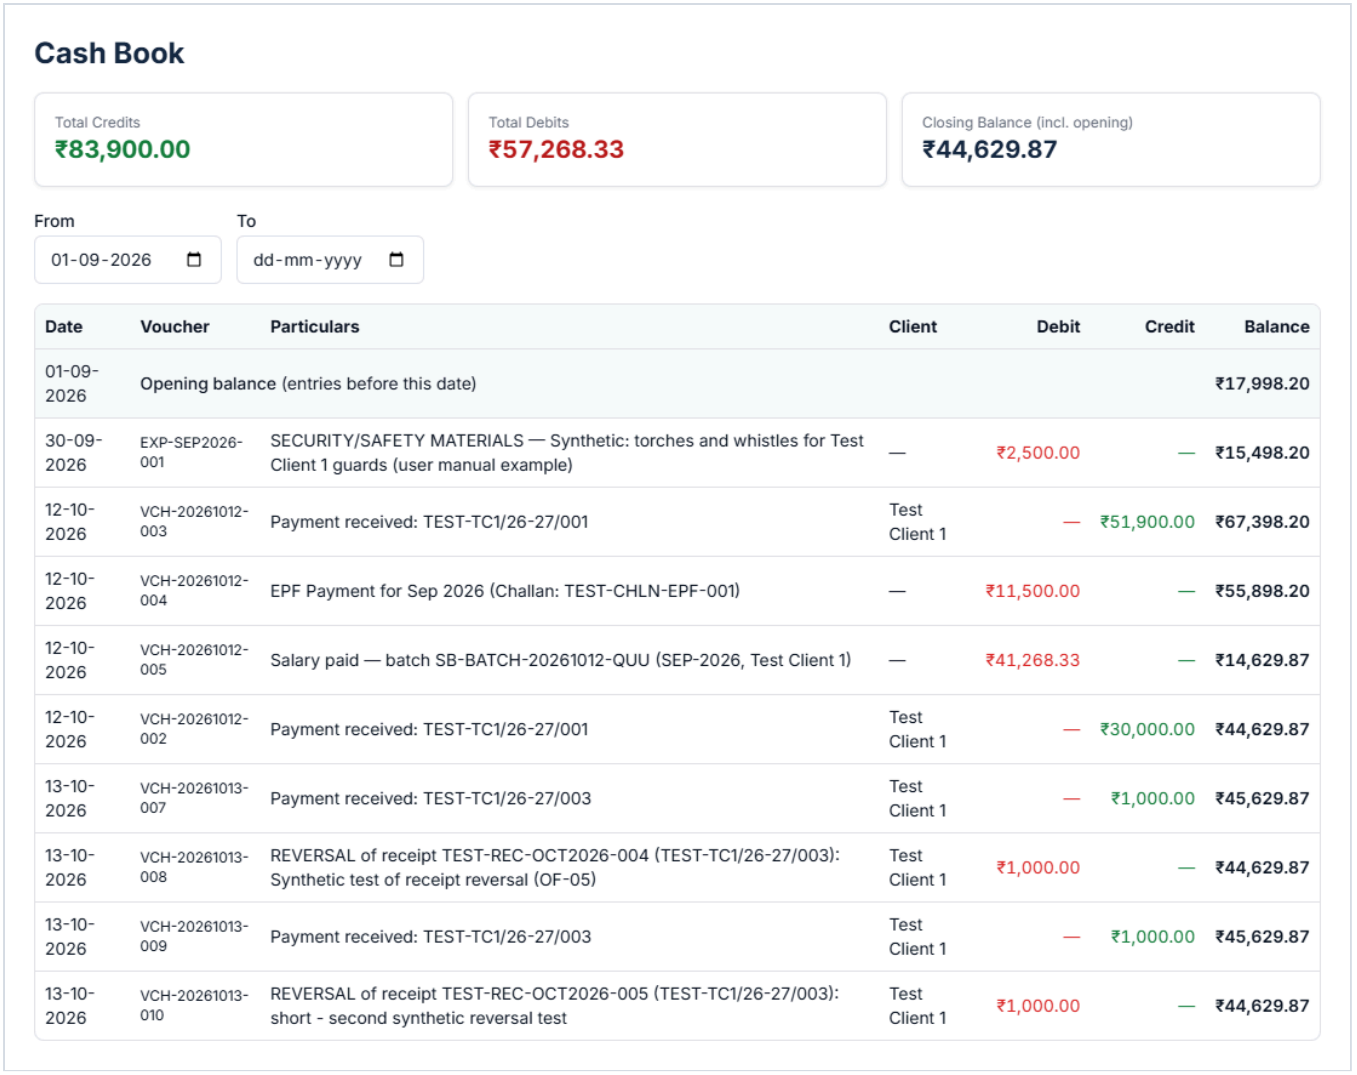

Figure 22.5 — Cash Book from 01-09-2026: opening balance ₹17,998.20 (earlier sandbox entries), this period's net ₹26,631.67, closing ₹44,629.87. Totals (credits ₹83,900, debits ₹57,268.33) also include two ₹1,000 test receipts and their reversals, which cancel out

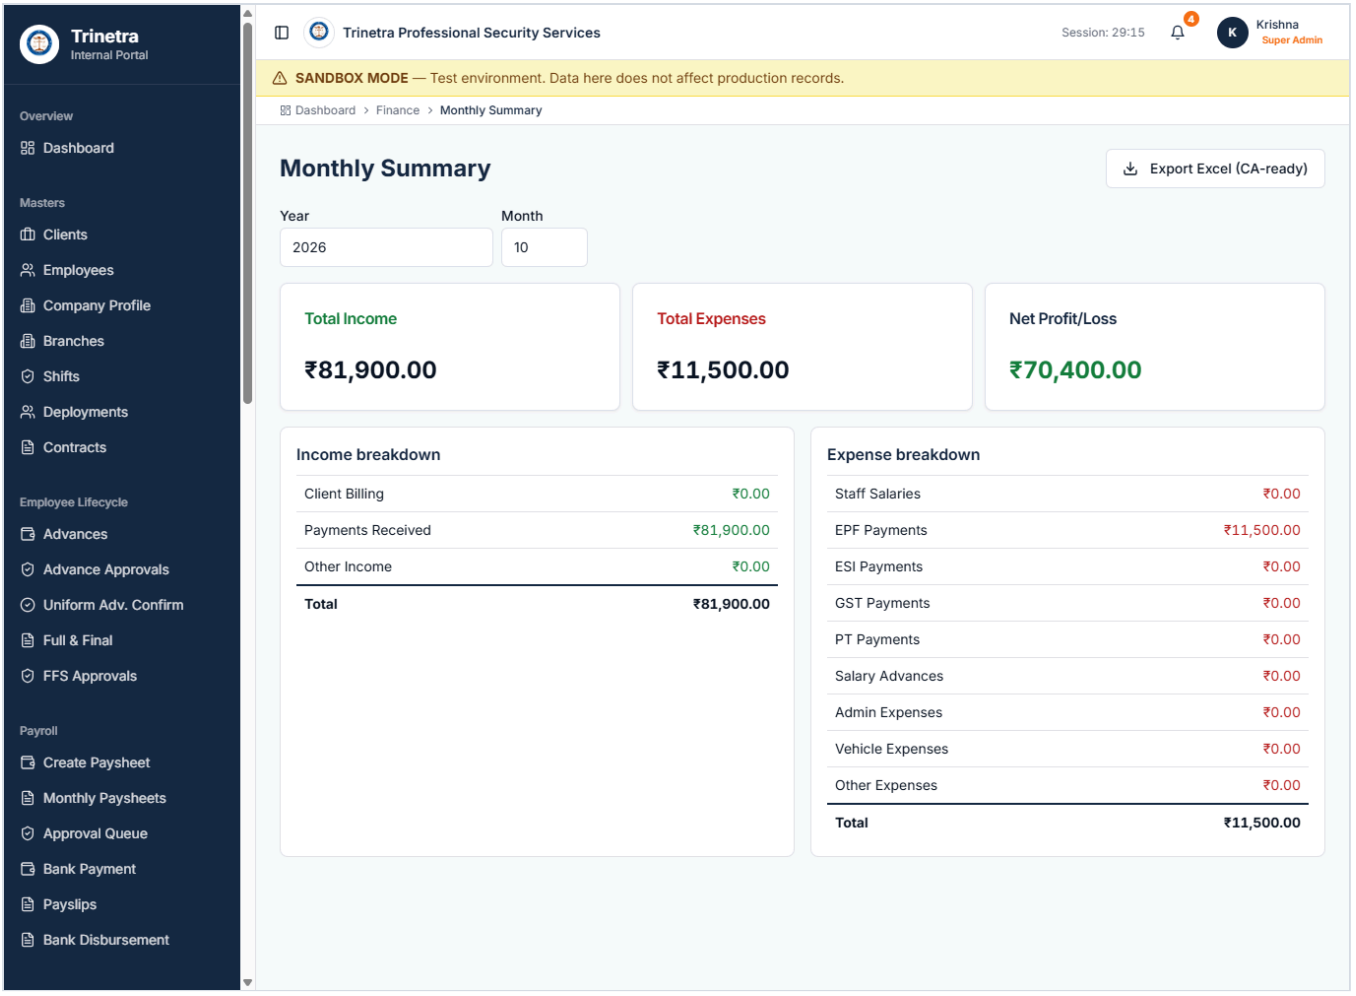

Figure 22.6 — Monthly Summary (October 2026)

22.4 Employee advances and Full & Final

- **Advances** (Employee Lifecycle › Advances):
  - **New Advance**: Employee, Type, Advance Date, Recovery Start Month, Total, Monthly Deduction, Reason (≤ 500 characters). The company's advance limit is checked.
  - Requests are **Pending** until a CEO or COO approves them in **Advance Approvals**. They then become **Active** and are recovered through paysheets until **Fully recovered**.
- **Uniform Adv. Confirm**: confirm uniform-advance deductions created when a paysheet is approved.
- **Full & Final** (Employee Lifecycle › Full & Final → New FFS):
  - Employee, reason, relieving date and last working day, then earned wages, bonus, leave encashment, gratuity basic and deductions.
  - **Save** (draft) or **Submit**. **FFS Approvals** (CEO / COO) approves it, optionally recording the payment.
  - Approval sets the employee to **Relieved** and closes active advances. A PDF is available.

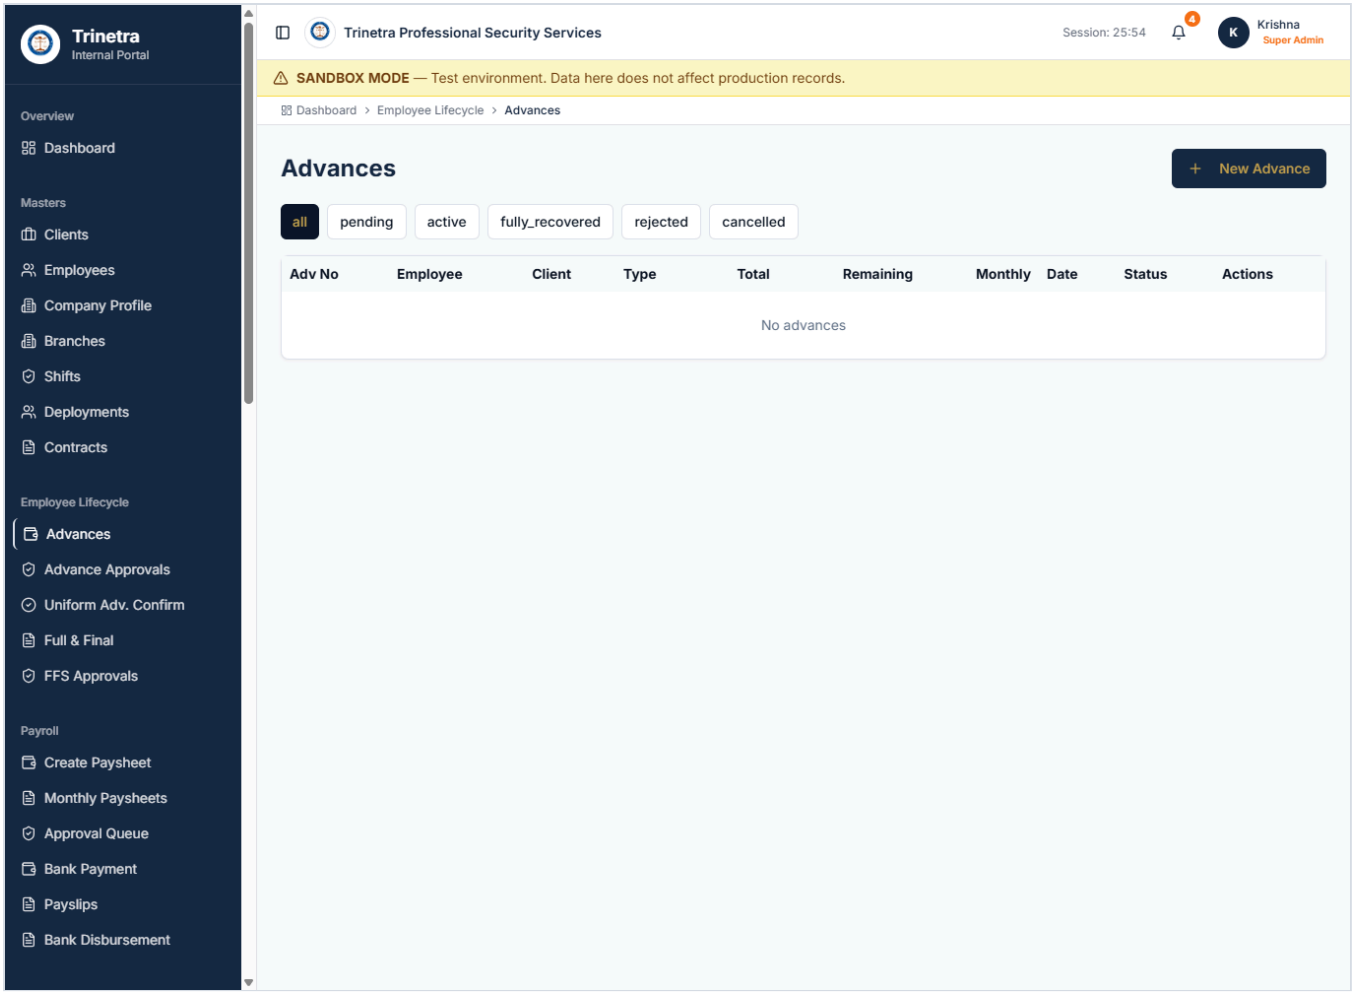

Figure 22.7 — Advances

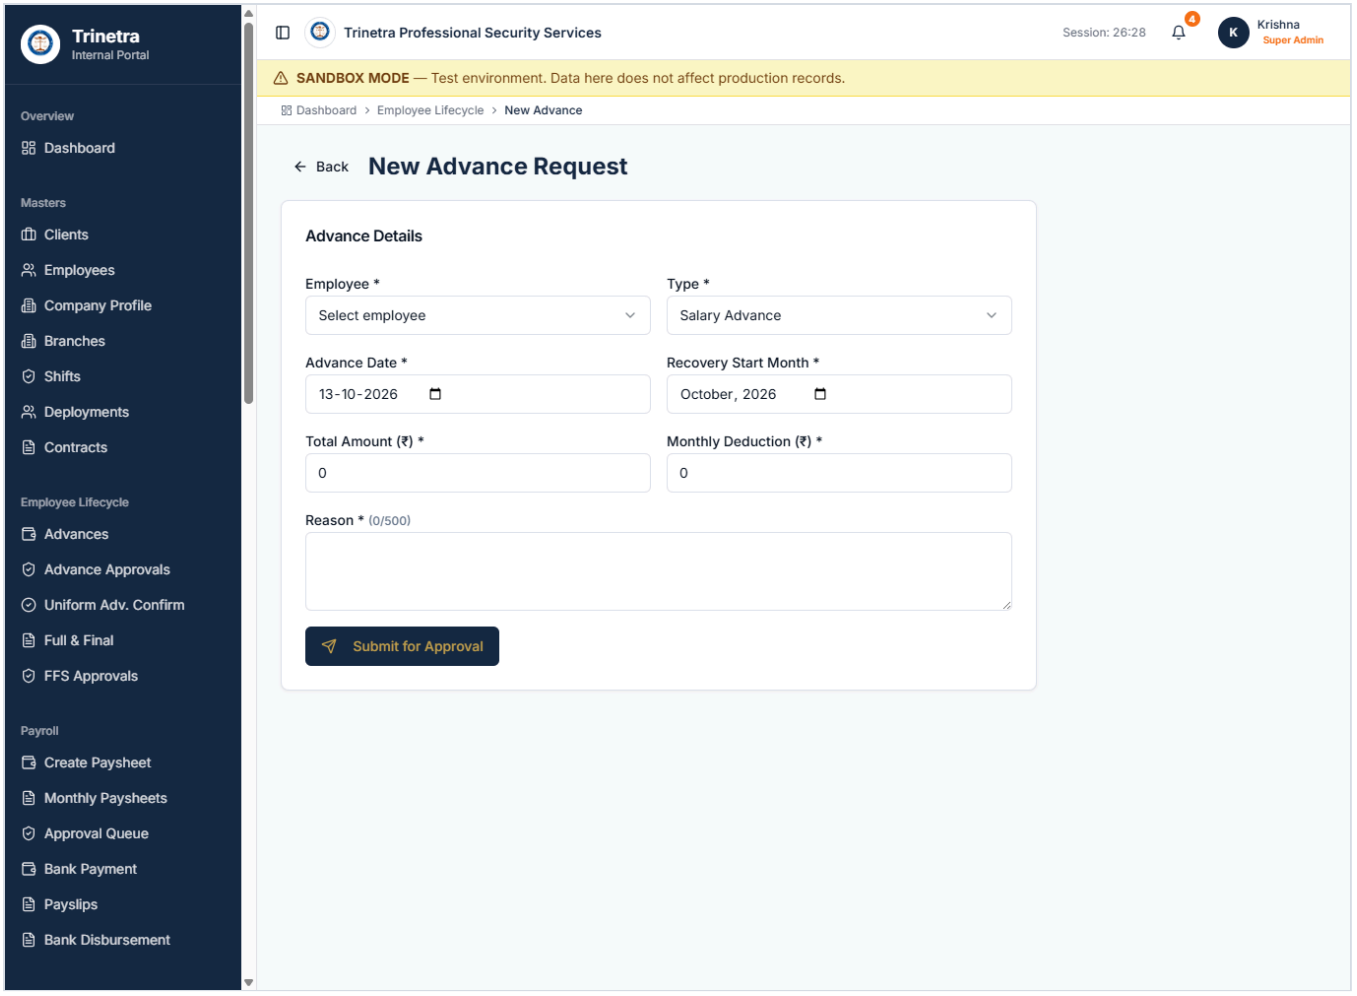

Figure 22.8 — New Advance Request

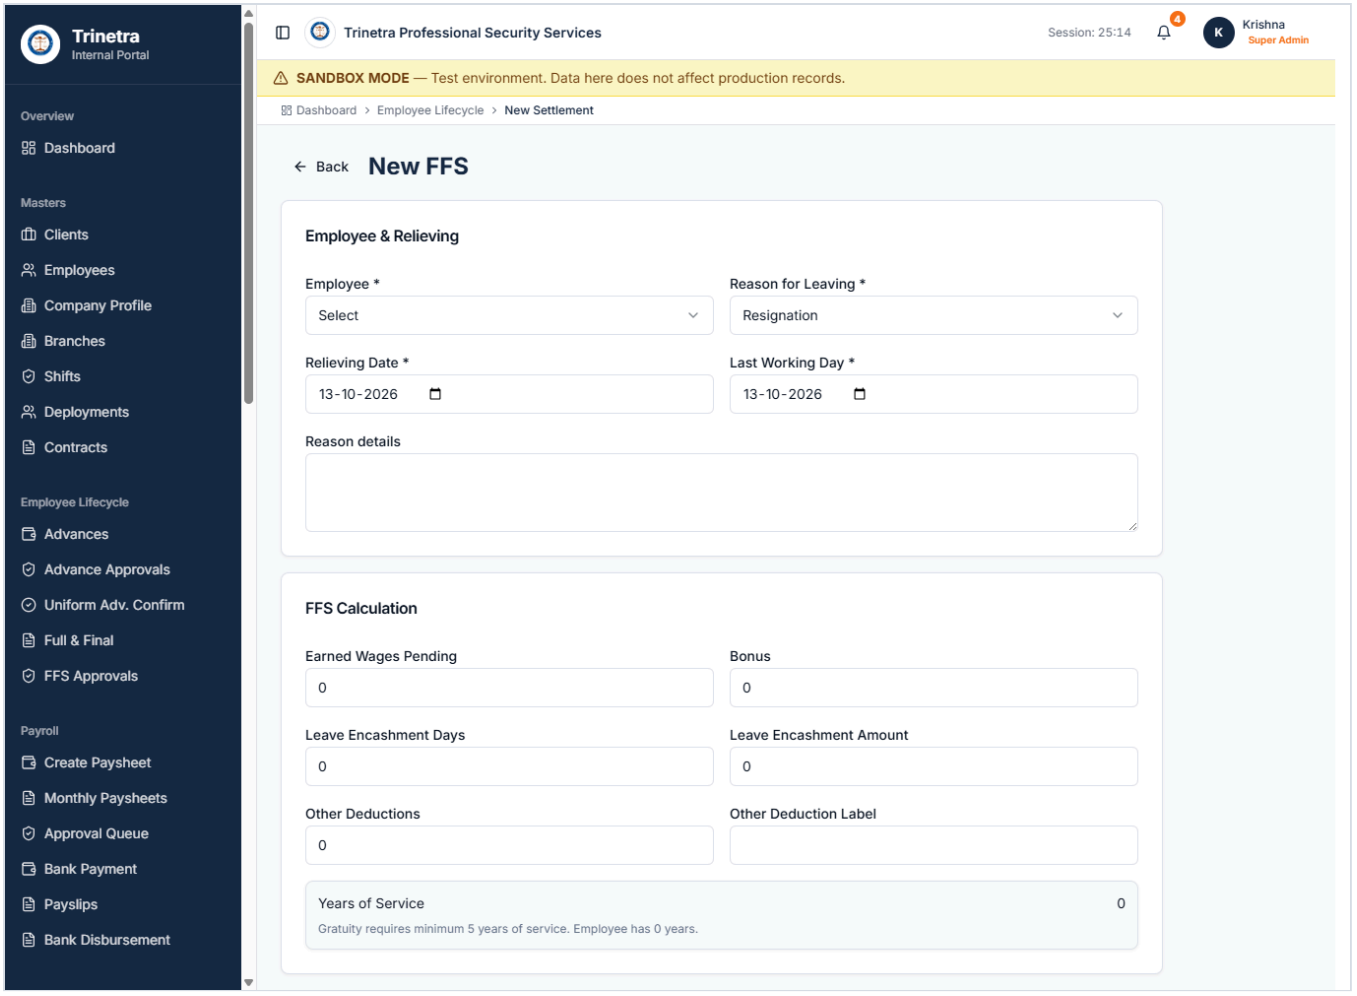

Figure 22.9 — New Full & Final settlement

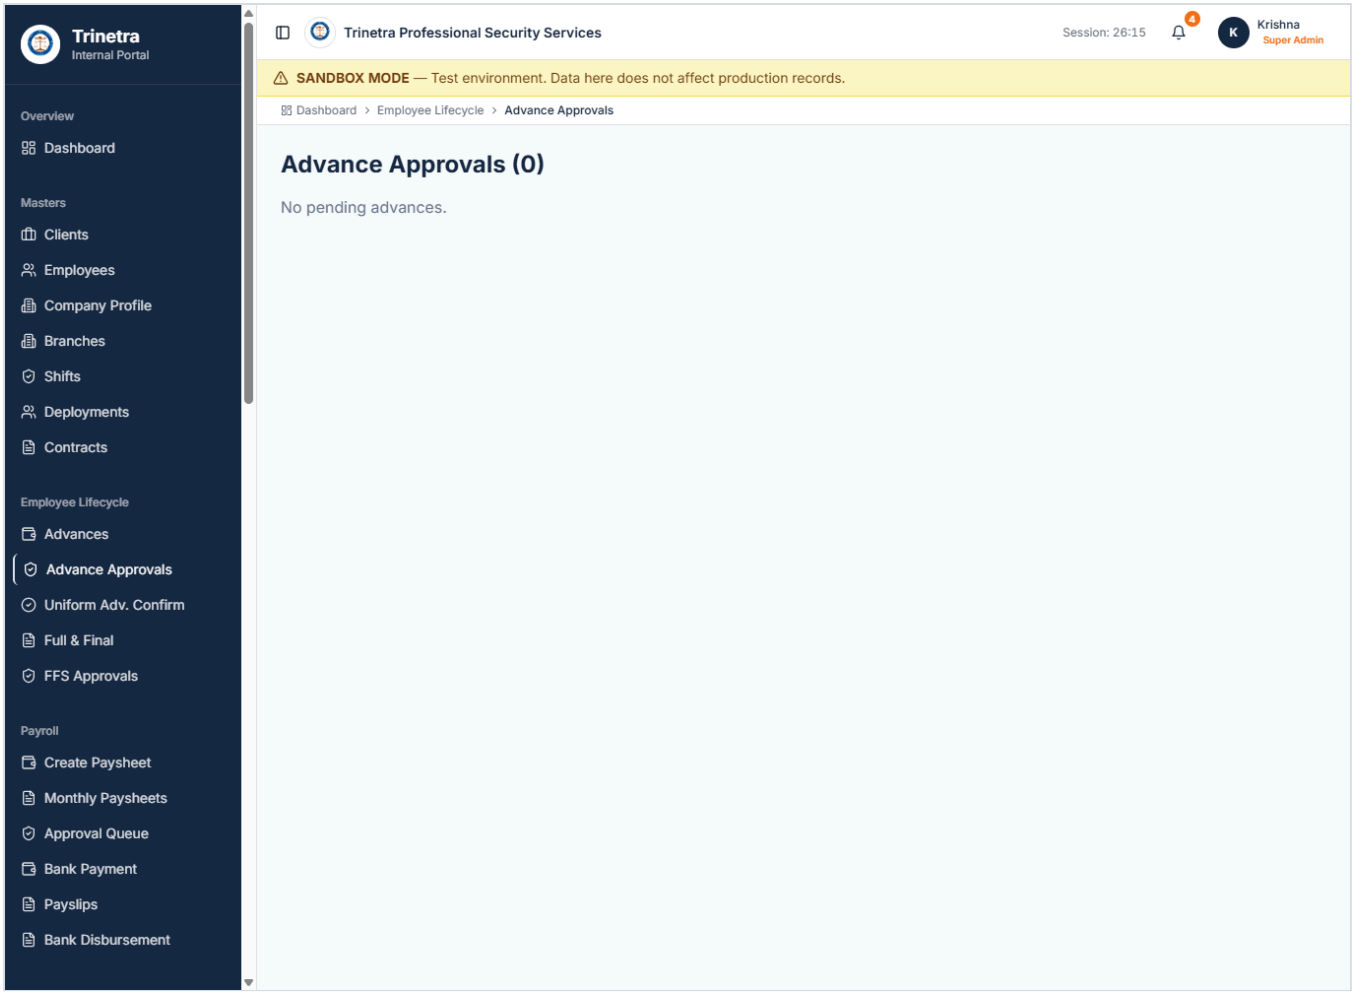

Figure 22.10 — Advance Approvals (CEO / COO)

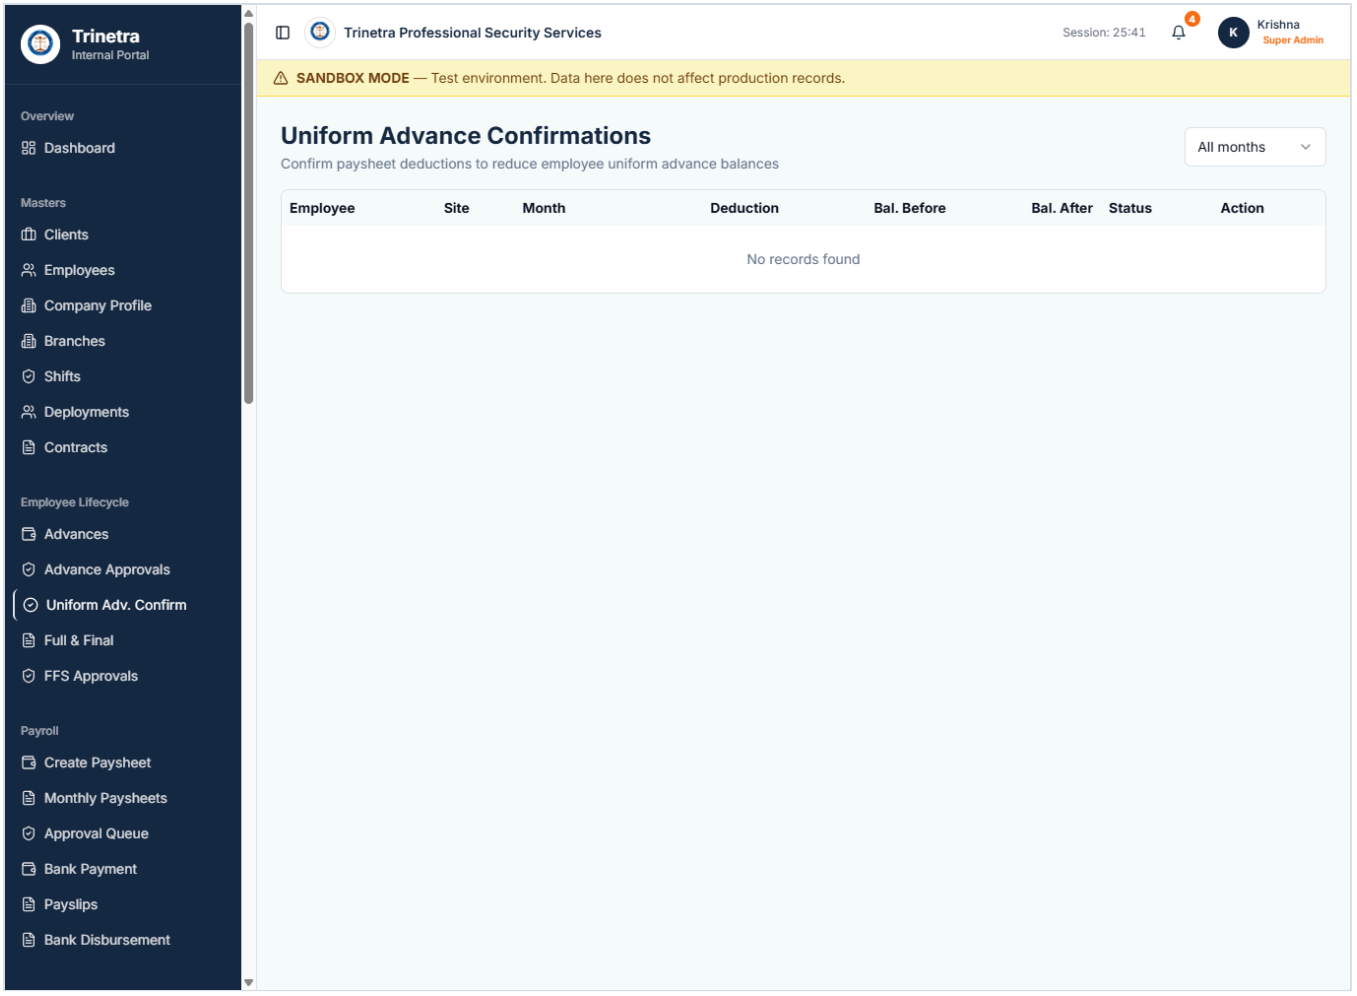

Figure 22.11 — Uniform Advance Confirmations

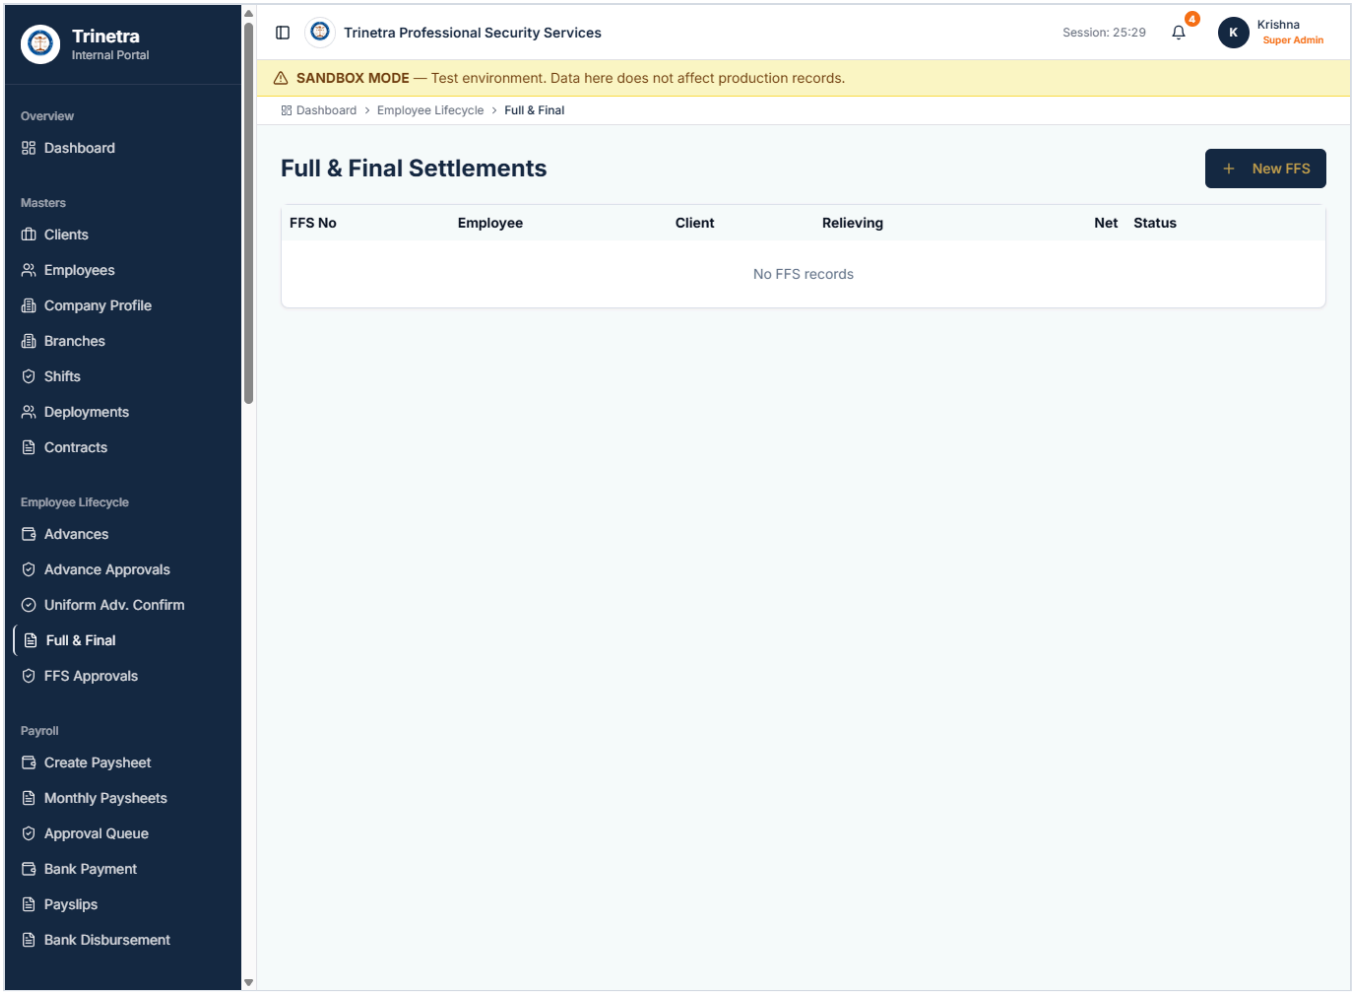

Figure 22.12 — Full & Final Settlements

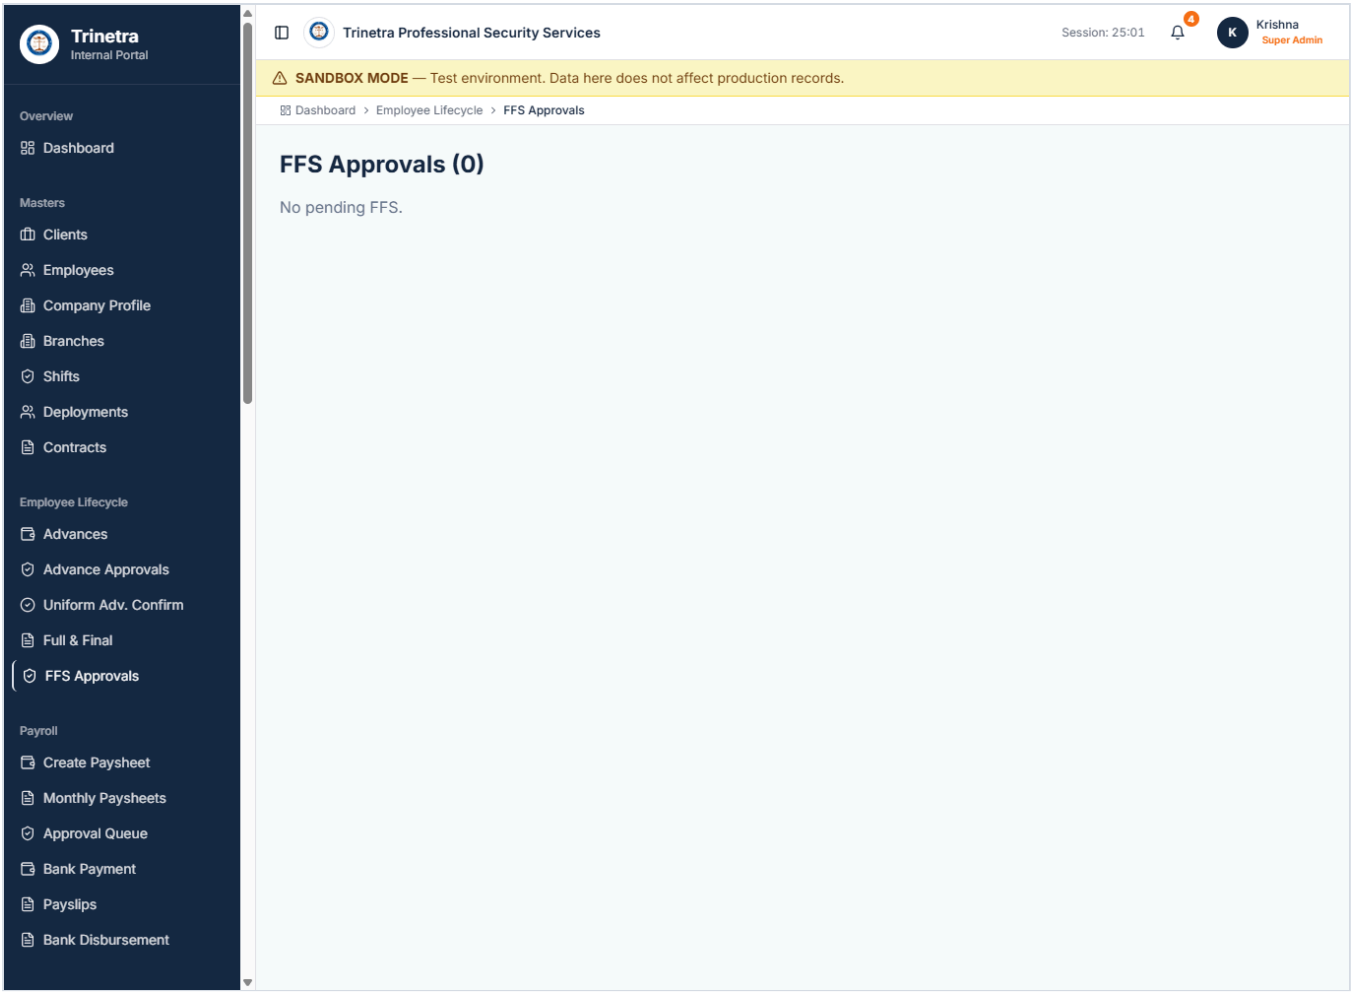

Figure 22.13 — FFS Approvals

(Advances and FFS were not exercised with sample data; they are documented from the application logic.)

23. Monthly operational cycle

When	Step	Chapter
Month start	Check new joiners, deployments, contract expiries	14, 15, 13
After month end	Create paysheet per client, enter duties, submit	17
	Approve paysheets	17.3
	Bank payment batch → upload Excel at bank	19
	Payslips, statutory PDFs, ECR / ESI files	17.5, 18
	Generate and issue invoices	20
By statutory due dates	Pay PF / ESI / PT, record compliance payments	18.3
Through the month	Record receipts, follow up overdue invoices	21
	Record and approve expenses	22
Month close	Review Cash Book, Monthly Summary, Aging, GST report	22, 24

There is no "close month" or lock. Approved paysheets and receipts cannot be edited, which provides most of that protection.

End-to-End Monthly Example — Test Client 1, September 2026

1. **Client** Test Client 1 (CLT-037): GST 18 %, TDS 1 %, PF / ESI / PT on. S.GUARD 12,000 + 3,000 DA; SUPERVISOR 15,000 + 3,000 DA; washing 500; uniform 300. Billing ₹22,000 per guard and ₹26,000 per supervisor (Figure 11.2).
2. **Contract** CNT-CLT-037-001, 01-04-2026 to 31-03-2027 (Figure 13.3). **Shift** Test Day Shift (Figure 10.2).
3. **Employees** EMP-192 and EMP-193 (S.GUARD), EMP-194 (SUPERVISOR, new joiner), all **deployed** to Test Client 1 (Figure 15.3).
4. **Paysheet** TEST-PS-SEP2026-001, duties 30 / 26 / 30:

Employee	Earned	EPF EE	ESI EE	PT	Final net
Test Employee 1	15,500.00	1,800.00	112.50	150	13,437.50
Test Employee 2 (26 duties)	13,433.33	1,560.00	97.50	0	11,775.83
Test Employee 3	18,500.00	2,160.00	135.00	150	16,055.00
Total	**47,433.33**	**5,520**	**345**	**300**	**41,268.33**

Employer cost: EPF ₹5,980, ESI ₹1,495. Example for Test Employee 1: (15,800 − 300) ÷ 30 × 30 = 15,500; EPF 12 % of 15,000 = 1,800. 5. **Approved** (Figure 17.12). **Bank payment** batch for ₹41,268.33; all three Paid (Figure 19.2). **Payslips** (Figure 17.14). 6. **Statutory:** PF statement ₹46,000 wages / ₹11,500 contributions (Figure 18.2); ECR and ESI files (Figures 18.6–18.7); EPF paid ₹11,500 on challan TEST-CHLN-EPF-001 (Figure 18.10). 7. **Invoice** TEST-TC1/26-27/001 from the paysheet: ₹82,600 total, ₹81,900 receivable, net margin ₹33,156.67 (Figure 20.1). 8. **Receipts:** ₹30,000 (Partially paid), then ₹51,900 (Paid, outstanding ₹0) (Figures 21.1–21.4). 9. **Expense** EXP-SEP2026-001 ₹2,500, approved (Figure 22.4). 10. **Cash Book** for this client's month: in ₹81,900 (two receipts); out ₹55,268.33 (salary batch ₹41,268.33 + EPF ₹11,500 + expense ₹2,500); net ₹26,631.67 (Figure 22.5). 11. **October** manual invoice issued, followed up, then corrected by cancel and re-create (chapter 25). The re-created invoice TEST-TC1/26-27/003 (₹81,900 receivable) is outstanding, which is the Statement of Account's closing balance (Figure 24.8).

24. Reports and dashboards

Report	Menu	Filters	Exports	Notes
Dashboard	Overview	Branch (CEO+)	—	Money cards are labelled **"(by billing month)"**: they cover invoices of this billing month, not cash dates. Issued invoices only (drafts and cancelled excluded)
Financial / MoM / Comparative	Reports	Metric, branch, client, months	Excel	Client filter keeps figures to one client. Issued invoices only; cancelled paysheets excluded. Employee Count is a plain number
Client History	Reports	Client*, dates	Excel, PDF	Invoice-by-invoice billing, margin, received, outstanding
Employee History	Reports	Employee*, dates	Excel (all tabs), PDF	Payroll, advances, deployments
Annual Summary (CA-ready)	Reports	Financial year, branch	Excel, PDF	Invoice and payment registers, payroll, EPF / ESI, expenses, P&L
Statutory Documents	Reports	Month*, clients*	PDF / ZIP	Ch. 18
Cash Book, Monthly Summary, Statement of Account, Aging, GST	Finance	Dates / month / client	Excel / PDF	Ch. 21–22. **Statement of Account**: each invoice is followed by a "TDS deducted by client" credit line, so the closing balance equals what the client still owes. **GST report**: issued invoices only, with CGST / SGST / IGST columns; **Export GST summary (for GSTR-1)** adds SAC, client GSTIN and place of supply

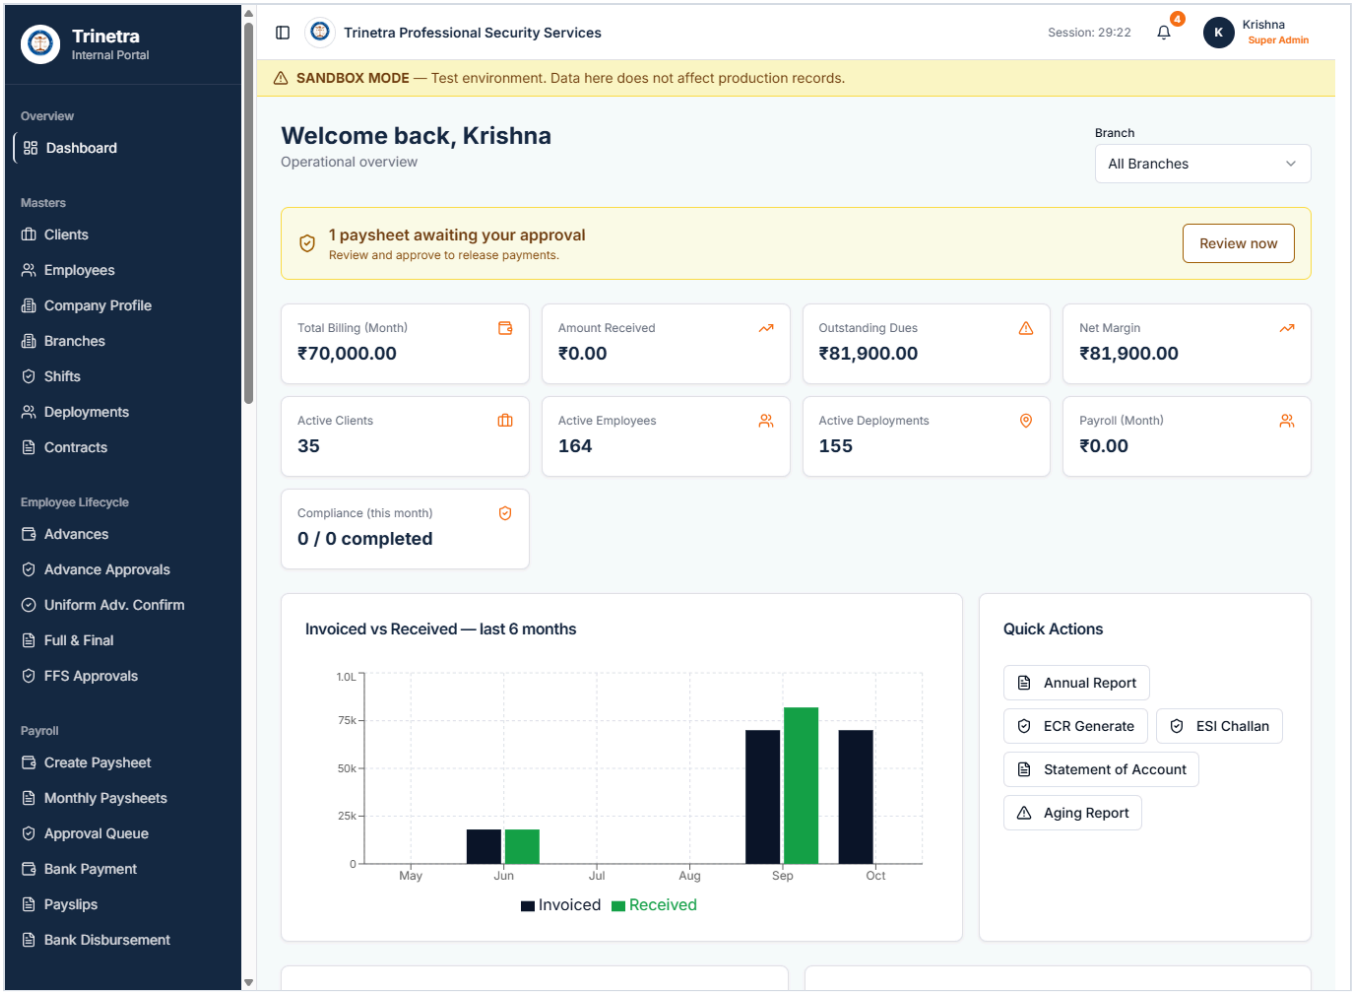

Figure 24.1 — Dashboard (October)

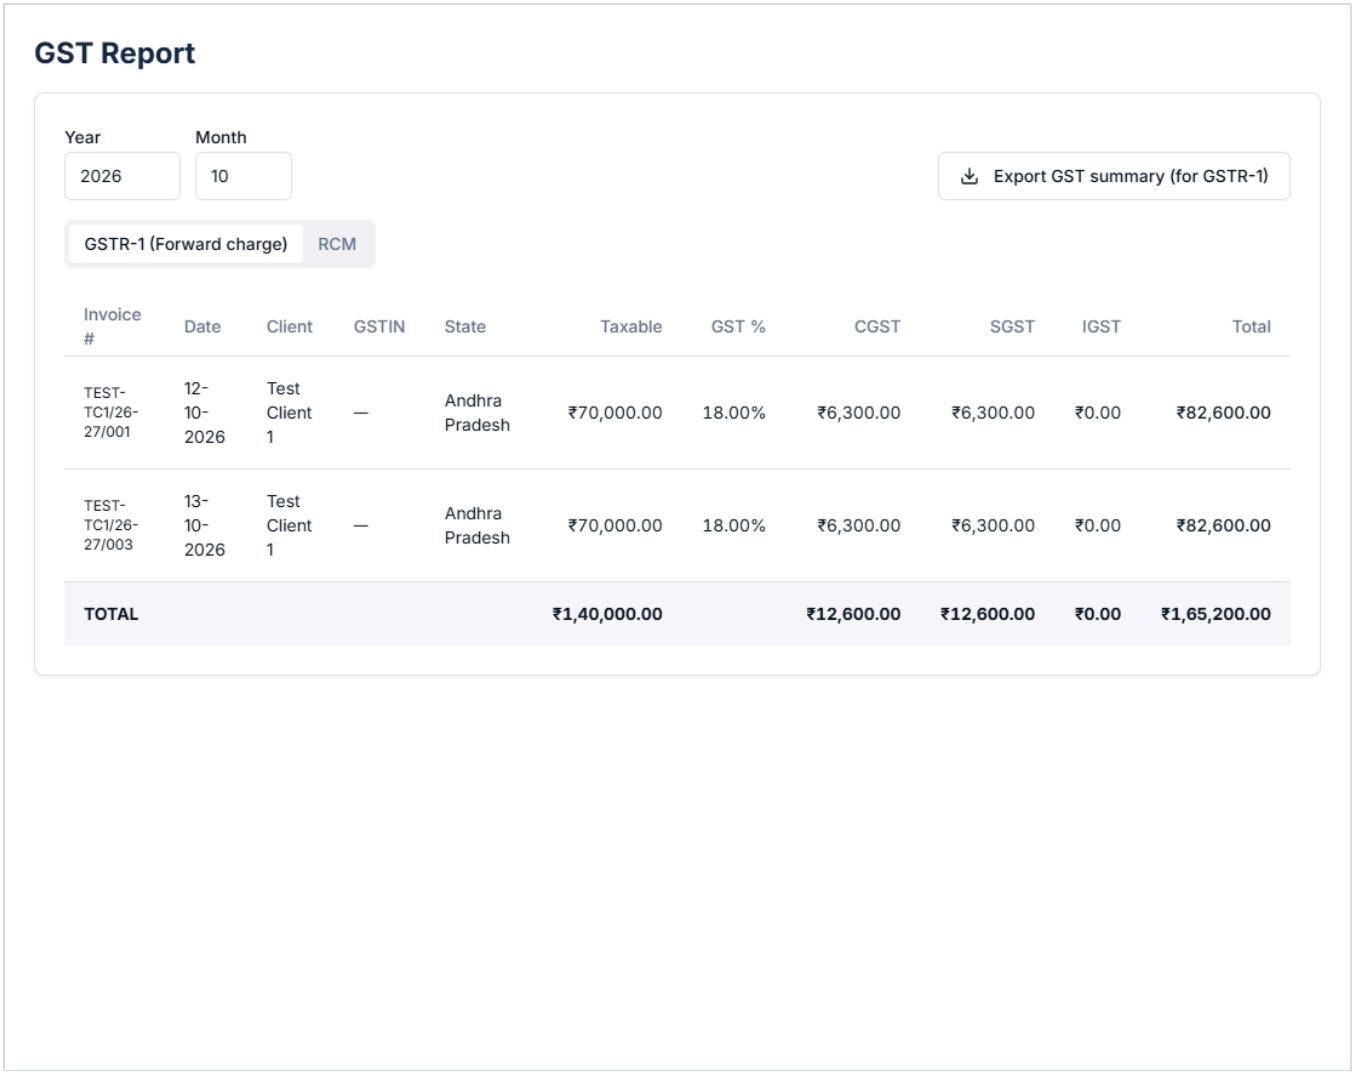

Figure 24.7 — GST Report (October)

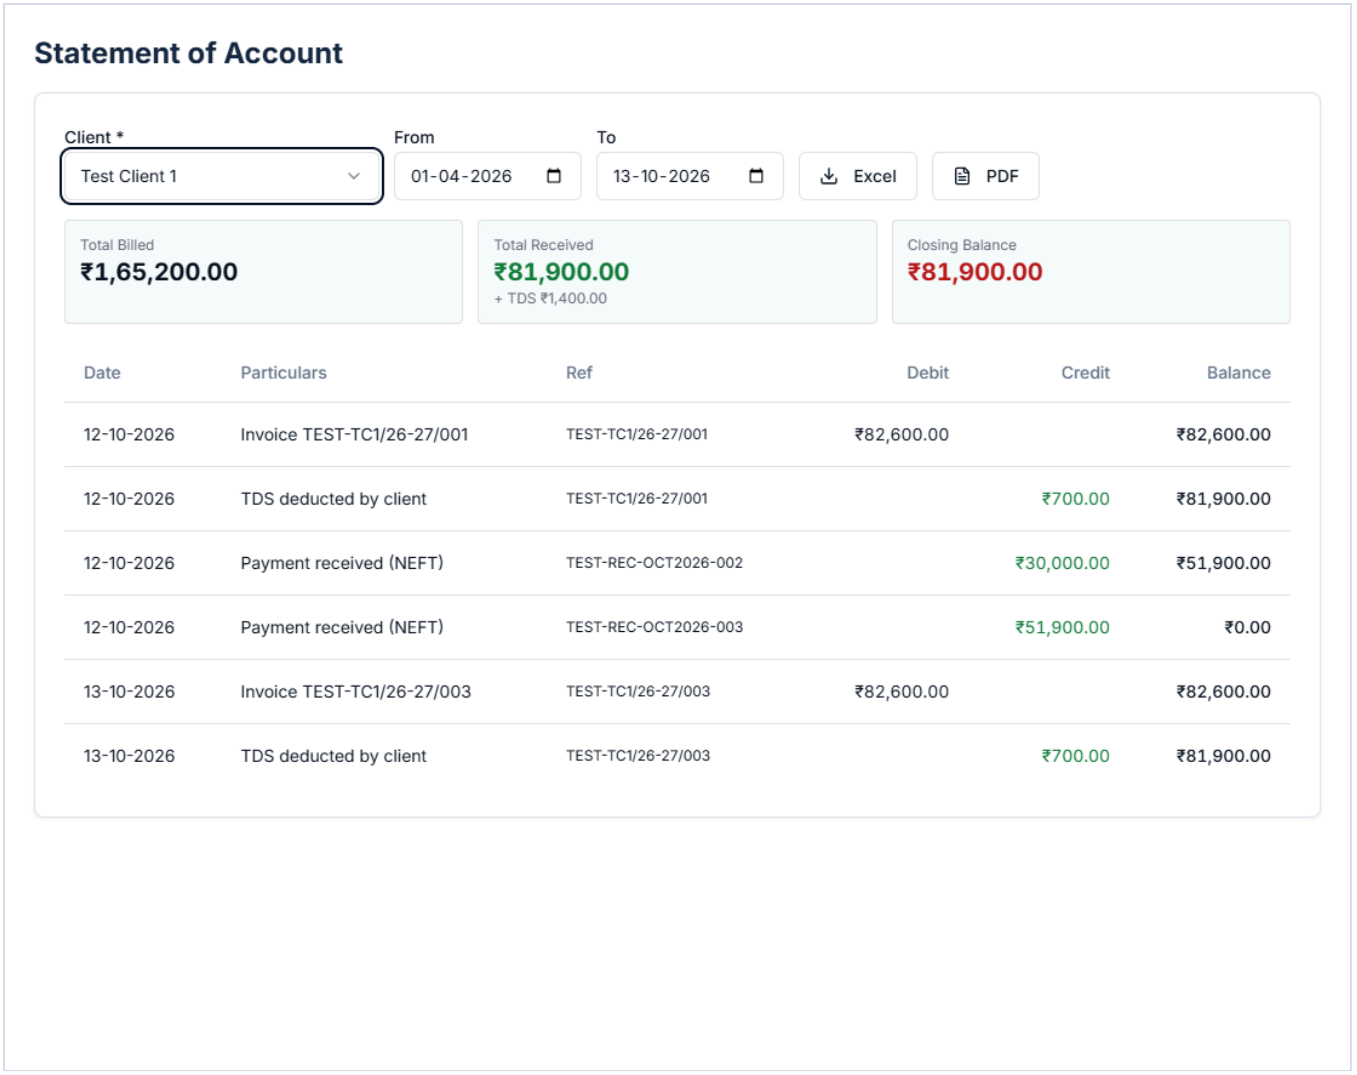

Figure 24.8 — Statement of Account

Statement of Account

Client: Test Client 1

Period: 01-04-2026 to 13-10-2026

Date	Particulars	Ref	Debit (Rs.)	Credit (Rs.)	Balance (Rs.)
12-10-2026	Invoice TEST-TC1/26-27/001	TEST-TC1/26-27/001	82600.00		82600.00
12-10-2026	TDS deducted by client	TEST-TC1/26-27/001		700.00	81900.00
12-10-2026	Payment received (NEFT)	TEST-REC-OCT2026-002		30000.00	51900.00
12-10-2026	Payment received (NEFT)	TEST-REC-OCT2026-003		51900.00	0.00
13-10-2026	Invoice TEST-TC1/26-27/003	TEST-TC1/26-27/003	82600.00		82600.00
13-10-2026	TDS deducted by client	TEST-TC1/26-27/003		700.00	81900.00
	Total		**165200.00**	**83300.00**	**81900.00**

Figure 24.9 — Statement of Account PDF

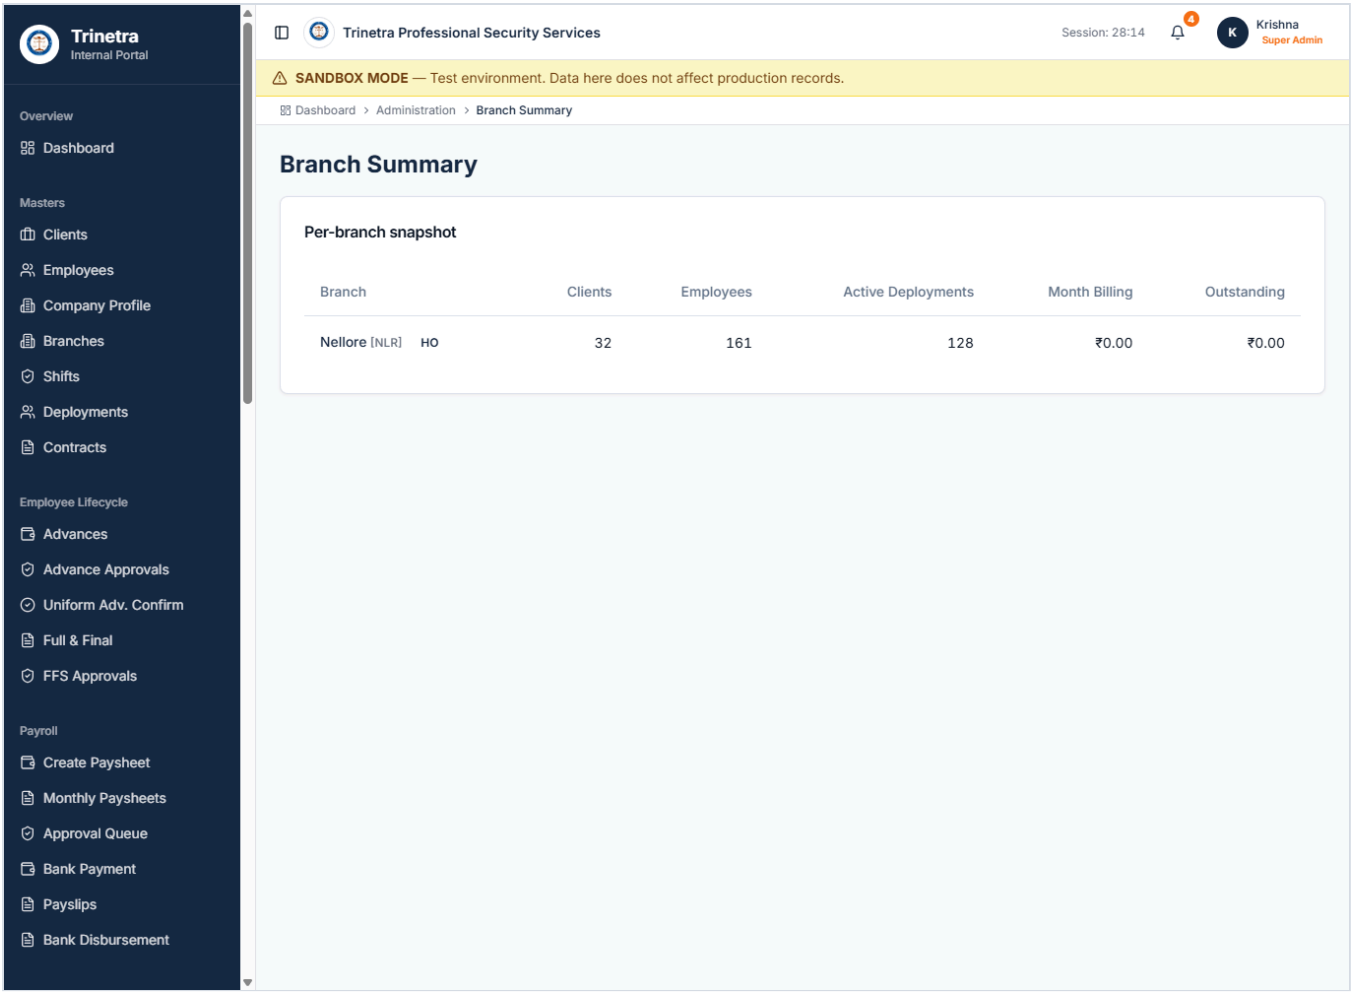

Figure 24.10 — Administration › Branch Summary (per-branch snapshot; CEO / Super Admin)

CRM — sales leads

Menus: CRM › CRM Dashboard, Leads Pipeline, New Lead.

- **Website enquiries** ("Request a Quote" on the public site) create a lead automatically and notify CEO and Super Admin users.
- **New Lead** (Figure 24.13):
  - **Required:** Contact Person Name*, Company Name*, Phone*.
  - **Optional:** requirement (category, number of guards, expected value, expected closure date), source, priority, status, assigned to, next follow-up.
  - The lead number (for example LEAD-2026-0001) is automatic.
- **Lead detail:**
  - **Log Activity:** notes required; contact mode; outcome; next follow-up.
  - **Add Quotation:** summary required; reference, date, value, status.
  - **Close Lead:** won or lost, with a reason; a win summary or closure remarks are required.
- **Statuses:** see chapter 33.

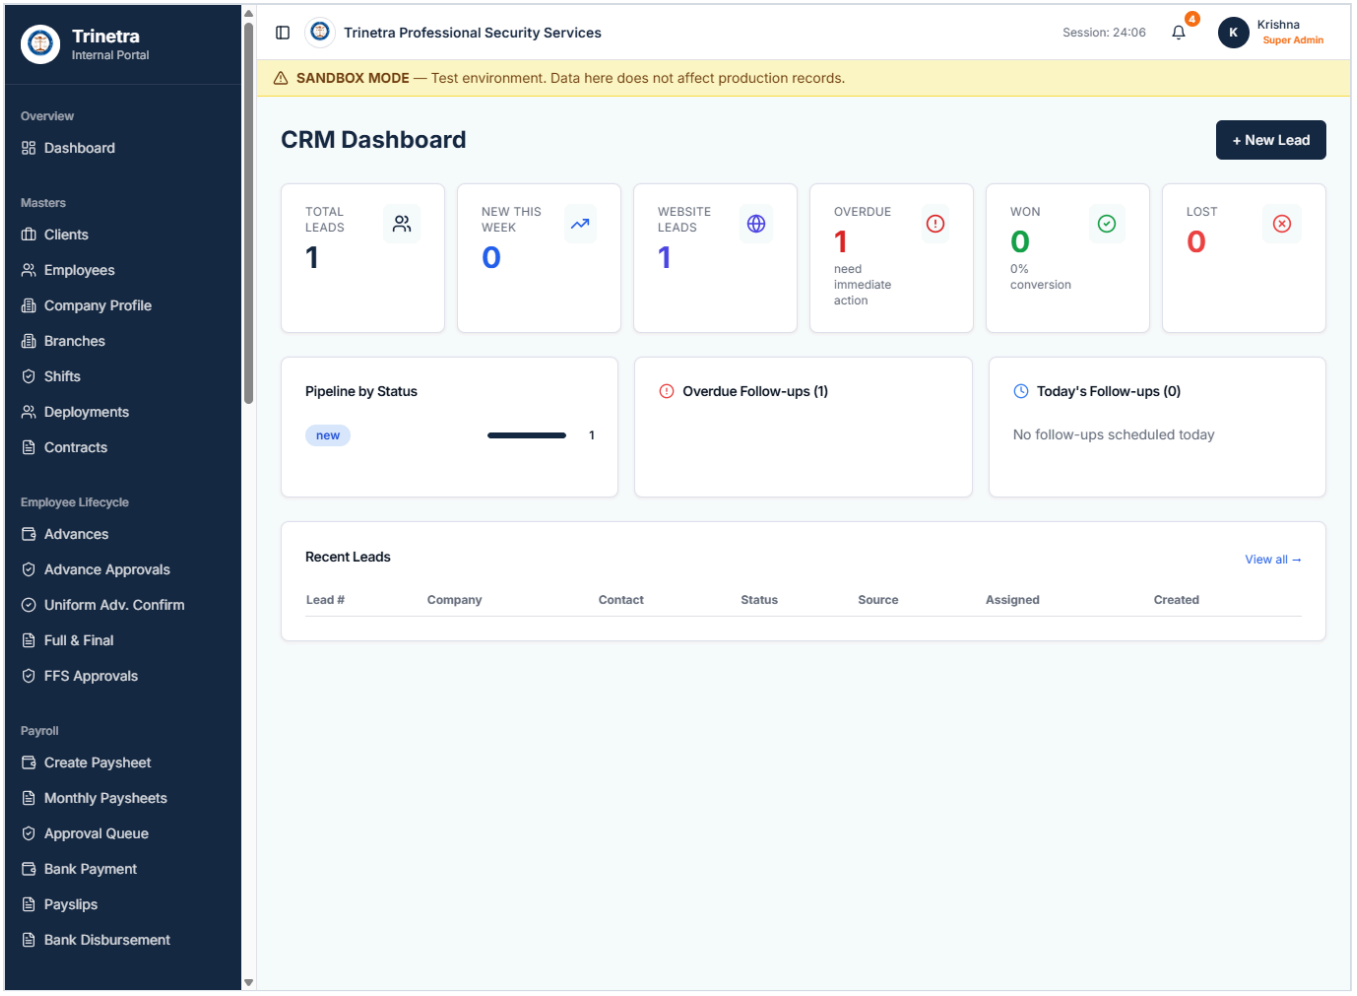

Figure 24.11 — CRM Dashboard (a real enquiry is hidden)

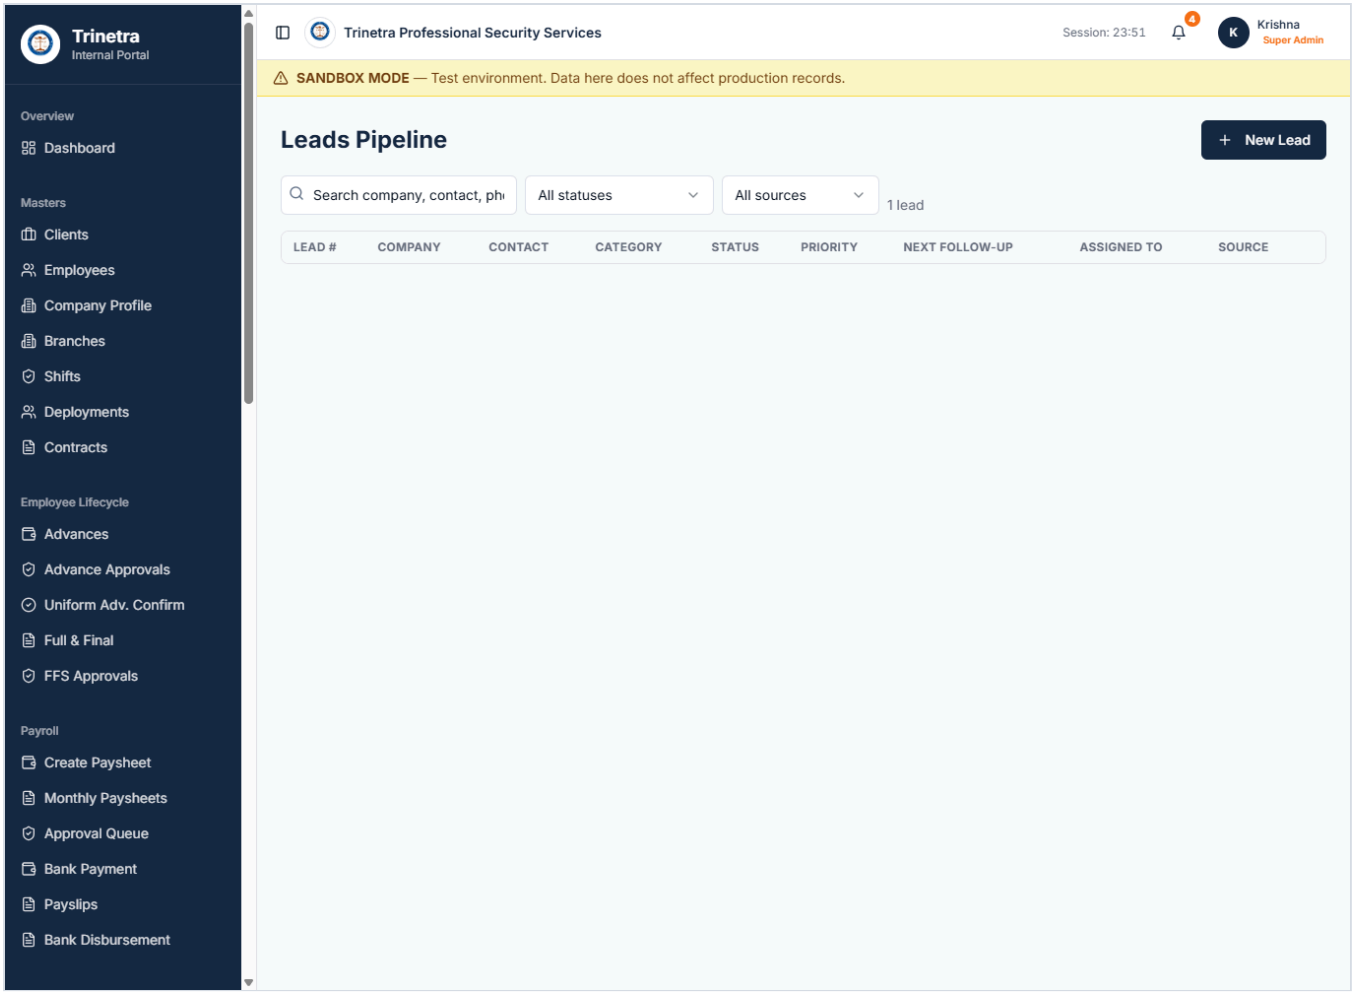

Figure 24.12 — Leads Pipeline

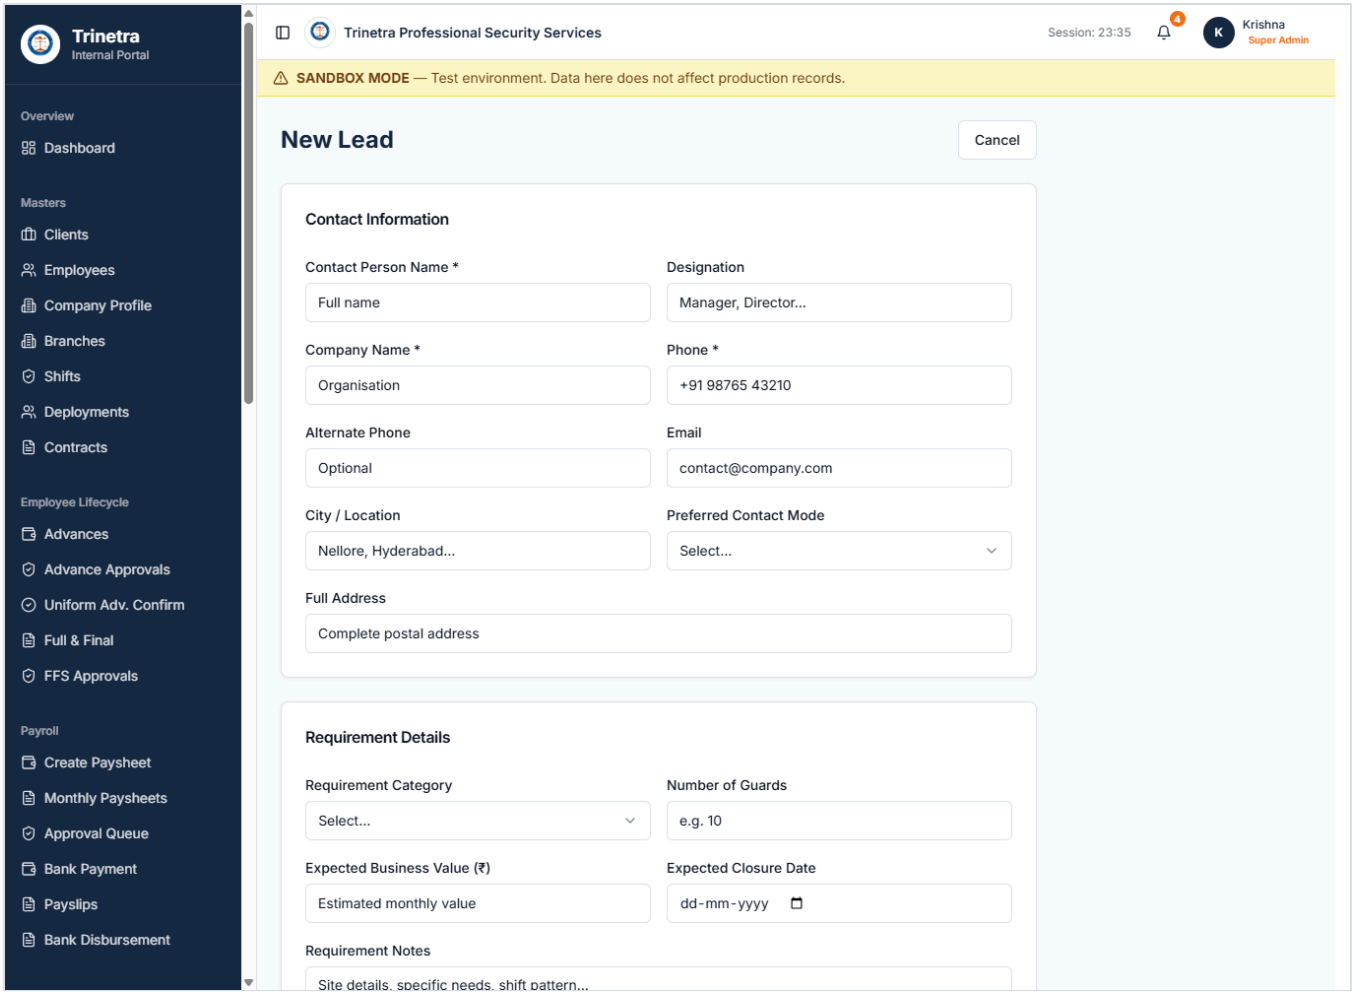

Figure 24.13 — New Lead form

Worked example — LEAD-2026-0002 "Test Prospect (Synthetic)" (all details synthetic):

1. **New Lead**: contact, company, phone, 4 guards, expected value ₹96,000 → **Create Lead** ("Lead LEAD-2026-0002 created", Figure 24.14). The lead opens in its detail page (Figure 24.15).
2. **Log Activity**: activity type (Call Made), contact mode, **Discussion Notes***, outcome, next action, next follow-up date → **Log Activity** ("Activity logged", Figure 24.16).
3. **Add Quotation**: reference, date, value, status (Draft / Submitted / …), **Summary*** → **Save Quotation** ("Quotation saved", Figure 24.17). Activity and quotation appear on the detail page.
4. **Close Lead**: **Won** or **Lost**, **reason*** from the list, closure date, **Win Summary*** (or Remarks for a loss), optional competitor and contributing factors → **Mark as Won** ("Lead marked as WON", Figures 24.19–24.20).

Each step adds an entry to the lead's **Activity Timeline**.

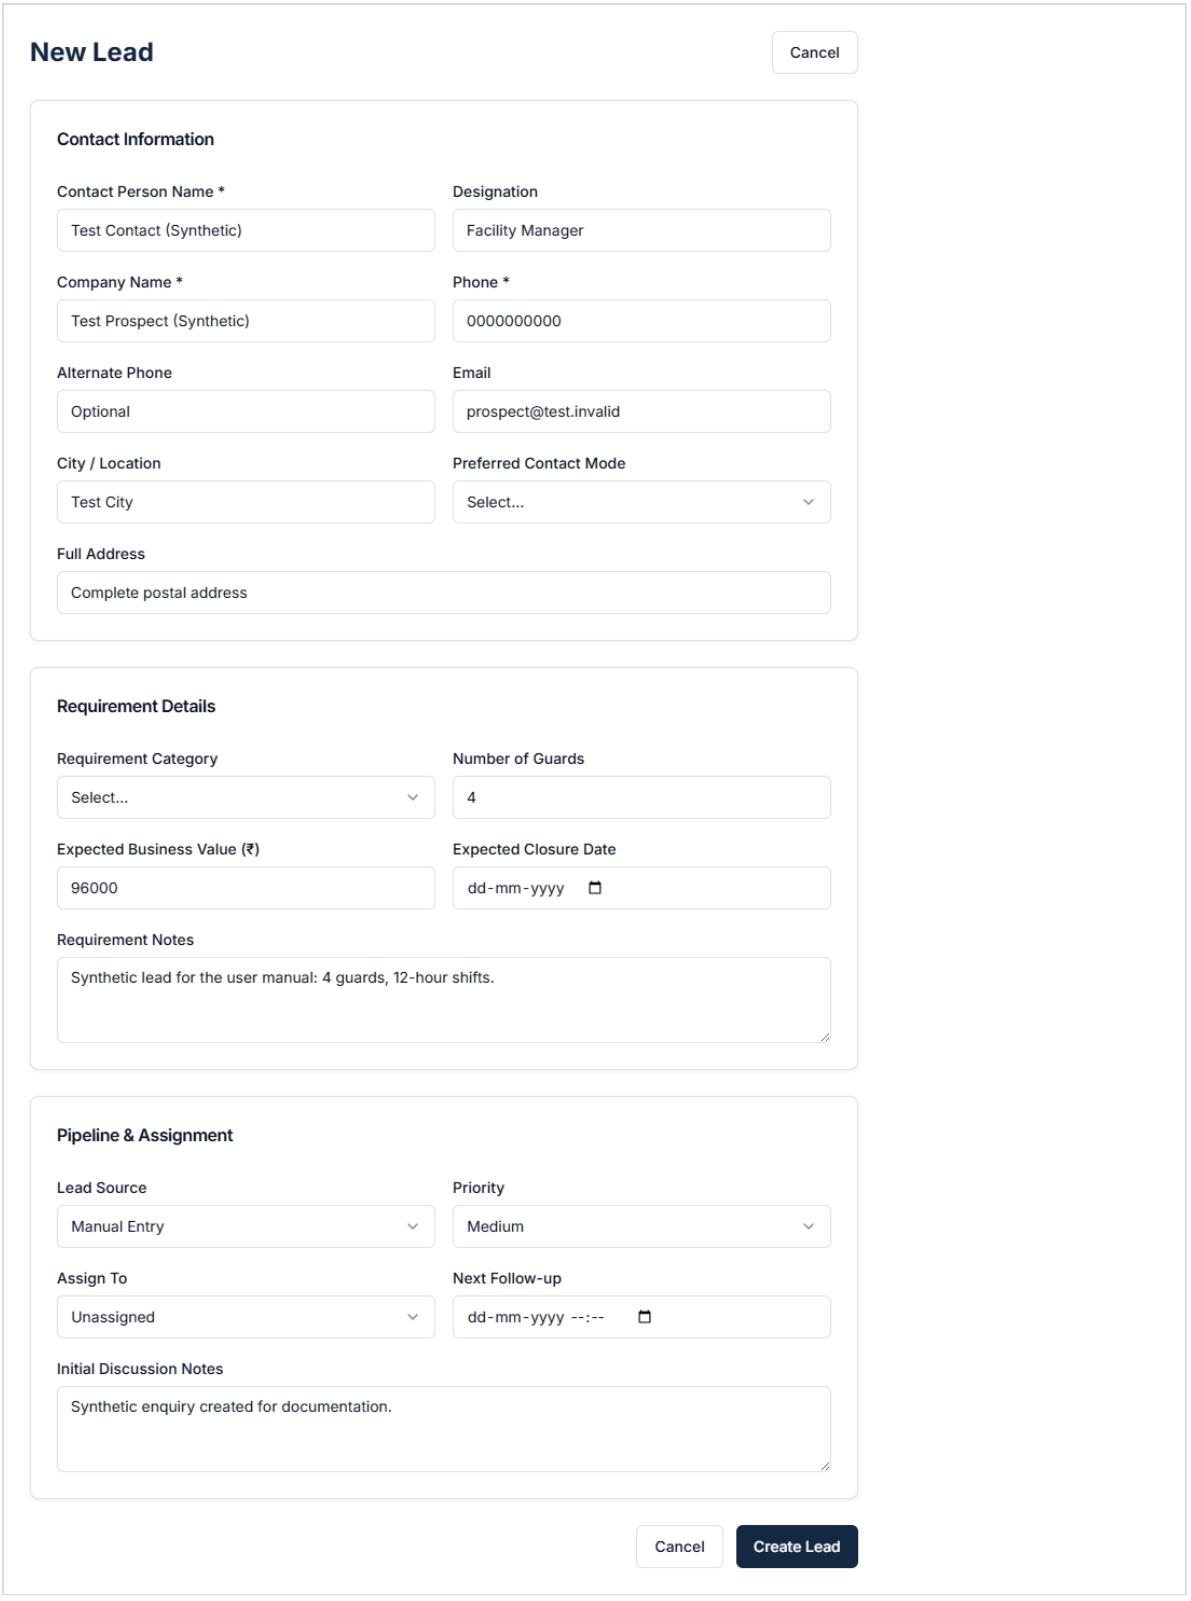

Figure 24.14 — New Lead form filled in

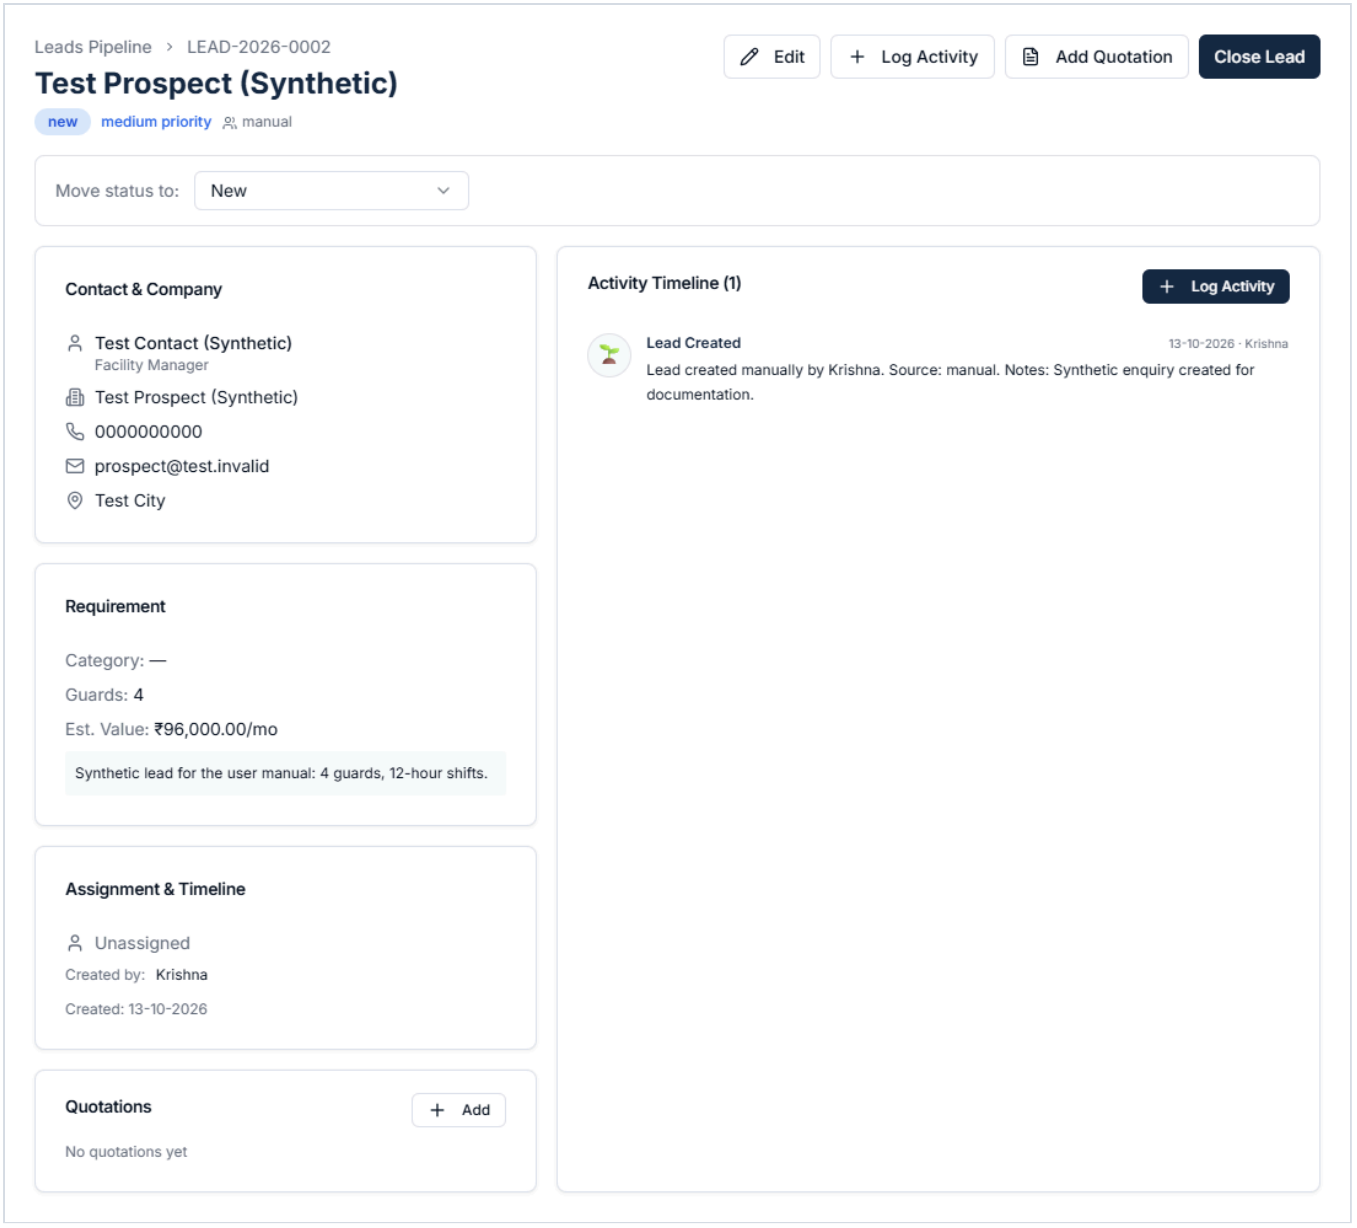

Figure 24.15 — Lead detail with Log Activity, Add Quotation and Close Lead

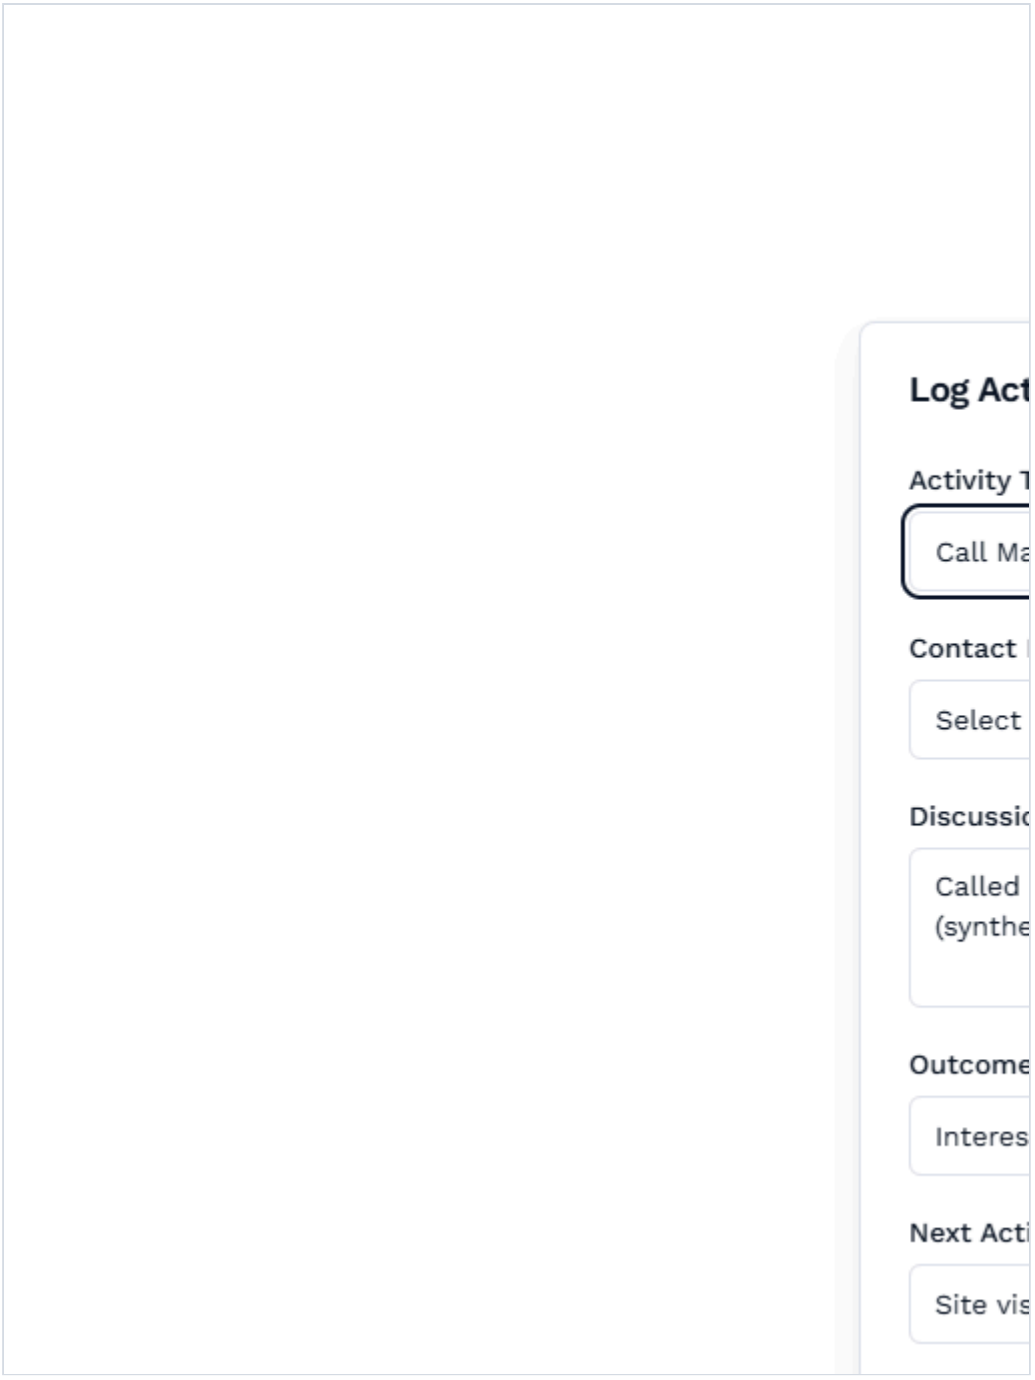

Figure 24.16 — Log Activity

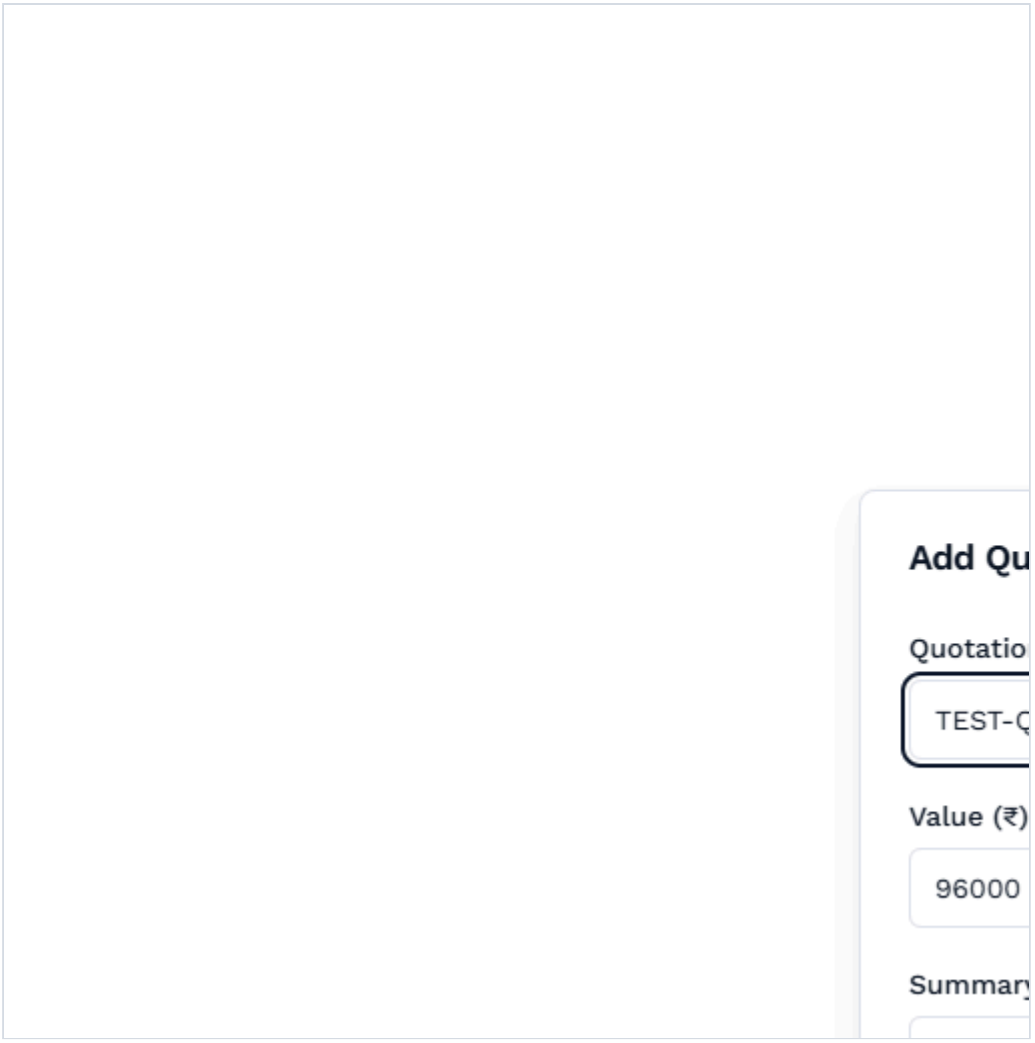

Figure 24.17 — Add Quotation

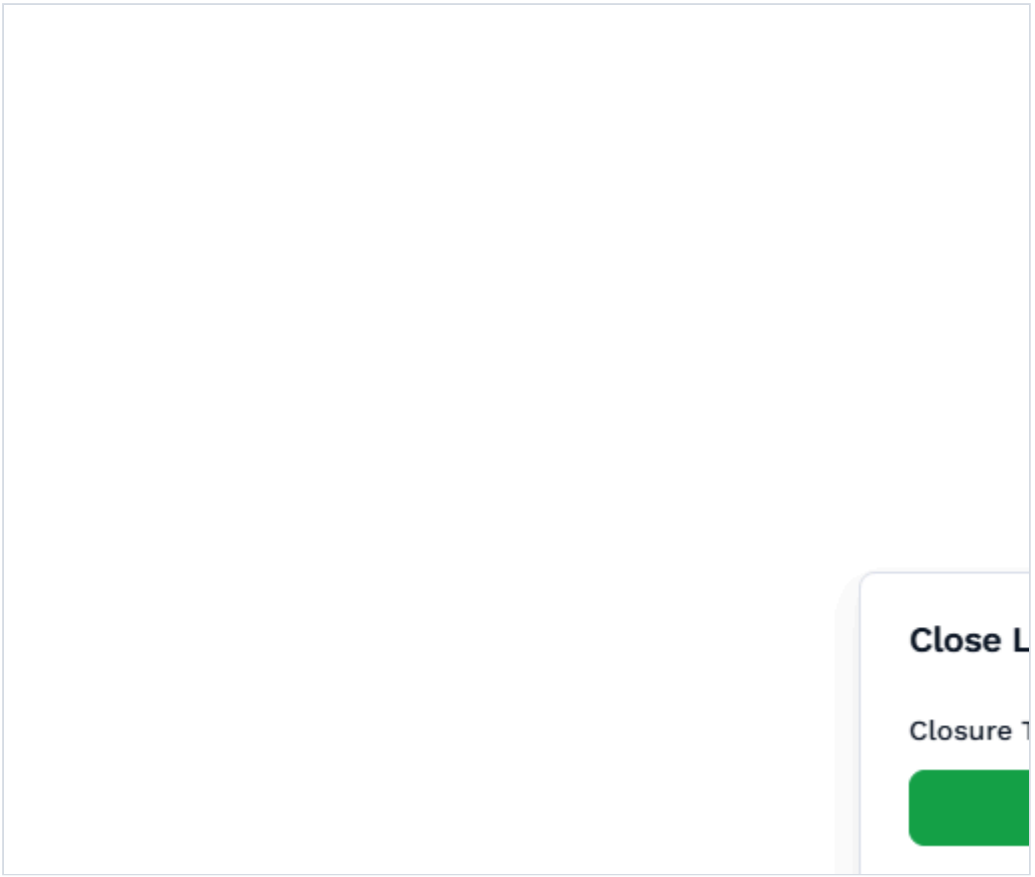

Figure 24.19 — Close Lead as Won

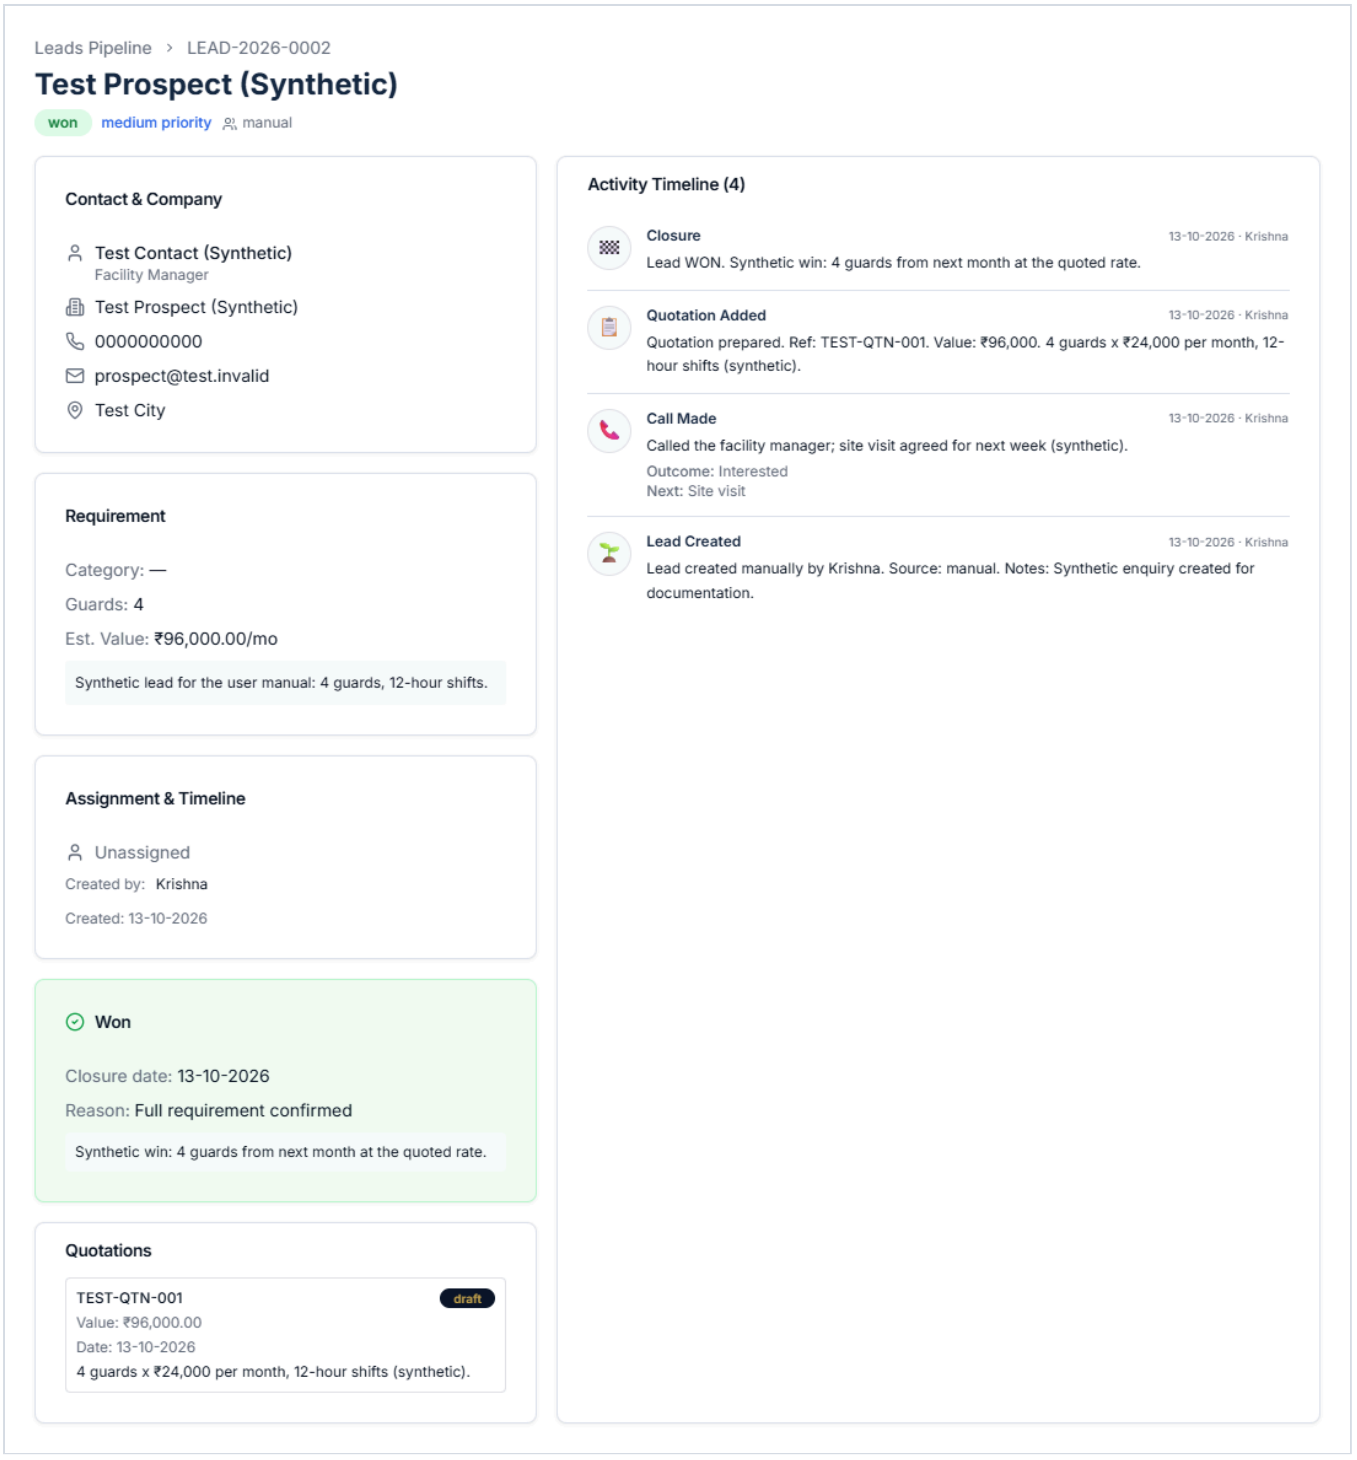

Figure 24.20 — Closed lead (Won) with reason, summary, quotation and the Activity Timeline (newest first)

Interpreting mismatches:

- **Statement of Account** shows the TDS the client withholds as a separate credit line, so "Total Received" (cash) plus TDS equals what was billed and paid off.
- **GST summary (for GSTR-1)** is a summary workbook. Prepare the portal return from it; don't upload it directly.
- The **Dashboard's** "(by billing month)" cards count receipts against invoices of that billing month, not money received in that month. Use the Cash Book for cash dates.
- **Drafts** never appear in summaries, the Statement, Aging or the GST report; issue the invoice first.

25. Corrections, cancellations, reversals and reprocessing

Situation	What to do	Who
Paysheet still Draft or Rejected	Edit and resubmit	Creator
Paysheet approved but wrong	**Cancel Paysheet** (reason ≥ 10 characters), then **Re-create Paysheet** (new draft, rows copied)	Super Admin
Paysheet has an issued invoice	Tick "Also cancel linked invoice"	Super Admin
Invoice Draft	Edit	Accountant +
Invoice issued, no receipts	**Cancel Bill** (reason ≥ 10 characters), then **Re-create Invoice** → edit the new draft → Mark as Sent	Super Admin
Invoice has receipts	**Reverse each receipt** (chapter 21), then Cancel Bill and Re-create	Super Admin
Wrong receipt	**Reverse Receipt** (reason ≥ 10 characters), then record the correct receipt	Super Admin
Expense wrong	Only drafts are editable; approved expenses cannot be reversed	—

Worked example: cancel and re-create an invoice

1. Open the invoice → **Cancel Bill**. Confirm stays disabled until the reason has 10 characters (Figure 25.1).
2. Enter the reason → **Confirm Cancel** (Figure 25.2). The status becomes **cancelled**, ledger entries for the invoice are reversed and follow-ups are closed (Figure 25.3).
3. Click **Re-create Invoice**. A new draft opens with the same lines (Figure 25.4).
4. Correct it if needed → **Save & Mark as Sent**. A new number is issued (Figure 25.5).

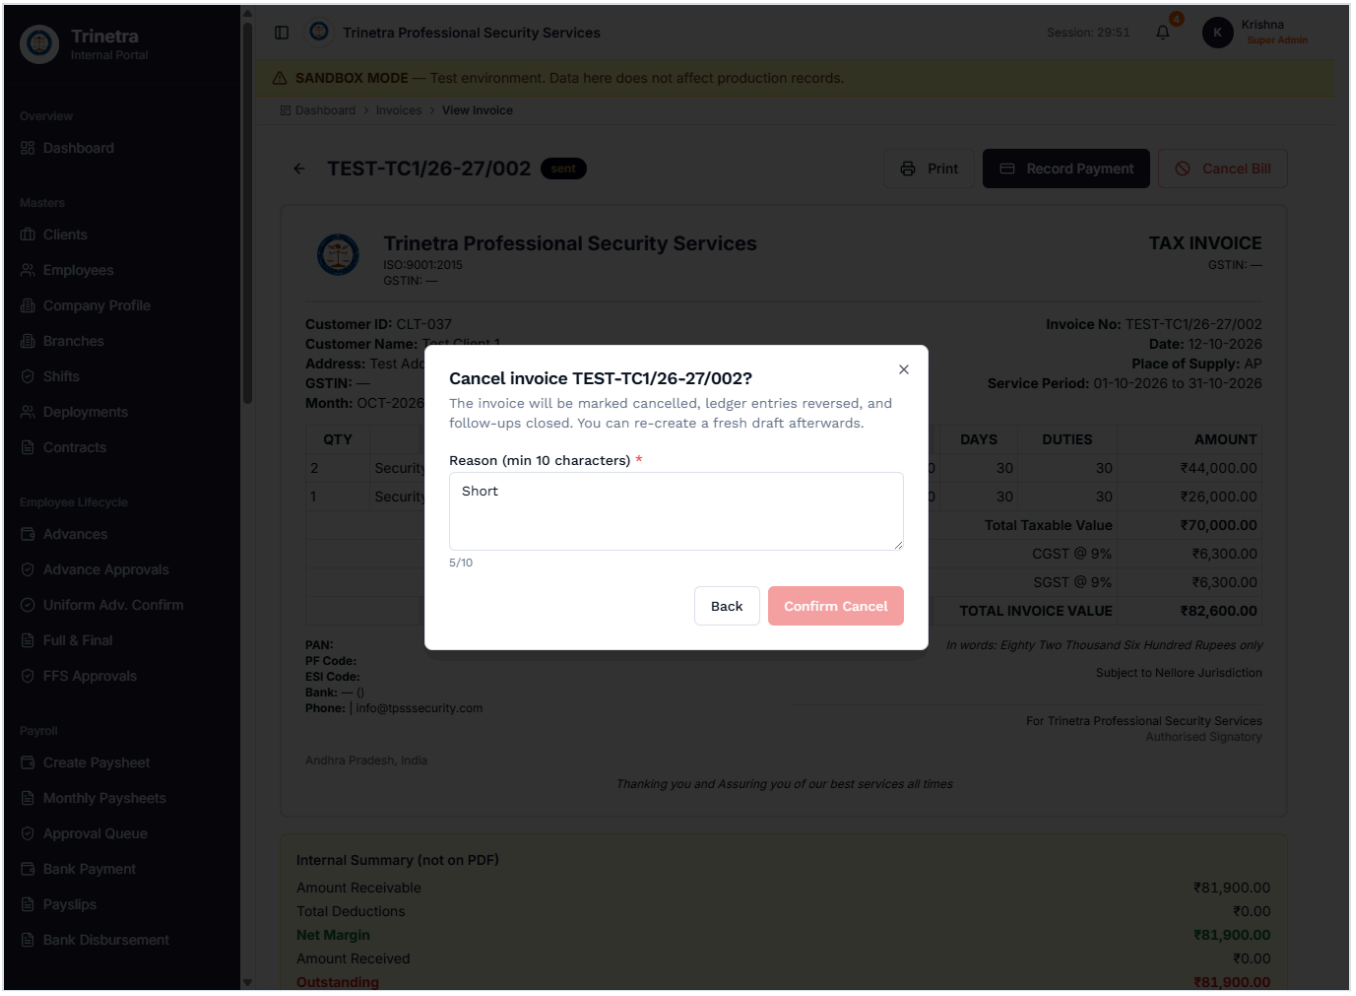

Figure 25.1 — Reason too short

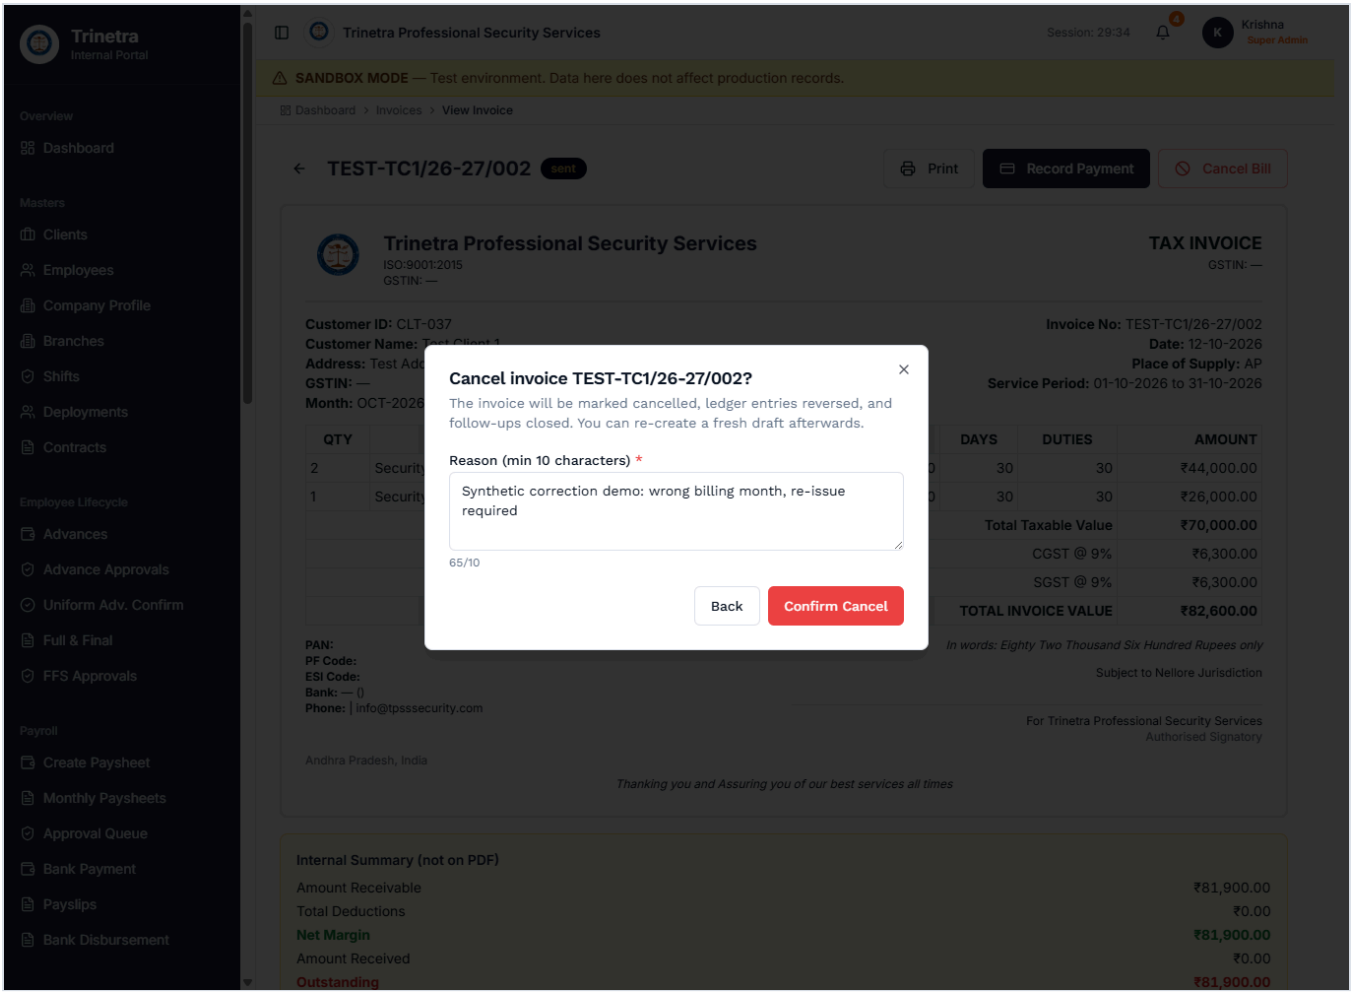

Figure 25.2 — Ready to cancel

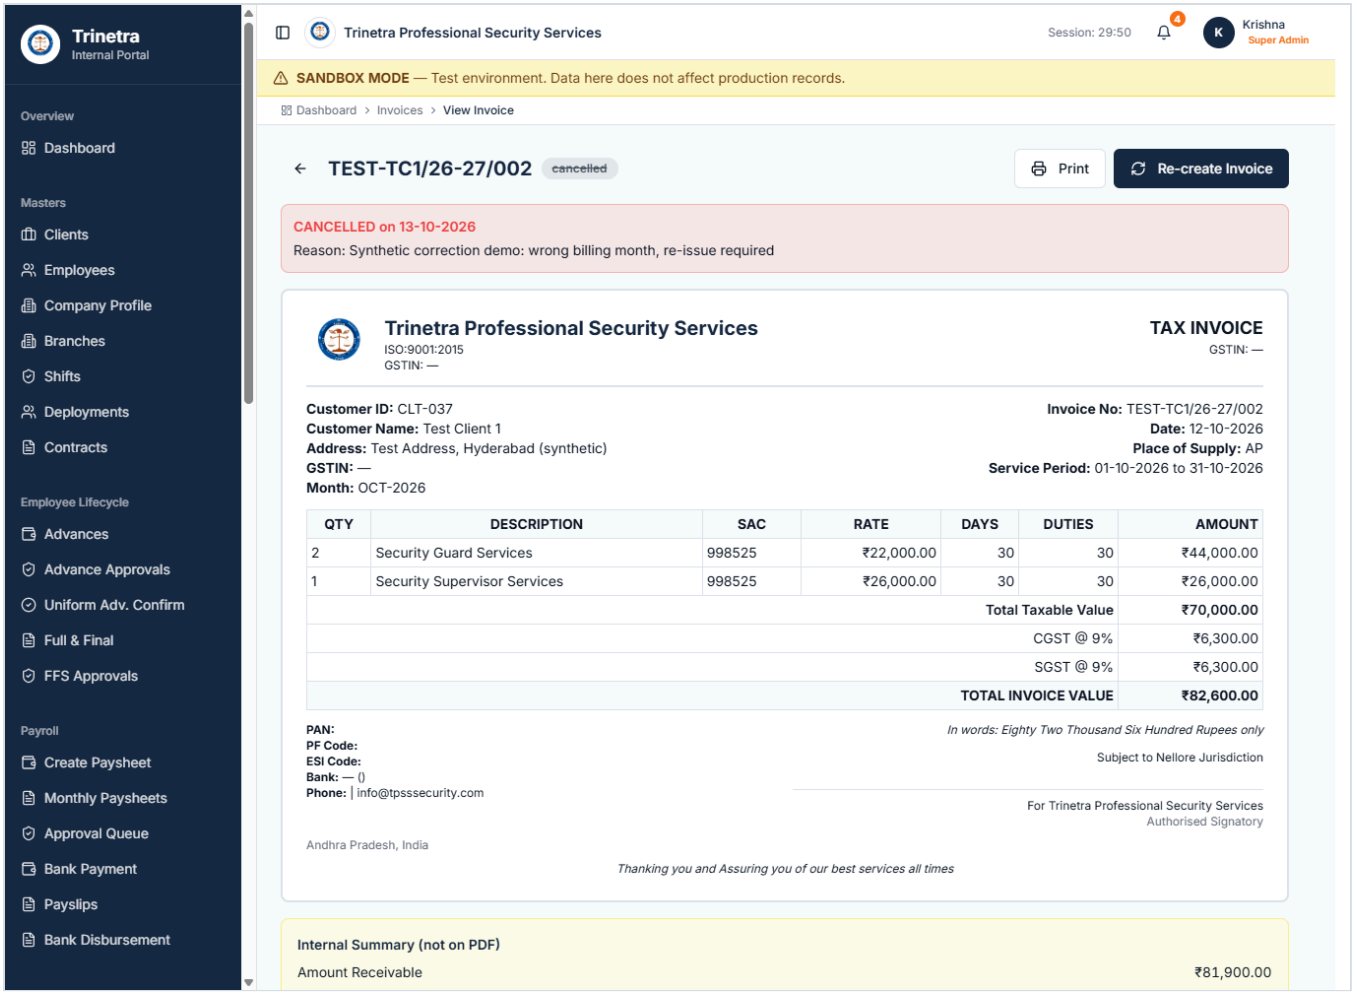

Figure 25.3 — Cancelled invoice with Re-create button

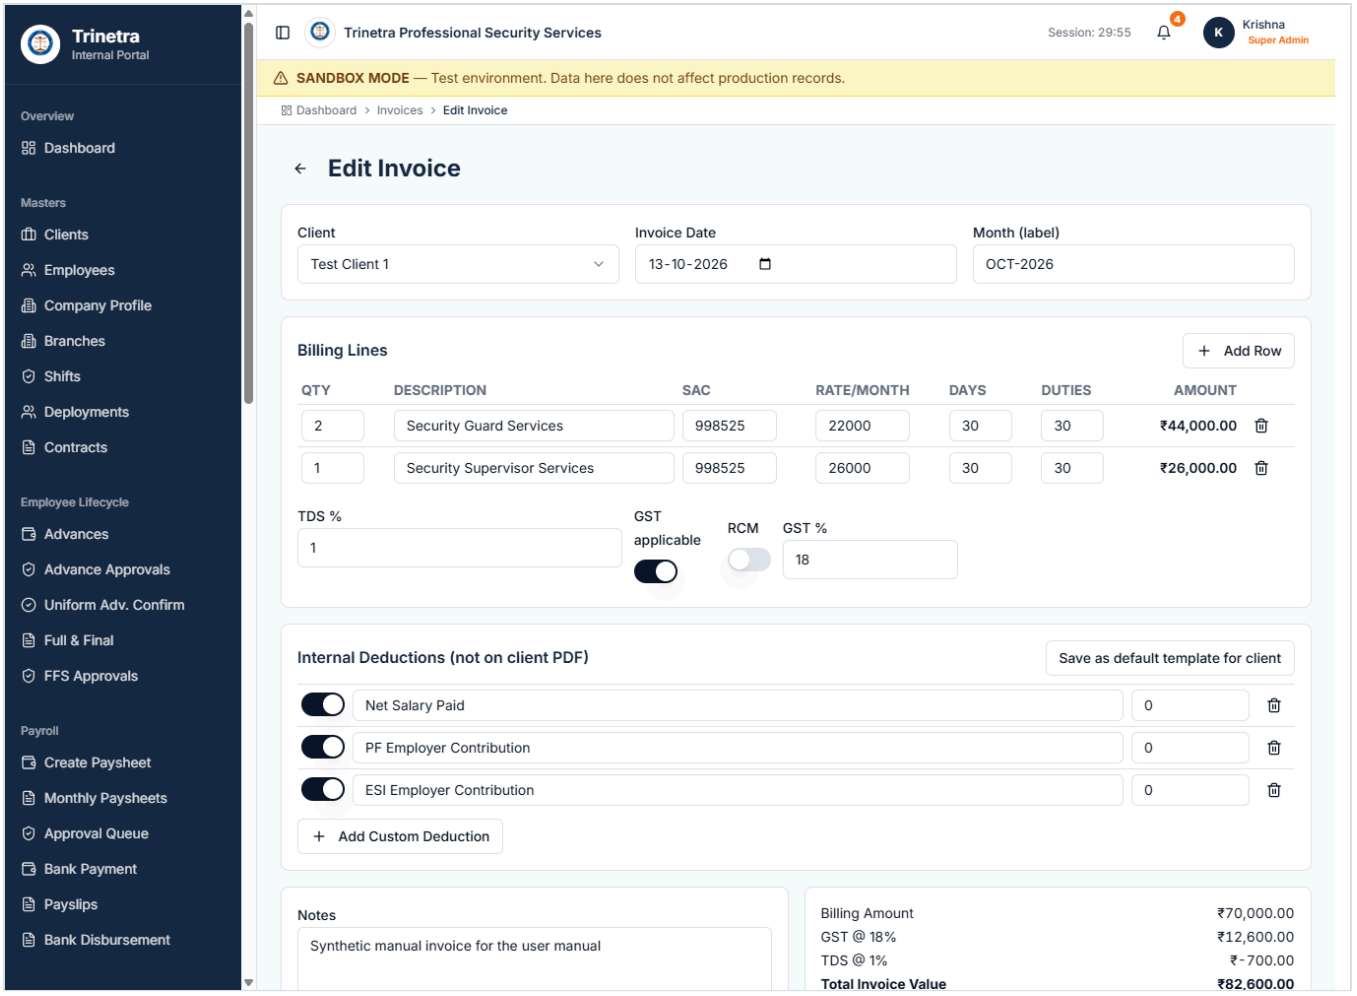

Figure 25.4 — Re-created draft

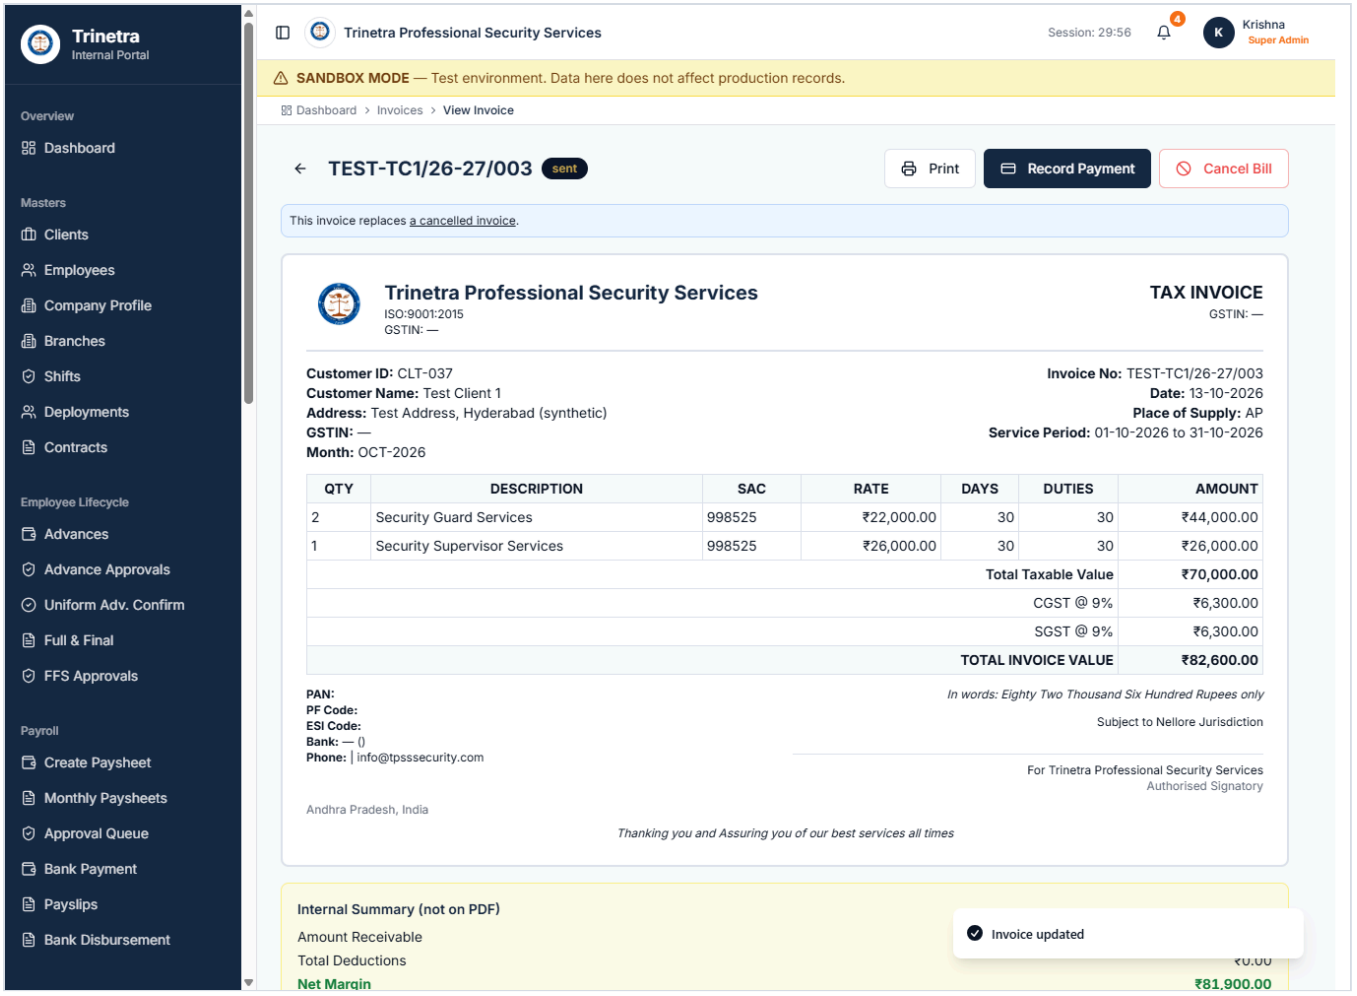

Figure 25.5 — Replacement invoice TEST-TC1/26-27/003 sent

Paysheet cancellation blocked

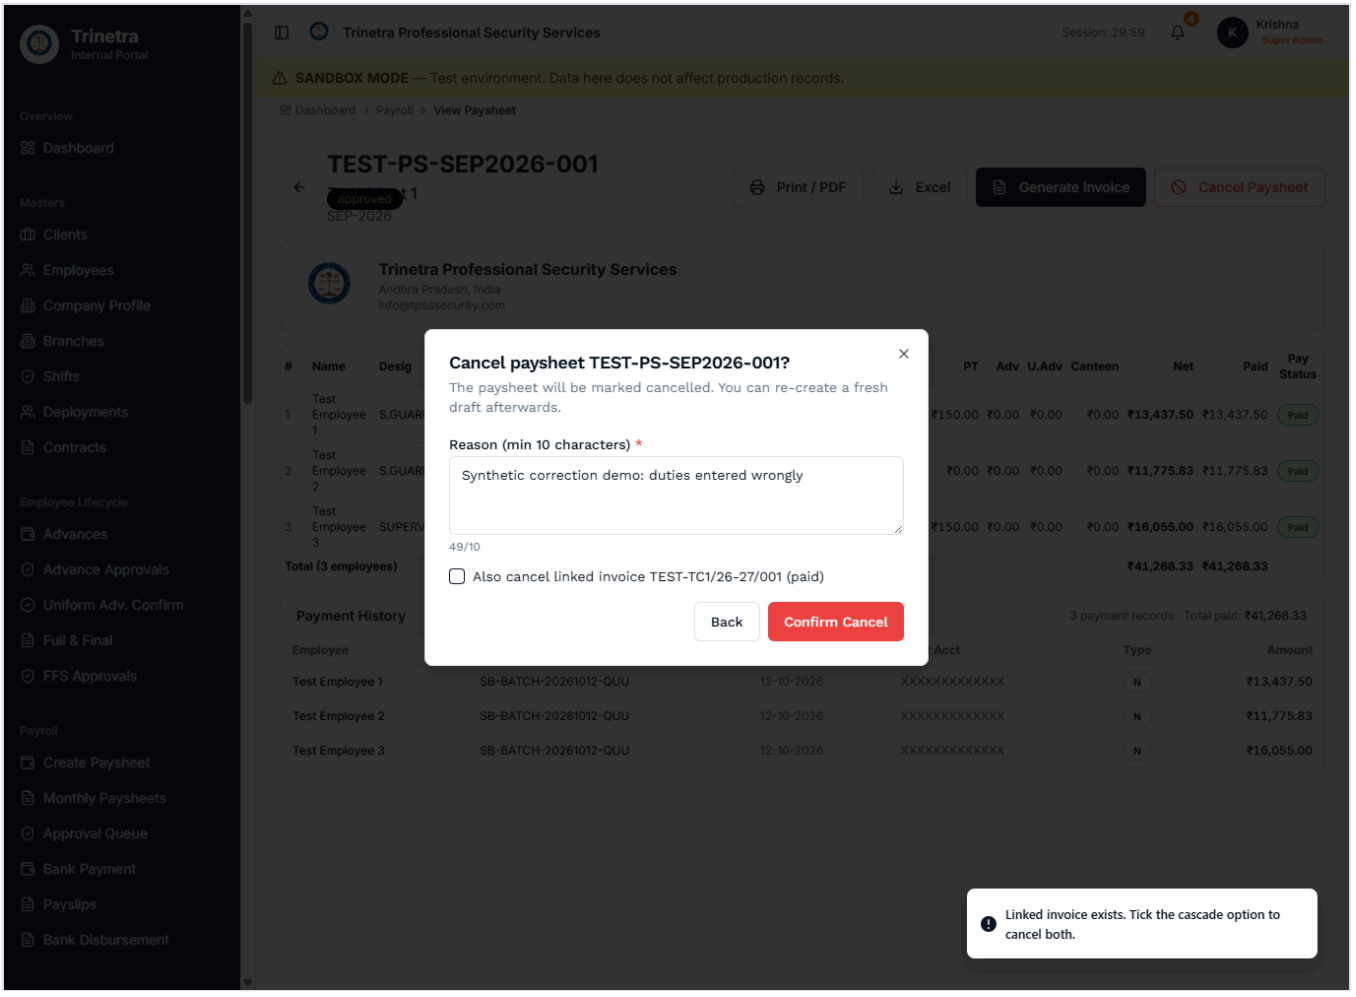

Figure 25.6 — "Linked invoice exists. Tick the cascade option to cancel both."

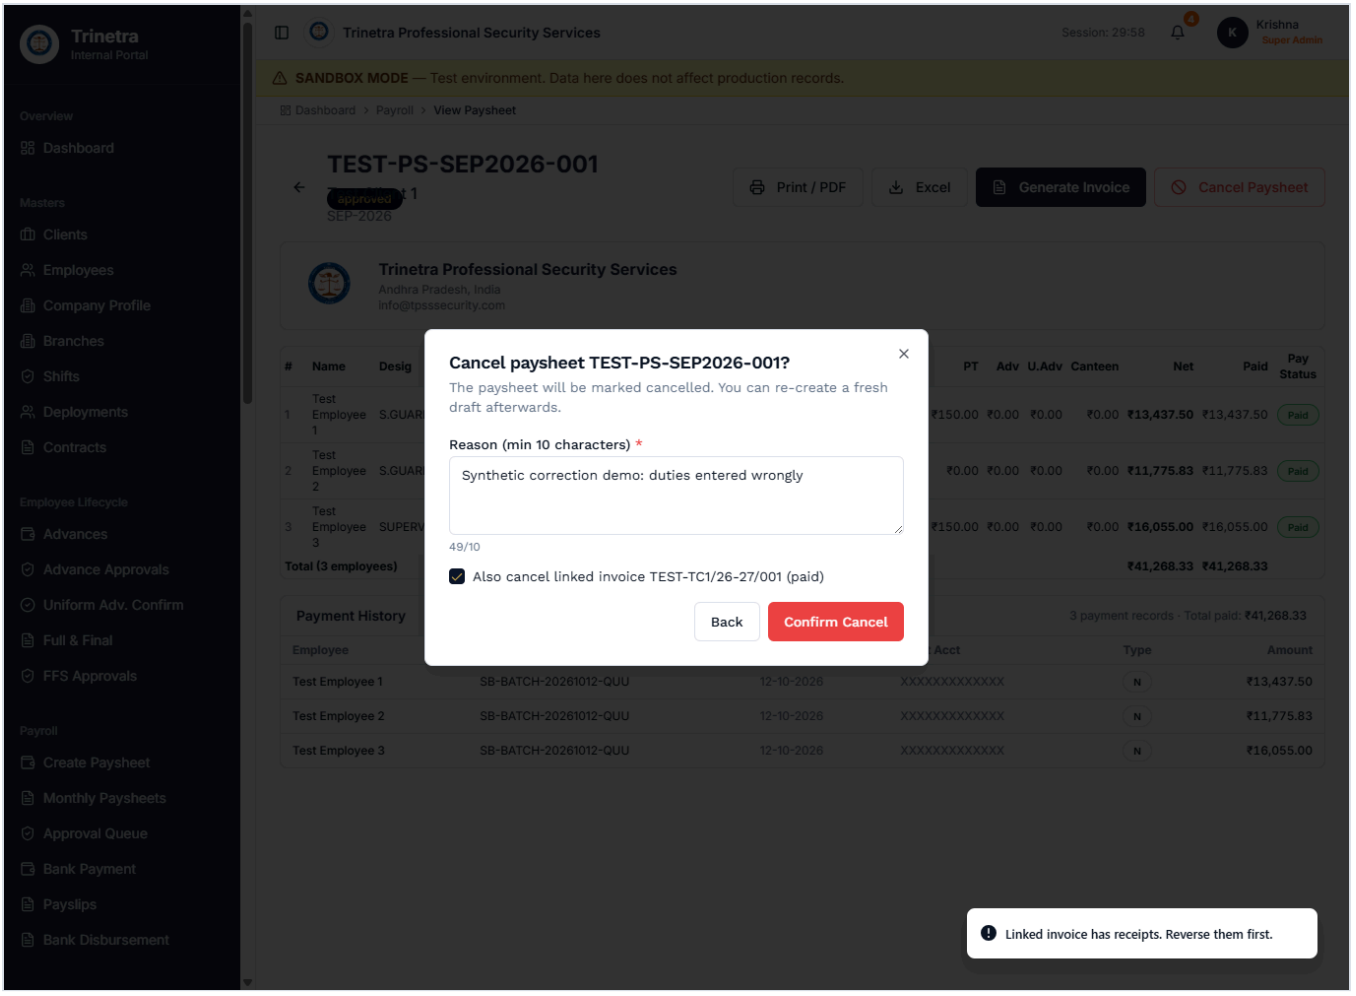

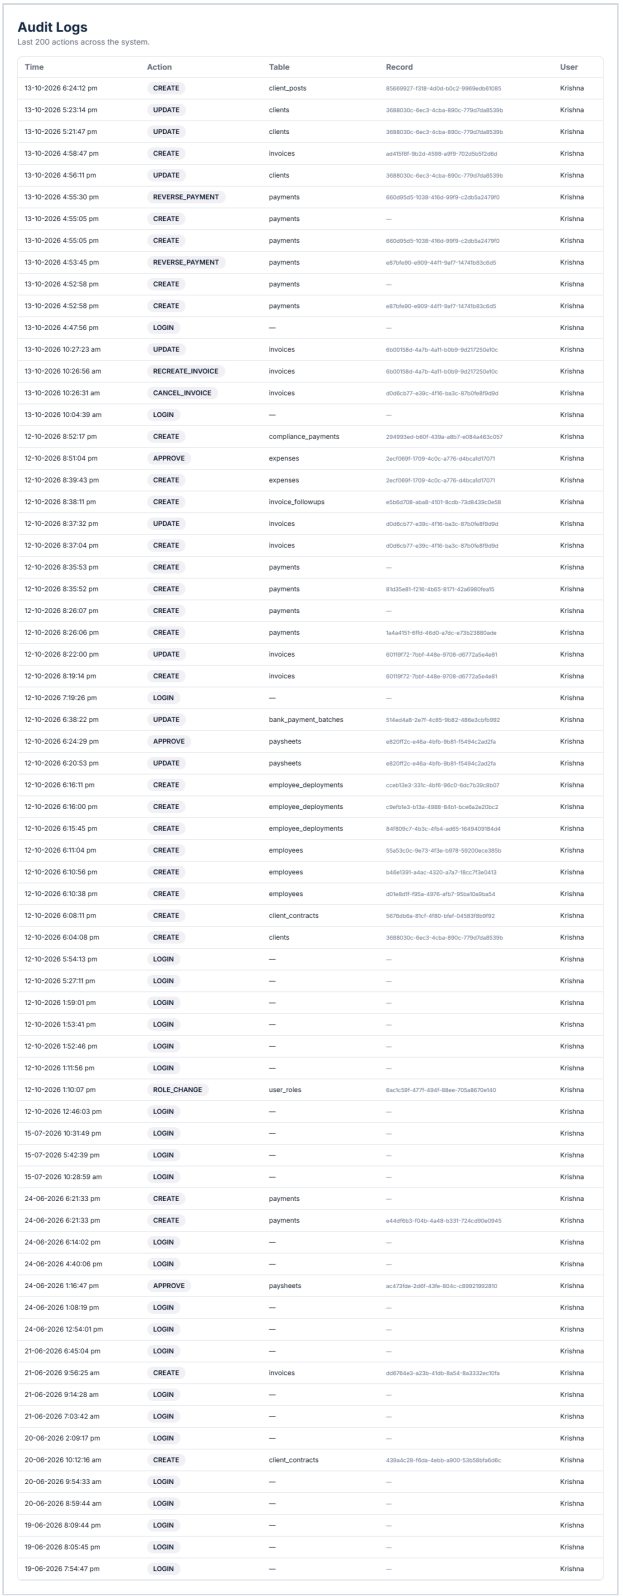

Figure 25.7 — "Linked invoice has receipts. Reverse them first." Reverse the receipts (chapter 21), then retry.

26. Audit trail and record history

- **Administration › Audit Logs** (Super Admin; Figure 26.1): sign-ins, creates, updates, approvals, cancellations, role changes and exports, with time, table, record and user. Users appear by name; records appear as IDs. Receipt reversals appear as REVERSE_PAYMENT.
- **Administration › Activity Log** (Super Admin; Figure 26.2): sign-ins, sign-outs, failed sign-ins and exports, filtered by user, type, dates and IP.
- **Administration › Backups** (Figure 26.3): automatic backup on the 1st of each month. Download is available.
- Records keep *created by / approved by / cancelled by* with timestamps. A cancelled document keeps a link to its replacement.

Audit Logs

Last 200 actions across the system.

Figure 26.1 — Audit Logs

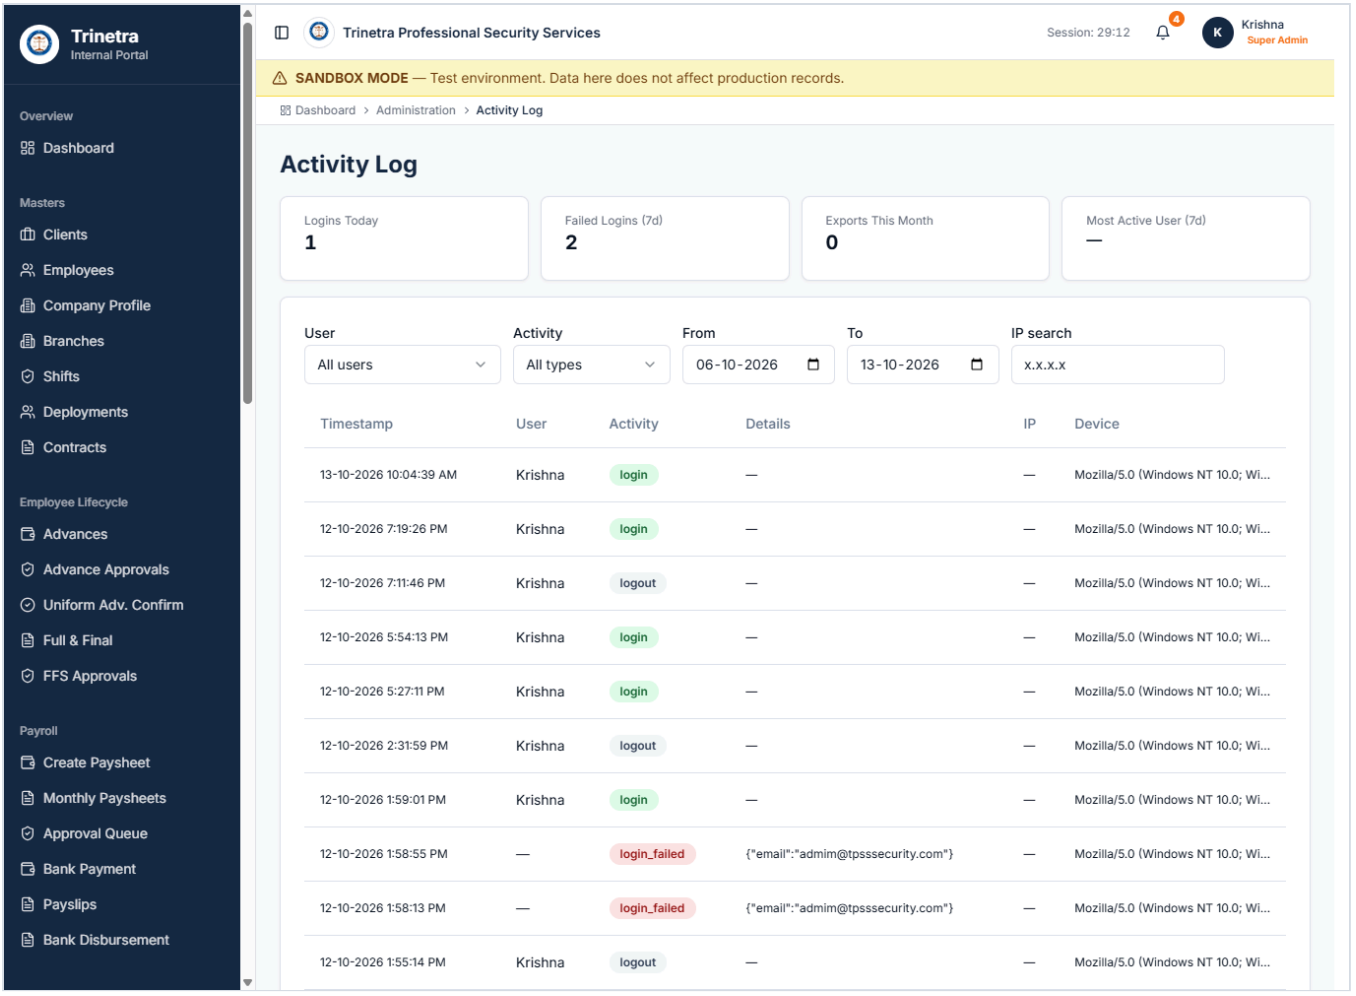

Figure 26.2 — Activity Log (IP addresses masked)

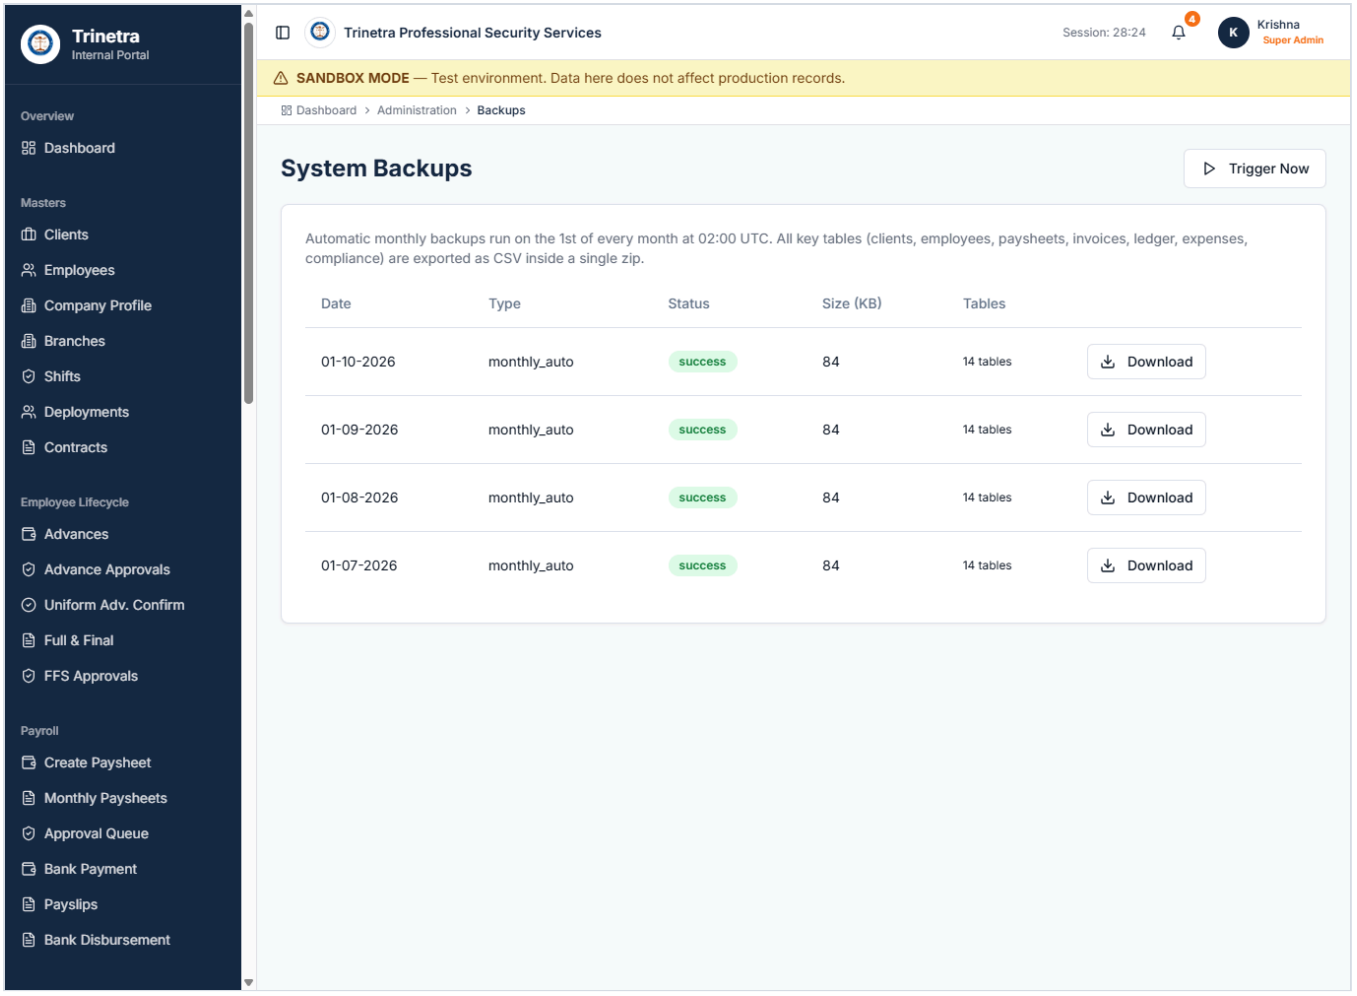

Figure 26.3 — Backups

27. Imports and exports

Export	Where	Format
Clients, Employees	Masters lists → Export	CSV
Paysheet	Paysheet view → Excel	XLSX (33 columns)
Bank payment file	Payroll › Bank Payment	XLSX
Disbursement	Payroll › Bank Disbursement	PDF + CSV
Payslips, statutory documents	Payroll / Reports	PDF (ZIP for several clients)
ECR / ESI challan	Compliance	TXT / XLSX
GST, Aging, Monthly Summary, Statement, histories, MoM, Comparative, Annual	Finance / Reports	XLSX and / or PDF
Compliance payments, Expenses	Lists → Export	XLSX

Imports: none in the application. Duty or paysheet upload is a placeholder.

28. Troubleshooting and common errors

Message / symptom	Cause	Fix
Taken to the sign-in page when returning to a tab	Your session was ended (timeout, deactivation)	Sign in again
"A user with the email … already exists"	Email in use	Use another email
"Client name is required" on client save	Client name empty	Enter a name
"UAN must be exactly 12 digits"	Format	12 digits
"IFSC must be 11 characters…" (TPSS Bank Accounts)	Wrong IFSC format	Use `AAAA0XXXXXX`, e.g. SBIN0001234
"Reversal reason must be at least 10 characters"	Short reason	Write more
"Select a client first" / "Client required"	Missing selection	Choose the client
Red blocker on paysheet	Missing UAN / ESI number	Fix the employee master
"Cannot approve your own submission"	Segregation of duties	Another approver
"Reason must be 10–200 characters"	Short reject reason	Write more
"Cannot exceed outstanding amount"	Receipt larger than balance	Check the amount
Bank Payment shows no month	No approved paysheet	Approve first
Bank Disbursement shows no month	Invoice not issued	Mark the invoice as Sent
ECR shows 0 paysheets	Paysheet not approved for that month	Approve; choose the right month
"Linked invoice has receipts. Reverse them first."	Invoice paid	Super Admin reverses the receipts (chapter 21), then retries
Generate PDF greyed out	Client / month not chosen	Choose both
Expense list empty	Wrong Year / Month filter	Change the filter

29. Frequently asked questions

Can I change PF / ESI / PT rates? No. They are built into the application (chapter 17.2).

Why does the invoice show CGST + SGST for an out-of-state client? Set the client's **GST Type** to IGST (chapter 11). New invoices then print IGST.

Why is my October dashboard "Received" zero although money came in? The cards are "(by billing month)": they group by invoice billing month. Use the Cash Book for money received by date.

Why doesn't my new invoice show on the dashboard or Statement? It is still a draft. Mark it as Sent.

Can I email invoices? Not in the current version. Print or save as PDF.

How do I move a guard to another client? Relieve the deployment, then create a new one (chapter 15).

Can I undo an approval? Paysheets: Super Admin can cancel and re-create. Receipts: Super Admin can reverse them. Expenses: no.

30. Glossary

Term	Meaning
Paysheet	Monthly payroll sheet for one client
Duties	Days worked in the month
Earned wages	Pay for duties worked (excluding uniform allowance)
Final net	Take-home after statutory and other deductions
EPF / EE / ER	Provident Fund / employee share / employer share
ESI	Employees' State Insurance
PT	Professional Tax
TDS	Tax deducted at source by the client on invoices
RCM	GST reverse charge: the client pays GST, so none is charged on the invoice
Receivable	Invoice total minus TDS: what the client pays
Net margin	Receivable minus internal costs (salaries, employer PF / ESI)
ECR	Electronic Challan-cum-Return for EPFO
FFS	Full & Final settlement
Sandbox	Training environment

31. Role-permission matrix

See chapter 9 and `ROLE_PERMISSION_MATRIX.md` (menu visibility, screen permissions and server-enforced actions per role).

32. Field reference appendix

Field tables appear in chapters 8 (users), 11 (clients), 13 (contracts), 14 (employees), 15 (deployments), 18.3 (compliance payments), 19 (bank payment), 20 (invoices), 21 (receipts and follow-ups) and 22 (expenses, advances, FFS). Mandatory fields were confirmed in the application.

33. Status and workflow appendix

Record	Statuses and transitions
Paysheet	Draft → Submitted → Approved / Rejected (→ Draft); any → Cancelled (Super Admin)
Invoice	Draft → Sent → Partially paid → Paid; Sent / Partially paid → Overdue (nightly); a receipt reversal moves it back (Paid → Partially paid / Sent / Overdue); → Cancelled (Super Admin, once no receipts remain)
Receipt	Recorded → Reversed (Super Admin, reason required)
Client site	Active ↔ Inactive
Paysheet employee payment	Unpaid → Partial → Paid (via Bank Payment)
Expense	Draft → Approved
Advance	Pending → Active → Fully recovered; Rejected; Cancelled
FFS	Draft → Submitted → Approved / Paid
Contract	Active → Renewed / Expired / Terminated
Follow-up	Open → In progress → Promised → Closed
Compliance task	Pending → In progress → Completed; Overdue
Uniform advance confirmation	Pending → Confirmed
CRM lead	New → Contacted → Qualified → Site visit planned → Proposal pending → Quotation submitted → Negotiation → On hold → Won / Lost / Closed
Employee	Active → Relieved / Absconded

34. Known limitations

- No attendance or roster, duty import, general vouchers, month-end lock, invoice email, or user-to-branch / client access restriction.
- No manpower requirement per site; invoice quantities are typed (the paysheet headcount is shown as a guide).
- Statutory rates and rules are built in, as decided by the owner. Verify the ECR / ESI files before upload (chapter 18.2).
- Issued invoices are not posted to the ledger (it is a cash book).
- Receipts cannot be edited (reverse and re-enter); approved expenses cannot be reversed. Details and severity: `DOCUMENTATION_FINDINGS.md`.

35. Support and escalation information

Issue	Contact
Sign-in, roles, new users	Super Admin
Payroll / statutory rules	CEO / COO, then your statutory consultant
Wrong figures or errors not listed in chapter 28	Super Admin. Note the screen, the record number, the exact message and the time
Application defects	Development team. Reference the finding ID in `DOCUMENTATION_FINDINGS.md` if listed

End of manual.
